It's Only Natural That You Would Handle BISHOPRIC STUCCO BOARD

Because almost everything else you carry is for the home—and Bishopric Stucco Board is the ideal material for stucco homes.

Architects are recommending Stucco in place of brick and wood, and specifying *Bishopric* Stucco Board because of its durability and economy.

Bishopric Stucco Board saves at least 50% of the time and cost, as compared with sheathing lumber, building paper, furring strips and metal laths—when used as a background for stucco outside or plaster inside.

Let us show you how you can make money by handling the Bishopric Line. Write us. 529AB.

Stanley Tools

Stanley Adjustable Spoke Shave No. 151

This new and improved Spoke Shave has a Lever Gap fastening the cutter in such a manner as to bring an even pressure on the cutting edge.

The important feature is that the cutter can be quickly adjusted both endwise and sidewise by means of the adjusting screws which engage the slots near the end.

The Cutter is made from a high grade of steel, well tempered and sharpened ready for use.

The handles are japanned and through each a hole is made to enable the owner to hang the tool up out of the way.

10 in. long, 2⅛ in. Cutter.

New Regulations for Freight Shipments

Canadian Freight Association Will Not Accept Goods After November 1 Unless They Are Properly Directed—New Rules Are Aimed to Reduce Losses of Retailers and Many Annoying Delays

NEW regulations which will be put into effect on November 1 by the Canadian Freight Association will affect all shippers, particularly manufacturers, the wholesalers and all retailers. The new regulations are aimed to reduce to a minimum losses of goods and delays in delivery directly traceable to carelessness in marking and addressing. Officials of the Canadian Freight Association stated to HARDWARE AND METAL that it was remarkable the number of parcels they receive which are not addressed at all.

Take It For Granted

"Some of the very worst offenders are the big wholesale houses," said a freight official. "They may have a dozen parcels or crates for one man whose store is perhaps a thousand miles away. They seem to work on the theory that because one parcel or crate is addressed and the others piled with it, that all will travel together to their destination. Every little while we have shipments of this kind. They get scattered, of course. Then the parcels that are addressed are forwarded while those without any addresses have to be held. There is a lot of time lost in finding out who shipped them and then in re-directing them properly. The new regulations are in the interests of the shippers themselves and the retailers, and will save the transportation companies endless trouble."

Just Mark Initials

Another railwayman stated to HARDWARE AND METAL that hundreds of parcels and crates are received daily marked with nothing but the initials of the consignee, and the town or city in which he lives. This often leads to delay and confusion, especially at the present time when help is scarce and many untrained men are handling the goods. In future every piece for shipment must be fully and properly addressed or it will not be accepted.

The New Regulations

A copy of the latest regulations as given to HARDWARE AND METAL reads as follows:

The attention of all concerned is directed to the following rules regarding marking and addressing of freight, framed for the purpose of minimizing so far as possible, loss or miscarriage of the property.

1. Freight, when delivered to carriers to be transported at less than carloads, or any quantity ratings, must be marked in accordance with the following requirements and specifications, except as provided in Rules Nos. 7 and 8, or in the Board of Railway Commissioners for Canada Regulations, for the transportation of Explosives and other Dangerous Articles by freight.

2. (a) Each package, bundle, or loose piece of freight, except as provided for in Rules No. 7, 8 and 9, must be plainly, legibly and durably marked by brush, stencil, marking crayon (not chalk), rubber type, metal type, pasted label (see note 1), tag (see note 2), or other method which provides marks equally plain, legible and durable, showing the name (not initials) of only one consignee, and (except as provided in Rule 2 (b) of only one town or city, and Province or State to which destined.

When consigned to a place of which there are two or more of the same name in the same Province or State, the name of the County must also be shown.

Must Be Stated

When name and address of shipper is marked on freight, it must be prefixed by the word **"From."**

(b) When consigned to a place not located on the line of a carrier, each package, bundle, or loose piece required to be marked by this rule must be marked with the name of the station at which the consignee will accept delivery, in addition to the name of final destination, if routed in connection with a Water Line via which there are no joint rates in effect, the name of the station at which delivery is to be made to such Water Line must also be shown.

(c) When consigned "To Order" each package must also be marked, and further marked with an identifying symbol or number which must be shown on shipping order and bill of lading.

Note 1. Labels must be securely attached with glue or equally good adhesive.

Note 2. Tags should be used only when the nature of the freight will not readily permit the use of labels, or other suitable marking. Tags must be made of metal, leather, cloth or rope stock or sulphite fibre tag board, sufficiently strong and durable to withstand the wear and tear incident to transportation; and

When such cloth or board tag is tied to any bag, bale, bundle or piece of freight, it must be securely attached through a reinforced eyelet.

Tags used to mark wooden pieces or wooden containers must be fastened at all corners and centre, with large headed tacks or tag fasteners; or

May Use Tags

Tags may be securely tied to wooden pieces when the freight would be injured by the use of tacks or tag fasteners.

Tags tied to bags, bales, bundles or pieces must be securely attached by strong cord or wire, except that when tied to bundles or pieces of metal, they must be securely attached by strong wire or strong tarred cord.

3. The marks on bundles, packages or pieces must be compared with the shipping order or bill of lading and corrections, if necessary, made by the shipper or his representative before bill of lading is signed by Agent of the Carrier.

4. Marks on bundles, packages, or pieces must correspond with those shown on shipping order or bill of lading. For example, on a shipment to Winnipeg, the package must be marked "Winnipeg," **and not some other destination for which the goods may be ultimately intended.** If packages are intended for reshipment, a special designating mark may be used for the guidance of those attending to the reforwarding but **only the destination** given in the shipping order or bill of lading must be shown on the goods.

5. **Old consignment marks must be removed or effaced by the shipper.**

6. Freight in excess of full cars must be marked as required for less than carload freight.

Continued on page 54

RETAILERS CONSIDER CO-OPERATIVE DELIVERY

THE Retail Merchants' Association of St. John, N.B., is considering a co-operative delivery system. On invitation of the association, J. A. O'Donnell, Cleveland, Ohio, of the National Deliverymen's Association, addressed the members this week on the subject. He is an enthusiastic advocate of co-operation in deliveries, and his address was a strong argument for the introduction of the system. In order to carry out the plan he suggested, the merchants would pool their delivery plant, retain the best and dispose of the balance for the mutual benefit of those concerned. A central depot would be established, and this depot would be the centre for all delivery operations. The teams or auto-trucks would call at each store, collect the goods to be delivered, carry them to the depot, where they would be sorted, and thence delivered in a systematic fashion, similar to that by which postal matter is distributed. Mr. O'Donnell asserted that a better service could be given at a saving of from twenty-five to fifty per cent. of the cost. The association will deal with the proposal at its next meeting.

BICYCLE BUSINESS IS STEADILY EXPANDING

THE annual report of the Canada Cycle and Motor Company, Limited, Weston, Ontario, which will be presented on October 25, will say in part:

"The bicycle business has again been active throughout the year, and with our new factory and improved factory facilities we have been able to make satisfactory deliveries and secure an increasing proportion of the trade."

A company now affiliated with the Canada Cycle and Motor Co. is the Machine and Stamping Co. Control of this company was secured with a view to preparing for after-the-war business. This company will machine and stamp small metal parts not made in Canada before the war. It is understood it will soon start making a number of bicycle parts.

Bicycle chains will also be made in the Dominion in the near future, it is expected, while a comparatively recent development has been the perfection of machines for the making of spoke nipples.

STOCKS OF TURPENTINE STEADILY DECREASING

SEVENTY per cent. of the turpentine production of the United States is now in, and about sixty per cent. of the rosin production. The figures show that at the three main ports there were 102,566 barrels less of rosin September 30 than at the opening of the season, April 1. This decrease in stocks is apt to become even more noticeable as the season progresses.

Market conditions are stable, with rosins generally showing a tendency to advance, despite the existing high levels of values. Turpentine has had slight fluctuations during the week, but the market on the whole has been without any distinctive features. There are a few weeks yet of fairly large receipts of turpentine, but the time is drawing closer and closer when fresh supplies will not be worth considering, and with the next crop to be of no larger dimensions than the present one—and probably smaller—conditions will favor the holders of stocks and induce higher prices. Consumers certainly have nothing to gain by postponing meeting their winter requirements with the market regarded as almost sure to move to higher levels.

A meeting which was to have been held in Washington Wednesday to have the turpentine industry put on the "essential" list has been postponed.

CUTTING OUT CREDIT IN LINSEED OIL BUSINESS

THE linseed oil manufacturers of the United States are the latest firms to fall in line with the "Put Your Business on a Cash Basis" idea. They have accepted the recommendations of the National Association of Credit Men, and important changes will go into effect on November 1. For shipments of carloads sight drafts will be made attached to documents, with no discount, and for less than carloads which are not remitted for on receipt of shipping advices, trade acceptances will be issued due thirty days from date of invoice, with interest at 6 per cent. and no discount. In doing this the American firms are profiting by the experience of Canadian firms who have been doing business on terms of thirty days net for some time.

RESTRICTING IMPORTS OF MANY VARNISH GUMS

CANADIAN firms will be affected by a ruling of the American War Trade Board just made by which the importation into the United States of varnish gums (Kauri, Copal, Damar, Zanzibar, Manila, Congo, Fentiansk, Bengurlla, Sandarao, and East India or Borneo gum) is restricted as to shipments made after October 10, 1918. All outstanding licenses have been revoked as to ocean shipment after that date and no new licenses will be issued except to cover the following: (1) Shipments made from abroad on or before Oct. 10, 1918; (2) shipments for the use of the United States Government; (3) shipments from Mexico or Canada by other than ocean transportation; (4) shipments from Europe or Mediterranean Africa when coming as return cargo from convenient ports where loading can be done without delay; (5) shipments of Copal or Manila gum when shipped from the Philippine Islands, and (6) shipments of Kauri gum not to exceed a total of 3,000,000 pounds during the calendar year 1918.

Licenses for the amounts of varnish gums permitted to come forward, pursuant to the fore-

going, will be allocated by the Bureau of Imports of the War Trade Board in accordance with the recommendations, as to distribution and price, of the War Industries Board. Varnish gums are accordingly added to the list of commodities excluded from the terms of license PBF 27.

TURNING HUN GUNS ON THE KAISER'S SOLDIERS

ANOTHER important step in turning the Huns' own guns upon himself was taken this week by A. Mitchell Palmer, Alien Property Custodian of the United States, when he took over the Bridgeport Projectile Co. of Bridgeport, Connecticut. By his investigation he bared the efforts of Count von Bernstorff, Dr. Albert, Dr. Dernburg, Capt. von Papen, and other German propagandists to use the Bridgeport Projectile Co. to prevent the manufacture and shipment of arms and munitions to the allies.

Germany planned to have this corporation buy up all the available supplies of powder, antimony, hydraulic presses, and other supplies and materials essential to the manufacture of munitions. The plan also involved the negotiation of contracts with the allied Governments to supply them with materials of war, apparently in good faith, but in reality with no intention of fulfilling them.

It was found that the company had made a contract with German agents not to sell any munitions to any country with which Germany was at war, and that the company contracted for the entire output of powder of the Aetna Explosives Co. (Inc.) of January 1, 1916, for which approximately $5,000,000 was expended. It was also found that the company had contracted to manufacture for Germany 2,000,000 shrapnel cases, the obvious purpose of which was to furnish a plausible excuse for its purchase of powder, presses, etc.

From now on the plant will likely be operated to produce supplies for the allies.

FIFTY PER CENT. CUT IN OUTPUT OF OIL STOVES

ADDITIONAL curtailments in the manufacture of articles not essential to the prosecution of the war are announced by the United States War Industries Board as a part of the general program for the conservation of material, labor, transportation and capital. During the six months' period from October 1, the manufacture of electric heating appliances, oil stoves and sewing machines will be curtailed to fifty per cent. of six months' production during 1917, watches and watch cases to seventy per cent., and metal stamps and stencils, rubber stamps, metal tags or badges to seventy-five per cent. No roadmaking machinery can be manufactured except for the Government railroads, public utilities or municipalities and counties. The manufacture of all light and fancy harness or saddlery is prohibited, but production of heavy saddlery and harness used by the United States and its allies, or in agriculture and industrial work, will not be curtailed.

ALLEGED DOPESTERS ARE IN THE TOILS.

STATING it had reason to believe they are practicing misleading advertising, the United States Federal Trade Commission has issued formal complaint against the following paint and oil concerns of Cleveland:

Consolidated Oil Company, and Nathan Weisenberg and A. Bernstein, co-partners trading under the firm name and styles of: Standard Linseed Co.; Manchurian Linseed Co.; Standard Paint & Lead Works; Southern States Turpentine Co.; Eastland Linseed Co.

The complaint alleges that the concerns—the Consolidated Oil Company, being controlled by Weisenberg and Bernstein—have sold products adulterated with low-grade mineral oil and other ingredients under the misrepresentation that they were composed of "second-run" turpentine and Manchurian and Japan seeds and gums, with the purpose and effect of deceiving the trade and the public into believing the products are pure and unadulterated.

The complaint also alleges that stationery is used bearing cuts of an extensive plant with buildings marked "laboratory" and "cooperage," whereas "in fact and truth" the concerns do not own or operate any such large plant as is pictured.

The concerns were cited to appear before the commission in Washington, November 14.

STEEL PRODUCTS CO. TO DISTRIBUTE PIG TIN

CANADIAN firms who have to depend on the United States for supplies of tin will be affected by the latest ruling of the American War Board. Under the recent decision of the Board to take control of the domestic pig tin situation by a license system the United States Steel Products Co. only is granted import licenses, this company to act under Government direction and in the interest of consumers.

All users and dealers in pig tin will be licensed, and will secure their future requirements of pig tin from the United States Steel Products Co., which will make distribution under the direction of the War Industries Board.

The Inter-Allied Tin Executive, who will carry out the terms and agreements of the Inter-Allied Pig Tin Pool recently arranged in London, will control the buying price in each producing market. The War Industries Board will control the prices and terms under which the pig tin is to be sold to the domestic users and dealers.

Preliminary to the issuance of licenses to the users and dealers an inventory of stocks on hand and contracts unfilled by the two thousand odd individuals and plants affected is being made. If necessary, there will be a redistribution of the stocks on hand to equalize them according to essential uses.

Cutting Costs By Standardizing

Importance of Eliminating Many Unnecessary Lines Shown by Leading Manufacturers at Annual Meeting of the Canadian Wholesale Hardware Association— J. W. Dowling is President For Third Term

THE vital importance of standardizing many lines of hardware goods, conservation, and economy, and a broad discussion along particularly helpful lines to the trade, were features of the annual meeting of the Canadian Wholesale Hardware Association held in Montreal. There was a large representation of the members, especially from Eastern Canada, and full advantage was taken of the big gathering to make a thorough survey of the present unique conditions affecting the trade.

A tribute to the good work of J. W. Dowling, of Caverhill, Learmont & Co., was paid when he was re-elected as president of the association for a third term. C. A. Whitwam of the Hobbs Hardware Co., of London was re-elected as vice-president.

Warmly Welcomed

President Dowling extended a warm welcome to the delegates and referred to conditions. The year had been one of the most trying in the history of the trade he said especially from the standpoint of securing supplies.

A general discussion took place in regard to standardization. The remarks of many of the manufacturers who explained fully why they had followed the course they did were listened to with the keenest interest. Some of the speakers explained why it had been necessary for them to eliminate as high as fifty per cent. of some lines.

Economy in Steel

F. H. Whitten, general manager of the Steel Company of Canada, discussed standardization and economy in the use of steel, emphasizing the value of standardizing. One of the immediate and important advantages he pointed out is that raw material would be available for the manufacture of lines really essential. From the standpoint of the jobber and the merchant too money would go farther, not being tied up in a variety of slow-selling lines many of which they could get along without. In the third place, because of the smaller stocks that all would be carrying, the manufacturer would have more material to go ahead with in making ready for repeat business on the standardized lines.

Reducing Costs Too

He also pointed out that the standardizing of steel goods would result in producing more reasonably the goods that were in demand and of standard pattern. With production increased, the unit cost would be much less, and the price depends on the production attained. It was desirable for the manufacturer, the jobber and the retail dealer that the manufacturing costs in Canada should be reduced to the minimum. Greater production all around would accomplish this.

What Has Been Done

As an instance of what conservation can do, the scale makers of the United States have eliminated 68% of the styles. In the first instance 60% reduction was made and a further effort raised this to 68%. The trade is still being supplied with all essential scales and this went to prove that concerted action was effectual in the present period of stress and generally abnormal conditions. It may, he thought, work much permanent good.

The stove makers have attained a real advantage in eliminating styles and finish on many stoves. By so doing the trade has been well taken care of and dealers have had a fair suply forthcoming all season. The same applied to makers of bedsteads and various other lines.

The Buyer Helpful

It was pointed out to HARDWARE AND METAL in this connection that the user of various steel goods had been a help in that he was willing to take what he could get, if the size or style wanted could not be furnished. For instance, in some cases where steel or iron bars were wanted a reasonable customer would take a 6 inch by ¾ inch size in place of 6 inch by ½. This was quite a help in the long run.

Developed Rapidly

The steel trade of Canada has made immense strides. So much so that this industry in Canada has been able to show a growth in the last ten years greater than that of any country in the world—population considered. The advances made were simply wonderful, and the future would be governed in so far as this industry was concerned, by the ability of Canada to absorb the supply.

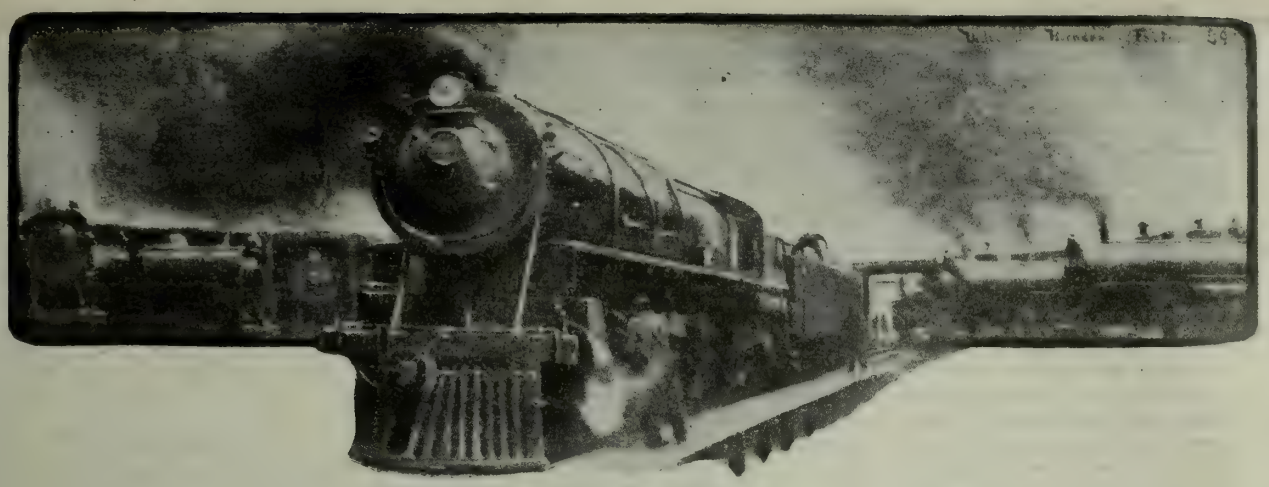
Another reason for the slower development of steel industry in Canada was that it was a comparatively new venture for this country, generally.

Word as to Prices

In a second address by Mr. Whitten, given at a luncheon tendered the association at the Windsor Hotel. the matter of prices was discussed. It developed that Canada is paying less, in a general way, for many of her steel needs than is being paid in other countries. The buyer is paying less, the speaker pointed out, than the prices asked in foreign markets, in some instances very much less.

This annual meeting was considered one of the most interesting and helpful gatherings in the association's history, and a really better "get-together" spirit was manifest throughout than ever before. "We ought to have more of them" said President Dowling to HARDWARE AND METAL.

New War Ruling On Copper Ore Imports



The ruling of the American War Trade Board affecting the importation of copper ore has been so far modified by a new ruling as to permit the importation of copper concentrates containing 50 per cent. or over of copper from non-enemy countries instead of 60 per cent. or over, as in the former ruling. The previous restriction prohibiting the importation of ore, except from Cuba, Canada, or Mexico, and of copper concentrates containing less than 50 per cent. of copper, except from the above countries, remains in force. There is no restriction upon the importation from any non-enemy country of copper matte, blister copper, or copper concentrates containing 50 per cent. or more of copper.

Silica Deposits Are Found Near Sydney

Extensive deposits of the material known as Silica-S10, used in lining boilers, and for other purposes such as asbestos is used, have been discovered in Cape Breton, N. S., near the town of Sydney, and a company has been formed by British and Canadian interests to promote its development. Buildings are being erected and three railway spurs laid to connect the mines with the railways, and it is expected to have operations under way before winter sets in. This deposit is the first located in Canada, existing supplies coming from various parts of the United States. The chief value of the material lies in its heat resisting qualities, it being able to stand a degree of heat under which asbestos crumbles.

IMPORT RESTRICTIONS ON GRINDSTONES MODIFIED

The restriction upon the importation of grindstones (item 121 of List of Restricted Imports No. 2) has been modified by the War Trade Board in a new ruling (W.T.B.R. 256) to permit the importation of grindstones from Europe and Mediterranean Africa when coming as a return cargo from said countries, when shipped from convenient ports and when loading can be done without delay, an official U. S. bulletin states.

Better Business at the Border

Retail Merchants' Association Has Been Going "Over the Top" Ever Since its Inception and is Putting Up Winning Fight by Close Co-operation of Nearly Five Hundred Members

PROBABLY the huskiest youngster of its kind in the Canadian business world to-day is the Border Cities Retail Merchants' Association. It will be nine months old in November, but it has more to show in the way of real achievement than many retail organizations that are old enough to vote. The Border Cities Association has more than 420 members and is growing rapidly. It is young and it is enthusiastic, right from C. H. Smith, the eight cylinder president, down to the most recent recruit. Doing things, especially the things that make for better business, is one of the main objects of the organization. The bigger the problem, the better. In its short existence the association has tackled many propositions that were just as hard to handle from a business standpoint as the Hindenburg line was for the Allies. Co-operation was the secret of the Allies' success and it is by co-operation that the Border Cities Retail Merchants Association is reducing salient after salient in the battles of business.

How It Started

The association had its inception one stormy day last February when C. H. Smith asked A. W. Peddie to come over to his office for a little while to talk over some business matters. Both Mr. Smith and Mr. Peddie conduct large dry goods stores. While business rivals they are the best of friends. During their talk over business problems the idea of forming the retail association came up. Neither Mr. Smith nor Mr. Peddie will take the credit for suggesting the formation of the organization. They are both modest. At any rate they got busy. They discussed the matter with other merchants. It was so popular that they were encouraged to include the municipalities adjoining Windsor, all of which will be united into one large city some day soon. The plan was so good that it was no time before it was decided to call a meeting for organization, and merchants from Windsor, Ford, Ojibway, Walkerville and Sandwich gathered. There were more than 200 of them and they formally organized upder the name of the Border Cities Retail Merchants' Association.

A Busy Existence

The association has been a real factor in the commercial life of the border ever since its inception. It is interested not alone in merchantile problems, which are much more numerous at the border than might be supposed, owing to the proximity of Detroit just across the river with a population nearing the million mark, and aggressive merchants, but also in civic and industrial problems. These all have more or less bearing upon the retail life of the border municipalities and the merchants are doing their share in solving them. New problems are continually cropping up and as fast as they come committees are named to deal with them. Getting action, and quick action, is a feature of the work of the Border Cities Association. Nothing goes to sleep and with more than 400 live wire merchants focusing their attention on any problem that is necessary, things are bound to happen.

Features of Organization

In addition to the work it is doing there are many features of the organization itself that make it worthy of emulation in every community in Canada. The "Get Together" spirit is apparent in everything the association undertakes. It is not a one man organization. Every member has a chance to have a say on every question that comes up.

The constitution and by-laws were given special attention, and are probably unique among the business organizations of Canada. There is a sliding scale of membership fees, so that the merchant who only has one clerk does not pay as much as the merchant who has twenty or more. The by-laws state specifically that in the election of officers, each municipality must be represented. This is carried out to the letter, and with excellent results. A careful perusal of the constitution and by-laws of the association given elsewhere in this article are well worth while and there are many ideas in them which may be incorporated with advantage by various organizations into their own constitutions.

To Help All

The object of the association is to promote merchandizing and retail conditions for the betterment of the members, and to obtain improved service for customers, to discuss the problems of the members and of fellow retailers, to secure and give such help as is possible through co-operation and to work together for anything that will better conditions in the border cities.

This is a pretty broad basis upon which to work, and because it lives up to its creed is one of the reasons why the association is accomplishing so much and always has so much to do.

Right from the start the members of the organization realized that they had a lot of problems, many of them big ones, on their hands. However, solving problems is one of the real joys in life to border city merchants. Their proximity to Detroit provides them with any number of business puzzles. They have learned by experience that the only way to meet these difficulties is to meet them face to face.

Were Not Daunted

They were therefore not one bit alarmed by the magnitude of some of the problems that presented themselves, and

were crying for immediate solution. One of the things that was worrying the border cities' merchants most was the competition from Detroit. At a conservative estimate residents of the border cities were spending $1,500,000 annually in Detroit stores. The farmers of Essex County were spending probably $2,000,000 a year across the river. Incidentally it might be mentioned that no farmers in Canada are more prosperous than these Essex county men. They raise tobacco, early vegetables, fruit and other commodities for which there is an unlimited market, and top prices. As a result they have unlimited money to spend, and they certainly spend it. The border city merchants did not like to see such a large percentage of the money that should be theirs going into the coffers of Detroit merchants. This was a problem that affected all five of the border cities, but Windsor especially.

How They Met It

One of the big troubles was that the only daily newspaper in Windsor, "The Record," carried page after page of Detroit advertising. "The Record" had a wide circulation in the county and the merchants realised that they would have to offset this and offset it quickly if they were to obtain results. Through the efforts of Harry J. Neale, and of H. McClure Scandlers, secretary of the Border Cities Chamber of Commerce, who cooperated with the retailers, W. B. Hermann, of the "Saskatoon Star" was induced to come to Windsor. At first it was planned for Mr. Hermann to start a new paper in opposition to "The Record" and the retail merchants were prepared to stand behind the project and guarantee advertising contracts to the value of $65,000 for the first six months. Later it was deemed advisable for Mr. Hermann to buy the "Windsor Record" which was secured for $150,000.

Improved the Paper

With the home paper under their control the merchants took two important steps. They insisted that only Canadian retail advertising be handled and also that a real newspaper be gotten out. This meant increasing the size of the paper, enlarging the editorial staff and securing a special wire service. All these things have been done. The "Border Cities Star," the successor of the "Windsor Record," carries no Detroit advertising. It is much larger than the "Record" and by its special wire service provides border readers with the latest happenings from all over the world.

Doing all this within a few months was no small task for a young organization. But it has been successfully accomplished and now that they have the Detroit advertising eliminated, the border cities merchants are prosecuting with all the energy at hand an educational campaign. This is county wide and is aimed to show the residents of the border cities and the farmers all through Essex County that it is their duty to spend their money at home and support Canadian and particularly border cities stores and institutions. The merchants' association is going about this educational campaign in a most systematic manner, and hopes in time to reduce the $3,500,000 that is going to Detroit annually to an insignificant amount. There is every indication that their efforts will be successful because the people now that they are alive to what they have been doing and to the work the association is doing are responding. Although it is too early yet to show material results, there is no doubt that the elimination of the Detroit advertising has resulted in thousands of dollars remaining in Canada that would otherwise have gone across the line.

Keeping At It

The committees working on the problem are continually devising new ways of impressing people, especially during war times, with the need of buying at home. The committee is extending its work through the women's organizations, through the press and through all the various patriotic and fraternal organizations. The movement is growing stronger every day. Hundreds of women, for instance, who formerly were lured across to the big stores of Detroit by visions of bargains, especially in dress goods, are now buying at home.

CLARENCE H. SMITH
The hustling president of the Border Cities Retail Association.

One of the novel means of illustrating the power of buying at home is the travelling $5 bill This is just an ordinary $5 bill which was started in circulation by A. B. Peddie. It is in a case and in the case also is a book and everyone who receives the bill is required to write down the date. The bill is in constant circulation, and to date has demonstrated that if spent in Windsor it would alone have a purchasing power each year of $2,100. In the first two months in which it was in circulation the $5 had changed hands so often that it had bought $390 worth of goods.

In order to impress on people the inportance of buying at home, stories are constantly appearing in the border cities' newspaper about the travelling $5 bill.

The bill is a good advertisement also for the association. On the back of the case in which it travels is the following:

Instructions

"This is a travelling $5 bill. It will be started on its purchasing way by our secretary, T. C. Ray. When you get it go out and spend it or pay a bill with it, but be sure that the retail merchant with whom you deal is either a member already of our Border Cities Retail Merchants' Association, or becomes one. When the bill reaches you sign your name with the date and the nature of your business, on the attached sheet, and also call up A. B. Peddie, phone 496, who is to keep track of this bill. Watch its progress and its purchasing. We hope to teach the people the advantages of trading at home. Information regarding fees of our association will be given to possible new members by T. C. Ray. phone 95, or by A. B. Peddie.

Reach the Farmers

Realizing that it is essential, if their campaign is to succeed, that they reach the farmers of the country, the association is constantly directing its guns at them through the press and by other means. The merchants have found an effective means of conducting their campaign in the fall fairs held recently. They were able at these gatherings to come in close personal contact with thousands of farmers and by means of personal appeals and special literature made good use of their opportunity to emphasize the duty, patriotic and economic, of buying at home. The results are already telling in increased sales in the border cities stores, and less money going over the river.

Some Other Problems

So much for one of the biggest problems which the young association tackled at the start and is fighting successfully. Another matter almost as important and perhaps just as far reaching was the question of collections. The border cities merchants owing to their location are placed in a peculiar position. Few cities in Canada have such

a large transient population as is continually going and coming at the border. Some of these people stay in Windsor for a few days or a month or even longer, but they make purchases and they do not always pay. Many of these people may be in Windsor to-day and in Detroit or some American city to-morrow. Most of them are good pay, but there is a percentage of them who were, to put it mildly, "delinquents." Before the association was formed, merchants of the border cities had a good many thousands of dollars out which they were anxious to collect. Much of this was in really small amounts and they were so busy with other business that they neglected going after it.

Has Done Great Work

If the association had done nothing else its existence has been justified by the work it has done in collecting the money due to its members. This work is handled under the direction of Thomas W. Ray, the efficient secretary of the association. Mr. Ray does not believe in any trifling or half way measures in anything he undertakes. His work in connection with the Border Cities Association speaks for itself, and it is a record of which he may well be proud. The collection end of the game is only one of the many things that he has undertaken, but it is a fair sample of the manner in which he sees things through. The main point is that Mr. Ray gets results in the collection system he has devised, and that these results are in nine cases out of ten in the very satisfying form of perfectly good little cheques which are negotiable at any bank. Mr. Ray has some ideas of his own in regard to the distribution of these cheques which show that Field Marshal Foch is not the only strategist in the world. For instance, he wants the members to realize that they can make the credit collection department of the association one of its most useful branches. He also wants every member if possible to attend every meeting, because there is so much good discussion every minute that any member who is not there is a real loser. He figured it out that one sure way of getting busy men to meetings is to give them some money. Every meeting night the secretary has a big bunch of cheques to hand out, the proceeds of his industry in collection work. The members who gave him accounts to collect do not know when they are going to hear from him. In a general way he announced before the meetings that he will have a lot of money to hand out and every merchant who is interested wants to be there and get his.

Makes Full Report

At the meetings Secretary Ray generally has a lot of comments to make on the progress he is making on his collections, or suggestions to the members. There is a lot of food for earnest thought in what he has to say, and the merchants appreciate it. He always urges them to make the fullest use of the Collection Department, and they are doing it. This year alone, at the rate he is going, Secretary Ray will collect more than $20,000 for the merchants. When it is considered that probably 95 per cent. of this had been written off by the merchants as a dead loss, and that many of the accounts were outlawed, some idea of the work the secretary is doing may be gained. In order to get the cheques that are coming to them, the merchants must attend the meetings. This is an iron rule with Mr. Ray. If the merchants will not come, he will not give them the money, no matter how much he has for them.

At Small Cost

All that it costs the merchants to have their collections made is ten per cent. of the amount. The secretary is continually devising ways and means of expanding his department. He uses collection letters. He uses persuasion, and he has infinite patience. But there are cases in which patience and persuasion fail. The secretary has encountered

THOMAS RAY
Secretary of the Border Cities Retail Association.

a few of these. With his usual resourcefulness he is meeting them and meeting them effectively.

"I want more power," he told the members at their last meeting. "It is useless for me to tell some of these people that I am going to take action to collect if I do not mean it. It makes a joke out of me and of the association if the weeks drag by and nothing happens, when I told them action would be taken."

There were something over 200 members at the meeting when secretary Ray made the above statement. In a few minutes his difficulty was surmounted. They backed him up to the limit and told him to go as far as he liked, as the entire organization was behind him. What is more they appointed Crown Attorney Rodd, one of the biggest and best known lawyers in Essex County as the solicitor of the association, with full power to take any action he and the secretary might deem advisable.

Will Be Far Reaching

"You have no idea just how much this will mean," said Secretary Ray. "It will show not only the delinquents but the whole public that this association means business. With an organization of more than 400 members behind us we have a power that is far reaching, and many of these people who might think we were bluffing will be more than pleased to pay up when they see that the matter will be carried into court if necessary. They will tell one another and the example will be good, and it will go a long way toward ending undesirable credits."

Another little plan the secretary is working on to aid the border cities merchants in their collections is to have all cartage agents and others who come in close touch with people who are moving telephone to him at once when anyone is making a change. It has often happened that people in Windsor who owed money quietly slipped over the river to Detroit or some other town and left the Windsor merchants in the lurch. In order to meet this situation the secretary is busy with plans by which he will secure almost instantly the name of any persons who are leaving the city, and also the destination of their goods. If they do not owe anybody any money all will be well, but in case they happen to owe half a dozen members of the association he will be able to pounce upon them and make them settle up before they can get away.

Got Them Together

Here is another little incident which shows the good work the Border Cities Retail Merchants' Association is doing. Not long ago two grocers in a certain section of Windsor fell out and started a cut rate war. The merchants got so enraged at one another that they would not speak. In order to get back at one another they cut and slashed prices mercilessly. The thing became the talk of the city. Citizens were getting goods at prices they never dreamed of before, and at which other firms could not compete. Things were going from bad to worse, and each of the grocers was suffering keenly but in a spirit of stubborn defiance would not stop.

Just here the retail association got busy. It required some manoeuvring and no little strategy to do it, but a committee from the association got the two hostile grocers together unexpectedly in another store, and had a heart to heart talk to them. They pointed out that the cut rate war was senseless, unnecessary and was draining the very life blood out of two good retail firms.

"You two chaps are simply dissipating your profits and are slowly bleeding to death," said one member of the committee to the two belligerents. "Be honest now, aren't you?"

The grocers admitted it and one went

Steel Situation Likely to Ease Up

American War Board Issues New Regulations Simplifying Procedure For Obtaining Export Licenses—Gigantic Production Will Also Help Relieve the Shortage—Outlook for the Future Brighter

AS PREDICTED in last week's issue of HARDWARE AND METAL changes which will make it easier to secure steel, especially for those engaged in war work have been put into effect by the American Government. The United States War Industries Board has issued new regulations simplifying greatly the procedure for obtaining export licenses and industrial priority permits especially with respect to iron and steel shipments to foreign destinations. Canada as the nearest outside point to the United States will be the first to benefit. While scores of Canadian firms are extremely short of many materials just now, the new regulations which became effective on Monday last are expected to help the general situation a great deal.

Committee Reports

At a meeting held in Toronto on Wednesday a report was made by the delegation of Ontario iron and steel men which recently conferred with the Dominion War Trade Board with reference to the acute condition of the industry owing to certain embargoes placed by the United States, which are affecting the output of war contracts.

The report which was presented by Major Lawrence L. Anthes was adopted. It was decided that it is advisable for manufacturers to co-operate closely with the Dominion War Trade Board and a committee was formed which will take up matters of importance to the trade as soon as possible. Those on the committee include: Major L. L. Anthes of Toronto, A. Hatch of Hamilton, H. Biggar of Hamilton, C. G. McGhie of St. Catharines, J. N. Shanston of Toronto, Arthur White of London, J. C. Notman of St. Catharines, H. J. Waddie of Hamilton, P. McMichael of Toronto, W. H. Shapley of Toronto, H. W. Fleury of Aurora, R. Harmer of Hamilton, W. W. Clare of Preston, A. R. Page of Hamilton, and W. E. Skelton of Hamilton.

Situation Serious

In his report Major Anthes explained that in view of the further embargoes of basic metallic materials, and the restrictions of Canadian priorities by the United States Government, and the inability of the Canadian producers of raw materials to meet the demands, the users of these materials were becoming alarmed lest they should be compelled to cease operations and be left with idle plants on their hands. The Major stated that Vice-Chairman Jones of the Dominion War Trade Board represented to the deputation that everything possible was being done by the board to put into blast again a number of furnaces in Ontario that have been out of commission for some considerable time.

Will Start Soon

They were informed that the furnace at Midland will resume operations some time this month, and that the furnace at Parry Sound is being overhauled and the docks there being put into shape, with every indication that iron will be turned out there early next spring. Steps have also been taken to have the furnace at Port Arthur put into commission again, it being held up for the time being owing to the fact that the U. S. Government had refused to supply coal for coke purposes.

As coking coal by-products are greatly essential in the manufacture of explosives, this restriction having been placed by the United States, the United States War Trade Board claim they cannot consistently supply coal to Canadian ovens to be manufactured into coke. The matter was stated to be still under consideration with Washington. Outside of Ontario one company has erected a new stack.

Relief Expected

Major Anthes said Vice-Chairman Jones expressed the opinion that the Dominion War Trade Board believed Canadian manufacturers would obtain relief from the new sources of supply before long.

It was pointed out, however, that the country's normal requirements of 1,000,000 tons of iron and steel per annum had been increased to 2,000,000 tons per annum. Regarding steel scrap exportation this had been prohibited, with the result that a very large tonnage had accumulated in Canada. The country had been scoured for cast scrap and this had been used by foundrymen to such a large extent on account of their inability to secure pig iron that there was very little scrap left in Canada.

Against This Plan

Reference was made to the effect of awarding cost plus contracts to Canadian plants by the United States, and the view was expressed that this, if continued, would tend towards the utter demoralization of Canadian industrial conditions and ultimately unfit Canadian manufacturers to meet the keen competition that will confront them after the war. The reason that the United States had placed so many shell contracts in Canada was because Canadian manufacturers of shells have made a great success of the business, whereas manufacturers in the United States had not, in some instances, reached the same standard set up by Canadian manufacturers.

Must Get Material

It was stated that the contracts emanating from the United States for shell orders did not affect the situation because the contracts had been accepted by Canadian manufacturers only on condition that the United States supply the materials which went into them.

Considerable discussion took place on the question of standardization, several manufacturers holding that many concerns attempted too great a variety of products. It was shown that the advantage of such standardization would tend to reduce the stocks and enable manufacturers to concentrate on fewer sizes, reduce the cost of production and overhead charges.

Out of Sheets

In Toronto many of the warehouses are completely out of sheets. The War Board continues to cut close on the orders that it allows to pass for filling. Last week several forging plants applied for plate for ovens in the heat treating process. The first orders were returned, Ottawa wanting to know if the plates were for repair or new work. Apparently the War Board would release material for repairing a plant now operating, while it would hesitate to give out material for new extensions.

In many parts of Ontario and Quebec the output of several large firms and many smaller ones has been greatly reduced by epidemics of Spanish influenza among employees.

More Big Business

The machine tool trade is waiting now to see if the big business that has been held up at Washington for some days is going to be released. There are a number of conferences going on at present. Undoubtedly the war news has something to do with the volume of business that the dealers are willing to prepare for. Opinion seems to be pretty well divided on war contracts, some of the trade believing that they should play the thing safe now, while others are certain that the call for munitions is not going to fall off for some time yet. It is expected that it may be several days before any definite announcement is secured on this particular point. On the outcome will depend to a considerable degree the volume of business that will be passing next year. It will not make much difference on present operations, as they are all under contract.

Cast Steel Shells

Several Canadian firms with good

foundry practice and equipment are considering the matter of cast shells, and a large amount of these are likely to be called for.

Reports from across the line indicate gigantic production. This it is felt will help in speedily filling all war requirements and in diverting supplies that are badly needed in other lines. Many Canadian firms hope to receive supplies before long.

Make New Records

In pig iron and steel ingot production new American records have just been established. In fact, the entire industry has just begun to attain the desired momentum on war activities for which plans have been maturing for months. With a most satisfactory and united effort, blast furnace interests in September produced a daily average of 113,765 tons of pig iron, the highest average on record. But as it was a 30-day month, the total tonnage output did not quite reach that of October, 1916, which is the record. The September output was 3,412,955 tons a considerable gain over August. To improved quality of coke and more favorable weather conditions are ascribed the more satisfactory increase. Several stacks went out of blast but others are preparing to take their places.

Allocations by the institute committee appear to engage all attention of furnaces and general trade inquiries even for next year's deliveries receive scant notice. The production of finished steel has taken expected shifts, and such lines as sheets, wire, etc., are continuing to give way to greater concentration upon the output of shell steel, ship plates, etc. Sheet mills are becoming even worse pinched for bars, and some mill activities appear to have declined as low as 30 per cent. Demand for steel rails, track fastenings, etc., for use by General Pershing's army has kept the mills going at high speed.

The New Regulations

The new rules of the American War Industries Board are as follows:

1. The War Industries Board and the War Trade Board announce, in a new ruling, that they have jointly adopted the following rules and regulations for the purpose of simplifying the procedure of obtaining export licenses from the War Trade Board, priority certificates from the priorities committee of the War Industries Board, and permits from the director of steel supply of the War Industries Board.

2. The War Industries Board announce the withdrawal of its regulations as set forth in P. C. Form No. 18, July 3, 1918, paragraph 6, requesting that applications for licenses to export iron or iron and steel products should not be filed with the War Trade Board unless the orders are covered by either priority certificates or permits from the director of steel supply.

Form of Application

3. On and after October 14, 1918, applications for licenses to export any article on schedule "XP," as given below, should be filed with the War Trade Board and must include the following papers properly executed:

(a) One application, Form X, to which should be attached—

(b) One each of such supplemental information sheets as may be required by the rules and regulations of the War Trade Board to be used in connection with shipments of certain commodities and shipments to certain countries; and

(c) New supplemental information sheet, Form X-26, which will be ready for distribution by the War Trade Board on and after October 14, 1918.

4. Applications which have Form X-26 attached will not require Form X-2.

Priority Classifications

5. The priorities committee of the War Industries Board has awarded priority classification "C" to all articles (on which priorities are issued) which are on the export conservation list of the War Trade Board and are covered by export licenses issued on and after October 16, 1918. No class "C" certificates will be issued with such licenses. If the article specified on the licenses is one on which priorities are issued, and if no individual priority certificate accompanies the export license, the license itself will be evidence that the articles covered by it have been automatically awarded priority classification "C."

Priority Certificates

6. Export licenses issued on and after October 16, 1918, under these regulations, covering commodities on which priority certificates are issued, will be accompanied by individual priority certificates of the priorities committee when in the opinion of the priorities committee a higher rating than class "C" is warranted. These priority certificates will be issued by the priorities committee and forwarded with the export licenses without further request from the applicant.

Constitute Permits

7. Export licenses issued on and after October 16, 1918, for the exportation of iron or steel, or the products or manufactures thereof, which are not covered by priority classification, will in themselves constitute a permit and approval from the director of steel supply for the filling of the orders for the quantity of iron or steel specified in such export license to the extent that such delivery will not interfere with the delivery when and as required of orders covered by priority.

8. It is the policy of the War Industries Board and the War Trade Board to discourage and prevent exporters and manufacturers from purchasing, manufacturing, or producing articles on the export conservation list for the fulfilment of specific export orders until an appropriate export license has been issued. Instances have come to the attention of the War Trade Board in which manufacturers before obtaining export licenses have manufactured articles for specific export orders which articles, while useless for domestic consumption, could not under the regulations of the War Trade Board be exported. It is essential for the proper conservation of commodities in the United States that this practice be stopped, and it is the purpose of the War Trade Board to refuse licenses to exporters who do not conform to this policy.

Certain Priorities

9. The priorities committee announces that it undertakes where necessary to administer priority in the production of all raw materials and finished products save foods, feeds, and fuel. The preference list promulgated by the priorities board forms the basis for the distribution of fuel. Priority is being administered generally on iron and steel products, copper and brass products, electrical equipment, and the products of which any of the above form an integral part. Priority is not being administered at this time on lumber or lumber products, paper or paper products, chemicals, brick, cement, lime, hides, pig tin, tin plate, mine products, and numerous other items which can not well be enumerated. It is not possible to prepare lists in detail covering either prioritied or nonprioritied products, and even in those mentioned above exceptions will from time to time occur. Any inquiries with respect to the commodities upon which priority is being administered should be addressed to the priorities committee of the War Industries Board.

Schedule "X.P."

Pig iron.

Ferrosilicon.

Spiegeleisen (frequently described as specular iron and mirror iron).

Iron and steel: Scrap, ingots, billets, blooms, slabs, sheet bars, skelp, wire rods, alloy steel, high-speed steel, tool steel, bars (including flats 6 inches wide and narrower), hoops and bands (including hot and cold rolled strip steel); shapes (including beams, angles, channels, tees, and zees); fabricated structural steel (including beams, angles, channels, tees, zees, or plates one-eighth of an inch thick or heavier, punched or shaped, including tanks made of plates one-eighth of an inch thick or heavier); plates (all classes, one-eighth of an inch thick and heavier and wider than 6 inches and circles over 6 inches in diameter; this includes No. 11 United States gauge but not No. 11 B. W. gauge); sheets (all classes under one-eighth of an inch thick); boiler tubes; mechanical tubes; boring tubes, oil-well casing, line pipe, drive pipe, cast-iron pipe, wrought iron and steel pipe, poles, wire rope, cable and strand, consisting of 6 wires or more; rails and splice bars; frogs and switches; railroad tie plates; railroad track spikes; railroad track bolts; boat spikes; wire; wire nails; wire spikes; cut nails.

J. A. Page, hardware dealer, London, Ont., sustained a loss of about $1,500 in a recent explosion of acetylene gas which caused damage estimated at $50,000. Besides two large plate glass windows, Mr. Page had more than 200 window panes shattered, his barn blown away, and his delivery car partly destroyed.

EDITORIAL COMMENT

OVERCOMING PRUSSIANISM

EVENTS have followed one another so quickly on the various war fronts recently that those trying to even guess at the future find themselves lost in a bewildering maze. The events in the last two weeks even have been of such magnitude and importance, and the progress made by the Allies so truly wonderful, that millions of people everywhere have been encouraged to hope for a speedy termination of the struggle. It would appear to be now only a matter of a few days at best before the Huns will have been driven headlong out of Belgium and France after having made the most of their opportunity for over four years to perpetrate all manner of deviltry and destruction. It seems to be only the matter of a very short time before Turkey will be eliminated from the war and on terms of unconditional surrender similar to those enforced on Bulgaria. Perhaps it is easier to imagine than describe the feelings of King Albert of Belgium and his brave troops when they find themselves back on their own soil again chasing as hard as they can an enemy who knows he is beaten and is going to be called to full account for all the inhuman outrages he perpetrated upon a smaller nation. The answer of the Allies to the peace proposals put forward by the Huns must have given the millions of soldiers on the firing line a little more than particular satisfaction especially when it was immediately followed by more of the smashing blows which Field Marshal Foch has been handing out so freely to the Kaiser in the last two months. It is hard for the average individual to comprehend the viewpoint of the Hun who has the cool nerve to extend one hand and ask peace while with the other he is busy sinking steamers, burning and looting towns and committing all manner of atrocious crimes. There seems to be only one way to deal with the Hun and that is to beat him so terribly and so completely that his power for doing harm can never be exerted again.

THE SPANISH INFLUENZA

PROBABLY never in the history of Canada has an epidemic caused such general or such widespread illness as the Spanish influenza. In many places business has been completely disorganized and very few firms have escaped without having a large percentage of their employees stricken. A most regrettable feature of the outbreak is the unusually large number of deaths, especially among the younger men and women. Young people in the prime of life, between twenty and thirty-five years of age, have been stricken and died after an illness of only a couple of days. In several cities whole families have died. Among the victims have been several doctors who were stricken while caring for others. Hundreds of nurses in the hospitals are ill. So far all efforts to check the disease have proven fruitless. It is making its way slowly but surely all over the country. It made its first appearance on this side of the Atlantic on the eastern coast of the United States after raging for months in various parts of Europe. In Boston hundreds of deaths occurred. The outbreak gave those who are fond of attributing everything bad that happens to German spies a chance to say that the Huns were responsible for the epidemic. This, however, is discounted by the fact that in Germany itself there were more than a quarter of a million cases of the "flu" and many deaths.

A SQUARE DEAL.

ARE you giving your country a square deal? Canada's effort in this war has aroused the admiration of the entire world. Thousands of Canada's sons have made the supreme sacrifice. What has been your part?

Has it just been that of making money out of war prosperity—and then squandering it? Yes or No? You must make the answer to your own conscience.

If the answer is "Yes," you are not giving Canada a square deal. You are, in truth, giving her the lowest kind of a deal. Sacrifices cannot be equal; but honor and conscience demand that everyone make some measure of sacrifice. The lightest that can be asked is the giving up of waste and extravagance—aye, even harmless tastes, in order to save. Canadians must Save in order to Lend. Canadians must Lend if Canada is to win and to thrive in the future. Give Canada a square deal. Sacrifice to Save; Save to Lend!

IF YOU'RE making twice as much money as you used to, don't forget to peel off a ten spot and slide it into your hip pocket occasionally.

BETTER BUSINESS AT THE BORDER

Continued from page 43

so far as to say that it was a case of the one who had the last drop of blood being the winner.

Good Friends Now

Each member of the committee had something to say to the two grocers and they said it so earnestly and so effectively that the grocers soon saw the folly of their way. The sticking point however was the animosity between them. It was all over some little trifling affair but it had caused fierce bitterness between them. The committee members did some more talking and pointed out that life was too short for such scrapping.

"Here you two get together and shake hands now and call this thing off right now," was the good advice of one member.

And the grocers did so. They shook hands and the cut rate war ended right there. One of the men who was not a member of the association came in soon after and both men are now good friends.

Got In Strong

The members of the Windsor police force not long ago asked the Police Commissioners for a salary increase. At first glance you may wonder just what this has to do with the Retail Merchants' Association. But wait a minute. The policemen explained politely but emphatically that owing to the high cost of living it was imperative that they get more money. The Police Commissioners did not see it that way, and it was not long before members of the force commenced handing in their resignations and getting more lucrative positions eleswhere. Now to the credit of the Windsor police it may be said that they are good men and always on the job. Records show that by their good work they have recovered no less than 87½ per cent. of all stolen goods. There are a lot of goods stolen in Windsor, too, because it is a border point and a big railway centre, and car thieves are busy.

The retail merchants had reason to know just how good the police force was, because in addition to recovering quantities of goods that had been stolen from cars, etc.,the policemen were always giving them little suggestions for improving their window and door fasteners, putting lights at the best points in stores and similar little services that meant dollars and cents to the dealers. The police had demonstrated in many ways that they had the interests of the merchants at heart.

Merchants Get Busy

The police when their request for wages was turned down never thought of enlisting the aid of the Retail Merchants' Association. The members of the association however, were wide awake enough to their own interests to see that if all the good men on the police force were allowed to drift away for the sake of a few dollars a month increase in pay it was not going to be very long before store robberies in Windsor would become frequent, and car robberies a favorite pastime. They saw that instead of 87½ per cent. of the goods being recovered that there would be hardly any, and that in addition, the thefts might increase 200 or 300 per cent. So they got busy. A committee was named and went down at once and discussed the situation with the Police Commissioners. It didn't take them long to convince the police board that it was acting foolishly and against the interests of the community. The policemen got an increase right away, and once more harmony prevailed as a result of the good work of the association. Right here it might be mentioned that the retail interests of all the border cities have no more faithful guardians than the policemen. It is the old story of the bread cast upon the waters.

Growing Steadily

At the present time the association has 420 members and is steadily growing. These 420 members have 2,300 employees. The association is so constituted that there can be only one vote for each business house represented. Employees who are in good standing in the association can attend all meetings and take part in all discussions, but cannot vote. In this way the benefit of their business experience is obtained, and it is often invaluable.

It has been found advisable also to allow such men as bankers, doctors, insurance men and others to become associate members. Many of these men in their daily rounds become possessed of information that is of the utmost value to the association as a whole. On the other hand the association has a big value to the associate members because it brings them into close touch with classes of men whom it is most desirable that they should meet. All associate members have the use of the credit collection department in case they desire it.

Getting Acquainted

The association has adopted a good idea at all its meetings by which everyone present knows who everyone else is, and also what line of business he is in. During the early part of the meetings there is a roll call at which everyone present is required to stand up in his turn and give his name and state briefly his business. Very often prizes are offered for the cleverest response. At the last meeting, for instance, A. W. Cadwell, of the Cadwell Sand and Gravel Co., was awarded the prize for his response which was, "A. W. Cadwell, the man with lots of sand." By this system of having everyone present on his feet at least once during the meetings it has been found that the ice is broken, and that there is a much better spirit in general. At other meetings it often happens that one or two men take possession of the gatherings and no one else ever speaks all evening. There are no long speeches at the border merchants' meetings, and yet everyone is free to speak on any question he chooses.

Electing Officers

Elections for officers take place the first Tuesday in February. Nominations take place two weeks before, and all must be made in writing. Any one man can only hold one office. The nominee from any of the border towns who receives the highest number of votes from that town is elected. There is one vice-president from each of the border cities, this insures equal representation on the executive.

All officers and committees and members co-operate to the fullest extent in all work. The druggists, for instance, recently by their support and the support of the association protected a member from their section who was wrongly accused by the license inspector under the O. T. A. of violating the law by selling Columbian spirits.

Closed Them Out

The laundry and dry cleaning men got together and decided that those tailors and repair men not having such plants should not reap the benefits of firms which had. It was found that a number of little firms which had no facilities were advertising and making all sorts of claims. For instance, a tailor would advertise that he did dry cleaning, etc., when he had no plant for the work. He would take it and then send the work to a real dry cleaners and collect a profit from the customer. The dry cleaners and laundrymen, in order to protect both the public and themselves from these people took action which resulted in completely stopping this misrepresentation. They refused to take the work and also advertised that the firms listed were the only real firms in the business. The tailors and others endeavoured to get around this by continuing to advertise, and by sending any goods they had to London or Sarnia firms. They soon found however, they were up against a losing game and quit.

Fixed The Hours

Through the association the druggists, grocers, hardware firms and others got together and arranged for early closing hours and half holidays, etc., that were satisfactory.

At the present time the association is taking up such important questions as having the Transient Traders' Act greatly broadened, the enforcement of the act in regard to hawkers, the question of co-operative deliveries, and the teaching in the schools of salesmanship.

The members have taken a most active part in all patriotic work, and in the coming Victory Loan campaign is preparing to maintain its previous records. The various committees are ready at any time to give their time, money, work and influence to any patriotic object. Special committees meet all returned heroes on their arrival, and welcome them and take them home in autos. In the past four months the committees have met and welcomed more than 160,-

EVENTS IN THE TRADE

Business Changes

Wheatley, Ont.—L. O. Charlesworth has purchased the hardware business of Howard Derbyshire.

Personals

A. Fulton, of the Fulton Hardware Co., Enderby, B.C., has been elected president of the newly formed branch of the Retail Merchants' Association of Canada, at Enderby.

G. F. Stephens, president and founder of G. F. Stephens & Co., Ltd., paint and varnish manufacturers, Winnipeg and Calgary, left for California recently, and will be away during the coming winter.

Obituary

John G. Watson, aged 71, president of the John Watson Manufacturing Co., died at his home at Ayr, Ont., on Thursday.

George H. Curle, aged 45, organizer of the Curle Ornamental Glass Co., of Windsor, died in that city from heart failure. Until recently he was a resident of Toronto.

James Baines, aged 31, of Hamilton, assistant manager of Bird & Sons' factory, died very suddenly. He had been ill with Spanish influenza and it was thought had recovered.

Sherbrooke, Que.—The sympathy of the trade will be extended to Malcolm Mitchell, of J. S. Mitchell & Co, Sherbrooke, Que., whose wife, Louise Lugsdin Mitchell, died of pneumonia recently.

William Taylor, aged 82, for more than fifty years in the hardware and tinsmithing business at Carleton Place, Ont., died at his home recently. He retired from active business in 1899. He came to Canada from Hamilton, Scotland.

P. D. Dansereau, aged 35, one of Lewis Bros., Ltd.'s. buyers, and a valued employee of the firm for many years, died at his home in Montreal on Sunday night after a brief illness. Mr. Dansereau served in various capacities with Lewis Bros., Ltd., and from the beginning had shown ability which resulted in his ultimately being chosen as one of the firm's buyers. John S. Fraser, sales manager, stated to HARDWARE AND METAL that his place would be hard to fill. Mr. Dansereau leaves his wife and two children.

Fire Losses

A loss of $15 000 was caused by fire in T. McAvity & Sons' King St. hardware store at St. John, N. B. For a time a stock valued at over $150,000 was threatened with destruction.

Montreal News

Chas. K. Pichler, representing the Slaymaker Co., will visit Montreal in the near future.

H. K. Parkman, with the Reed Manufacturing Company of Erie, Pa., was in Montreal this week.

J. A. Orsalix of the illuminating oil division of the Imperial Oil Co., Montreal, is home owing to illness this week.

R. C. Misson, Montreal sales manager of the Sherwin-Williams Co. of Canada, Ltd., is confined to the house through illness.

S. M. Ward, sales manager of The Canada Paint Company, Ltd., is expected to return to his office in Montreal this week. Mr Ward has been away for several weeks on an extended trip in the United States and his many friends will welcome him home again.

Owing to the influenza epidemic, several of the larger salesman's conventions may have to be cancelled or indefinitely postponed. This was a possible contingency in connection with the annual convention of a large paint company here, and developments of the next few days will be a deciding factor.

Trade Notes

The Imperial Oil Company will shortly open new service stations at Tweed, Millbrook and Stittsville.

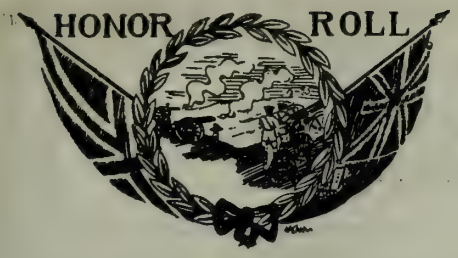
The site occupied by the National Spring and Wire Company of Windsor, Ont., has been transferred to the Ideal Fence and Spring Company of Canada.

F. Fairhall who purchased the hardware business of E. Colwill at Centralia, Ont., has had the store remodelled and redecorated, and will handle tinware also.

The British American Oil Co. of Toronto has purchased an acre of ground at Windsor on which buildings will be erected shortly to cost $100,000. A complete plant for oil and gasoline distribution for the district is planned.

The plant of the Dunlop Tire and Rubber Goods Company, Toronto, was shut down for three days for the purpose of disinfecting the works against the spread of influenza. The plant closed October 11, and re-opened Tuesday morning.

The Canadian Hoskins, Ltd., of Walkerville, Ont., have been succeeded by the Hiram Walker and Sons Metal Products Co., Ltd. This firm will manufacture electric furnaces, gas and oil furnaces, heat resisting castings, and kerosene heating and lighting devises.



E. B. Plewes, of Plewes, Ltd., Winnipeg, is on a business trip to southern Saskatchewan. W. H. Plewes, son of the above, who has been discharged from the army after seeing considerable service at the front, is back home, and calling on the trade for Plewes, Ltd., in Western Canada.

Seven buildings which were formerly used by the Ford Motor Co. as distributing, assembling and service stations have been taken over by the American Government for the use of the War Department. The buildings are located in St. Louis, Mo.; Atlanta, Ga.; Long Island City, N. Y.; Cambridge, Mass.; Louisville, Ky.; San Fransisco, Cal.; and Philadelphia, Pa.

At the forty-first Annual Sales Convention of the Martin-Senour Co. or America held in Chicago recently the salesmen were enthusiastic over prospects for business next year and look forward to healthy increases in all departments. The company has shown its confidence in the possibilities for increased business by opening a large number of new territories.

A new corporation to be known as the National Operation Corporation, and formed under the direction of officers of the American Government, is to supersede the present management of the Smith & Wesson Company, and operate the plant for the United States Government. W. C. Bryant, of Bridgeport, Conn., is president of the new corporation. H. C. Heiden, the secretary and treasurer, is the only member of the new board who has been connected with the Smith & Wesson Company in the past.

The Dunlop Tire and Rubber Goods Company, Limited, of Toronto, has obtained rights to the tire-making methods and formulæ of the English company and will have access to the large rubber plantations owned by the parent concern in England. The Canadian company now will be able to make use of the master plans of the Dunlop institutions in England, France and Japan. The Canadian company has been in existence for twenty-five years while the English company has been making tires for thirty-two years.

John Scott Elliot,who was employed with Emerson & Fisher, Ltd., St. John, N. B., before enlisting with a siege battery unit, was reported wounded in the face on October 1.

Samuel Carson, with James Pender & Co, Ltd., St. John, N. B., until he went overseas two years ago has been reported suffering from severe gunshot wound in the knee.

Robert Garnett, who was employed with T. McAvity & Sons, Ltd., St. John, N. B., until he enlisted in 1915, has been admitted to a hospital in France suffering from gunshot wounds in the back.

New Brunswick News

Francis Gallagher, foreman of T. McAvity & Sons' machine shop, St. John, who was married this week to Miss Loretta Kane, received a handsome chest of silver from his associates in recognition of the happy event.

Major J. T. McGowan, of H. L. & J. T. McGowan, "The St. John Paint Store," until he went overseas with the first contingent, who has been home on furlough, has volunteered for and been accepted for the second tank battalion.

Fred Whelpley, the originator of the "Long Reach" skates, who conducted a skate factory near St. John for many years, until driven out of business by German competition, died at his home in Massachusetts this week of Spanish influenza.

The city of Moncton and the Moncton Board of Trade has been fighting vigorously an application of the natural gas company for permission to substantially increase the rates. Moncton has become practically dependant upon gas for cooking and heating purposes, and an increase in the rate which would force many persons to return to the use of coal would involve the purchase of many stoves, and the readjustment of many furnaces.

BACK AT WORK AGAIN

After being away from business for nearly two years after a nervous breakdown R. Miller of the Bond Hardware Co. of Guelph, Ont., is back at work again. He returned recently from Vanconver, where he spent the last six months. To HARDWARE AND METAL Mr. Miller stated that business conditions on the Coast are steadily improving. Just now there is great activity in shipbuilding. This is furnishing work for more men than are available and there is a scarcity of help.

New Companies

The Canadian Crude Asbestos and Fibre Corporation, Ltd., of Thetford Mines, Quebec, has obtained a Dominion charter.

High Prices of Furs Encourage Trappers

Canadian hardware merchants catering to trappers in various parts of Canada will receive added encouragement to push the sale of trappers' supplies in the knowledge that record prices were paid for skins at the recent New York fur sales.

All that had been predicted about the high prices to be paid for muskrat at the fur auction came to pass when both brown and black skins sold at the highest levels ever reached in the history of the trade in the United States.

The bidding for muskrat was the feature of the entire sale, and the bids came so fast when the choicest skins were under the hammer that the "spotters" were barely able to keep up with them. As one buyer put it, "It was the closest approach to drumfire that has ever been heard on the New York front." The attendance while these skins were on the block was larger than at any other time during the week, and the rapidity with which the more than 207,000 pelts offered were disposed of told graphically the story of how badly they were wanted by the buyers.

The supply of these skins is said by experienced fur men to be smaller than for years, and the demand for them was never greater. This was especially true of the brown muskrat, which in the dyed state is known as Hudson seal. The fact that the best brown pelts sold within eight cents of the best black ones, which are always the scarcer of the two, was in itself evidence that they were regarded by the trade as extremely desirable property to own. One New York firm purchased the finest lot of brown muskrat at $2.22 each, and also the best black skins at $2.30 apiece.

Excepting for polar and brown bears, which were unchanged, all the furs showed large advances when compared with the average price obtained at the Spring sale. Partly as a result of this the total sales for the entire auction ran higher than had been expected. At the close of selling the grand total was announced as being about $3,200,000.

Following are the prices paid for the best skins sold on the last day: Nutria, $2.55; black bear, $24; brown bear, $26,-50; polar bear $36; raccoon, $7.10; rabbit, $2.40 a pound. Comparison of average prices with those of last April showed the following percentage advances: Nutria, 10; black bear, 35; brown bear, no change; polar bear, no change; Northern raccoon, 25; Southwestern raccoon, 35; brown muskrat, 55; and black muskrat, 10.

Trade Inquiries

717. Wire Nails.—A Manchester firm with extensive connections all over the United Kingdom is open to purchase large quantities of wire nails.

725. Handles.—A Birmingham firm is open to purchase two thousand dozen ash hammer handles 12 inches, 14 inches, and 16 inches.

Catalogues

A new color card issued by the Imperial Varnish & Color Co., Ltd., shows an attractive assortment of paints and contains valuable suggestions for painting.

HARDWARE LETTER BOX

Water Fronts for Modern Garland

We have been trying to get water fronts for the modern Garland 9-20 range. These ranges were made by Bowes, Jamieson Co., Hamilton. Kennedy & Desroches, Penetanguishene, Ont.

Where can I procure repairs for stoves manufactured by Bowes, Jamieson & Co., Hamilton; E. Troughton, Lumsden, Sask.

Who manufactures repair parts for Bowes, Jamieson stoves, formerly made at Hamilton? John Bullied, Lumsden, Sask.

Answer:—The firm of Bowes, Jamieson, stove manufacturers, Hamilton, is now out of business. Same is running under the name of the Garland Stove and Foundry Co., Hamilton, from whom you should be able to secure repairs for stoves formerly made by Bowes, Jamieson.—Ed.

Pioneer Box Stove

Can you please advise where I can secure grates for the Pioneer box stove? The MacFarland Hardware, Etzikom, Alta.

Grates for the Pioneer box stove are procurable from the D. Moore Co., manufacturers, Hamilton, or branch at Winnipeg.—Ed.

Feed Cutters

Please give me names of firms making feed cutters. G. H. Melvill, Cereal, Alta.

Manufacturers of feed cutters are as follows: John Watson Manufacturing Co., Winnipeg, Man.; Massey Harris Co., Ltd., Calgary and Edmonton, Alta.; Bateman Wilkinson Co., Ltd., Toronto; B. Bell & Son Co., Ltd., St. George, Ont.; Bruce Agricultural Works, Teeswater, Ont.; Connor Machine Co., Exeter, Ont.; J. Fleury's Sons, Aurora, Ont.; Gilson Manufacturing Co., Ltd., Guelph, Ont.; Peter Hamilton Co., Peterboro, Ont.; Eureka Planter Co., Woodstock, Ont.; Maxwell's, Ltd., St. Mary's, Ont.—Ed.

Ruddy Gas Water Heaters

Will you advise us where we can procure the Ruddy automatic gas water heaters?—Plummers-Ferguson Hardware Co., Ltd., Sault Ste. Marie, Ont.

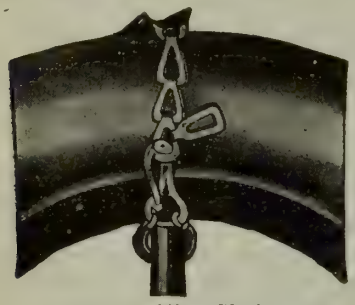
Ruddy Automatic Gas Water Heaters are manufactured and distributed by Ruud Mfg. Co., 371 Adelaide St. W., Toronto.—Ed.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

HOME MOTOR

The Hamilton Beach Home motor is shown below running a sewing machine. It is claimed it will run a little grinder that will keep knives sharp, that it will operate a polisher for keeping silverware bright, that it will run a fan and



Home Motor

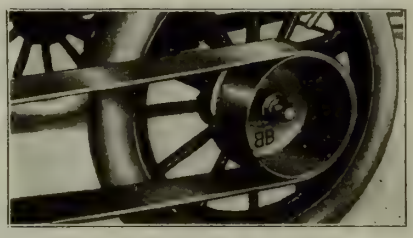
do many other things to lighten woman's work in the home. Special attachments for the motor such as polisher, grinder, fan, etc., as well as the motor are manufactured by the Hamilton Beach Manufacturing Co., of Racine, Wisconsin.

EASYON TIRE CHAINS

The Woodworth Manufacturing Corporation of Niagara Falls, Ontario, made some important improvements in the Easyon Tire Chains. The Easyon chains for pneumatic tires are still made with the special shaped cross member, which presents a perfectly smooth rounded surface to the tire and the thin edges of the metal toward the road, but the

Easyon Tire Chains

parts are being made of heavier metal than formerly so that under test it is claimed that the breaking strain is nearly twice as high as formerly.



The Easyon Truck chains for solid tires are now made with a self locking hook for connecting the ends of the cross chain around the tire and the ends of the leather covered chain around the spoke. This it is claimed makes it possible to put the chains on very quickly and easily.

The pneumatic chains are made in three sizes which will fit all sizes of pneumatic tires.

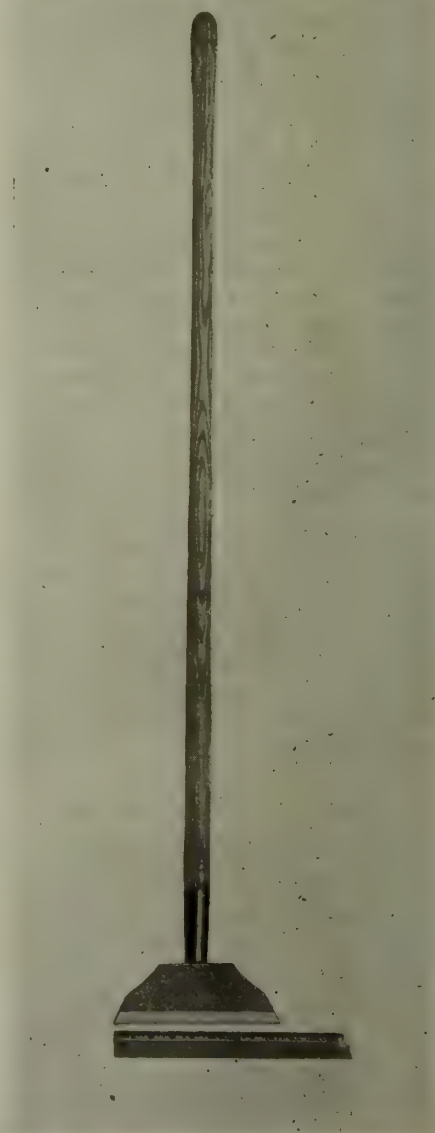
The Easyon truck chains are made in five sizes.

AUTO POWER PULLEY

The "BB" auto power pulley is an ordinary 5-inch crown face belt pulley 10 inches in diameter, designed so that it can be attached to either rear wheel of an automobile by simply unscrewing and replacing the hub cap. When so attached it is said to be a perfect belt-power pulley for transmitting power to any belt driven machine.

Power Pulley

It is claimed it is particularly useful for farmers and will turn a grindstone, run a cream separator, churn the butter, shell corn, pump water, saw wood, run an ensilage cutter and do all kinds of similar work if attached to a Ford or other auto.



GLIDDEN INSECTICIDES

One of the most vital problems to-day is the production of foodstuffs in sufficient quantity to feed ourselves and the Allies. Maximum crop production is impossible without the use of the proper insecticides and fungicides to control the myriads of insect pests and diseases which infest growing plants. Authorities everywhere recognize the vital importance of proper spraying methods and materials, and are keenly interested in proper production and distribution of insecticides and fungicides. The Glidden Company in order to give its customers the maximum of service from the standpoint of quality and distribution is manufacturing insecticides and fungicides. Glidden insecticides and fungicides it is claimed meet every requirement, and are manufactured and marketed with the view of giving to growers and farmers products which can be used with a certainty of maximum efficiency at minimum cost.

The Glidden Company insecticides include Glidden dry powdered arsenate of lead, Glidden dry powdered arsenate of calcium, Glidden dry powdered Bordeaux mixture and Glidden dry powdered bordo-arsenate.

SIDEWALK CLEANER

A sidewalk scraper which is designed for chopping snow and packed ice from sidewalks is being manufactured by the Conron McNeal Co., of Kokomo, Indiana. It has a heavy steel blade, 3/16-inch thick and 8½ inches in width on the cutting edge. It has a four foot handle and ferrule and blade are painted black.

No Rise in Gasoline Prices is Anticipated by Distributors

SINCE the new regulations of the Fuel Controller in regard to the licensing of gasoline were made known in last week's issue of HARDWARE AND METAL inquiries have been pouring in from distributors all over the country who are anxious to know what they are to do. The big distributors are sending lists of their agents to the Fuel Controller in order that there may be no chance of mistake and it is expected that the Fuel Controller's department will send to each agent the necessary application form for securing a license. In case this is not done, each seller of gasoline must apply himself to the Fuel Controller's Department for the necessary license. The new regulations provide heavy fines for all persons selling gasoline without a license.

No Price Increases

The largest distributors of gasoline in the Dominion stated to HARDWARE AND METAL that at the present time there is nothing to indicate that there will be any necessity of advancing prices. Under the new regulations the dealers are allowed a ten per cent. profit, but the distributors for many months past have been keeping prices in Canada much lower than they have been in contiguous territory in the United States.

Some interesting facts in regard to the gasoline situation were given at a meeting in New York, by M. L. Requa, director of the old division of the United States Fuel Administration.

Needs For The Year

"We will need this year, to meet only a normal increase in consumption, not less than 25,000,000 barrels of crude oil, more than we used last year," he said. "We used only 16,000,000 barrels in 1897. This grew to 166,000,000 barrels in 1907, and to 340,000,000 barrels in 1917. If we are to meet this normal rate of growth we must have not less than 265,000,000 barrels in 1918. This is 66 per cent. of the total production of the world, and yet it is not enough."

Mr. Requa spoke of the difficulties of transportation and said that, although the pipe lines bringing oil from Oklahoma had been largely increased, no more oil could be carried than was carried at present, unless new pipe lines were built.

Production Increased

Speaking more directly of gasoline, he said:

"In the first half of 1918 our gasoline production has increased more than 8,000,000 barrels, but our consumption has more than kept pace with this. Our stocks of kerosene are 2,000,000 barrels less than on the first of this year, and our stocks of crude oil are 12,000,000 barrels less.

All demands for export will continue to be met from the 350,000,000 barrels of crude oil, the 80,000,000 barrels of gasoline, the 40,000,000 barrels of kerosene, and the 170,000,000 barrels of fuel oil, that will probably be produced this year."

Success of "Gasless Sundays"

Referring to the "gasolineless Sunday" about which, hitherto no figures have been available as to the amount of gasoline saved, he said:

" 'Gasolineless Sunday' is a magnificent success in that it has made it possible to load for France 10 cargo boats of gasoline, of 50,000 barrels each, which otherwise could not have been shipped—and that has been done by the voluntary effort of a free people on the mere request of the Fuel Administration."

People Are Buying Medium-priced Stoves

A LEADING Montreal stove maker stated to HARDWARE AND METAL that the demand is very good and that the firm which has the goods has little trouble in selling them. He pointed out that it is the medium-priced stove and range that is selling. Those calling for the largest outlay are still selling, but not so readily. When a customer is asked $100 for a kitchen range it is pretty safe to say that the matter "will be considered." Some folk, not having bought a stove for years, would find present quotations somewhat higher than they had expected, and they therefore would wish time to consider the matter as to what the investment should be.

Medium Price Helps

There are some advantages in making the purchase of a medium-priced stove. The investment required will often secure a good stove or range and more money is left with which to buy furnishings. The medium priced stove is very often well-made and if care was taken to supply heavy castings in the firebox the stove would always reflect credit on its maker. Reliable stove manufacturers have usually built up a good foundation and stand back of their various lines. In fact, illustrative of this very point the sales manager of a large Canadian foundry pointed out to HARDWARE AND METAL that there was a demand—sometimes insistent—for a lighter line of goods. This his firm consistently refused to cater to, preferring to retain a good weight in the goods carrying their name. This prevented the loss of prestige and eventual trade through the user being better content in the long run, the price paid being quickly forgoten.

District Governs Selling

It is up to the hardware man, generally speaking, to cultivate his own trade and ascertain customers' wishes in the matter of purchasing a stove. Some parts of Canada, for instance, like gaudily-decorated ranges, and these very goods would remain on the dealer's floor indefinitely in another district. From personal experience the writer knows that the mouldng of the customer is in the hands of the hardware dealer selling stoves, to a great extent. In an extended connection with the trade he found that many stoves of a certain type and at a given price sold readily after a fair amount of missionary work had been done. This is largely possible through careful advertising and the exercise of initiative.

Making the Old Stove Last

There are doubtless many places in which the old stove is made to last another season. This will be the case today. It is the hardwareman's duty to push the sale of new goods and particularly of stoves. Failing this, he ought to enquire about the stove that is being used. If he shows interest in this way and is willing to secure the needed repairs, the customer will appreciate the consideration and come back later to buy a new range.

In this connection HARDWARE AND METAL asked if there had not been a larger sale of repairs this year than usual. This was hard to define, the informant stated, for stoves are left until the very last minute before repairs are ordered. There was a very large demand for castings at this season, and this year it was heavy, too.

BENJAMIN MOORE & CO. CONFERENCE IN CHICAGO

Sixty-eight members of the sales forces of the Benjamin Moore Co. were in attendance at the annual sales meeting held in Chicago when a general discussion of wartime problems, future prospects, selling lines, etc., was had. The meeting closed with a smoker, instead of the usual more elaborate banquet. George T. Goodrow presided. The following were present from the Canadian plant. Toronto—Fred Moore, Arnold Smith, James Tait, R. P. Barrington. W. W. Howard, J. J. Cleveland, W. Moore.

DEATH OF MAJOR DILLON

The death occurred at Oshawa, Ont., after an illness of four years of Major Robert Dillon of the firm of R. Dillon and Son, manufacturers of hay forks, saw files, etc. He came to Canada from Dublin, Ireland. Major Dillon was one of the best known rifle shots in the Dominion, having represented Canada on the Bisley team many times and always with honor. He saw active service during the Fenian Raids of 1866 and again in 1885 in the North-West rebellion.

The death occurred at Brantford, Ont., of James G. Scarfe of Scarfe Co., manufacturers of varnish.

B-H Salesmen in Annual Convention

Managers and Travellers From the Whole Dominion Convene at Headquarters in Montreal—Three Days Spent in Profitable Discussion of Next Year's Business

THE Windsor Hotel, Montreal, was the scene of an important gathering from October 9 to 11, when the managers and salesmen of Brandram-Henderson, Limited, met in their tenth annual convention. Almost the entire selling organization was present, but owing to the outbreak of influenza two or three members of the staff were unable to attend the convention and messages of sympathy were sent to all the absentees on behalf of the Brandram-Henderson Sales Organization.

On Wednesday the managers met in a conference at the head office, and various problems pertaining to sales and production were discussed. Some far-reaching decisions were arrived at and these were later communicated to the convention as a whole, and met with enthusiastic approval.

Co-operation Urged

By Thursday morning the managers had been reinforced by the salesmen, who arrived in large numbers on the Wednesday evening and Thursday morning trains. At 10.30 in the morning the convention was formally opened by an address from the president, Mr. George Henderson, who welcomed the delegates to head office, outlined the program of the convention, and emphasized the fact that the salesmen were to consider the convention as a place where they were to teach the executives as much as to be taught by them.

Following the president's address the salesmen were conducted through the factory and the many interesting processes in the manufacture of white lead, paint and varnishes were described by the production manager, superintendent and foremen.

See Demonstration

After the tour of the plant the salesmen gathered in the top floor of the new warehouse where a painting demonstration was given by R. H. Monk, assistant to the president, aided by Frank H. Smith, superintendent of the sample department. These demonstrations were very convincing as to the excellence of the product which Brandram-Henderson salesmen have for sale, and all the travellers were imbued with new enthusiasm as the result of these tests.

The next item on the program was a group photograph of the convention delegates taken in front of the head office, a reproduction of which appears above. Every B. H. agent will readily recognize in this group the traveller who regularly calls upon him.

The morning's proceedings were thus concluded, and a special car took the delegates from the head office to the Windsor Hotel, where tables had been set in the Oak Room. This room was reserved for the Brandram-Henderson delegates throughout the convention.

Plans For Future

The Wednesday afternoon session of the convention was given over to a discussion of the advertising plans for 1919. A talk on this subject was given by James G. Lorriman, and the whole advertising policy was graphically illustrated with a large chart which had been drawn up in the form of a target. Many new advertising features which have been adopted for 1919 were displayed and were most enthusiastically treated by the salesmen.

The discussion which followed the address on the advertising program was participated in by all the salesmen present, who have a very keen interest in this phase of the company's promotion work. In this discussion some excellent ideas were brought out for use in future campaigns.

After an informal dinner in the Oak Room the main entertainment feature of the convention was announced.

In spite of the fact that all the theatres of Montreal were closed on account on the Spanish influenza epidemic; the smoker which had been organized by a committee under the chairmanship of Mr. C. H. G. Short, displayed some of the best talent in Montreal, and the boys thoroughly enjoyed the varied programme of songs, instrumental selections and monologues.

Window Displays

The second day's proceedings were opened by the annual window display

Continued on page 54

Brandram Hendersons sales staff and managers photographed at their successful annual gathering in Montreal.. The sessions lasted through two days and many important trade matters were discussed.

Boston Varnish Co. Convention

Optimistic Tone at Most Successful Session—Canadians Among the Visitors

THE annual convention of the Boston Varnish Company was aptly described as the most smooth flowing, joyful, high gloss red letter days in the company's history. Representatives of the company were present from all the fields of activity in which the company operates. A number of Canadians were present, including C. H. A. Bamford, sales manager of the J. H. Ashdown Hardware Co., Winnipeg. During the convention Mr. Bamford for some reason or other was styled C. High Speed Bamford, some claiming that the two middle initials of Mr. Bamford stood for "High Speed." Mr. Bamford was one of the speakers at the convention and delivered an inspiring address full of breezy optimism.

The convention which lasted four days was formally opened by the president, Mr. James B. Lord, who outlined the purposes of the convention. H. A. Hall, treasurer of the company, reviewed events of the past year. Speaking on the subject of "Co-operation with the Advertising Department" Mr. C. A. Dana Redmond, advertising manager, laid stress on the fact that service on the part of the company, with salesmen, jobbers, dealers and consumers is one of the most powerful factors in building and sustaining the great volume of business enjoyed by the firm. Mr. Redmond outlined an extensive policy for the coming years.

Instructive talks were given on credits, factors in the art of selling the company's products, importance of small town dealers, analyses of the company's products.

Discussion took place on technical questions and a trip through the company's plant, including the new addition, gave the visitors an opportunity of seeing the products in the making. An instructive address by Mr. Hall on "Varnish from Kettle to Can" covered every step in the manufacture of high grade varnish. Suitable acknowledgements were made of the sacrifices by the men who joined up for service.

The social features of the convention were of a unique and pleasing order and thoroughly enjoyed by all present.

Jack Frazer and Fred Bamford of Winnipeg were among the Canadian visitors.

Paint Salesmen in Convention

Selling Force and Executive Staff of G. F. Stephens & Co., Ltd., Winnipeg, Hold Most Successful Gathering in History

THE salesmen and department and executive heads of G. F. Stephens & Co., paint and varnish manufacturers, Winnipeg and Calgary, met at the head office in Winnipeg October 3, 4, 5, for their annual convention. There was a full attendance, representatives being present from Calgary, Edmonton, Moose Jaw and Saskatoon. Business sessions were held on the afternoons and evenings of each day during the convention.

The convention opened with a careful review of the activities of the past year. Salesmen told of conditions existing in their territories, and this was followed with a discussion as to the policy to be adopted during the coming year in reference particularly to raw material, sales, advertising, and credits.

Valuable Points

Advantage was taken of the convention to demonstrate to the salesmen what could be accomplished with Stephens products. One of the values of sales conventions is the opportunity they afford to show salesmen points concerning the lines they are selling. When this is done effectively, sales conventions are worth while.

Among the excellent papers read at the convention was one on Paint Technology by a member of the organization. Papers were also delivered on sales methods and legitimate means that may be employed to advantage and methods that must be avoided. In a paper that was read on the subject of credits, particular emphasis was placed on the co-operation that should be given the credit department by the travelling representatives.

President Absent

The president, G. F. Stephens, was unfortunately not able to be present, having left early in October for California where he will spend the winter months. A letter was received from him addressed to the staff, which was much appreciated. Referring to the company's business, he made mention of the fact that while they had naturally been anxious to increase the volume and to make a reasonable profit, yet the policy and traditions of the firm had been maintained inasmuch as it was secured in a fair and straightforward manner.

Referring in his letter to the past year's business, Mr. Stephens added that their usual policy had been pursued to improve their products, making "quality" instead of "price" their argument. While it had been difficult to obtain raw materials for their standard grades even at excessively high prices, yet he felt sure their customers would concede that the goods shipped in 1918 were in no way inferior to what had been supplied during the past third of a century.

The general manager stated to HARDWARE AND METAL that this was the most successful and instructive convention ever held by their company, and the salesmen all left for their respective fields with renewed inspiration and a determination to make 1919 the banner year of the company's achievements.

The business session concluded with a dinner at the Hotel St. Charles, and afterwards the entire party attended the Orpheum Theatre. Those present at the convention were as follows:

F. W. Stephens, vice-president; M. F. Christie, secretary-treasurer; L. C. Stephens, assistant-secretary; D. McIver, S. Ayres, J. B. Baillie, R. M. Balmer, D. E. Birch, Neepawa; E. W. Calder, Edmonton; J. A. Cameron, W. S. Cumming, J. J. Dwyer, H. A. Ellis, G. Gallant, H. C. Gibson, Calgary; H. R. Graham, H. A. Kerr, W. R. McFarlane, Calgary; A. D. O'Brien, Moose Jaw; H. Pringle, Saskatoon; J. Putts, W. J. Quinn, V. Stephens, and J. Wilson.

Forty-Seven Men Overseas

It might properly be mentioned here that the staff of the G. F. Stephens Co., Ltd., have done their duty in the conflict now raging in Europe. Forty-seven enlistments have taken place from the staff since the war began, and it is interesting to note that two of the members of the staff present at the convention were men who have been in active service overseas and have been honorably discharged. Stephens men who have gone to the front are to be found in every branch of the service from the Flying Corps to the Tank Battalions. The policy of the firm in employing new men is to give first chance to those who have seen service at the front.

Because of the prevalence of influenza, which closed theatres and other public places and brought the request from Boards of Health everywhere that all meetings and gatherings be dispensed with, President George C. Morton has announced the cancelling of the convention of the National Paint, Oil & Varnish Association which was to have been held in Boston October 21 to 24.

Clay Delong has been appointed manager of the Eastend Hardware Co. at Eastend, Sask., and L. Gallagher has joined the sales staff.

WANTED — OLD-ESTABLISHED PAINT manufacturing firm located in Ontario requires a good sales-manager. Must be a good salesman and organizer. One with paint experience preferred, but not absolutely necessary Apply giving full particulars. Box 108, Hardware and Metal.

BETTER BUSINESS AT THE BORDER

Continued from page 47

000 American soldiers who were passing through Canada. Every soldier was provided with stamped picture post cards, cigarettes, chocolates and often with eatables. The advertising value of these postcards to Windsor has been of enormous value, and the committees are constantly receiving letters and cards from the men who are now overseas thanking them for what was done.

Following is a list of the officers: president, Clarence H. Smith, dry goods, Windsor; 1st vice-president, Henry Crouchman, coal merchant, Walkerville; 2nd vice-president, Clarence A. Lanspeary, Windsor, druggist; 3rd vice-president, O. Desrosiers, grocer, Sandwich; 4th vice-president, H. Plant, grocer, Ford City; 5th vice-president, A. J. Wilkinson, druggist, Ojibway; Directors, A. B. Peddie, H. J. Neal; F. L. Howell, J. R. Hewer, George Nairn and H. L. Pratt; secretary-treasurer, T. C. Ray.

Following is the constitution:

BORDER CITIES RETAIL MERCHANTS' ASSOCIATION

Article 1.

Section 1. This Association shall be known as "The Border Cities Retail Merchants' Association.

Section 2. The title, "Border Cities," it is understood, refers to the municipalities of Ford, Walkerville, Windsor, Sandwich and Ojibway.

Article 2.

Objects.

Section 1. To secure closer friendly relationships and good fellowship among our members; to co-operate with each other in the solution of our common problems in various lines of business; to lend assistance towards the solution of problems not directly affecting ourselves but of moment to our fellow merchants to co-operate with other organizations having kindred purposes, for the advancement of commercial interests.

Section 2. To safeguard the interests of all the retail merchants, individually and collectively, in our vicinity.

Section 3. To exert our influence as an association towards the securing of legislation, through municipal, provincial and national legislative bodies, such as may strengthen, advance and protect ourselves as retail merchants.

Protects Members

Section 4. To use our influence against any such legislation that may be proposed in the said legislative bodies, if such legislation seems to be adverse to our own or our national interests.

Section 5. (This section to be included after affiliation with the Dominion Retail Merchants' Association or after incorporation of our own organization). To protect our members by the establishment of a credit reporting department, for the conservation of credits and for the collection of accounts.

Section 6. To endeavor to have the trade of our vicinity confined as far as possible to the retail merchants here, as against the out-of-town mail-order houses, co-operative stores, wholesale houses and retail stores not of our municipalities.

Section 7. To conduct a campaign, through the newspapers or other mediums for the impressing on the consumers of this vicinity their obligations towards the retail merchants who are carrying stocks, employing hands, and doing business for their comfort and convenience here, and,

Section 8. To, as a body, lend our loyal aid towards the enforcement of any legislation that may be made, and which is deemed necessary for the best good of our nation.

Article 3.

Membership.

Section 1. There shall be two classes of membership, namely, "Active and "Associate" Members. The Active members are voting members, the Associate members are non-voting, except at such times as by proxy of an absent active member they become for the time being an active member.

Section 2. An active member is one, who, having complied with our scale of membership fees and being in good standing, is either a proprietor of, a partner in, or an active "bona fide" manager of a store or shop, where the business or service is direct to the consumer.

Section 3. An Associate member is one whose place of business or shop is already represented by an active member with voting power, and who may therefore be another partner to the voting partner, another stockholder of an incorporated company, or an associate manager of an active member. One place of business under separate and distinct management has one vote.

Section 4. To the specified associate members referred to in Section 3, there may be added other associate members who, through interest or wishing to use our credit department, may desire to join our association. The question of eligibility of such is to be decided by the Directors of the Association.

Article 4.

Government.

Section 1. The government of the organization shall be vested in the Board of Directors, consisting of twelve (12) members elected in accordance with the by-laws. Of these twelve directors, there shall be a President, five Vice-Presidents, and there shall be six directors. The five Vice-Presidents shall be representatives of the five municipalities in the Border Cities.

Section 2. A permanent Secretary-Treasurer shall be appointed by the Board of Directors. He shall attend all the meetings but he shall not have voting power.

Section 3. The Board of Directors shall have the power to amend, change, or suspend at any time any article on this constitution or the By-laws that are adopted until such changed constitution or the by-laws is approved and adopted at a meeting of the association, called for that purpose.

Section 4. Parliamentary rules of province shall govern all our meetings.

Section 5. Internal organizations of sections shall be encouraged so that problems peculiar to a line of business may be discussed and the result of such deliberations may be the more concisely laid before the general organization.

By-Laws

Section 1. Article 1. Fees. The fees of this Association are payable annually, within the period of two months from the beginning of a new year of business. Failure to pay the said fees causes the delinquent member to lose his good standing and so deprives him of the privileges of the organization. Proper notice of his delinquency must be sent to such member by the Secretary and if at the end of ten days from date of such notice he still remains delinquent, his membership may be forfeited, unless otherwise ordered by the executive.

Section 2. The scale of fees for active members is graded according to the number of the sales clerks as follows:

Proprietor alone, $5; with one clerk, $5; with 2 clerks, $6; with 3 clerks, $8; with 4 clerks, $10; with 5 clerks, $12; with 6 clerks, $14; with 7 clerks, $16; with 8 clerks, $18; with 9 or more clerks, $20.

Section 3. Employees who have not attained their majority, and as such may be classed as apprentices, shall not be counted.

Section 4. The fee of all associate members shall be $5 per annum.

B-H SALESMEN CONVENTION

Continued from page 52

contest, and all the salesmen were on the job bright and early dressing the windows which had been allotted to the various divisions. The judges visited the windows at noon and their decision in favor of the Maritime Division was very popular.

In the afternoon sales problems held the boards, and Mr. W. S. McLeunan, the general sales manager, spoke at length on the policies which had been adopted for 1919. Following his address the meeting was opened up for a discussion of divisional problems. While these discussions were in progress the manager of the different divisions occupied the chair and conducted the proceedings. Mr. R. M. Monk led the discussion for the Lead Works Division, Mr. S. W. Smith for the Ontario Division, Mr. George Helliar for the Maritime Division, and Mr. J. Leonard for the Western Division. Mr. Geo. E. Smith, manager of the British Columbia Division, was unavoidably absent.

At the close of the afternoon session George Henderson addressed the convention, summarizing the results, and expressed himself as being highly gratified at the ideas whch had arisen out of the discussions and the enthusiasm which had been shown by all the salesmen in the products and policy of the house. The reception given to Mr. Henderson's remarks was so hearty as to convince him that the sales staff is determined to make 1919 a banner year for B. H. products.

NEW REGULATIONS FOR FREIGHT SHIPMENTS

Continued from page 37

7. Shipments of bar iron and steel must be marked as follows:—

All iron and steel bars five-eighth inches and under to be bundled; a tag to be placed on each bundle.

All iron and steel bars over five-eighth inches, in addition to each shipment being painted on end a distinctive color, to be tagged as follows:—

One For Every Five

Shipment of fifty bars and under, one tag for every five bars.

Shipment of over fifty and under one hundred, one tag for every ten bars.

Shipment of one hundred or over, one tag for every twenty bars.

These tags to be fully addressed to consignee and destination and endorsed "Part of lot of five, ten, fifty, or one hundred, as the case may be, marked Red, Green, Yellow, etc.," in accordance with the colors painted thereon.

Shipments of bars, in five-foot lengths or under, exceeding a value of 10c. per pound, to be either boxed or crated.

8. (a) A shipment that fully occupies the visible capacity of car or that weighs 24,000 lbs. or more, when shipped from one station, in or on one car, in one day, by one shipper, for delivery to one consignee, at one destination, need not be marked, except when for rail and water transportation, as provided in Rule 9.

(b) L.C.L. shipments of cheese may be accepted with the factory brand plainly stencilled on the container, instead of name and address of consignee.

9. Each package, bundle or piece of freight either in carloads or less than carloads for transportation via rail-and-water, must be fully marked as required for less than carload freight, except for shipments of flour and other grain products, sugar, cement, and salt bearing standard brands or trademarks.

10. **Freight traffic for points in United States must be marked as required by the Official Classification and Supplements thereto.**

The proper marking and addressing of freight is as much in the interests of the shipper as of the carrier, as neglect in the addressing of packages may result in the loss or miscarriage of the goods.

If the above requirements and specifications are not complied with, freight will not be accepted for transportation.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

LOWER prices are again in evidence on linseed oil. These amount to 5c in some quarters for a total of 23c in the last couple of weeks, and 15c in others, bringing the basis of quotations down to the same level in all quarters. The weaker seed market has been directly responsible, though this seems to be stiffening again. Supplies of seed are being held up through strike at Fort William, and this may tie up the crushers seriously if relief is not afforded quickly.

A decline of 25c per 100 feet in screen wire cloth is noted in new prices issued for spring, a most unusual happening for manufactured wire products. The basis now prevailing is along same lines as that in the United States, though orders there are being accepted only for immediate delivery, while here the privilege of booking for spring has been extended. Galvanized poultry netting, which advanced recently, has been changed again, and prices now being offered on spring bookings is on same basis as that at which 1918 business was accepted.

Turpentine has declined locally two cents per gallon in the face of an advancing market in the south. It is intimated stocks are fairly heavy, and there is a desire on the part of some to stimulate business. If favorable war news continues, and there is every reason to believe it will, prices at primary points will, it is thought, go still higher. With the possibility of overseas shipments being permitted, the market is likely to rule with a very strong undertone.

Although declines have been made, the usual quota of advances is also in evidence. This is shown in an increase of 50c per box in the price of horse nails, and steel squares have registered a ten per cent. jump.

Orders for hammocks for next season are now being solicited, and quotations show an advance approximately 33 1-3 per cent. beyond those adopted for 1918. Booked orders for lanterns are being accepted at present prices for next year's delivery.

One of the heaviest increases made in any one line is that made on carpet sweepers and vacuum sweepers. Carpet sweepers, japanned finish, have gone up $5 per dozen, and nickel-plated finish $8 per dozen. Vacuum sweepers are up as much as $24 and $27 per dozen. Labor increases and high prices of all raw materials are factors contributing to this change.

New discounts on clothes wringers, which provide for higher prices, are generally effective now, and also new lists on some lines of washing machines. Wringer rolls and tub stands have also undergone a slight advance.

Other lines to follow the upward trend include heavy and light tee and strap hinges, canvas gloves, fruit presses, sap pails and plaster of Paris. Soldering coppers have also advanced, and another increase is noted in the price of charcoal.

MONTREAL MARKETS

MONTREAL, October 17.—Various advances are made in hardware lines this week. Washing machines are higher, and wringers, too. Heavy tee and strap hinges, three-in-one oil, black screen cloth, carpet sweepers, and horse nails are also advanced. There are many changes in auto accessory lines, and the detailed information gives considerable advances for a variety of goods under this class. Nails and iron and also wire are becoming scarcer, and the outlook indicates that they will be scarce for some time. Stoves and ranges and various winter wares are moving out rapidly.

Radius Rods and Axle Shafts Up

Montreal.

RADIUS RODS, ETC. — Increased from $2.63 front radius rods for use on Ford cars are now selling at the trade price of $2.92.

Axle shafts are higher, for the most part. Number 2505 D selling heretofore at $2 is now $2.07; Chevrolet No. 49 D, formerly $2.40, is now $2.17, and drive shaft No. 2595 B, previously $2.80, is now $3.19.

Pistons, Ring Gears Moved Higher

Montreal.

PISTONS AND RING GEARS.—Changes, most of them advances, are made in these lines. Pistons, standard and oversize, Number 3020 Standard and also numbers .0025 oversize and .005, .010 and .03125 are all selling at $1.95, the previous trade price being $2.08.

Ring gears No. 2518 are up to $3.75 from $3.36; driving pinions, 2597 B, from $1.21 to $1.35; connecting rods 32439 from $1.63 to 1.69 and brake shoes from 63c are reduced to 57 cents.

Reduced Prices For Auto Lenses

Montreal.

AUTO LENSES.—Prices have been readjusted on lenses of Osgoode make and are now as follows: For 7, 7½ and 7¾ inch sizes the trade price is now 1.95, or in dozen lots $1.82. For 8, 8¼ and 8¾ inch, $2.51 is now asked, or dozen, $2.35, and for 9, 9¼ and 9½ inch, $2.70, or $2.52 in dozen. Sizes from 9¾ to 11 inches are priced at $3.04. In dozen lots the price of these is $2.84.

Net Prices For Auto Oils, Greases

Montreal.

AUTO OILS AND GREASES.—Trade prices for Veedol line of oils and greases are announced as follows: Zero, light, medium, heavy and special heavy, steam cylinder and clutch grades are selling as follows: Bbls., 87c gallon; ½bbls., 93c; drums, 97c; ½ drums, $1.02; ¼ drums, $1.06, and this price for cases containing two 4 1-6 gallon tins and for one only 4 1-6 gallons. For 12-1 gallons $1.25 is charged per gallon.

Transmission gear oils for barrel lots are per gallon, 74c; ½ bbls., 80c; drums, 83c; ½ drums, 88c; ¼ drums and cases, 92c; and cases of 12 1's, $1.11.

Light, medium and heavy gear compound is selling at 13c in bbls.; 13 2-3c in ½ bbls., 17¼c in drums; 19¾c in ½ drums; 21c in cases of two 4 1-6 gallon tins; 21½c in cases of one tin and 24c in cases of 12 1's.

Engine-Driven Pumps Down; Timers, Primers

Montreal.

PUMPS, PRIMERS, TIMERS.—Engine driven pumps of crane type are now selling at a revised price of $12.38. Previous price for this line was $13.88. a lower price obtains for quantities. This quotation is used for Nos. 31595 to 31604, 32203 and 32304.

Prices on Campbell timers are given at $1.69 each or for lots of 12 $1.57½. Copley primers are priced at $5 each or at $4.69 in lots of 6. Stikit wrench sets sell at $3.75 in single lots or $3.50 when 6 are taken. Autokit No. 1 are sold at $12.38 singly and at $11.55 in lots of 6.

Celluloid Weatherstrip Quoted; Pliers Up

Montreal.

WEATHERSTRIP, PLIERS.—Weatherstrip of celluloid style is priced at 94c to the trade. This comes in strips 42 inches long and is used on regular and overlapping styles of windshields. In taking lots of 12 the price is lower at 87c.

Drop forged black pliers of the combination sort are priced at 27c per pair in the 6 inch length. In two dozen lots the price is 25c pair and for 8 dozen lots 23c pair. Previous prices were 23½c, 22c and 20c respectively.

Higher Prices Asked For Auto Materials

Montreal.

AUTO MATERIAL.—Various advances are made for 'Apco' material used on automobiles. Foot accelerators for Fords are now 87c and brake rod supports also 87c each. In dozen lots the price is 82c. New type oil gauges are 87c singly and 82c in lots of 24, the previous single lot price being 70c. Radius rod anti-rattlers are up to 44c each in 2 doz. lots, and steering rod anti-rattlers are the same. Special cotter pin assortments of this line are 31c per ass't. in lots of 24. Fan belt guides are quoted at 30c singly and at 28c in lots of 25. Steering column braces are 87c singly, advancing from 80c each and running board trusses are priced at $2.52 each, the former price being $2.01.

Prices Given For Thrust Ball Bearings

Montreal.

BALL BEARINGS.—Prices for ball bearings of Leader Thrust pattern are announced as follows: No. 607, 74c; Nos. 608, 610, 611, 94c Nos. 613, 614, $1.67; Nos. 616 and 617, $1.74; Nos. 618 and 619, $2; Nos. 621 and 622, $2.07; and Nos. 624 and 626, $2.23.

Fire Extinguishers Up; Siren Horns

Montreal.

EXTINGUISHERS, HORNS. — Advances are made for Pyrene fire extinguishers in one quarter this week, the single lot price being $11.20 to the trade and for lots of 6 $10.50 each. The liquid for these is also higher at $1.60 in single quarts and $1.50 in 6 one quart tins.

A line of Liberty siren horns is selling at $3.75 to the trade singly, or at $3.50 in lots of six.

Cylinder Head Gaskets Make Various Advances

Montreal.

GASKETS. — Advances of varied amounts are made for cylinder head gaskets. For Overland cars the No. 1 style is selling now at $3.43 trade; No. 12, used also on Overlands, are worth $1.50; No. 9, for Saxon sizes, are $1.70; No. 26, for Dodge, $1.27; and No. 82, for Dort, $2.23. For Chevrolet 490 and Baby Grand the price on No. 103 is 80c; No. 104, for Maxwell 25, $1; No. 101 for Fords, 63c, and those for Hudson Super Six, $2.17.

Patch, Cement Prices Named

Montreal.

AUTO SPECIALTIES. — Special patches and cements, etc., for the trade, known as the Wonder Worker line, are priced as follows: Vulco-Visco patches, 79c; Para Plastic tire repair outfits, 60c; self-vulcanizing fabric patch, small, 53c, and large, $1.05; shop size, $5.17. Rubber cement in 5-24 pints are priced 30c; 5-12 pints at 53c, and 5-6 pints at 90c. Vulcanizing cement in the sizes corresponding to the foregoing are selling at 41c, 79c and $1.31, respectively. Mica tire powder is worth 26c and tire and mat paint in gray and also in white are selling at 90c each for 5-6 pints. On this basis the trade discount is 25 per cent. A different list and discount applies where larger quantities are bought.

In addition to the foregoing Quad Lac in 5-12 pints is priced at 75c in small lots; engine finish in gray and black at 67½c each, and aluminum finish at 90c. This is put up in 5-12 pints also. Neatsfoot clutch compound is priced at 56c; iron cement in ½ lbs. at 53c; brazing compound in 1 lbs. at 86c; solder paste at 22½c in 2 oz. tins and at 94c in 1 lbs.; nickel in 5-6 pints at 49c; magneto and timer oil at 30c for 5-24 and bearing blue, 3x4, at 26c.

Rim-Kote in 5-12 pints sells at 67½c; rim and gasket cement in 2 oz. bottles at 19c and in 5-6 pints at 86c; hand soap, 15c; cushion dressing in 5-12 pints at 67½c; pantasote and leather top dressing and also mohair top dressing, both in 5-6 pints, 86c; indelible top lining dye at 90c; self-curing mohair top patches, 52½c; radiator cement, 56c; liquo seal, Ford size, 86c; 5-6 pint size, $1.50; radiator cleaning compound, 75c; Never-Freeze powder, $1.50; carbon remover, 5-12 pints, 75c, and 5-6 pints, $1.15; Jet-Lac, 5-12 pints, 67½c.

Carpet Sweepers, Clothes Wringers Up

Montreal.

VARIOUS LINES.—Advanced prices apply this week to various lines of Bissell carpet sweepers. Universal japanned are now $39 per doz.; nickel plated, $46; Grand Rapids Supreme, $41 for japanned and $48 for nickel plated. Clothes wringer discounts have been altered from 30 per cent and 10 per cent. to 30 per cent. and 5 per cent.

Horse Rasps Move Up; Oil, Wire Cloth

Montreal

RASPS, OIL, WIRE CLOTH.—Advances are made for Globe horse rasps. The discount on these is now 70 per cent. here.

Three in One oil, in the large size only, has advanced to $2.08 per doz.

New prices for next season's booking on black wire cloth are out and the new price is $3.25 per 100 feet.

Washing Machines Up; Horse Nails, Too

Montreal.

WASHING MACHINES, HORSE NAILS.—Advances are made for washing machines of various makes. Canadian are selling at $10 each; Dowswell at $10; Jubilee at $9.50; Peerless, $10.50; Hamilton, $12; Seafoam Electric, $107; and Style B. Seafoam, engine drive, $49. The regular discount is 30 per cent. and 10 per cent., as shown in current quotations.

Horse nails of M.R.M. make have advanced 50c per box.

Wire Nails Firm; Will Be Scarce

Montreal.

WIRE AND NAILS.—The markets are very firm and prices may be ad-

vanced. This would be justified, it is stated, for the costs here have so increased for labor and kegs as to make present margins very close. Advances are not unlikely and scarcity is forecast.

The same condition applies to wire products, although there is not a great deal of interest in the trade regarding smooth wire.

Wire nails are based at $5.35; cut nails at $5.85, and smooth steel wire at $6.25.

Normal Rope Business At Steady Prices

Montreal.

ROPE AND CORDAGE.—The market is firm, but featureless. Sales are about normal, considered in the light of "war" years, and stocks are ample to meet all demand upon them. Much future business is being booked for the fishing industry, a great deal of material being required to make up the nets and other needs of fishermen on the east coast. Pure manila rope basis is still 39c per pound; British manila, 33c, and sisal, 27½c.

Stove Prices Firm; Sales Active

Montreal.

STOVES, WARES.—The stove and range selling season is at its height and makers here have been taking care of customers' wants quite well. It is little trouble to sell the goods. Thus far a very fair assortment has been maintained and the demand is better for the medium priced and the cheaper lines than for those costing most. Heater sales have been good, and through exercising the greatest care a fairly satisfactory service in filling orders from the trade has been maintained. Various wares, pails, kettles, stove pipe and elbows, and a great many seasonable lines are now moving out. Scarcity of material continues and some of the fall and winter lines are delayed shipment on this account.

Outside Oil Prices Up; Steady Here

Montreal.

COAL OIL, GASOLINE.—Advances were made for coal oil as applying to Quebec City, the price there for Royalite being 19½c. For the better grades, Palacine and Electroline, 23½c obtains at this point, while Montreal quotations are unchanged at 19c per gallon for Royalite and 22c for Palacine and Electroline. Motor grade gasoline is still 34c here.

Scarcity Pronounced For All Sheets

Montreal.

SHEETS.—Under the shortening of supplies the markets are ruling firmer all the while and buyers often have to pay a premium if they desire spot delivery of the goods. There is no relief in sight, as far as the near future is concerned, and the same advice as heretofore given with regard to conservation still applies.

BLACK SHEETS—	Per 100 lbs.		
10 gauge	$9 75	$9 75	$11 50
12 gauge	9 50	9 65	11 00
14 gauge	8 25	9 00	7 95

26 gauge	11 35
22 and 2 4gauge	11 15
20 gauge	11 05
18 gauge	10 95
16 gauge	10 85

NOTE.—These prices are for full bundles, an extra charge of 25c per 100 lbs. is made for broken lots.

ADVANCE MADE IN PRICES OF GLASS

Important advances were made in glass on Thursday. Box glass discount is now 20 per cent. cent. and sheet glass five per cent. It is expected that drastic action may be taken very shortly by the United States by which all exports of glass to Canada may be prohibited or at least very greatly reduced. Stocks of window glass have been steadily decreasing for some time.

Steel and Iron Bars Rule Firmly

Montreal.

STEEL AND IRON.—The market rules with a firm undertone and prices are without change. There is little surplus and buyers are willing to take substitute sizes from time to time, realizing that the market cannot afford the choice of normal times.

Common bar iron, per 100 lbs.	$4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95

Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 22

Lead Products Steady; Light Movement

Montreal.

LEAD PRODUCTS.—The market is very steady and the undertone firm. In the absence of buying the inclination of the local market has been to rest itself. Buyers have been apparently unsettled owing to the favorable war news and indications of an earlier peace. The epidemic has also laid many up and business is not on its normal basis for the immediate present.

Note—The above prices for solder are for full boxes of 100 lbs. Jobbers will charge several cents more for small lots.

Old Material Inactive; No Changes

Montreal.

OLD MATERIAL.—The market is somewhat quiet and without feature. The preference is for such quantities of heavy casting scrap as are obtainable and these are holding with more steadiness than some of the lighter materials. Prices as given herewith are without change.

Dealers' Buying Prices:		
Tea lead	0 05	0 05¾
Heavy lead pipe	....	0 07½
Yellow brass	....	0 13½

Overshoes, lumbermen's rubber boots	....	0 05
Bicycle tires	0 04½	0 05
Automobile tires	0 04¾	0 05

Tin Market Steady; Copper, Lead Hold

Montreal.

INGOT METALS.—Markets are rather quiet, and this is attributed to the favorable war news. Users are not inclined to buy much beyond immediate needs.

COPPER.—Production is the greatest difficulty and there has not been much favorable change in this respect. Local business is limited and prices unchanged at 28¾c to 30c pound. Whether the present price will be continued after the end of this month is to be decided upon.

TIN.—A price of 90 to 92c per pound still obtains on this commodity and business is but fair. Supplies are not large but some tradng is being effected.

LEAD.—So great have been the continued needs of the governments that little lead is to be had for trade purposes. What business obtains here is firm at 10 to 10¾c per pound.

SPELTER.—A slightly firmer feeling has developed for this line in the States, but quotations here are unchanged at 10¼ to 10¾c per pound.

ANTIMONY.—Unchanged from the previous quotations of 17c per pound there is nothing of interest in the local market.

ALUMINUM.—The volume of business here in this commodity is small and the interest confined. For various lots prices range from 50 to 55c pound.

TORONTO MARKETS

TORONTO, October 17—Higher prices are again the order of day as shown in new quotations made on several important items this week. Carpet sweepers show a very sharp advance of from $5.00 to $8.00 per dozen, while vacuum sweepers are up as much as $27.00 per dozen. Wash tub benches are higher along with fruit presses and sap pails for delivery up to March 1. Plaster of Paris is higher and new lists are now ruling on various lines of oils which provide for an increase in price.

Sap Pails Up; Fruit Presses, Too

Toronto.

SAP PAILS, FRUIT PRESSES.—New prices have been named on sap pails for spring delivery, the 10 quart flaring, now selling to the trade at $22.50 per hundred. Orders are being booked on this basis for delivery up to March 1.

Higher levels have been reached on fruit presses and quotations which are now being made to the trade on the Arctic show a price of $4.75.

Carpet Sweepers Go Much Higher

Toronto.

CARPET SWEEPERS.— New prices have been issued to the trade on carpet sweepers and vacuum sweepers. The present basis of quotations represents a very stiff advance over former levels and it is supposed is the result of labor conditions and scarcity of raw materials. The Bissell carpet sweepers in the Japanned finish advance a straight $5.00 per dozen and the nickel plated finish $8.00 per dozen. On this basis the new prices work out as follows:—Champion Japanned $36.00 per dozen; Champion Nickel Plated $43.00; Standard Japanned $38.00; Standard Nickel Plated $45.00; Universal Japanned $39.00; Universal Nickel Plated $46.00; Grand Rapids Japanned $41.00; Grand Rapids Nickel Plated $48.00; Boudoir Nickel Plated $48.00; Princess Nickel Plated $49.00; American Queen Nickel Plated $51.00; Parlor Queen Nickel Plated $54.00; Elite Nickel Plated $54.00. Brushes for the carpet sweepers are now quoted at a new price of $7.20 per dozen.

In vacuum sweepers the advance has been very substantial also. The Grand Rapids Nickel Plated Vacuum Sweeper is now quoted at $108.00 per dozen, which represents an advance of $24.00. The Household Japanned is now quoted at $96.00 per dozen, the former price was $72.00. Superba Vacuum Sweeper Nickel Plated is now selling at $126.00 per dozen, the previous price was $99.00.

Lanterns Being Booked; Hammocks, Too

Toronto.

LANTERNS, HAMMOCKS. — Lanterns are now being booked for next year and prices are holding at the same levels now prevailing. Orders are now being taken for next year's delivery of hammocks at prices which range approximately 33 1-3 per cent. beyond opening figures for 1918.

Steel Squares Higher; Hinges, Too

Toronto.

SQUARES, HINGES—A further advance is recorded during the week in steel squares amounting to about 10 per cent. Labor and scarcity of raw materials are considered factors.

A change has also been made in heavy tee and strap hinges and light tee and strap hinges. quotations now being made on the basis of 10 per cent. discount from list.

Wire Cloth Lower; Poultry Netting

Toronto.

WIRE CLOTH, POULTRY NETTING—A decline of 25c in the price of black wire cloth has been recorded and prices are being accepted at $3.25 per 100 feet for spring delivery. Prices in the United States are on a similar basis, immediate delivery, but manufacturers here extend privilege of placing orders for spring.

Galvanized poultry netting on which the discount was changed to 12½ per cent. recently is now back at 15 per cent. in some quarters, booking orders being accepted on this basis.

Canvas Gloves; Charcoal Up

Toronto.

CANVAS GLOVES, CHARCOAL. — The trend of all cotton products is shown in a stiff advance on canvas gloves, which brings the price of the cheapest line to $1.60 per dozen pairs.

Charcoal has undergone a further revision in price and is now quoted at the high level of $1.90 per dozen bags.

Oil Lists Are Revised; Higher

Toronto.

OILS.—Changes in the list on various lines of oils have been made, and these generally provide for a slightly higher level of prices. List prices on some of familiar lines are: Black oil, summer, 18½c gallon; winter, 19½c; Imperial kerosine, tractor, 55c; Capital cylinder, 61c; machine oil, regular grades, 32½ to 41½; Standard gas engine, 39½; paraffine oil, 25c; all of which are subject to a trade discount of 15 per cent.

Horse Nails Up; Soldering Coppers

Toronto.

HORSE NAILS, SOLDERING COPPERS.—An advance of 50 cents per box has been made in M.R.M. horse nails and new prices figured on this basis appear in current market quotations.

Soldering coppers have undergone a revision upward, being quoted at 64½ base per pound.

Wash Tub Benches Higher

Toronto.

WASH TUB BENCHES.—Higher prices have been named on the Dowswell Lees line of wash tub benches, quotations being made to the trade at $2.45 each. An advance in the Otterville wash tub bench has also been made, this now selling at $1.75 each. This was shown as Ottawa in last week's issue.

Plaster of Paris Goes Up; Cement

Toronto.

PLASTER OF PARIS, CEMENT.—Higher prices have been named on plaster of paris, this being brought about by increased production costs and price locally being influenced by recent advance in freight rates. In single barrel lots, price is $4.50 per barrel, and in five barrel lots the price is $4.00. Supplies are ample to meet the demands of the trade, sales being considered reasonable.

Cement has been comparatively quiet. The volume of business has been small and prices show no change at figures appearing in current market quotations.

Cordage Steady; Twines Firm

Toronto.

CORDAGE, TWINE.—The market is very steady and there is no particular feature of interest in regard to the cordage situation during the week. The demand is rather quiet but this is a normal condition and the markets as a whole are ruling with a steady undertone. The prices are without change at the following basis—pure manila, 39 cents per pound; British manila, 33; sisal 27½ The market on twine is considered very strong, but no further change over recent advances is recorded. Stocks are rather limited in some grades and styles, but there is still some twine available.

Nails Firm; Wire Steady

Toronto.

NAILS, WIRE.—The situation generally in nails is without change. Sales have been maintained at a very satisfactory level right along, and the undertone to the market is decidedly strong. Wire nails remain unchanged at a price of $5.30 per 100 pounds to the retail

trade, cut nails steady at the recent advance, selling at $5.85.

In regard to wire there is nothing new in the situation. Quotations are firm and the demand within limited channels. The base price of smooth steel wire at $6.25 per 100 pounds being steadily maintained.

Gasoline Firm; Coal Oil Active

Toronto.

GASOLINE, OILS.—The situation in regard to gasoline shows no change from conditions outlined last week. Prices have held firm and the demand continues to represent a very large total. Prices are unchanged locally at 33 cents per gallon for the motor grade. Sales of coal oil are increasing every day with the shortening days and the greater use of oil for oil heating purposes.

Quotations show no change at the recent advance of ½ cent per gallon, prices to the trade now being from 18½ to 21½ cents per gallon according to grade.

Stoves Steady; Wares Moving

Toronto.

STOVES, ENAMELWARE — The situation in regard to stoves is without any particular feature this week. Manufacturing conditions are becoming more difficult all the time and this is resulting in a smaller production and must in time be reflected to a greater extent on the retail customer and ultimate consumer.

Enamelware is very steady and sales are being maintained at a very satisfactory level. It is becoming increasingly difficult to secure materials to keep the plants operating and what the next six months may bring forth is rather an uncertain quantity. Prices are unchanged at levels shown in current market quotations.

Situation in Iron and Steel Steady

Toronto.

IRON AND STEEL.—The situation is steady. Supplies are fair and no indication of an immediate price change has been noticeable. The demand is along seasonable lines which is rather quiet.

TORONTO—	Per 100 lbs.

No Signs Relief in Sheets, Plates

Toronto.

SHEETS, PLATES.—Promises of relief in the shortage of steel plate and light sheets have shown no signs of materializing as yet. Some of the warehouses have no stock on hand. The War Board continues to cut close on the orders that it allows to pass for filling and in some instances a disposition has been shown to release material for repairs more readily than for new work. There are some odd shipments of black sheets getting through but very little galvanised. Some authorities are of the opinion that commercially the situation will grow worse. Even a cessation of hostilities is not looked upon as a factor in affording immediate relief to the many industries now running so short, or cleaned out altogether. As a matter of fact some of the mills are advising those with orders placed and not given priority to leave same with the mills, for if they withdraw them, they must go to the foot of the list again. Altogether the situation is not showing results for encouragement given out some time ago. The outlook is not bright by any means.

BLACK SHEETS—	Per 100 lbs.

Prices shown are for full cases. An extra charge of from 25c to $1 per 100 lbs. is made for less than case lots.

Outlook No Better in Corrugated Sheets

Toronto.

CORRUGATED SHEETS, EAVETROUGH.—With the situation in flat sheets so serious, there is no question of doubt this must be reflected in the manufactured article. Supplies are becoming scarcer all the time and there seems little prospect of improvement for some time to come. All manufactured lines such as eavetrough, conductor pipe, etc., are in the same position as regards materials and it looks as though the trade must face a condition where "everything is going out and there's nothing coming in." Nominal quotations on corrugated sheets follow:

TORONTO—	Per 100 Sq. Feet	
Corrugated Sheets—	Gal'zed	Painted
No. 28 gauge	$ 9 00	$ 7 50
No. 26 gauge	10 00	8 50

Wrot. Pipe, Boiler Tubes Hold Firm

Toronto.

WROUGHT PIPE, BOILER TUBES. —The market on wrought pipe is firm and rules without change. Decreasing stocks are reported with production along continually narrowing channels.

Boiler tubes move out but they don't come in and the result of this condition is easily seen. Arrivals have been nil this past week and no definite word of any shipments is yet forthcoming.

Spelter Shows Easier Tendency

Toronto.

INGOT METALS. — A little easier feeling is noted in spelter but as yet there is hardly a quotable change. Lead is very scarce but the market is rather dull. Tin is quiet and similar conditions apply to other lines.

Copper —Conditions remain about the same. Production is being very largely absorbed in government war work of one type or another, and commercially there is little to report. Prices locally are steady at 30 to 32 cents per pound.

Tin.—The market is very quiet and there seems little disposition to stir up any excitement. Prices are held at unchanged levels at 95c to $1.00 per pound and the requirements of the trade are being met from supplies which continue to arrive fairly well.

Spelter.—There is a weaker feeling in the market, but there is hardly a quotable change as yet. The demand is within rather restricted channels and there seems to be sufficient stock to take care of the demand. Prices which rule with a weak undertone are named at around 11 cents per pound.

Lead.—Producers are still operating at a high pitch to try and keep up with the demand. The market generally may be said to be quiet. Locally the situation is not too serious and quotations hold steadily at 10½ to 11 cents per pound.

Aluminum.— Government work continues to absorb the bulk of the metal available and for this reason there is little to report commercially. Quotations nominally may be said to range at 50 cents per pound.

Antimony.—Quiet reigns supreme in this market and the demand is comparatively light. Prices are unchanged, holding at 18 cents per pound locally.

Pig Iron. — Production figures for September just recently made public show that a substantial increase in pig iron and steel ingots production was recorded. Even better production figures are looked for during the present month, and it would now seem that the iron and steel industry is operating at practically its full capacity. Locally the situation is runing along normal lines. Prices are only nominal and for this reason are largely withheld.

LONDON MARKETS

LONDON, October 17.—Important price changes have been made during the week, and advances are provided for in practically every instance. Carpet sweepers show a stiff advance, the japanned going up $5 per dozen, and the nickel-plated $8 per dozen. Included in the list of goods to follow the upward trend will be found shaving soap, jellstone, iron handles, clothes wringers, and some lines of washing machines.

Carpet Sweepers in Stiff Advance

London.

CARPET SWEEPERS, VACUUM SWEEPERS.—A decidedly sharp advance has been recorded on the Bissel line of carpet and vacuum sweepers. The wholesale trade received notification that the Japanned carpet sweepers were to go up $5.00 per dozen and the nickel plated $8 00. New prices are immediately effective. Figured on this basis the present lise of quotations is as follows:—

Carpet Sweepers: Champion, Jap'd., $36 doz.; N.P., $43 doz.; Standard, Jap'd., $38 doz.; N.P., $45 doz.; Universal, Jap'd., $39 doz.; N.P., $46 doz.; Grand Rapids, Jap'd., $41 doz.; N.P., $48 doz.; Boudoir, N.P., $48 doz.; Princess, N.P., $49 doz.; American Queen, N.P., $51 doz.; Parlor Queen, N.P., $54 doz.; Elite, N.P., $54 doz.

Vacuum Sweepers: Household, $96 doz.; Grand Rapids, $108 doz.; Superba, $126 doz.

Brushes for Carpet Sweepers, $7.20 doz.

Clothes Wringers Up; Wash Machines, Too

London.

CLOTHES WRINGERS, WASHING MACHINES.—Higher levels have been reached on clothes wringers through a revision of the discount, lists appearing in the current market quotations now being subject to a discount of 30 and 5 per cent. in place of 30 and 10 per cent. formerly in effect.

With washing machines the discount remains the same. However, on several types the list prices have been revised, changes amounting to $1.00 in some instances and as much in $5.00 in others. Prevailing lists appear in the current market quotations and are subject to a discount of 30 and 10 per cent.

Iron Handles Up; Oil Heaters Active

London.

IRON HANDLES, OIL HEATERS.—A new price has been established on the Potts iron handles, the figure now being $1.50 per dozen. Sales of oil heaters continue along very satisfactory lines, and there has been no change in price recorded. The present list on the Perfection Heaters No. 525 is $7.00 each; No. 530, $8.25 and No. 630, $10.25 all of which are subject to a discount of 25 per cent. The Perfection Heater wick No. 500 are quoted at $3.45 per dozen net.

Loaded Shells Move; Shaving Soaps Up

London.

LOADED SHELLS, SHAVING SOAP.—Although the bulk of the booked orders for loaded shells have gone forward, there is still a fair movement to the retail trade. Prices have held firm and unchanged, the Dominion Black powder being quoted at list plus 10 per cent. and the Dominion smokeless powder shells at net list.

A higher range of prices is shown on shaving soap and quotations which are now being made to the trade for the Williams Barber Bar are 76 cents per pound, Williams Shaving Stick, large, $4.05 per dozen, Williams Shaving Cream in tubes $4.05 per dozen.

Jellstone Up; Nails Steady

London.

JELLSTONE, NAILS.—Higher prices have been found necessary on jellstone, which is provided for in a revised list. The new list on the 20th Century jellstone, white, is 13 cents per pound and on tints 14 cents per pound, both of which are subject to a discount of 40 per cent.

There has been no change in the situation in nails during the week. Wire nails are still quoted at a base of $5.30 per 100 pounds and the cut nails at $5.85.

Linseed Oil Down Again; Turpentine

London.

LINSEED OIL, TURPENTINE. — Linseed oil has declined still further this week and prices to-day are five cents below last week's heavy drop. The seed market seems to have steadied and it is thought that unless phenomenal changes are made either way that the present basis of quotations on linseed oil will hold fairly steady.

Turpentine is enjoying a fair sale. Conditions in primary points show a little more strength but locally the market is unchanged. Prices on both linseed and turpentine appear herewith.

Linseed Oil:—	Raw	Boiled
1 to 2 bbls.,	$1.87 per gallon.	$1.90
3 to 5 bbls,	$1.86 per gallon.	$1.89
6 to 9 bbls.,	$1.84 per gallon.	$1.87

Less bbls. add 10 cents per gallon.

Turpentine:—1 bbl. lots, $1.00 per Imp. gal.; 2 to 4 bbl. lots, 99c per Imp. gal.; 5 gal. lots, $1.10 per Imp. gal.

WINNIPEG MARKETS

WINNIPEG, October 17.—Price changes during the past week are again fairly numerous, and with two exceptions are all on the upward trend. Included in the list to go up are such items as pine tar, harvest tools, anvils, tinned copper, silver-plated flatware, 900 ware, alarm clocks, watches, candlewick packing, cup hooks and square shoulder hooks. Stove pipe and solder have registered declines.

Solder Registers Substantial Decline

Winnipeg.

SOLDER.—Due to a further drop in the market price of tin the Winnipeg jobbers have been able to reduce their prices considerably on solder. Prices at which it is now selling to the trade are as follows: Standard half and half, full

cases, 55c lb.; less than cases, 56c lb.; Strictly half and half, less than cases, 57c lb.

Cup Hooks Go To Higher Levels

Winnipeg.

CUP HOOKS.—Prices on brass cup hooks show a further advance during the week. This is the first change for the past year and is considered very moderate in view of the advances in raw material and labor. Prices now ruling are as follows:

Brass Cup Hooks No. 81—½-inch, $2.05; ⅝-inch, $2.10; ¾-inch, $2.20; ⅞-inch, $2.50; 1-inch, $2.90; 1⅛-inch, $3.85; 1¼-inch, $4.95 gross.

Brass Square Shoulder Hooks No. 412—¾-inch, $2.20; ⅞-inch, $2.50; 1-inch, $2.90; 1⅛-inch, $3.85 gross.

Anvils Move Up 3 Cents Pound

Winnipeg.

ANVILS.—Manufacturers announce another advance on anvils which move up 3c per pound. This is said to be due to the advanced cost of labor as well as the increased freight rates. Stocks are reported as badly broken, owing to the fact that the export of Peter Wright anvils is prohibited by the British Government, while the American Government is taking practically all the United States output, so even further advances would not come as a surprise. To-day's ruling prices on Peter Wright anvils or equal is as follows: 80 lbs. and over, 27c pound; Clip Horn, 80 lbs. and over 28c pound.

Harvest Tool Discount Revised

Winnipeg.

HARVEST TOOLS.—Due to further advances in raw materials as well as the advances in handles, new prices have just gone into effect on all lines of harvest tools. These are now selling at 17½ per cent. discount from list.

Stove Pipe Revised; Copper Up 5c lb.

Winnipeg.

STOVE PIPE, TINNED COPPER.—A slight revision has been made on patent stove pipe during the week and new prices now ruling are given herewith: Patent Standard, 6-inch, $22.25; 7-inch, $23.55 per 100 lengths.

Prices on tinned copper which has remained firm for the past year or more, shows an advance of 5c per pound during the week, making to-day's price 65c per pound, while planished copper remains firm at former quotation of 75c per pound.

Silver Plated Flatware Higher

Winnipeg.

SILVER PLATED FLATWARE—New selling prices on Community silver plated flatware which show the heaviest advance since the commencement of the war have been advanced. These show an average of about 20 per cent. over former prices. The following are the net prices to the trade on a few of the more familiar items:

	Doz. Community Plate	Doz. Reliance Plate	Doz. Par Plate
Tea Spoons	$4 54	$2 60	$1 80
Dessert Spoons	8 44	4 80	3 34
Table Spoons	9 08	5 20	3 60
Soup Spoons	9 08	5 20	....
Berry Spoons	21 72	12 84	10 92
Sugar Spoons	9 48	5 16	3 96
F. H. Forks, Dessert	8 44	4 80	3 34
F. H. Forks, Medium	9 08	5 20	3 60
H Handle Knives, Des.	13 10	11 60	....
H Handle Knives, Med.	13 50	11 90	....
Gravy Ladles	16 56	13 08	8 64
Pickle Forks	9 24	7 56	5 46
Pie Servers	28 56	18 96	....
Sugar Tongs	10 68	.....	....

Higher Prices On Other Cutlery

Winnipeg.

CUTLERY.—Following the trend of advancing prices other manufacturers have announced new prices covering their products. These include the lowest price and one of the highest priced lines of flatware as No 900 ware and 1847 Rogers Bros. flatware. Prices now in effect on these lines are given below.

900 Teaspoons, $4.25 gross; 900 Dessert Spoons, $8.25 gross; 900 Table Spoons, $8.50 gross; 900 Dessert Forks, $9.35 gross; 900 Medium Forks, $9.60 gross; 900 Dessert Knives, $1.85 dozen; 900 Medium Knives, $1.85 dozen.

1847 Rogers Bros.' Tea Spoons, $3.90 dozen; Dessert Spoons, $6.95 dozen; Table Spoons, $7.80 dozen; Dessert Forks, $6.95 dozen; Medium Forks, $7.80 dozen; Dessert Knives, $4.75 dozen; Medium Knives, $5.00 dozen.

Alarm Clocks, Watches Revised

Winnipeg.

ALARM CLOCKS, WATCHES.—New prices have been announced during the week on several lines of alarm clocks and watches. These are advances attributed to increased cost of production. Ruling prices to-day are as follows: Alarm clocks, Sleepmeter, $1.85; Lookout, $1.75; America, $1.35 each; Watches, Boyproof, $1.25; Pocket Ben, $1.25 each.

Candlewick Higher; Pine Tar Up

Winnipeg.

CANDLEWICK, PINE TAR.—Owing to the continued advances on all cotton products, a further advance has been considered necessary on candlewick packing which moves up to 75c pound.

Prices on pine tar show a further advance after holding firm for the past six months and the different sizes are now quoted as follows: Pine tar, ½ pints, $1.50; 1 pints, $2.40; ¼ gals., $4.00 doz.; ½ gals. 60c each; 1 gals., $1.15 each.

Linseed Oil Holds; Turpentine Steady

Winnipeg.

LINSEED OIL, TURPENTINE.—Linseed oil prices still hold firm on the local market at former prices which are as follows: Raw linseed oil, $2.20 gal.; boiled linseed oil, $2.23 gal.

No change is recorded during the week on turpentine which is holding steady with the usual seasonable demand. Prices ruling are as follows: barrels, $1.10 gal.: ½ barrels, $1.13 gal.; 5 gal. lots, $1.15 gal.; 1 gal. lots, $1.15 gal.; plus the usual extras for containers.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Oct. 17—The rate of steel production in September was 12 per cent. above the rate in August, which was about 4 per cent. below the rate in four months preceding. The increase even exceeds the expectations that were entertained, based on the passing of hot weather.

A further and very encouraging fact has come out, by reason of the practical completion of statistics of the country's steel ingot production in 1917. Previously information as to ingot production has come through reports of 29 large companies, which reported monthly. In 1916 these companies made 88.15 per cent. of the country's output, and it has been assumed, naturally, that they contributed about the same amount to the 1917 output. On that basis the 1917 output was about 42,200,000 gross tons of ingots. Now, however, returns from practically all producers for 1917 show that in that year the output was about 43,700,000 tons, or 1,500,000 tons more than has been assumed. The 29 companies contributed only 85.10 per cent. to the 1917 output, presumably by the fortuitous circumstance of other producers having indulged in more new construction than did the 29 companies as a whole.

On the basis that the output of the 29 companies in September represented 85.10 per cent. of the total output, as was the case in 1917, and making allowance for the number of working days, the country produced steel ingots in September at the remarkable rate of 46,800,000 gross tons a year. The favorite estimate of capacity has been not less than about 47,000,000 tons, this estimate being based on actual output in 1916, which was 41,400,000 tons, plus allowance for new construction. Outputs have appeared to fall much below this amount, and the forced explanation has been that on account of war time difficulties, largely the shortage of scrap of good quality, the output feasible under normal working conditions could not be obtained. Now the situation appears much more favorable, and the common view is that October will show a better rate of production even than September. Naturally there will be some decrease with winter weather, but perhaps nothing serious.

Steel Requirements and Supplies

These new steel ingot production statistics permit a close examination of steel supplies in relation to requirements as formulated by the War Industries Board and an estimate of the deficit between supplies and the program,

WEEKLY PAINT DEPARTMENT

Big Chances for Paint Dealers

More Painting Being Done This Fall, Especially by Farmers, Than For a Long Time—People Realizing That it is Poor Economy to Neglect Work That Should Be Done

PAINT men who have been studying the situation all over Canada this fall report two outstanding conditions that appear to be almost diametrically opposite. One is that it is a long time since so much painting has been done, especially in the farming districts. The other is that never in their travels have they seen so much work that needs to be done. Both of these conditions mean good business for the paint dealer.

Many firms report that their paint trade has kept up splendidly throughout the year and that at the close the volume of business will show an increase of from twenty to fify per cent. There is only one explanation to this they say. They have kept everlastingly at it.

Boosted the Sales.

By attractive window displays, by timely advertising and by talking paint, paint and more paint all the time, they have not only maintained one of their best paying departments, but have increased the turnover. Many firms have found it pays well to hold weekly or semi-monthly conferences of the clerks, at which special selling talks in connection with paints are given. Very often arrangements are made with travellers for the paint manufacturers to be present, and in this way the clerks can learn all about the various lines and get first-hand information which proves invaluable to them later in selling.

Keeping Right At It.

The firms who have been making new sales records are not ceasing their efforts because they have "gone over the top" already as far as sales go. Some of their very best sales are being made right now. They are boosting fall painting for all they are worth and are getting the very best returns for their efforts. They are taking at its full value the fact that probably there never was in the history of the Dominion so much painting to be done. Hundreds of people have been leaving off work that should have been done a year or two years ago. They are realizing now that had they done the work a year or two years ago they would have saved money. They not only need more paint now, but in many cases the material upon which they have to work has suffered from the processes of decay that result from weather conditions. Only paint and good paint can prevent disintegration of this kind. Scores of people have had this lesson driven home to them. They have learned to their cost that it does not pay to put off painting. It is an expensive policy in the long run.

Farmers Are Learning.

The farmers especially are learning this. With machinery, lumber and other things at the present prices the farmers are realizing that it is far cheaper to preserve the things they have by the application of a little paint than to buy new. The farmers are more prosperous than they have ever been and they are putting more of their money this fall into paint than they ever did before. The live dealers realize all this and are keeping up the good work by advertising their paints and talking paint to all customers as they never did before.

Don't Mind Prices.

It seems more or less remarkable, but dealers all over the country report that very few people make any kicks about the higher prices. Certainly the higher prices of paints is not materially affecting the trade of many firms. They have sold more paint than ever and much of it at prices that were double any they had ever asked. It is a question of getting the goods apparently. They realize that paint is the only thing that will do the work they want done and do it efficiently. Therefore, they are going to have paint, no matter if it does cost a little more because they realize that they are saving money in the end.

Used Extensively In Every Line of Trade— Boeckh's Brushes!

There's a high-grade Boeckh brush especially suitable for every requirement—no matter how exacting it may be.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Oct. 17—Linseed oil has not declined in price, even though flax markets are much lower. It is expected that some lowering of price may be brought about if the transportation from the head of the lakes can be improved; otherwise the supply of seed here will not be ample to cause a lowering of quotations. As heretofore pointed out, lower prices obtain for future delivery than for spot oil.

Paint orders for delivery next spring are coming in well, travellers securing a good volume of business from various districts. Putty is very active and firm, but unchanged. White lead in oil is also firm and glass prices may be increased. Varnishes are almost sure to advance in the very near future.

Oil Still Rules Unchanged

Montreal.

LINSEED OIL.—Although flaxseed markets have declined materially during the past two or three weeks, the price of spot linseed oil holds well. This is due to the scarcity of seed and the slow delivery of the same from the West. The strike of freight handlers at Fort William has put a crimp in the transportation so that local crushers have little promise of having supplies augmented.

There is a feeling in some quarters that prices for oil will be lower. There is, on the other hand, a feeling that conditions do not warrant such a hope. At any rate prices are maintained for the week without change, and the matter will rest largely on the improvement of seed delivery. From a standpoint of the future, indications are that crop results will be reasonably good in the Canadian West.

Linseed Oil—	Raw, Imp. gal.	Boiled, Imp. gal.
1 to 2 barrels	$1.98-$1.99-$2 05	$2.01-$2.02-$2.08

Add 10c per gallon in smaller quantities.

Turpentine Seems Likely to Advance

Montreal.

TURPENTINE.—The market is very firm and some are not offering any to the trade. This means that local stocks are not very great and that it will be a little time before the stocks are better. There seems to be every likelihood that prics here will advance.

Rosin is still firm and the wholesale price on this to-day is $17.25 per barrel of 280 pounds—a very high price.

Turpentine.		Per Imp. Gal.
1 to 4 barrels	0 95	0 98 1 00
5 barrels and over		....
Small lots		1 01 1 06

(Packages extra)

Putty Firm; Sales Large

Montreal.

PUTTY.—The market is steady and the undertone firm. Supplies of whiting are not too large, some jobbers already looking around to augment their stocks. It will depend upon the ability of the trade to get enough whiting as to whether prices hold on the existing basis. The volume of business for this line has developed and increased of recent weeks, and a very satisfactory trade is being done. Prices are unchanged.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Paint Makers Need White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—Paint makers require a great deal of white lead in oil at this season of the year and this is their chief concern now. The demand from the trade is not large, but is reported normal. A great many orders will be shipped out before the expiration of the time in which orders will be accepted at to-day's prices—and which expiry date is Nov. 30. Quite a number have protected themselves in this way. Prices are still without change, five-ton lots still selling on the basis of $17; ton lots, $17.35 and smaller quantities, $17.85 per 100 pounds.

Mixed Paint Sales For Future, Good

Montreal.

PAINT AND SPECIALTIES.—All markets are steady and firm. Bookings are coming in well, the paint men state, and they are well pleased with the promise for next year, in so far as output is concerned. The container question is still surrounded with considerable uncertainty. Travellers have been sending in very good orders, mixed paints, varnishes and the general specialties wanted for spring figuring in business coming to hand.

Varnish To Go Up; Glass May Advance

Montreal.

VARNISHES, GLASS.—It is evident that the varnish makers intend to ask more money for their lines soon. Staffs have been depleted lately, through so much illness, and one large maker pointed out to HARDWARE AND METAL that this was a reason for change being withheld now. This will probably come in the immediate future. Raw material is costing much more all around.

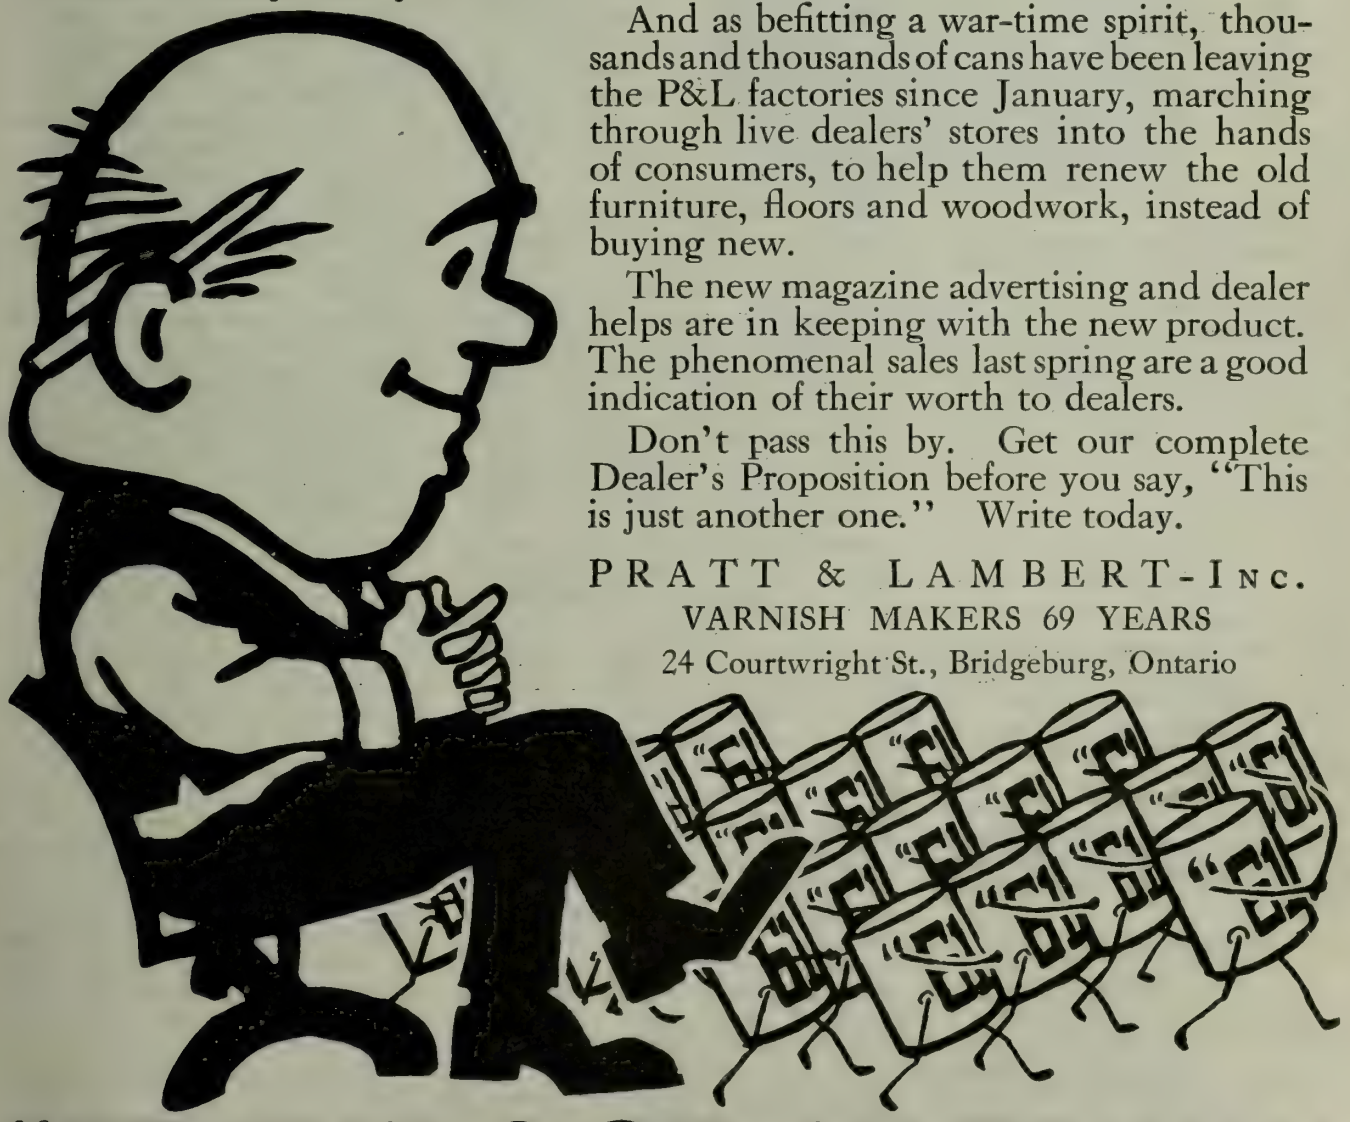
Glass is selling at very little over the importer's laid-down costs, it is claimed. Certain elements have been contributing to maintain the present price basis, and even to better it, but it is generally understood that existing quotations as reported in the current quotation page are being adhered to. An advance is not at all improbable.

TORONTO

TORONTO, October 17.—Lower prices have been named on linseed oil again this week and basis is now same in all quarters. Turpentine has also come down 2c gallon, though conditions at primary points show a stronger tone. Sales of mixed paints for spring are being made and those manufacturers soliciting business report volume of business very good. Glass is very strong and higher levels likely at an early date.

Linseed Oil Comes Down Again

Toronto.



LINSEED OIL.—Further declines have been recorded this week and basis of quotations is now the same in all quarters, viz., $1.87 per gallon for raw in 1 to 2 barrel lots. The seed market is a little easier than a week ago but seems to be on a fairly firm basis now and an advance during the past couple of days is recorded. Shipments to the East are being held up through strike at Fort William and this may result in tying up crushers unless some relief is afforded at once. Supplies generally are sufficient to take care of requirements but the situation is by no means easy.

Linseed Oil—	Raw Imp. gal.	Boiled Imp gal.
1 to 2 barrels, gal.	$1 87	$1 89½-$1 90
3 to 5 barrels, gal.	1 86	1 88½- 1 89

Add 10c gallon in smaller quantities.

"A War-Time Seller"

CONCEIVED during war times, to enable dealers to cash in on the war-time demand for an all 'round household finish that would be worthy of the valuable time any housewife or handy man spent in applying it, "61" in Colors was born. There you have it — a better varnish stain; clear and transparent; colors with life and sparkle. As for durability — these new colors have all the toughness, elasticity and waterproof qualities that have characterized "61" Natural (clear) these twenty-five years.

And as befitting a war-time spirit, thousands and thousands of cans have been leaving the P&L factories since January, marching through live dealers' stores into the hands of consumers, to help them renew the old furniture, floors and woodwork, instead of buying new.

The new magazine advertising and dealer helps are in keeping with the new product. The phenomenal sales last spring are a good indication of their worth to dealers.

Don't pass this by. Get our complete Dealer's Proposition before you say, "This is just another one." Write today.

PRATT & LAMBERT-INC.
VARNISH MAKERS 69 YEARS

"61" FLOOR VARNISH

for Floors, Furniture and all Woodwork

Now made in Eight Colors

Turpentine Drops 2 Cents Gallon

Toronto.

TURPENTINE.—A decline of two cents per gallon locally has been recorded in turpentine. This is the result of an effort to stimulate sales somewhat, it is stated, as primary points show an upward movement. The outlook seems to be for a higher market in the South, if war news continues good, and there is every reason to believe that it will. This is quite likely to result in shipments getting overseas and when this condition is assured, higher turpentine is almost a certainty. Already it is intimated that 7,000 barrels of rosin have been allotted shipping space and that turpentine may follow is not unlikely. In the meantime it is thought prices will not go up more than three or four cents more.

Turpentine—	Imp. gal.
1 barrel (barrel included)	$0 98-$1 00
2 to 4 barrels (barrels included) ..	0 97- 0 99
5 gallon lots	1 08- 1 10

Mixed Paint Orders Coming

Toronto.

MIXED PAINT.—The outlook seems to be brightening and retailers as a whole show a disposition to book for spring delivery at new prices recently established. The situation generally is considered fairly satisfactory and spring requirements will, it is thought, be very well taken care of. A continuation of the war for another year will probably show the effects of the difficulties confronting the manufacturers more clearly than any one of the past four years has done.

Steady Tone To White Lead in Oil

Toronto.

WHITE LEAD IN OIL.—The market is steady and the demand within comparatively narrow channels, a seasonable condition. Lower prices on oil have not yet made any appreciable difference in the market, the scarcity of lead largely offsetting this. Quotations on pure white lead in oil, ton lots, are being made at $17.80 per 100 pounds; in smaller quantities the price is $18.15. The various brands appear in current market quotations.

Glass Holds Firm; Putty Selling

Toronto.

GLASS, PUTTY.—The market continues to rule with a strong undertone but there is no particular feature of interest in the situation. Prices appearing in current market quotations are unchanged.

Very fair sales of putty continue to be made and the volume of business is considered quite satisfactory. Prices are firm and rule without change as follows:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

PITTSBURG MARKET REPORTS

Continued from page 61.

with enquiry as to where the deficit will fall.

It will be recalled that early in July the War Industries Board estimated the steel requirements for the half year at 20,000,000 tons, this being in net tons of finished rolled steel. At the same time it pointed out that the industry had never made more than about 16,500,000 net tons in a half year. There is some doubt whether that statement was strictly correct. Later the board increased its estimate of the requirements to 23,000,000 tons for certain, with a possibility that the total might be 25,000,000 tons. The increases were due, first, to increased demands of the A.E.F. and our Allies, and second, to large demands of the Railway Administration for rails and for cars in addition to the 100,000 bought a few months ago. The board's estimate of supply was increased only to 17,000,000 tons.

There is information available that permits a close estimate of rolled steel supply from the tonnage of ingots produced at about 6,200,000 net tons in July and August, and at about 3,300,000 tons for September, making 9,500,000 tons for the three months. In view of the September rate of output and the expectation that October will do still better, 10,000,000 tons or possibly a trifle more is to be expected for the current quarter, making 19,500,000 to 20,000,000 tons for the half year.

Thus there will be a deficit of not less than 3,000,000 tons between the supply and the estimated requirements, and the question, now that production is speeded to the utmost, is simply where the deficit will fall. Enough is now known to make a rough approximation. It will fall in part upon supplies for the general war program, chiefly by way of reducing the factor of safety that has been used in making up the estimates, and partly upon the commercial industries that have been recognized as helpful in winning the war.

It is certain that some parts of the war program have been allotted more steel than they could currently use, whereby reservoirs have been created against the possibility that speeding up afterwards might draw from these reservoirs. Three instances may be mentioned in connection with the prospective reduction in the factor of safety, shell steel, ship steel and railroad steel as follows:

(1) In the past ten days a large shell forging plant at Bridgeport, Conn., has been closed for lack of steel, while a forge shop at Cleveland lost three days' time and is now put on the basis of operating two-thirds capacity. The supplies of forged material have been well in excess of the capacity of the machine shops to make finished shells, and thus the production of shells will continue as formerly, but the reservoir against speeding up of machine shops in future is decreased.

(2) The quota of plates for shipbuilding has been 50,000 net tons weekly for several months past. Several weeks ago a survey showed that fully 1,000,000 tons more plates had been shipped from mills than had been applied to steel hulls. Likewise, there have been many more steel hulls launched than have been completed, because the bottle neck has been the flow of engines, boilers and the thousand and one other appurtenances needed for completing hulls. As the flow of equipment is expected to increase greatly, and as the shipways are certain to launch hulls more and more rapidly each month, it was desirable to have this factor of safety, of hulls awaiting completion, and of plates awaiting application in hulls.

(3). The Railroad Administration has been desirous for some time past of receiving 60,000 tons of rails a week, 40,000 tons a week having been furnished. Also, it desired that the 100,000 cars ordered a few months ago be put through, so that additional orders could be placed. The railroads have been functioning quite satisfactorily through the spring and summer, but to cope with winter conditions needed additional facilities to be on the safe side. Now the case is, as stated plainly in an official statement by Chairman Baruch of the War Industries Board, that the Railroad Administration has renounced claim to some of the steel allotted to it in favor of General Pershing, and there is a possibility, with particularly bad weather, of railroad difficulties this winter.

As to steel for commercial purposes on the preference list or accorded the lower degrees of priority as helpful in winning the war, there will be still more serious curtailment than there has been and there may be some rearrangement of priorities and preferences to take cognizance of the new conditions when it is clear the steel supply will not stretch through the preference list, and in the case of some products will not last through the priorities, which come before the general preference list. One item in this direction has already appeared. Oil country goods, chiefly tubular products, distributed through jobbers, have hitherto been given B-4 priority, the same as standard steel pipe, whereas when ordered direct by consumers have been accorded B-2. Now the order is that B-2 is to apply also to oil country goods when distributed through jobbers, and the account is to be kept entirely separate from the regular replacement account of jobbers. As the mills cannot increase their output of tubular goods in general, this will mean that jobbers will receive more oil country goods for distribution and less standard steel pipe and even hitherto their replacements, month by month, have been falling somewhat behind.

Hydro Problem is Before Ontario Government

BETTER business administration of the Hydro-Service is demanded by many manufacturers and other users of Hydro power in Ontario. Ottawa has been approached for aid against the arbitrary cutting off methods which have been injuring industry. Ottawa has put the matter up to the Provincial Government of Ontario, and the issue must shortly be decided for or against Autocratic Control of the Hydro. On this vital subject see THE FINANCIAL POST dated Oct. 12th—a leading article on page one.

WILL VICTORY LOAN AFFECT EXCHANGE?

A vigorous and interesting special article on the question of Canadian-American Exchange and the Victory Loan forthcoming, is written for THE FINANCIAL POST of Oct. 12th by a Canadian banker in New York. See this. It is important to International business relations.

REGULATION OF SEED SUPPLY IN WEST

An almost new system for supplying seed wheat for settlers and for making collections for the supply has been inaugurated. Particulars detailed authoritatively by E. Cora Hind, appear in THE FINANCIAL POST of Oct. 12th, and the matter is worth your special attention.

CHANGES IN C.P.R. ADMINISTRATION

Retirement of Lord Shaughnessy and appointment of E. W. Beatty to his position as president of the C.P.R. with the results immediate, and to be anticipated from the changes form the subject of another special and important article in THE FINANCIAL POST of Oct. 12th. The big business prospects ahead for the C.P.R. mean more business for every Canadian concern.

OTHER CONTENTS OF THE POST FOR OCT. 12

Toronto Railway Co. to do Its best to Give Service.
Canadian Pacific Classed as "Peace Stock."
Regulation of Gasoline Sales.
Canadian Flour in Chinese Market.
August Trade With States Biggest of the Year.
British Imports to Canada Now Under License.
Ogilvie Sales Over $56,000,000 in Year.
Substantial Gains in Bank Clearings.
Earl D. Babst—Student of Groceries—(Biographical).
The Farmer's Income and Income Tax.

A Quality Standard

"Equal to Berry Brothers" is a statement often heard by varnish buyers. This is because the uniform dependability of all their products has caused them to become the standard of comparison.

There is no surer prelude to an artistic and lasting finish on woodwork, walls, floors and ceilings than Berry Brothers' varnishes, enamels and stains.

The wide knowledge of this fact among discriminating buyers makes all products bearing the Berry label easy to sell.

BUILDING PAPER

It's Easier to Sell

Automobile SKATES

Their high quality is well known to Hockey Players and to the skating public.

The broad, straightforward Guarantee fully protects the purchaser.

Sales are therefore made quickly, saving the salesman's time and reducing selling expense.

How is your stock?

Canada Cycle & Motor Co. Ltd.

Makers of GOOD Bicycles

Montreal Toronto WESTON, ONT. Winnipeg Vancouver

CARTER'S

The Best Quality of Genuine Dry Red Lead and Genuine Dry Powdered Litharge

Paper manufacturers want a Red Lead to protect their steam and water pipes, and a Litharge to reline their digesters. Rubber and Color Makers need them. Shipbuilding firms must have them. Railways and Ironworks use them. Are you ready to supply the requirements of such firms in your district. Also

YOUR PAINTER

must have Genuine Red Lead and Litharge to meet his requirements. Do not delay in putting in a stock or you will lose good business which is rightly yours.

The Carter White Lead Co. of Canada, Limited, 91 Delorimier Avenue, Montreal

TO THE WESTERN CANADA DEALER

Does a connection with a progressive and aggressive, amply capitalized and fully equipped concern, grown to be the largest paint and varnish factory in Western Canada, appeal to you?

BRITISH AMERICA PAINT CO., LIMITED

Wants more live dealers in Western Canada. It co-operates with its dealers to make bigger and better business. Join up with a pushing selling organization that will help you put 'em over. Send for booklet "The Evidence." Tells the story in fac-simile letters from Bapco dealers.

DISTRIBUTING POINTS

Established at Victoria in 1900 the British America Paint Co., Ltd., has found ever-widening markets. To care for this trade branches have been opened at VANCOUVER, B.C., CALGARY and EDMONTON, ALBERTA, and REGINA, SASKATCHEWAN.

TO SELL AND RE-SELL

Paint MUST give satisfaction.

Bapco Pure Paint and Bapco Varnish are of the highest possible quality. To insure this the raw materials undergo chemical laboratory tests. Skilled makers see that the ingredients are perfectly proportioned and modern machinery insures proper grinding and blending. Rigid machine and chemical tests are made during process of manufacture and the completed mixtures are subjected to comparative tests with the fixed Standards. One big roof of the factory is devoted to weather tests.

The growth of the British America Paint Co. and its constantly expanding trade territory is convincing evidence, not only of the quality of its goods, but of its resourcefulness and enterprise as well.

EMPIRE SELF-CLOSING BIBBS

BALL BEARING

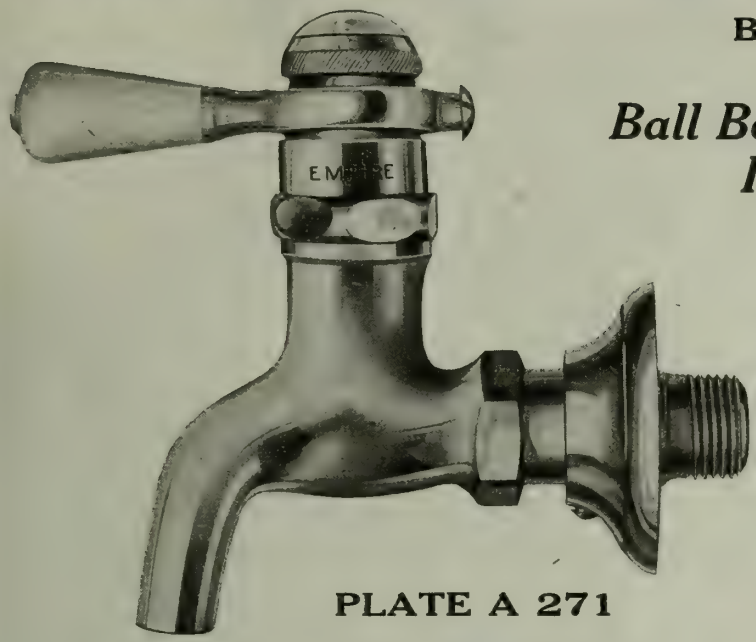

PLATE A 271

Ball Bearing Lever China Index Handle

If you want to build up bigger business, you need dependable goods. You need to install those goods that are made right and fully guaranteed.

Empire Self-closing Bibbs are made right; they are fully guaranteed, and do not waste water. One of the greatest economic wastes in our towns and cities is water. Most office and factory buildings and public institutions are on the meter system, and wasting water is a serious matter.

Empire Self-closing Bibbs will save the price in water rates in less than a year. It is unpatriotic to waste water, particularly these days, because every gallon of water needs some kind of power to pump same.

Get full information from us about this line right now, it's a real winner.

Have You Used UNIVERNISH?

"The Varnish that Lasts Longest"

We wish every dealer to put a display box on his counter—it's a sure seller, the profit is good and repeat orders are certain.

UNIVERNISH is the one varnish for all uses—good on floors, tables, pianos, woodwork, automobiles, motor boats, etc., etc. Good anywhere and everywhere; impervious to hot water; even ammonia cannot injure its beautiful gloss.

Put up in all sizes from Quarter Pints up

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Through Stephens' wide and persistent advertising, through window displays, counter displays and personal suggestion, through its own reputation, the Economical—and Decorative Advantages of Silkstone Flat Wall Colours have been driven home in the minds of the buying public—**the correct answer to all decoration problems.**

"Silkstone" is cheaper than wall paper, more sanitary—more permanently beautiful. "Silkstone" goes on easily and quickly, and dries hard with a soft, silky finish that wears like the plaster on which it's laid.

Right now when economy is so much in the public mind, you should sell more "Silkstone" than ever before.

Let this *Worthy Brand* Dominate Your Paint Department And Hold Your Trade

Only the skilled and expert chemist can determine Jamieson quality by *examination*. To the workman, however, Jamieson quality is determined only by *service*.

Many years' experience and continual improvement has given the Jamieson line to-day a prestige that makes it a best seller wherever paints and varnishes are sold.

We want **you** to be the Jamieson agent in your town. Drop us a postcard and we will show you how it will **pay** you to sell Jamieson Paints and Varnishes exclusively to your customers.

O.K.'d by Three Generations

Lucas Dry Colors and Lucas Imperial French Green

These famous colors, made by us in Canada according to the Lucas formulae, are of the same superior grade that has made the name Lucas synonymous with color perfection.

Pure Superba White

Cheaper than White Lead.

A blended white that meets all requirements of good painting at a considerable saving over the cost of White Lead. Means larger profits to the Dealer. Put up in 25-lb. irons only.

Munro's Pure Paris Green

Place your order now and be assured of next Summer's supply.

Three generations of Canadians have placed their O.K. on Crown Diamond Paint Products. Since 1842 they have steadily grown in favor with dealers and public.

More dealers every year are realizing that the Crown Diamond Agency means greater profits. The position of this company as manufacturers and importers of heavy chemicals, dry colors and aniline dyes, and the fact of there being but one sales organization for these and other products makes for lower manufacturing and sales costs and a greater margin of profit to the dealer. The Crown Diamond Agency thus gives the dealer a greater personal interest in the paints he sells.

Note the big selling Paint Specialties listed in the panel.

Get particulars from us direct or from the following distributors of Crown Diamond Paints:

Stewart & Wood, Ltd., Toronto.
W. B. Dalton & Son, Ltd., Kingston, Ont.
Robertson, Foster & Smith, Ltd., St. John, N.B.
Crowell Bros., Limited, Halifax.

Do You Want Export Business?

ADVERTISERS in the "Export Numbers" not only reach every worth-while hardware buyer in Canada, but also reach a select list of 1,200 buyers in foreign lands. The next "Export Number" will be issued Nov. 2. Last forms close Oct. 26. Copy and cuts for the export section this issue should be sent in without delay. Regular advertisers may use space pro rata on contract. Rates same as in ordinary issues. Two pages, $80; one page, $45; half page, $25. Extra color if desired, $15 page.

It would cost you many thousands of dollars and take years for a representative to call on the 1,200 foreign buyers who receive the "Export Numbers" of HARDWARE AND METAL. For the modest rates given above, you can reach these buyers simultaneously.

Write for evidence of direct results secured by advertisers in these numbers.

Conservation

lies at the very base of the Government's War Program. The Allies must have more oil. Production of oil is at its height. More oil for war purposes can be had only by rigid conservation.

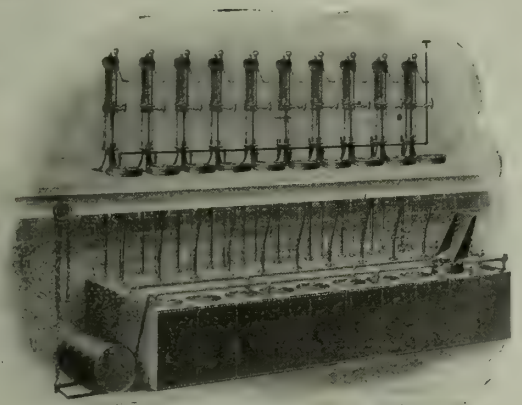

Figure 115. Battery for Paint, Oils or Lubricants

For more than thirty years

BOWSER ESTABLISHED 1885

SYSTEMS

have been conserving the nation's oil and gasoline.

They also conserve

Time
Labor
Space

BOWSER SYSTEMS are

Leakproof
Lossproof
Fireproof
Evaporation proof
Deterioration proof
Convenient
Rapid
Highly Efficient

Tell us your problem. We'll help you CONSERVE OIL. A system for every requirement.

Have you put in your stock of Anthes Feed Cookers?

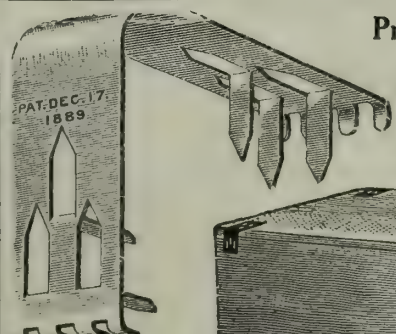
Every farmer and stock raiser in your community will require a Feed Cooker. The superior merits of the "Anthes" will make it a big sales-getter.
The cauldrons are of high-grade cast iron, uniform in thickness and smoothly finished inside and out. They come in 20, 40, 50, 60 and 75-gallon sizes, Imperial measure, conforming to the new law which prohibits the use of wine measure.
In the 20 to 60-gallon sizes the jackets are of 16-gauge sheet steel, and in the 75-gallon size of 14-gauge sheet steel, reinforced at bottom with heavy band iron.
The margin of profit on this Cooker is reasonable, too.

All leading jobbers sell them. Specify "Anthes" when ordering.

In stock for prompt shipment.

ANTHES FOUNDRY LIMITED
Manufacturers of Soil Pipes and Fittings, Tank Heaters, Feed Cookers, Etc.
Saskatchewan Ave. Winnipeg

GULF BRAND



Pure Gum Turpentine and Rosin

of highest Quality, guaranteed at destination* to Equal *Government Standards

The High Cost of Shoe Leather Keeps Taylor-Forbes Outfits in Demand!

The present high cost of leather and shoe repairing is boosting sales for Taylor-Forbes shoe repair outfits and fittings.

Hardware dealers will do well to take advantage by stocking a few T.-F. popular kits and supplies at once.

When writing ask about other fast-selling T.-F. lines.

Order from your jobber.

Round Oak Goods

Here is another internationally advertised line of exceptional merit. This firm is one of the original manufacturers in the market putting all their efforts behind one range, one heater, one base burner and one furnace, and we feel that with their many years' experience they should be able to turn out a good article. They do not use scrap iron and for that reason get a material, which while a little higher in price, gives genuine satisfaction, and always brings back the neighbor as a customer as well as the one to whom you have made the sale. We carry a full stock of repairs and that feature recommends it. Since this firm started doing business in Canada many years ago there never has been a time when you could not get their repairs in a hurry. We would be glad to co-operate with you in any local advertising scheme you wish to put on. If you need any advertising matter write us.

WINNING THE BUYER'S FAVOR

THE best possible buyer is not made an actual buyer at a single step It is one thing to win the buyer's favor for an article and another to make adjustments incident to closing the sale. Winning the buyer's favor is the work of trade paper advertising. Under ordinary conditions it should not be expected to do more.

Say You Saw It In Hardware and Metal

The Story of War Under the Earth

THE German sappers had discovered and broken into a Canadian tunnel. They had planted a machine gun at their end and sent a shower of bullets down the dark, narrow passage whenever the Canadians made any effort to enter their underground galleries. The story of how two Canadians nailed steel snipers' shields to the front of a push cart and shoved it ahead of them up to the very teeth of the gun, and how they dropped a can of deadly explosive, hopped on to the cart, and let it coast back down the tunnel, while bullets rattled on the shield like hail and, finally, how the explosive blew up the machine gun and its crew and blocked the passage again—this remarkable story is told by Lieut. C. W. Tilbrook (who was one of the two) in the course of an article, "An Underground Tank," in October MACLEAN'S.

Recently a Toronto newspaper declared editorially that the public was tiring of war books and war stories because of the sameness of them. The newspaper was right. But the public literally devours any story of the war that is new. The series of articles that Lieut. Tilbrook has done for MACLEAN'S have been read with an astonishing amount of interest *because they are different from anything that the public has yet read.*

Warfare in the tunnels is a terrible business—grim, silent, cruel. It is a strangely technical phase of warfare and the "sappers" go about their business with queer instruments that might have figured in a Jules Verne phantasy. To read of underground fighting, as Lieut. Tilbrook tells of it, is to get a vision of a new kind of war altogether—something gripping, fearsome and mystifying.

"An Underground Tank," is the best of his series. But, after all, it is only one feature in a long array that makes the October issue of MACLEAN'S one of unparalleled interest.

A STRANGE CHANGE IN WOMAN'S WORLD. By Agnes C. Laut.

The new status of women, arising out of the war, is treated in the powerful style of this famous writer, who came from the Canadian West. It introduces a new thought.

CONSCRIPTION AFTER THE WAR. By Brigadier-General A. C. Critchley.

A young Canadian who rose from Lieutenant to General in three years and originated the "Critchley Method" of military training, tells what he thinks about the need for compulsory service after the war.

THE LIFE OF MARY PICKFORD. By Arthur Stringer.

The second of a series of articles on Canada's most famous woman. No expense has been spared to produce the beautiful illustrations specially posed for the photographs.

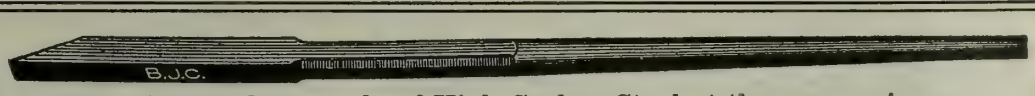
THE FOUR FACTIONS AT OTTAWA. By J. K. Munro.

That the House will split into four, more or less, distinct groups is the guess of the author, a trained political observer. He outlines the reasons humorously, pungently and impartially. It is a political article on new lines and will be found refreshing.

BONEHEAD BILL—Another Service Poem.

Robert W. Service, most popular of poets, sends all his war verse to MACLEAN'S. In "Bonehead Bill" he depicts the grief of a soldier for his fallen foe.

THE EVENTS OF A MAD WORLD.



are summed up in the "Review of Reviews" which gives reprints of the best articles from the magazines of the world. All the best and most important articles are selected—five dollars' worth for twenty cents!

SOME OF THE BEST RESULTS SECURED BY ADVERTISERS

THERE are several manufacturers, selling entirely through wholesalers, who have secured exceptionally good results from advertising in HARDWARE AND METAL. These manufacturers do not call on the retail trade direct, but realizing the importance of keeping in close touch with retailers, use HARDWARE AND METAL'S advertising pages regularly, featuring their products, and giving the names of wholesalers from whom the goods are obtainable. This form of advertising keeps the manufacturer and his products prominently before the trade, stimulates the interest of the wholesaler and his travellers, and shows the retail buyer where the goods may be purchased with a minimum of trouble and expense.

Owing to the scarcity of help and the need for conservation of time, the retailer wants to know the nearest source of supply. If he knows where he can get your goods quickly he may not be so willing to take the next best. Save time for everyone, wholesalers, travellers, retailers, yourself, by featuring your goods in HARDWARE AND METAL, and giving the names of your wholesale distributors. It's paying other manufacturers to do this—why not you? Remember, HARDWARE AND METAL reaches over 90 per cent. of the hardware trade from coast to coast, and the advertising rates are sufficiently low to enable you to use the paper, even though your trade connections may be confined to a small portion of Canada.

HARDWARE AND METAL can serve you nationally or locally. Drop us a line for further particulars.

HARDWARE AND METAL

MONTREAL TORONTO WINNIPEG

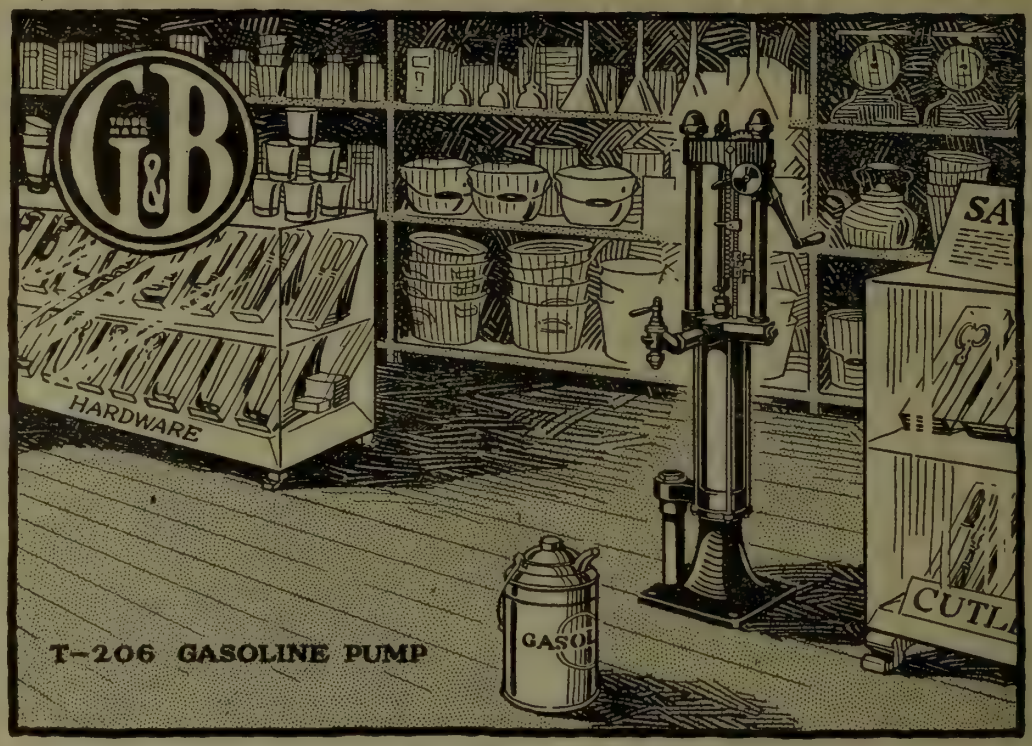
Do You Buy to the Best Advantage?

WELL bought is half sold. Do you buy Polarine so as to secure the best terms and the greatest profit for yourself? Stock the full Polarine line of course. Have the right grade of lubricant for every car and tractor —Polarine and Polarine Heavy for cylinder lubrication, Polarine oils and greases for transmission and differential lubrication.

Polarine
FRICTION REDUCING MOTOR OIL

Makes a Good Car Better

A small investment in Polarine yields 33 1/3% profit. That is an attractive margin, but do not overlook the advantage of quantity orders. Quantity discounts considerably increase your profits. Ask our salesman to explain the next time he calls.



Polarine always gives satisfaction. The right grade insures the maximum satisfaction. The demand is steady; quality dependable, never varies. Pleased customers come back again and again.

Polarine is well-known because consistently advertised. A big campaign is now running in the leading Canadian magazines and newspapers; another to follow it is in preparation. Polarine will never spoil or "go dead" on your shelves.

Polarine is easily handled. Supplied in convenient, attractive, sealed cans—half-gallon, gallon, and four-gallon. Larger quantities in 12½-gallon steel kegs, half-barrels and barrels.

If you are not fully acquainted with our Polarine proposition, write to Imperial Oil Limited, 56 Church Street, Toronto. Ask for Polarine Booklet on Automobile Lubrication.

IMPERIAL OIL LIMITED

Helping The Hardware Dealer Handle Gasoline Trade

Hardware dealers building up a lucrative gasoline trade through the great increase in automobile and motor-truck operators can give speedy and convenient service by installing a Gilbert & Barker T-206 pump.

It discharges, exactly, gallons or lesser quantities as desired. Discharge register tallies from one to ten gallons. Such an outfit pays for itself by eliminating waste, and with underground tank, minimizes fire risk.

There are other G & B pumps delivering from one to five gallons at a stroke and suitable for the needs of dealers with a small or large gasoline trade.

G & B storage outfits for lubricants, paints and varnishes are made in different sizes; substituting safety and convenient service for fire risk and messy waste.

Write for catalogue or call at any branch of Imperial Oil Limited.

Why You Should Be A Michelin Dealer

No. 27

Michelin Dealers are an Integral Part of the Michelin Organization

Michelin's success has been built on the idea that the best way to help Michelin is to help the Michelin Dealer.

Our first consideration is to make the Michelin Dealer permanently successful by enabling him to offer his customers superior values and by giving him such sales and advertising co-operation as will enable him to make and hold customers easily.

We do not wish to sign up any dealer unless he is convinced that the Michelin proposition is going to bring him greater prosperity and permanent success.

The Michelin dealer-proposition is designed to be a definite assurance on these points. Let us tell you more about it. Write today.

Michelin Tire Co. of Canada, Ltd.

White busses bringing tourists down from Pikes Peak

The most popular mountain climb in the United States

THE summit of Pikes Peak sees more visitors each year than any other real mountain in the United States. With the aid of the cog-railway and automobiles it is estimated that 44,000 people reach the top. Each year more and more people are making the climb by motor car. Last year the Pikes Peak Automobile Company which operates a fleet of White Motor busses up the mountain carried 7,000 people.

To insure the safety of so many passengers up and down the steep grades of the mountain, it is of vital importance that the brakes on these motor busses shall be absolutely dependable. Even the slightest slip might result in a most disastrous accident.

How the tourists are protected

Like so many other companies facing the same kind of problem, the manufacturers and the company operating these White busses have ***standardized*** on Thermoid Brake Lining to protect the lives of their passengers.

After thorough tests they decided that Thermoid gave long and more dependable service for three reasons.

1st—Contains 40% more material and 60% more labor than ordinary woven brake lining. This gives long wear.

2nd—It is Grapnalized, a special exclusive process which enables Thermoid to resist moisture, oil and gasoline.

3rd—Thermoid is Hydraulic Compressed. It wears down slowly and can be used until cardboard thin.

The brake lining that meets the exacting test of mountain roads is surely the brake lining for you to recommend. Thermoid will give your customers ***lasting*** satisfaction.

Thermoid Brake Inspection Chart

At speed of	A car should stop in

35 " " "	104 "
40 " " "	148 "
50 " " "	231 "

Will your car do this?

New campaign to help your business

This month we are starting our fall campaign to impress on your customers the need of having their brakes relined after the summer's wear. Tie up with this campaign and increase your fall relining business.

Remember every foot of Thermoid that you install is backed by our ***guarantee: Thermoid will make good—or WE WILL.***

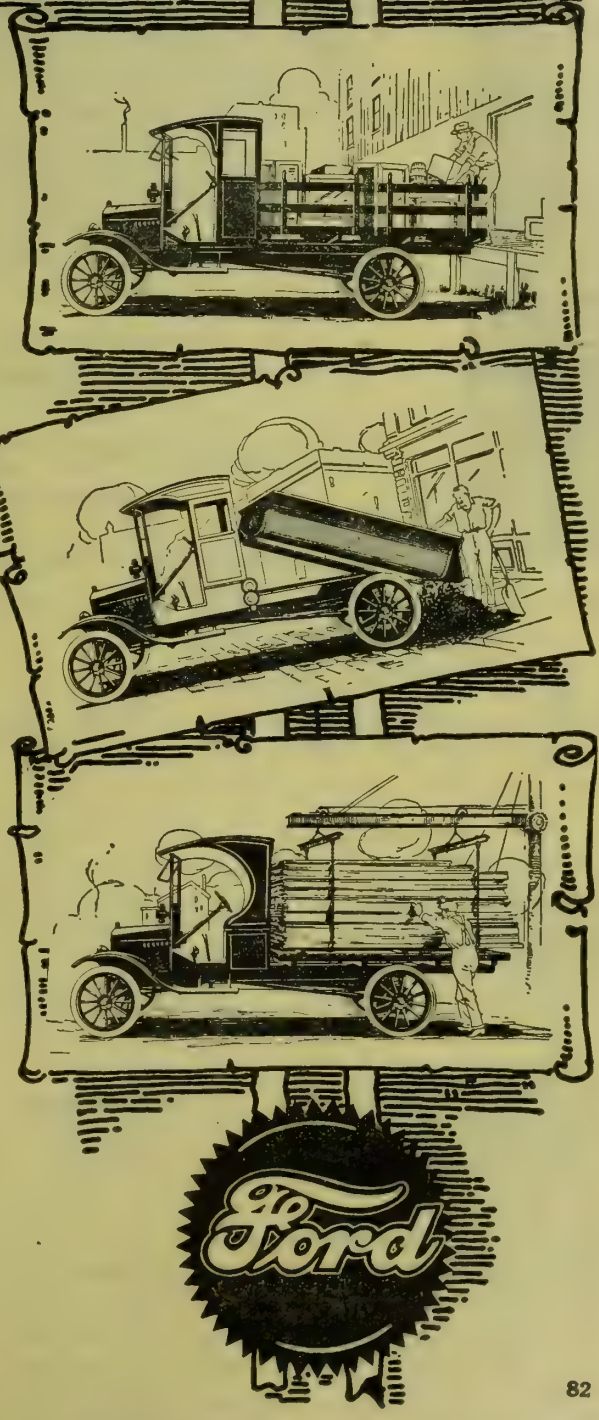
Manual Labor is at a Premium



THE demand for labor exceeds the supply—labor is at a premium. Employers of labor, therefore, are looking for mechanical equipment to make good the shortage.

The motor truck has already proven itself a conserver of manpower.

In your delivery department fewer men will be required if you use the Ford One-Ton Truck. It will release labor for productive work and at the same time improve your delivery.

A body suitable for your requirements is easily obtained and attached.

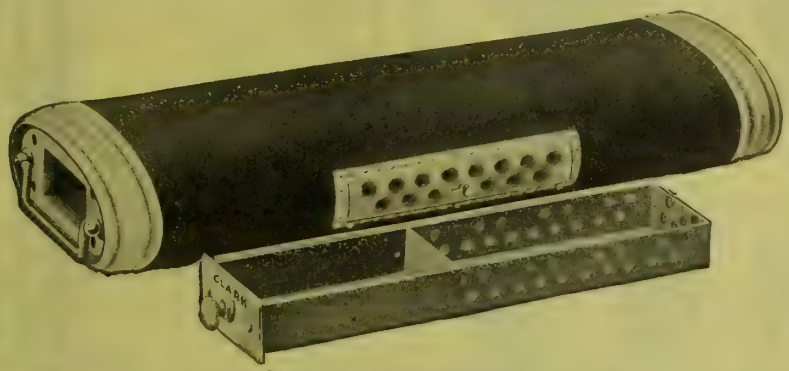
Hardware Merchant's Influence

¶The local hardware merchant exerts a great influence throughout the district in which his store is located. The majority of hardware merchants have been established for many years; they are reputable merchants who have built up their businesses on sound business principles and who have endeavored in every possible way to give the best possible service to their customers and supply them with goods which will give satisfaction.

¶Is it any wonder, therefore, that when customers visit the store of a well-known and long-established hardware merchant, they consider him an authority on lines which he is selling and will usually follow out his recommendation regarding the lines which they wish to buy. Actual investigations have proven that in the majority of cases customers place absolute confidence in the recommendation of their local dealer.

¶The chief problem, therefore, confronting the manufacturer who wishes to distribute products to the hardware trade or to introduce new lines, whether direct or through wholesalers, is to sell the hardware merchant and his sales staff. When you sell the hardware merchant and his salesmen on your line, you can rest assured that you have then gained the co-operation of the strongest retail selling force in the Dominion.

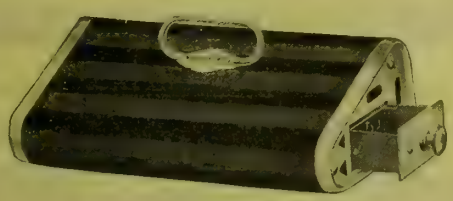


¶Practically every worth-while buyer and seller of hardware in Canada can be reached through the advertising pages of HARDWARE AND METAL. The keenest hardware buyers in Canada are the closest readers of the advertising pages in HARDWARE AND METAL, because it pays them.

Clark Indestructible Steel Heaters

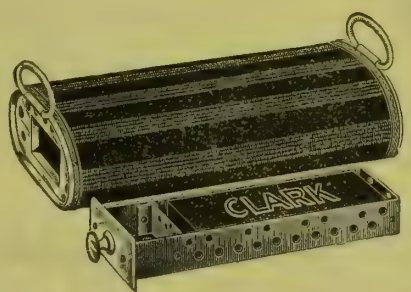
For Automobiles, Carriages, Sleighs and All Vehicles

Dealers! *This has been a good selling and profitable line with the Trade for 25 years, and Clark Heaters are more popular than ever.*



DEALERS ORDER NOW

Your Jobber Can Supply You



No. 8XX Clark Automobile Heater—The Duchess

The handsomest heater ever built. Covered with rich velvet plush in blue, green or maroon shades. Extra wide, highly finished, nickel-plated flange at ends. Side and end adjustable ventilators. Re-inforced steel body. Extra heavy asbestos lining. All outside metal parts quadruple nickel-plated. De luxe finish, 24 inches long. Weights 12 lbs.

No. 7D Clark Heater—Slanting Top

Clark indestructible riveted steel body. Drawn steel ends, heavily nickel-plated. Side and end adjustable ventilators, allowing perfect regulation of heat. Thick asbestos lining. Covered with extra quality of green Brussels Carpet. A beautiful heater. 14 inches long. Weighs 9 lbs.

No. 5B Clark Heater

Strong, durable, and of good appearance. Covered with Brussels Carpet. Asbestos lining. A good heat giver. Used extensively by farmers, mail carriers, cab drivers, etc. Light and handy. 12 inches long. Weighs 4 lbs.

Clark Carbon

The World's Best Heater Fuel

A scientifically prepared carbon densely compressed into bricks yielding a much higher percentage of heat than any other heater fuel. No known substance contains so high a caloric value. One brick in a Clark heater will furnish a strong and steady heat for a period of from 12 to 16 hours.

Case Containing 100 Bricks

SINGLE BRICK
Sizes 7½ x 2½ x 1¼ inches

The New Carton and Container for Clark Carbon

For the convenience of dealers and customers, Clark carbon scores another big hit in the new package. Three bricks are packed in a neat cardboard carton, and four of these cartons, or one dozen of the bricks, are packed in the larger cardboard container.

This package preserves the brick from breakage in shipment and makes it clean and convenient to retail in packages of ¼ dozen bricks.

Only our Clark Carbon is put up in this way.

FORD SET

The Ford Set contains: 1 Handle 7 inches in length; 2 Screw-driver Bits; 1 Extension Bar 6 inches in length; SIX SOCKETS to fit all nuts and bolt heads on Ford Car, including the cylinder head.

STANDARD SET

Standard Set contains: I Handle 7 inches in length; 2 Screw-driver Bits; 7 Sockets to fit semi-finished Hex nuts, as follows: U.S. Standards from ¼ to ½ in.; A.L.A.M Standards from 5-16 to 11-16 in.; Cap Screw Heads from 5-16 in. to ⅝ in.

Autoists like that ratchet feature

Lane's Unique Ratchet Wrench is ideal for close work

The autoist who has once discovered a few of the hard-to-get-at nuts and screws on his car is only too pleased to have some one introduce to him Lane's Unique Ratchet Wrench. He sees at a glance how effective the ratchet feature would be in close quarters where an ordinary tool would be absolutely useless.

Play up this ratchet feature and so arrange auto accessory displays that when motorists get up against the tool problem they will remember Lane's Unique Ratchet Wrench and come to you for a set.

PARLIAMENT BUILDINGS, OTTAWA.

TENDERS WANTED FOR "STEEL SASH, DOORS AND PARTITIONS, ETC."

SEALED TENDERS will be received by the undersigned until Noon, **October 22, 1918**, for the "Steel Sash, Doors and Partitions, etc.," required in the construction of the Central Heating Plant of the above building.

All tenders to be based on the execution, erection and completion, together with the furnishing of all materials, tools, appliances, labor, etc., as required and described by the plans and specifications for "Steel Sash, Doors and Partitions, etc.," for the central heating plant.

The work included under this contract shall be commenced immediately upon the signing of the same and continued as may be directed and in such a manner as to ensure the completion thereof by **January 31, 1919.**

Plans and specifications and any other information required can be obtained at the office of the General Contractors, P. Lyall & Sons Construction Company, Limited, Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered bank payable to the order of the Minister of Public Works, for a sum not less than five per cent. (5%) of the amount of the tender, which will be forfeited if the parties tendering decline to enter into a contract when called upon to do so. If the tender is not accepted the cheque will be returned. If the tender is accepted an additional cheque for a sum equivalent to five per cent. (5%) of the amount of the tender must be deposited before the contract is signed. The total security will be forfeited if the contractor fails to complete the work contracted for.

Certificates of payment shall be issued monthly as the work progresses, and shall not exceed in the aggregate ninety per cent. (90%) of the value of labor and material furnished and set out in the work.

The lowest or any tender not necessarily accepted.

Envelopes containing tenders to be marked: **Tenders for Steel Sash, Doors and Partitions, etc.,** and addressed to the undersigned.

Twelve Cents Per Word!

Several weeks ago a firm in Vancouver, B.C., telegraphed a want ad to Hardware and Metal. They wanted a clerk in a hurry and wished to catch the earliest issue.

The cost of a telegram from Vancouver to Toronto is ten cents per word, added to this was our charge of two cents per word.

This firm had faith enough in Hardware and Metal's Want Ad column to pay *twelve cents per word,* for an announcement in this column. This little story speaks for itself. Mail or wire your want ads, we will accept them until Thursday noon for the current issue.

Hardware and Metal Want Ad Dept.

Success and Your Associates

ALWAYS associate with men who are earning more money than you are. Such is the advice given by a man whose name is known the world over for his own success and the business which he created. It is good advice of a certainty, but we are not urging that it is the best advice. At the same time it is wise to associate with better or bigger men than you are yourself, because you are likely to be lifted up to their levels.

Most of us would probably like to be the intimates of J. P. Morgan, or of John D, or of Charlie Schwab, or Canny Andrew. If we had a speaking acquaintance with John Wanamaker, or Lord Beaverbrook, or Lord Shaughnessy, and with other distinguished and successful men, we would take comfort from the fact.

And most of us would feel rather small and uncomfortable if we were placed beside President Woodrow Wilson at a dinner table, or beside Sir Robert Borden, Sir Herbert Holt or Sir Wm. Mackenzie. And the reason would probably be that we know so little of the knowledge that really counts. If these successful business men engaged us in conversation we would probably find ourselves knowing very little about the things that matter.

This will illustrate the point:

Here's a true story. A Toronto manufacturer found himself on a train going to Albany in company with a number of distinguished Americans about to attend the inaugural ceremonies of a State Governor. A washout led to a delay, and the Canadian was thrown into close association with senators and congressmen and prominent lawyers. They bantered the little Canadian about Canada. He had the pluck of a bigger man. He had been a constant reader of THE FINANCIAL POST, and had absorbed many facts about Canada. He surprised his American traveling companions with his positive, well-informed and wide knowledge of Canada. When the company reached Albany, the Canadian was persuaded to attend the ceremonies, and was introduced as the man who knew all about Canada. The Governor was interested in Canada, and said so, and the little Canadian found himself telling the story of Canada very ardently to a very attentive listener, much to the amusement of his friends who introduced him.

This man made a hit on that journey, and many friends. One of the company gave him a stock market tip worth a fortune.

The point of this story is: You, as a Canadian, can make yourself informed very fully and intelligently if you become a regular reader of THE FINANCIAL POST. You can make yourself a worthy companion and intimate of presidents and magnates. The world likes to listen to men who know something well, and who can talk interestingly and informingly on the subject of their study.

You can become worth listening to if you know your Canada well. And you can get the kind and amount of knowledge concerning Canada which will make you interesting to others if you will read THE FINANCIAL POST regularly each week.

IF you read THE FINANCIAL POST REGULARLY you will find yourself keeping company with the highest paid staff of editors engaged on any publication in Canada—trained men who know how to make others know what they know and learn.

You will find yourself living in a most interesting world—the great, throbbing world of business. You will have your thoughts tremendously stimulated and helpfully directed. You will find yourself becoming a fit table companion for big men — this because you will have knowledge of a quality that will keep you from shame.

What is it that keeps you and THE POST separated? It cannot be its subscription price of $3. Probably it is because you are not very well acquainted with this paper.

We are going to put it to you this way: If you have the desire to be worthy of association with big men, then prepare yourself for such association by reading THE POST, and to make acquaintance easy, we provide the coupon below. It offers you THE POST for four months for a dollar bill.

- —

The MacLean Publishing Company, Limited,

143-153 University Avenue, Toronto.

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

IF YOUR HARDWARE BUSINESS IS FOR sale, who is more likely to buy it than a hardware man, be he merchant, clerk, or traveller? It is only hardware men who read Hardware and Metal, and a condensed advertisement in this paper offering your business for sale, will put you in touch only with the people who will be most interested.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

INDEX TO ADVERTISERS

Occasionally advertisements are inserted in the paper after the index has been printed. The insertion of the advertiser's name in this index is not part of the advertising order. The index is inserted solely for the convenience of the readers of the paper.

The Ideal Article for The Farmer

The Big Seller

The farmer for some time past has neglected the painting of his outbuildings, and now they are in such a condition that a coat of paint is absolutely necessary. You will find it a profitable investment to put in a stock of Homestead Liquid Red.

If you know of any owners of barns in your district, who have not quite decided whether to paint their buildings, let us know and we will write them for you—let us help you secure this business.

Food—Food—Food

Is the Nation's Call

The Food Board does not insist that the populace deprive themselves of food; eat what is needed—but don't waste it.

When the cry came from "Over There" for food, what a stupendous question faced us. The whole nation denied itself and voluntarily undertook the task of feeding the world, yet, nobody has gone hungry. Thousands of housewives have discovered that Winning the War in the kitchen is not a sacrifice, and that it is made easy, by the use of

Conservation

THE corrosion of Sheet Metal means a double or triple loss—

The loss of the Metal itself.
The loss of labor and time used in converting, transporting and applying it.
The loss of goods and equipment through failure of the sheet metal, and loss of the use of the structure until repairs can be accomplished.

It takes no more iron to make a ton of Toncan Metal than to make a ton of ordinary Steel. Therefore the use of Toncan Metal, because of its greatly increased durability, means a saving of iron, of time and labor, a distinct conservation of our resources.

Our book—"Corrosion: The Cause—The Effect—The Remedy" will help you to understand why Toncan Metal lasts. It is yours on request.

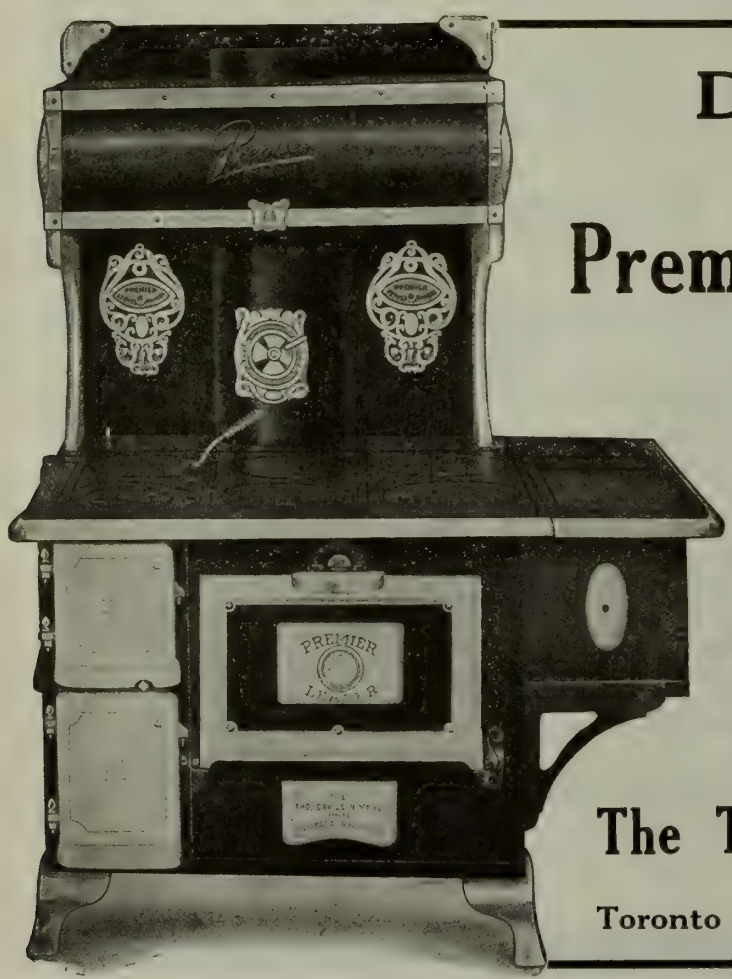
America Hangers Sell Easily and Give Life-time Service

The roller bearing tandem truck hanger is constructed entirely of steel and built to carry heavy doors.

The adjusting screw below the track is always accessible and allows increasing or decreasing the space between door and building.



The detachable drop strap permits door to swing out at right angles and prevents tearing down.

America hangers run on the famous Hatch Trolley Track, supported with corrugated brackets.

Swing in to-day. Hitch your efforts to the biggest selling, profit making line of door hangers.

Stanley Tools

Stanley Adjustable Spoke Shave No. 151

This new and improved Spoke Shave has a Lever Gap fastening the cutter in such a manner as to bring an even pressure on the cutting edge.

The important feature is that the cutter can be quickly adjusted both endwise and sidewise by means of the adjusting screws which engage the slots near the end.

The Cutter is made from a high grade of steel, well tempered and sharpened ready for use.

The handles are japanned and through each a hole is made to enable the owner to hang the tool up out of the way.

10 in. long, 2⅛ in. Cutter.

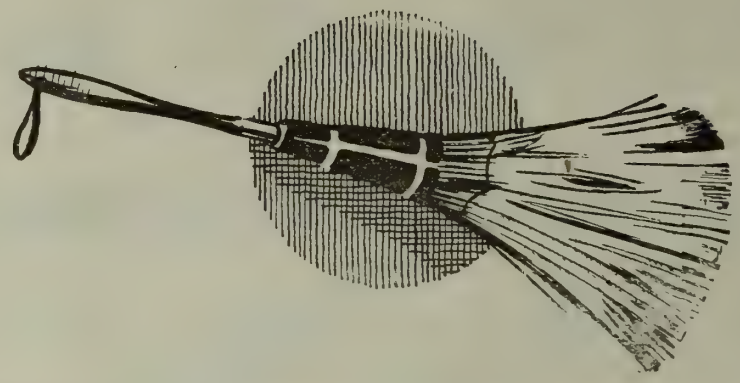
The Needs of the Empire

NEVER BEFORE in the history of Canada has greater opportunity been offered her Sons and Daughters to render SERVICE to the Empire;—and

NEVER BEFORE have the needs of the Empire demanded as high a standard of QUALITY in thought, deed and product as at present.

HOW NOBLY CANADA has responded is now known around the World and history will record it for the future.

THE PRODUCTS OF OUR MILLS are at the Fronts and on the Seas, in the Shipyards and Factories and in the Fields, faithfully fulfilling their mission of reliable performance wherever the Government's War-Winning Programme directs, as we are, and have been, stripped for action since the first call to arms.



THE NEEDS OF THE EMPIRE are many and the War-Winning Programme changes as necessity demands; but it matters not, the needs of the Empire are paramount and must be supplied.

THEREFORE, if in these trying times, we do not deliver promptly to you such of the products of our Mills or Blast Furnaces as you may need, console yourself with the thought that through us, you are rendering Service to the Empire and to the Cause that matters most for the Liberty, Justice and Freedom of the World.

WHAT THE FEATHER DUSTER CANNOT DO

AT best, the ordinary mop and feather duster can only raise the dust to settle elsewhere. An unsanitary method which does little to help the appearance of goods openly exposed on the shelves.

STANDARD Floor Dressing

is different. It **captures** fully 90% of the atmospheric dust and holds it. It is sanitary, non-evaporating, non-gumming. It preserves as well as cleans the surface with which it comes in contact. It is purely mechanical in action.

Properly applied with an ordinary floor sprayer, a single gallon will take care of 500-700 square feet of floor space, and will serve its purpose well for several months without further dressing so long as the surface is regularly swept clean with a hard broom or brush.

Sold in one and four gallon cans and in barrels and half barrels.

THE VIKINGS are here

We also have them in Toronto

The wires are "hot" with Rush Viking orders.

The Viking story is now being told to your customers—all of them—in a clear and intelligent way. You should read it.

You should have Viking Cream Separators on your floor.

The Dairy Farmers will be after the Viking dealer. They want to see the Vikings. They will be practically "sold" when they come into your store.

The proposition is good. And—don't forget the fact that you, the dealer, make a larger profit on every Viking sale.

Every Dairy Farmer will buy a Better Separator at a Better Price. Viking selling points make sales easy—low price, simplicity, thorough construction, ease of operation and cleansing, larger capacity than any other separator of equal rating and the strongest guarantee ever written. Every Viking is guaranteed for a lifetime.

Write us at once for full particulars and Dealer's Terms.

Williams' Superior Drop-Forged Structural Wrenches

Originated by us about 16 years ago as an aid to the structural steel-worker, the usefulness of this line of wrenches to the Bridgemaker, Constructor and Shipbuilder, —in fact to all structural men—has since abundantly justified its creation.

The **tang** on the end of the handle is for bringing bolt-holes into line and for insertion into convenient openings when the wrench is not in use, thus preventing loss and keeping the tool in sight.

The **offset** in the handle provides for clearance of obstruction and safety for the hands of the operator.

Still Good for Thousands of Miles

The other day my motor commenced to misfire.

I drove into the service station and asked Jerry, the service man, to give her the "once over."

Jerry took his pliers and short circuited one plug after the other to locate the missing cylinder.

"She's missing on No. 1," he announced.

He took out the plug and laid it on his work bench.

It was badly sooted. He showed me the trouble.

"Gimme a new one," I said, "and we'll throw away the old one. I've had it ever since I bought the car."

Jerry replied: **"Don't throw that Sterling Plug away. It's good for thousands of miles yet. I'll clean it and it'll be as good as new."**

Clean—Good as New

Here is a lesson for all motor owners.

Sterling Plugs are cleanable, time after time.

They are separable, and when you clean them you know they are positively clean.

Low grade fuels of to-day make carbon troublesome, but Sterling Plugs are built to meet the fuel situation.

Sterling Spark Plugs are sold everywhere by progressive garages and supply dealers.

A size and style for every car

BUY VICTORY BONDS

SAY it often, Buy Victory Bonds! Say it to yourself, Buy Victory Bonds! Say it to others, Buy Victory Bonds! Say it with the ardent earnestness of a prayer and it will echo in the ears of our soldier boys at the front as a pledge of victory and will thunder like an oath of vengeance in the ears of the Boche. Buy Victory Bonds! Say it! Mean it! Do it!

Victory Loan of 1918

Non-taxable 5½% Bonds

Denominations: $50, $100, $500, $1,000.

Five Year and Fifteen Year Maturities

It is no sacrifice to merely buy a Victory Bond. Such a purchase is one of the best investments you can make. Not often will you be offered securities like these non-taxable and paying 5½% interest. It is no sacrifice to buy a Victory Bond unless you dispense with some luxury or deprive yourself of some comfort in order to subscribe. If you are a true Canadian you will subscribe to the 1918 Victory Loan to the uttermost of your ability and will gladly make every sacrifice that your subscription may be larger.

Let your patriotism be judged by the way you respond to your country's call. Acts, not hollow words, will be the gauge by which your love for Canada will be measured through all the years to come.

Subscribe to the Victory Loan of 1918. Buy Victory Bonds and induce as many others as possible to buy Victory Bonds.

For the Credit of Canada!

BUSINESS is good in Canada. More men and women are now employed than at any other period in our country's history.

Many millions of dollars are being expended annually in Canada.

A large proportion of this money is paid out in wages—large sums go to our farmers.

Our well-paid workers and our prosperous farmers turn over much of their large incomes to the merchants from whom they obtain their household and personal requirements.

• • •

But there is another side to the picture.

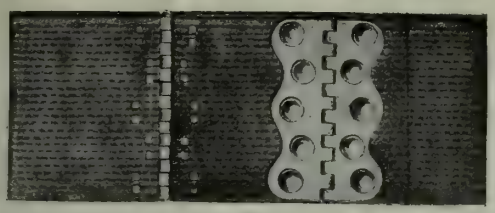
For four long years we have been defended by an army so brave and so well-equipped that it is called, with reason, "The most formidable weapon of its size on any fighting front."

To maintain that army costs money—and the money must continue to come from the Canadian people.

Not as a gift—but as a loan.

• • •

The merchants of Canada must subscribe their share of that loan—must provide their fair proportion of the money that is to maintain our fighting strength, our industrial activity, and our farm prosperity.



You know that Canada cannot continue her splendid effort without money, the super-weapon in this war.

You know that Canada's Victory Loan 1918 provides an opportunity of lending your money to help win the war—and it will come back to you plus a high rate of interest.

Be ready then—to buy Victory Bonds.
Buy all you possibly can.

Issued by Canada's Victory Loan Committee
in co-operation with the Minister of Finance
of the Dominion of Canada.

Kills The Losses

Why should housewives take **all** the risk in regard to honest mistakes in weighing? It certainly is easy to convince her she shouldn't, and that a Renfrew scale will save not only risk but many actual losses. That builds up sales for **you.**

An ordinary, doubtful scale would only add useless disputes. The Renfrew is accurate for every weight from ½ oz. to 30 lbs., and its owner can prove her weights every time by means of the Government Inspector's Certificate which goes with every Renfrew.

The Renfrew is made in black finish, or in all-nickel finish suitable for candy stores or homes desiring a little bit better. Write for literature and attractive selling proposition.

Renfrew
HOUSEHOLD SCALE

Guaranteed to weigh accurately. Capacity: ½ oz. to 30 lbs.

The Renfrew Machinery Co., Limited

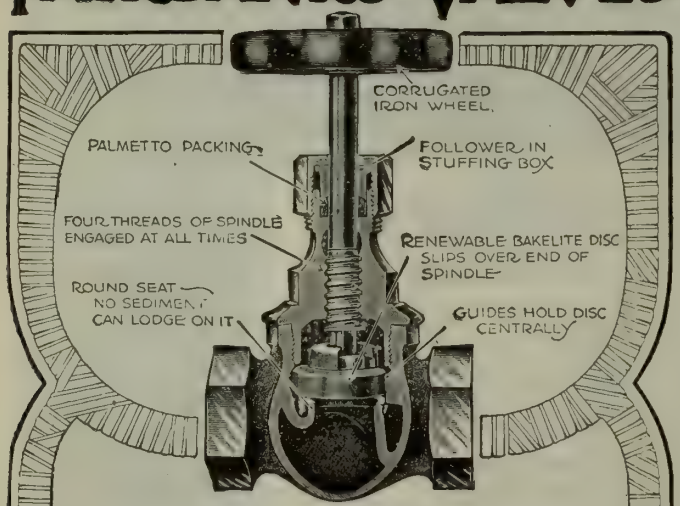
Striking the Line of Least Resistance

This idea has been recognized by all great salesmen as the real secret of success in the commercial world.

THE LINE OF LEAST RESISTANCE in the sale of FOOD CHOPPERS, BREAD MAKERS, COFFEE PERCOLATORS, TEA POTS, KITCHEN KNIVES, LUNCH KITS and POCKET CUTLERY is

THE "UNIVERSAL" LINE, because



1. **After years of use in thousands of homes UNIVERSAL goods have proven BEST BY TEST.**
2. **Unlimited national advertising has made the name "UNIVERSAL" familiar to EVERY ONE OF YOUR CUSTOMERS.**
3. **By selling UNIVERSAL goods you can give your customers unquestioned QUALITY at NO GREATER COST to them and a LARGER PROFIT for yourself.**

When making up your orders in these lines specify UNIVERSAL, and remember that with present uncertain freight deliveries, prompt shipment of your orders is an important consideration.

IF YOU WANT YOUR GOODS SHIPPED THE SAME DAY AS THE ORDER IS RECEIVED, BE SURE TO ADDRESS THE ENVELOPE

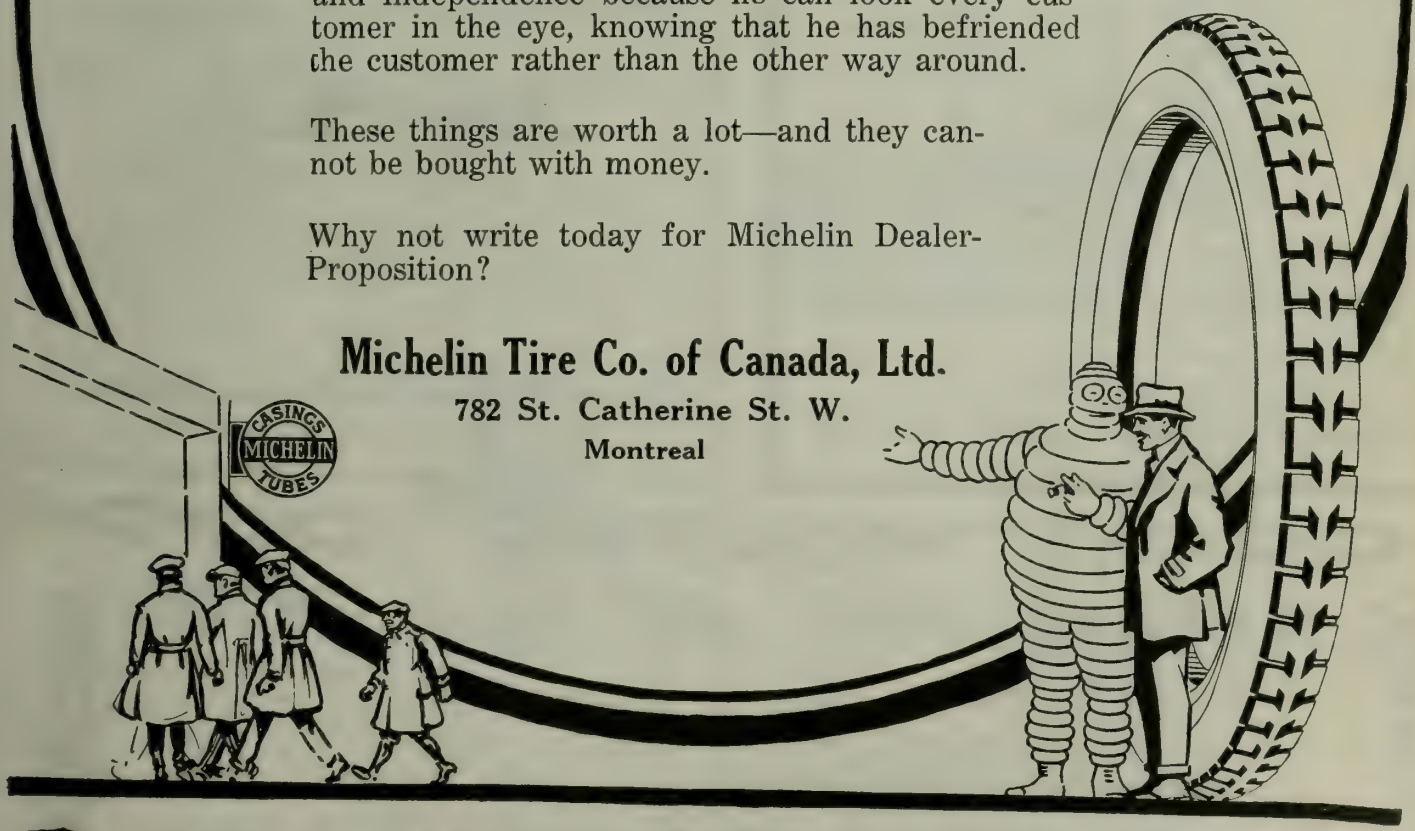
Why You Should Be A Michelin Dealer

No. 28

In Addition to Money, There's All-around Satisfaction Waiting for You



The Michelin Proposition does more than bring the Michelin Dealer prosperity. It wins for him many other and perhaps equally important forms of compensation.

It brings him freedom from the worries, the complaints and the petty annoyances that make a burden of so many businesses. It brings him satisfaction and independence because he can look every customer in the eye, knowing that he has befriended the customer rather than the other way around.

These things are worth a lot—and they cannot be bought with money.

Why not write today for Michelin Dealer-Proposition?

FREE POWER

The fact that the power for operating an "Ideal" Washer does not increase the water rate and is, therefore, free, is a very convincing argument to many customers. The cost of operating an electric washer, such as our "Seafoam," is practically negligible in most districts served by electric power; but the fact remains that many sales may be made of the "Ideal" Water Power Washer when the prospect shows hesitation in regard to an electric machine.

With the two, the "Seafoam" Electric and the "Ideal" Water Power, you have a machine to suit the requirements of every urban customer and the assurance that each is as good as high grade material and workmanship can make it.

SUPREME AMONG WASHERS

The "1900" Complete Line Pays You Best

For over twenty years we have been making washing machines **exclusively.** The best types of washers have been developed and patented by us in this time.

Recently we have perfected two new models representing the highest development the Washing Machine has ever attained.

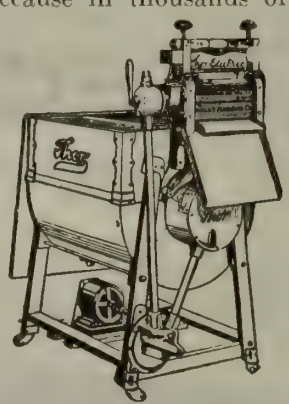
"1900" Cataract Electric Washer

These most modern washers, as well as the other various "1900" machines—the Gravity, Water Power and Gasoline Motor Washers—are sold everywhere through our extensive advertising, which is the largest publicity campaign conducted for washing machines in Canada. Inquiries in large numbers result from this advertising, and these inquiries are turned over to such "1900" Dealers as have proven their worth in their different territories.

"1900" Agitator Electric Washer

Is there a live "1900" Dealer in your district? Would you like to know more about the "1900" line?

If there is no one selling "1900" Washers in your territory there is a chance for you. Make use of it by writing to-day to the Wholesale Department.



The "1900" Washer Company

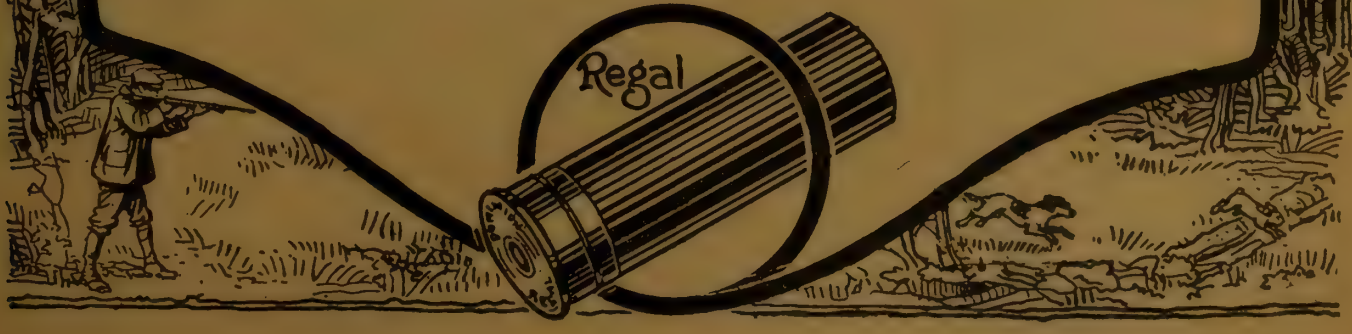
Two Standard Shot Gun Shells

The sportsmen—trapshooters and hunters—who stand at your counter know the superior qualities of

Sovereign and Regal *Shot Gun Shells*



The double assurance of strong, safe casings, due to the knurled base and the steel reinforced head in both the Sovereign and Regal are points that interest your sportsman customer. Care in loading — well seated wads—the large Dominion 3B primer all help to develop the

Speed—Pattern—Penetration

that have meant so many successful days for Dominion users —your customers.

Show the loading to the doubters by slicing the side of a Sovereign or Regal shell. Demonstrate further by pressing the cut paper back in place and firing the shell at a large piece of paper spread out on a board. Point out to him the number of pellets of shot that have hit and how evenly they are spread on the paper—Pattern. Show him how deeply the shot has gone into the board—Speed and Penetration. The customer will not mind missing a shell from a box when such quality is demonstrated.

Success and Your Associates

ALWAYS associate with men who are earning more money than you are. Such is the advice given by a man whose name is known the world over for his own success and the business which he created. It is good advice of a certainty, but we are not urging that it is the best advice. At the same time it is wise to associate with better or bigger men than you are yourself, because you are likely to be lifted up to their levels.

Most of us would probably like to be the intimates of J. P. Morgan, or of John D, or of Charlie Schwab, or Canny Andrew. If we had a speaking acquaintance with John Wanamaker, or Lord Beaverbrook, or Lord Shaughnessy, and with other distinguished and successful men, we would take comfort from the fact

And most of us would feel rather small and uncomfortable if we were placed beside President Woodrow Wilson at a dinner table, or beside Sir Robert Borden, Sir Herbert Holt or Sir Wm. Mackenzie. And the reason would probably be that we know so little of the knowledge that really counts. If these successful business men engaged us in conversation we would probably find ourselves knowing very little about the things that matter.

This will illustrate the point:

Here's a true story. A Toronto manufacturer found himself on a train going to Albany in company with a number of distinguished Americans about to attend the inaugural ceremonies of a State Governor. A washout led to a delay, and the Canadian was thrown into close association with senators and congressmen and prominent lawyers. They bantered the little Canadian about Canada. He had the pluck of a bigger man. He had been a constant reader of THE FINANCIAL POST, and had absorbed many facts about Canada. He surprised his American traveling companions with his positive, well-informed and wide knowledge of Canada. When the company reached Albany, the Canadian was persuaded to attend the ceremonies, and was introduced as the man who knew all about Canada. The Governor was interested in Canada, and said so, and the little Canadian found himself telling the story of Canada very ardently to a very attentive listener, much to the amusement of his friends who introduced him.

This man made a hit on that journey, and many friends. One of the company gave him a stock market tip worth a fortune.

The point of this story is: You, as a Canadian, can make yourself informed very fully and intelligently if you become a regular reader of THE FINANCIAL POST. You can make yourself a worthy companion and intimate of presidents and magnates. The world likes to listen to men who know something well, and who can talk interestingly and informingly on the subject of their study.

You can become worth listening to if you know your Canada well. And you can get the kind and amount of knowledge concerning Canada which will make you interesting to others if you will read THE FINANCIAL POST regularly each week.

IF you read THE FINANCIAL POST REGULARLY you will find yourself keeping company with the highest paid staff of editors engaged on any publication in Canada—trained men who know how to make others know what they know and learn.

You will find yourself living in a most interesting world—the great, throbbing world of business. You will have your thoughts tremendously stimulated and helpfully directed. You will find yourself becoming a fit table companion for big men — this because you will have knowledge of a quality that will keep you from shame.

What is it that keeps you and THE POST separated? It cannot be its subscription price of $3. Probably it is because you are not very well acquainted with this paper.

We are going to put it to you this way: If you have the desire to be worthy of association with big men, then prepare yourself for such association by reading THE POST, and to make acquaintance easy, we provide the coupon below. It offers you THE POST for four months for a dollar bill.

The MacLean Publishing Company, Limited,

143-153 University Avenue, Toronto.

Send $\frac{\text{me}}{\text{us}}$ THE FINANCIAL POST for four months for One Dollar. Money $\frac{\text{enclosed}}{\text{to be remitted}}$

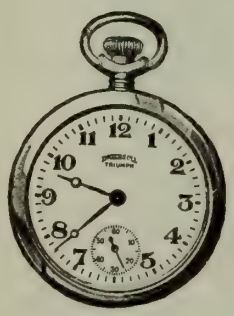
THERE IS NO TRICK

in selling Ingersolls. The whole secret is in letting your customers know that you have them. Keep them displayed where your customers can see them—make an occasional display in your window—and they will add considerably to the profit side of your ledger.

This fall our advertising campaign for the Dominion is larger than it has ever been. It not only includes many magazines published in the States, which have a large circulation in the Dominion, but most of the best Canadian magazines, farm papers, etc. Connect up your store with these advertisements by making a window display and our advertisements will be your advertisements, so far as your locality is concerned. We will supply the material for the display.



THE MAPLE LEAF

Retail Price $2.00

This model needs no introduction. It is the model that made Ingersolls famous. Sturdy—and dependable.

You get 4 of these in the Special Assortment.

THE TRIUMPH

Retail Price $2.50

A watch with the sturdiness of the Maple Leaf—but a few more refinements in the way of good looks. A splendid watch for a man who wants a watch that will stand lots of hard service and is good looking, too.

You get 3 of these in the Assortment.

THE RADIOLITE

Retail Price $3.00

The watch that tells the time in the dark. The hands and numerals of this watch are coated with a self-luminous substance containing genuine Radium. Luminosity is guaranteed for life of watch.

You get 3 of these in the Special Assortment.

THE INGERSOLL WATERBURY

Retail Price $5.50

12 size—thin model, jewelled. The sturdiest jewelled watch made, will stand many knocks and jars that would put most jewelled watches out of business. And it is good looking, too.

With Radiolite Dial it sells for $6.50.

You get 2 with Plain Dial in the Special Assortment.

Special Assortment

We have arranged special assortments of 1 dozen of these four fast-selling models. They are assorted in the way that you will sell them. With an order for one or more assortments, we will send you 3 attractive display cards. Put these cards in your window—and they will sell the watches for you in "rapid fire" time.

This assortment complete costs you $22.05 and sells for $33.50. Your profit $11.45—and a quick turn-over on your money.

This is one of the handsome Show Cards that is included with the Assortment. It is printed in 4 colors—has an easel stand—and it certainly is a beauty.

Cut out this coupon and mail it to-day. It is best to order several of these assortments while we can still supply them. You will need them for your Christmas trade.

Robt. H. Ingersoll & Bro.,
128 Bleury St., Montreal, P.Q.

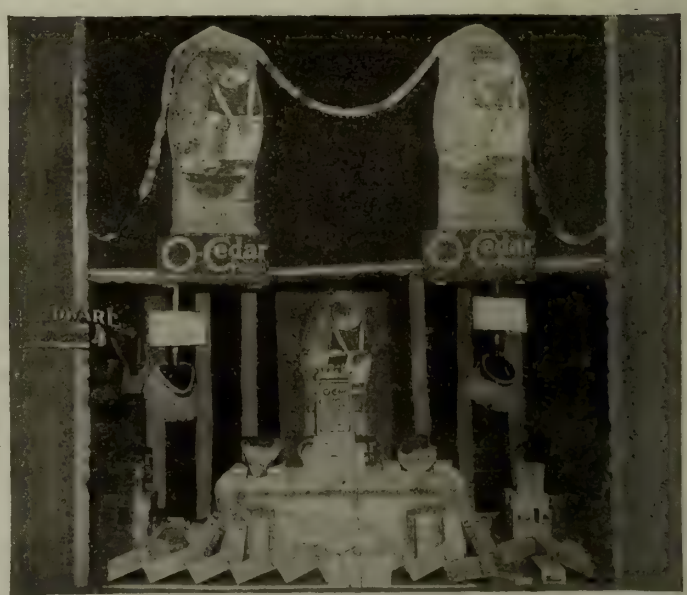
TELL THE PEOPLE WHAT YOU HAVE TO SELL!

ALMOST every day some of the women in your district are hearing about O-Cedar Products, and how they lessen the work of housekeeping. They are reading our advertisements in newspapers circulating all over the Dominion, and they are hearing about O-Cedar from their neighbors.

O-Cedar Polish



You should let them know, in the most forceful way possible, that they can buy O-Cedar Products in your store. There may be dozens of people who would buy O-Cedar from you, if they were simply reminded of it by an attractive window or store display of O-Cedar Mops and O-Cedar Polish.

To give you an idea of how to go about making a good display, we are illustrating one very attractive window trim, made up from a stock of O-Cedar Products and regular O-Cedar display features. Right now is a good time to show O-Cedar. Will you plan to make up a display Monday morning?

Order from your jobber.

See the O-Cedar Hardware Transfers on this Window.

Famine Expected in Galvanized Sheets

License Must be Secured for Every Shipment of Raw Material From the United States —Many of the Largest Mills Have Supplies Cut Fifty Per Cent.—Stocks in Canada Very Small—Steel Situation Remains Decidedly Complicated

A FAMINE in galvanized sheets is likely to prevail in Canada from now on, according to A. T. Enlow, president and general manager of the Dominion Sheet Metal Company, Limited, of Hamilton. The change on the part of United States Priorities Committee in the method of handling priorities for steel he says will have far reaching effects here.

"Heretofore," said Mr. Enlow, "when a Canadian consumer desired to purchase, for instance, galvanized steel sheets which we manufacture, and the raw material for which could not be secured in Canada, it was necessary for them to furnish us with a statement signifying the exact use of the material. This we passed on in the form of an application for priority certificates to Ottawa, and if they looked favorably upon it, they sent to Washington, where the Canadian War Mission endeavored to secure a priority certificate.

Must Have License

When this certificate was finally secured, granting that the need was regarded as urgent, the mill would proceed in turn to fill the order and eventually the customer would get his material, but now this has all been dispensed with and for every shipment of raw material from the United States there must be a license secured which takes the place of the priority certificate.

In order to secure this license it is necessary to fill in a form X-26 which is a long closely printed form of four pages and after filling this in, one regards the proposition as almost hopeless but granted that it does finally run the gauntlet and the export license is granted, the mill is then authorized to go ahead and manufacture the material and export it in turn or as its urgency warrants.

Exports Limited

After fully analyzing the new form, which must be used in connection with application for export license, one must inevitably conclude that export of steel in any form to Canada or for that matter to any country outside of the United States will be very limited, much more limited in fact than heretofore under the priority certificate system.

In view of this we can only conclude that the most urgent requisitions will be the only ones given any attention whatever, and they will not come through very fast unless the material is direct for the Canadian Government or some of its branches.

Output Reduced

We are advised by several of the largest sheet mills making black sheets that they are operating at less than half capacity, due to the fact that the Government cuts off their supply of steel, using it for other commodities. As regards the local supply of black sheets it resembles the well known "drop in the bucket," but nevertheless has helped out what has been a very bad situation indeed and what bids fair to be much worse.

Our conclusion is that every user of sheets, black or galvanized, may as well prepare to go on a strictly war ration if he has not already done so, and the supply which has seemed to be very scanty will look quite profuse as compared with what will be available during the next several months or until the actual conclusion of peace."

Material Still Scarce

There have been some shipments of sheets reaching Toronto this week, but they are not in keeping with the business booked against them. Galvanized sheets that are being delivered now are selling for $11 up, mostly up. As a matter of fact, the $11 figure does not exist now as a selling mark, and prices are running at $12 and $12.50. Peace talk has had no effect on the calls that are made on the material. There is a fair amount of the lighter sizes in plate still on hand in Toronto, but for the heavier sorts the scarcity is felt. Ottawa does not sanction extension to plants, even for the production of munitions, but will grant permits for material that is required for the upkeep or repair of existing plants, with a view to keeping production up in size and quality.

Production Affected

Reports from Montreal state that efforts are being made to maintain operations in spite of the influenza that is depleting offices and factories throughout the district. The situation in regard to steel plates shows little relief and the difficulty in obtaining material except for the most necessary purposes is as acute as ever. Local mills are compelled to work under additional pressure owing to the number of men that are away, so that in consequence the general output is considerably below the average for the period. Dealers report that in some respects the delivery of material from the States has been delayed, and the cause of this is generally conceded to be the prevailing shortage of help for the operation of the rolling stock. A factor that is beginning to influence the trend of activities is the possible effect that an early peace may have on the industrial situation. While to all appearances the business continues as brisk as ever there is some tendency to retrench, particularly in the direction of covering requirements for future operations. This has not yet been felt regarding existing activities but the undertone is quite pronounced in many places.

HAMILTON IS GLAD TO WELCOME HARDWAREMEN

WRITING in reference to the recent article in HARDWARE AND METAL regarding the annual convention of the Ontario Hardware and Stove Dealers' Association, H. G. Wright, President of the E. T. Wright Co., Limited, says:—

"I am pleased to see HARDWARE AND METAL give Hamilton a boost. We shall be pleased to welcome the Ontario Retail Hardware members' Association to Hamilton for the third consecutive time. This speaks well for both the Retail Hardware Association and for the City of Hamilton. The Retail Hardware Association apparently know a good thing when they pick Hamilton for their annual convention, and the City of Hamilton know it is a good thing to have the Ontario Retail Hardware Asssociation hold their convention in Hamilton. The Retail Hardware men are a bright, clever, energetic, live set of business men, and no doubt Hamilton, which has an increased population of 110,000 after sending 10,000 men to the war follows a good policy in giving the Retail Hardware men another warm welcome to our lovely city."

ELIMINATE EXPLOSION FROM GLASS POLICIES

AT a special meeting of representatives of companies handling plate glass insurance held at the office of Lloyd's Plate Glass Insurance Co., in New York, it was decided to amend the policy so as to specifically exclude losses occasioned by explosion unless an endorsement is attached extending the coverage to that hazard, for which an additional premium is to be charged.

After the meeting, however, it was learned that one or two companies who were not present at the meeting were opposed to restricting the present form of coverage, contending that the explosion hazard was one of the main reasons for a property owner carrying plate glass insurance and intimating that they would continue the present form notwithstanding the action of the majority of the companies.

IMPORTANT DECISION IN PRICE CUTTING CASE

A PRECEDENT of much importance has been established by a decision of the New Jersey Chancery, upholding the Ingersoll Watch Company in restraining dealers from selling its watch below the company's advertised price under the company's guarantee and trade-mark. The issue upon which a decision was sought and rendered is this: Should a manufacturer of an advertised article—the good will for which has been built up at great expense and effort and which is trade-marked and guaranteed—be permitted to restrain the dealer from offering the article at prices below those advertised by the manufacturer?

It seems reasonable to assume that there are considerations due the company for the obligation incurred by it under its guarantee as well as the value of the trade-mark. Moreover the Ingersoll watch is not a monopoly and the company offered to make a similar article without its guarantee on which it would not require price restrictions to be observed. The court held that no rulings of the Supreme Court had as yet been made which applied to exactly similar cases. Furthermore, it was held that under-priced selling of the watch was an intention to mislead the public into the belief that all the goods sold in the defendant's stores were similarly low priced. The guarantee, however, seems to have been the determining factor in the court's decision, reinforced, also, by the company's declared willingness to exact no resale restrictions on similar goods without such guarantee. The ruling applies only to this limited type of case and only in the State of New Jersey, thus far, but it establishes a precedent which is important in its possible bearing on interpretation of the Sherman and Clayton Anti-Trust Laws.

IMPORT RESTRICTIONS ON HARDWARE GOODS

GENERAL Import License No. 2, just issued by the Canadian War Trade Board, places the United Kingdom and the United States on the same basis so far as import restrictions are concerned. These regulations extend also to Newfoundland and the islands of St. Pierre and Miquelon.

The list of commodities now requiring individual import license from the United Kingdom, the United States, Newfoundland and the islands of St. Pierre and Miquelon includes: automobiles valued at over $1,200; games, tables and accessories, dice and poker chips; baskets; beads and ornaments; bells; boats; electric lamps; certain electro-plated ware and gilt wares; fishhooks, rods, reels and artificial bait; furniture; manufactures of gold and silver, including jewelry; firearms and accessories, and ammunition if not for war purposes; animal ivory and its manufactures; oilcake; phonographs, etc., and parts; photographic goods; crude rubber; silverware; skates and parts; toys.

ORGANIZED LABOR IS ANXIOUS TO WIN WAR

THE attitude of railroad labor organizations towards the recent order in Council prohibiting strikes during the period of the war is clearly indicated in a telegram received by Senator Gideon Robertson from James Murdock, Vice-President of the Brotherhood of Railway Trainmen. It reads as follows:—

"Pleased, indeed, to read recent order in Council prohibiting strikes for the duration of the war. Under existing conditions and arrangements organized Labor can receive prompt recognition and adjustment of its reasonable needs. Honest organized Labor does not want to be unreasonable, and most surely places war requirements first. There should be no strikes to interfere with war efforts, and I am glad to note there will be no strikes. Respectfully suggest that the first violator of order be dealt with promptly.

"Yours for the Victory Loan,

"(Signed) James Murdock."

FIGHTING APPLICATION TO RAISE PHONE RATES

TORONTO will lead the fight against an application just made by the Bell Telephone Co. to the Dominion Railway Commission to increase its rates after November 20. City Solicitor Johnston of Toronto was given immediate instructions to fight and it is expected that municipalities and business organizations all over the country will join in and help.

The new rates planned by the Bell Co. contemplate a flat increase of 20 per cent. over existing rates. They also provide for a new charge known as "service connection," to be paid for installation, which ranges from $2 to $6, according to the cost of the phone. Long distance rates are also to be increased. The minimum increase is 10 cents for eight miles, with an additional charge of 5 cents for every eight miles or fraction thereafter. For change of name an extra charge of $2 is provided for. Greatly increased cost of labor and materials is advanced as the reason for the proposed increase.

In Toronto, in addition to the change in long distance rates, a person who wants a residence phone would have to pay a new service charge of $4 when he makes the application, and a business firm would have to pay an initial charge of $6 on application for such a service.

SEEKING TO RELEASE 108,000 HORSE-POWER

THE Dominion Power Commissioner, Sir Henry Drayton, is negotiating with the United States Government with a view to obtaining some relief for Canadian manufacturers and secure the release of 108,000 horsepower which is still being exported to the United States.

The shortage of power has been keenly felt by many manufacturers for some time and a great deal of machinery has not been working to capacity because of insufficient hydro to go round.

ANOTHER HUN OWNED FIRM IS TAKEN OVER

GERSTENDORFER Brothers, Inc., a $1,000,000 concern, dealing in bronze, paints, varnishes, and enamels, at 331 East Forty-second street, New York, which in past years did a considerable amount of business in Canada, principally through jobbers, has been taken over by the Alien Property Custodian, A. Mitchell Palmer, on the discovery that 90 per cent. of its stock was enemy owned. The concern reported only 30 per cent. enemy owned.

Mr. Palmer's investigator, Francis P. Garvin, found that Albert Gerstendorfer, now in Germany, was the principal stockholder, having 1,349 shares, and that three days before Ambassador von Bernstorff received his passports an alleged transfer of sufficient enemy-owned stock was made to give control of the corporation to residents in the United States.

New certificates were issued, Mr. Palmer said, for 1,200 shares to Edmund Echart, president, and 100 shares to John Raabe, secretary of the company. Echart explained, according to the Alien Property Custodian, that in making the transfer he was carrying out the wishes of his uncle, Albert Gerstendorfer, but no record that the German owner authorized or agreed to such transfer could be produced.

MOTOR FIRMS MERGE FOR POST WAR TRADE

AN amalgamation of the interests affiliated with the General Motors Corporation is in progress. In order to take care of the after-war expansion, which the directors of the company believe is in store for gasoline-propelled vehicles of all kinds, including tractors, the consolidation of the McLaughlin Motor Car Co., Limited, Chevrolet Motor Car Co. of Canada, Limited, and McLaughlin Carriage Co., Limited, with General Motors Company has been consummated. The transfer takes place November 1. All the plants at Oshawa will be operated to full capacity as soon as the raw material situation permits.

The new organization will be represented by R. S. and G. W. McLaughlin.

WAR BOARD PUTS BAN ON GASOLINE STOVES

THE chairman of the War Industries Board of the United States has just issued the following:

"The discontinuance of the manufacture at this time of gasoline stoves, because of the heavy war and industrial uses of gasoline is advised by the War Industries Board.

"The Priorities Division in granting priority to the oil and gasoline heating and cooking devices and appliances industry requires a pledge of the manufacturers to reduce consumption of iron, steel, brass, copper, and aluminum used in the manufacture of their products to a basis of not exceeding 50 per cent. of six-twelfths of the 1917 consumption."

"The war and industrial uses for gasoline are so heavy at this time that it is advisable to ask you to discontinue the manufacture of gasoline stoves during the present emergency and use the materials which are ordinarily applied to the manufacture of such products to the manufacture of gas heating and cooking devices and appliances. This will not be construed as interfering with your working up materials on hand which are suitable only for the manufacture of gasoline stoves.

RULING ON THE IMPORTS OF RUBBER JANUARY 1

AN important ruling has been made in the United States regarding the importation of crude rubber. A dispatch from Washington says:

The previous rate of permitted importations of crude rubber, effective up to October 1, 1918, has been continued by the War Trade Board in a new ruling for the final quarter of the year. Importations of crude rubber from overseas during the months of October, November, and December, 1918, will, therefore, be limited to 25,000 tons, or at the rate of 100,000 tons a year.

One-fourth of this amount will be licensed only from Central and South America. The remaining three-fourths may be licensed from any country.

Dealers Score Price Cutting by Hydro

Hardwaremen Claim Unfair Tactics Are Being Adopted to Drive Them Out of the Electrical Trade—London Hardware Association Plans to Take the Matter Up With Ontario Commission and Ask For Justice

HARDWARE dealers in many parts of Ontario are strongly of the opinion that they are getting a decidedly unfair deal from Hydro. In some quarters it is alleged that Hydro is jealous of the electrical trade the hardwaremen are doing and is trying by every means in its power to put them out of business. Price-cutting is alleged to be one of the favorite weapons used by Hydro and some of the hardwaremen feel so strongly about the matter that they are planning to take the matter up with the Ontario Hydro Commission and ask for a fair deal. Among other places from which complaints come is London, Ont., the home of Sir Adam Beck, chairman of the Ontario Hydro Commission. Here, it is stated to HARDWARE AND METAL, price-cutting has been indulged in so freely that the London Retail Hardware Dealers' Association at its next meeting plans to name a delegation to wait on the Ontario Hydro Commission and see what can be done to stop the practice.

Unfair Tactics

Not long ago in London, Ontario, a Hydro office and sales building was erected. It was to have cost $50,000, but it is no secret that the expenses ran into a great deal more. The building is unquestionably a handsome structure. It is furnished in a style that is suggestive of some of the electrical palaces on 42nd Street in New York City. It is one of the very handsomest buildings of its kind in all Ontario and when it is lighted up at nights the effect is very striking.

Among the people who have to help pay for all this grand display are the hardwaremen of London. The tax rate in London is pretty heavy and most of the hardwaremen have big tax bills. It rather exasperates them when in addition to paying these taxes they find Hydro cutting prices on them and endeavoring to prevent them by this method of competition from engaging in the sale of electrical goods.

Spoiled the Sale

One hardwareman stated to HARDWARE AND METAL that a sale of irons was planned by a London hardware dealer. The price was to be $5 and the merchant had gone ahead with all arrangements for his campaign. To his surprise the Hydro store came out at the same time with irons selling at $3.90 and of course killed his sale. Price-cutting of this kind may be legitimate, but the London hardwaremen do not think so. This instance was merely given to HARDWARE AND METAL as a sample of what is being done. The hardware dealers are indignant over the matter and will see if anything can be done to prevent it.

In Other Places

In St. Thomas and in Windsor also complaints are made by hardware men about Hydro price-cutting. In St. Thomas one hardware firm sells more electrical goods than the Hydro shop. It meets competition by competition. If Hydro cuts prices the hardware firm cuts prices too. The hardware firm can do this because it is such a large buyer and can get the same discount as the Hydro. But the other St. Thomas firms who can not buy in this way cannot meet the competition.

Is Short Sighted

"The whole sum and substance of the matter is that Hydro is jealous of the hardwaremen," said one dealer. "The policy of Hydro is to make a big showing at a few points at the expense of the public. London is one of these points. In the long run this is a shortsighted policy because there are hundreds of places in Ontario where there is no Hydro shop and the hardwaremen are the logical distributors for the electrical goods because they come in such close touch with the buyers for the homes. As a result of the price-cutting that is being carried on, the hardwaremen in centres near big Hydro shops are not able to push the sales of many articles as they would otherwise. This means that many people who might become consumers of current and buyers of electric goods are not reached."

Cannot Meet This

A Windsor dealer stated to HARDWARE AND METAL that in addition to price-cutting there was another factor in which the Hydro store had an advantage over him because it is maintained to some extent by public funds.

"They can send out a man to make repairs free," he said. "If I sell any electrical goods and they need repairing I have to charge for what is done. Hydro stores send out a man who makes all kinds of little repairs free. This is quite a big advantage to the Hydro store."

No Definite Policy

"There is no definite sales policy in regard to hardwaremen or any other dealers," said Mr. Madden of Toronto, sales engineer of the Ontario Hydro Commission. "The Hydro stores in each municipality are operated by the Hydro Commission of that municipality. For instance, the Hydro store in London is looked after entirely by the London Utilities Commissioners. It carries out whatever sales policies it desires to. The Ontario Hydro Commission has nothing to say about it. The hardwaremen can buy their goods from the same firms from which Hydro purchases. The policy of Hydro is to handle only the best goods. We have had complaints that hardwaremen and grocers are selling goods, especially lamps, that are inferior in quality to those offered in the Hydro stores for prices that are the same."

Welcome Competition

No class of business men welcome clean cut, fair and square competition more than the hardwaremen. If the Hydro stores by fair methods can sell to the public irons, or any other goods, at lower prices than the hardwaremen, there is no kick coming. But if the Hydro stores cut prices and carry on business at a loss in order to drive the hardwaremen out of the electrical trade and do this because their losses are made up through public taxes, a percentage of which is paid by the hardwaremen themselves, this is neither legitimate or fair.

Public Has to Pay

A rather striking instance of what the public may expect if Hydro competition is allowed to throttle other business has occurred right in London, Ont., the home of Sir Adam Beck, in the past few days. The London and Lake Erie Transportation Company, an electric line which was a competitor of the London and Port Stanley Railway, a system operated by Hydro, was forced out of business. As long as there was a rival line the people got cheap fares, but a few hours after it was out of business the Hydro line was considering raising fares. If Hydro stores succeed in crowding the hardwaremen out of selling electrical goods and then jump the prices when they have no competition the buying public will be far worse off than it was before.

A dealer in Folkestone, England, who recently charged a member of the Royal Air Force 5s. for a safety-razor strop instead of 2s., the advertised price, has been placed by the military out of bounds to all members of the forces for an unlimited period.

SEASONABLE WINDOW DISPLAYS

Just now when thousands of men and women are planning what they will put in boxes to send to the boys on the firing line a window showing razors and other cutlery will not only make a most attractive display but will bring many additional customers into the store to buy things for the boy "over there." A window full of good tools, well arranged, always has immediate results in increasing sales.

At first thought you would hardly think that galvanised iron goods and vacuum sweepers could be combined so as to make an attractive window. Both lines are in great demand just now and and will be for several weeks. Here is an idea that will make every housewife, and everyone who has to look after the furnace these chilly days think of their needs and come into your store for them.

You Can't Keep a Real Hustler Back

Because There Was No Newspaper in Stoney Creek, Ontario, John H. Lee Gets Out His Own Little Sheet And Sends It Broadcast Through the Country Filled With Telling Sales Talks That Pull Business

THERE is an old saying that you cannot keep a good man down. It might perhaps be paraphrased and be quite as truthful to say that you cannot keep a hustling merchant from advertising. The proof of this comes from Stoney Creek, Ont. The population of Stoney Creek is 500. It has no newspaper, but it has a hustling merchant in the person of John H. Lee, hardware. Mr. Lee appreciates the advantages of advertising. He knew that it would boost his business and help him build up a fine big store. He was up against the problem though of having no paper to advertise in. Was he discouraged? Not a bit of it. He started his own paper. It must be admitted that Mr. Lee has his own ideas of how a paper should be conducted, and what matter should go into it. But no one after reading his paper "The Spotlight," will accuse Mr. Lee of being prosy or dull.

Keeps It Bright

He keeps it bright and newsy. Especially from the standpoint of his customers is the paper newsy. It fairly overflows with sales talk written in a bright, catchy style that carries an appeal and brings people into his store. There is withal a friendly spirit in all the news, just as if Mr. Lee was chatting with you over the counter. Mr. Lee has a sense of humor and he does not fail to use it, and put his sales talks across with a smile. Business with him apparently is not such a serious affair that one must never crack a smile or enjoy a good laugh. Mr. Lee, as editor of "The Spotlight," has realized the advantages of good cuts to help brighten up his paper, and he makes good use of them. "The Spotlight" however is thoroughly capable of telling its own story, and below are given quotations from it which will illustrate the manner in which Mr. Lee is going after business in his district.

Newsy and Brief

In what might be termed his editorial column Mr. Lee says:

"I feel the need of a local newspaper more than anyone else. I need its columns to tell you what I have for your benefit. So I have adopted this plan. It will cost you nothing and will save you a lot. I can buy and sell as cheap as any city store. That's because I buy heavily and at the right time. I cannot afford to carry the heavy stocks I buy any length of time, so you will get the benefit. Prices will be right. Quality will always be guaranteed. Service will be prompt.

A Great Thing

Speaking of service, it is one of the greatest things in life. He who serves his fellow man serves himself best. I intend to continue and greatly expand my mail order service. You may live at an outside point. You will never be too far away to serve. Whatever you may want can be sent to your nearest shipping point as easily as loaded on your wagon at my door.

A Personal Touch

One other thing. I want to thank you, personally, for your patronage of the past. I feel that every customer is a personal friend. I like to see you, and I like to hear about your troubles and how you overcome them. It helps me to forget my own. It also gives me pointers how to help you. Come in and see me again.

Lots of "Punch"

Here are some excerpts from the columns showing how Mr. Lee keeps seasonable goods before the people of his district with lots of "punch" in his printed sales talks.

There's one thing I want all my customers to see when they drift into the Creek. It's that new electric power washer in my front window. It's all hooked up with the current. All I have to do is to turn the button, and—zip—away she goes.

It's an inspiring sight, I can assure you. Just think what it would mean to your wife every week! There is no other job under the sun that ages a woman like bending over the wash tub. No man likes to see his wife grow old. If he don't care, then that's different.

Seasonable Hints Served to Your Taste

What a difference when you carry your lunch to have your tea piping hot, especially in cold weather You can have it with a Thermos lunch kit. Our $1 size has a pint bottle held in the top with a strong clamp. The box is all metal, neatly Japanned, and the handle falls down flat. Get one the next time you are in. You'll thank us for trying to sell you one.

Time for Flashlights. What a handy little lamp they are. A safe light wherever needed—tieing or untieing your horse in the church shed, looking down a dark well you can see what is at the bottom. Makes a good egg tester; try it. We stock the Eveready Daylo because they are the best, and you ought to see the different styles and sizes to fit any purse or pocket. Prices 75c to $3.50; batteries, 25c to 60c; bulbs, 20c each.

Peeling apples by hand is no snap—used to do it myself quite awhile ago—but I soon got a peeling machine, which did the trick in less than half the time. Now, this peeler is called the Hudson; cog wheel drive, all nicely lacquered, and will take the hide off an apple slick and clean and pushes the peeled apple off the fork. All you have to do is put the apple on and turn the handle. Clamps on your kitchen table. Yours for $1.00.

With some kinds of fruit, of course, you have to use a paring knife, and we can take care of you in that respect. A nice black handled one, good tempered steel blade, four shapes to choose from, 20c and 25c each. Then we have cheaper ones, but not such good stuff in them for 10c and 15c each.

Othella Treasure Range

The Wonder Baker

You'll be cutting the corn pretty soon to save Jack Frost doing it for you. All of us can't afford a corn binder, so we've got in some of the little "Giant" hand sickles; the blades adjustable to three angles to suit your purpose. A thin high tempered steel blade that you can keep sharp; securely fastened to a good feeling handle—all for 65c.

Yes, the flies do bite hard this month, and torment horses and cattle till you feel it in your pocket book Your horses get thin and you cows give less milk. But we've got a remedy in Dr. Williams' fly chaser that'll make your stock laugh if you spray it on them only once a day Comes in quarts, 60c, half gallons, 90c; and a spray gun to put it on with for 75c and 90c each

How often you've wanted a scale to weigh sugar and plums you're doing down—and you've got to have a pretty fine scale to weigh sugar just now—to know if you're getting them too sweet or too sour. We've a scoop style, 10 lb. brass beam scale, government inspection certificate goes with scale, for $5.50; just the thing for butter

A spring balance scale with nickle-plated barrel, weighs 1-4 lb. to 15 lbs., called a Sportsman scale. Very handy, 65c.

Some heavy galvanized boilers, good strong seams, No. 9 size, $2.25.

Strong tin boilers, with copper pit bottom and pressed tin lid, handles won't come off, either, $3.50.

1,000 light basket hooks, in a package, at 20c; stronger ones to go in hard covers, 25c. Big saving if you take a full crate

O'Cedar Mop is the right thing to use on your hardwood floors, licks up the dust clean. You can do it so easy, too. Our triangular shaped, padded frame, saves injury to furniture and gets in the corners. The Genuine is $1.50 everywhere. A 4 oz bottle O'Cedar Oil, 25c, or 12 oz., 50c. Take the larger, it's cheaper

Big stock Wicks for Perfection Oil Stoves at the old price, 25c; should be more.

No more messing around with an old demijohn or awkward oil can to fill the lamps when you can get a Neverfail with a little pump that puts the oil in steady and evenly.—No running it over because you didn't think it so near full—if you do happen to get it too full, just press button on top of can then spout puts it back where it came from. We'll show you how it works next time you're in. Don't let us forget because we might be busy showing you the many other things we have which always is a pleasure to us and will be profitable to you

Got some thick linseed oil. All right for painting floors and ironwork. Is it worth $1 a gallon to you? It's the last out of the barrel, has the best ingredients in it, can easily be thinned, excellent for interior finish. Our loss is your gain. Only 5 gals. to a customer at this price

LEE HARDWARE

STONEY CREEK, ONT.

Telephone 108 r 4 Winona

When she is gone he will realize what he has lost. Then wife number 2 will have a power washer, you bet! Don't make any mistake about that. Second wives are not caught in "love's halter."

Meeting Arguments

Cost! Yes, they're rather expensive. That is, strictly from a dollar-and-cents point of view. But we have reached the age where money is not the only thing in life. What it will bring one in comfort and time to read and broaden the mind is the best way to view riches.

I can arrange it so that everyone on a power line can have one of these washers. I do not believe in the "Instalment" plan any more than you do. But there are a few things in the list that make for better life that should be obtained as quickly as possible. I have a nice little plan for you to be the owner of one of these washers on easy payments. Not a cent of interest will be charged. You will know when you sign the contract just what you are expected to do, and what to expect of me. We'll both be frank and honest, and we'll both be happy, especially you, if you get one of these washers.

Seasonable Hints

"How to make shingle roofs last fifty years—give them a coat of our Carbolastic Roof Cement. Keeps shingles from curling up and cracking—prevents all rot and waterproofs them. The best for all metal surfaces, too; will stand heat of furnaces, boilers, steampipes, etc."

"I want a halter," one of our customers said as he entered store. "A good one, like I got from you before. Somebody stole it off the horse while in the pasture field." This halter was good enough to steal—you never hear of a poor article being stolen—and we don't wonder at it, for when people see the kind of halters we have, they want them. They're made from belting leather and strong. Pretty hard to get good leather in halters these days, but we have them for colts or the bad ones."

Help! Help! Get This

"In order to combat the constantly soaring cost of living, we advise our readers to biplane food."

Help Wanted. — Men or women to paint their homes and help unload our big stock of paint we have put in for the fall trade.

For Sale.—Davis Acetylene lighting outfit. 35 light machine. Fixtures and pipe complete. An attractive price for cash now.

Wanted.—A few good second-hand stoves, taken on the price of a new one.

Wanted.—The names of people who intend buying new stoves this fall. Have something of interest for them. Inquire at the Spotlight Office.

Is your name on our mailing list?

Did you see our Grand Fall opening of Horse Blankets?

He also fights who helps a soldier fight. Buy Victory Bonds.

Boosting Heaters

It's plain to be seen that there's going to be a big "drag" on coal oil this winter. Everything points that way. Shortage of coal, prohibitive prices for wood and no gas.

It is a "cinch" therefore, that coal oil will be used more extensively than ever. You will be using that good, little Perfection heater more this winter than ever before. You will want a touch of summer warmth in your bedroom once in a while. It's amazing how much heat these litle heaters throw out. Coal oil will be the real "stand-by." There may be times when the supply at your dealer's will be low this coming winter. The most logical thing to do and the cheapest as well is to get your oil by the barrel. Let me quote you barrel prices. Can deliver it to your nearest shipping point.

Appeals to Women

"The writer accepted an invitation to dinner out in the country. It was at a big farmstead, and the lady of the house knew how to make that good old staff of life—Home Made Bread. After being "fed-up" on bread off-the-wagon kind, the taste of this bread—bread like mother used to make—was a rare treat. Even pumpkin pie wasn't in it and "have some more bread?" was a familiar break in the conversation as the bread was passed towards the "humble guest."

Now, maybe you've had a similar experience. Then you'll vouch for this when I say it certainly is a treat, especially when it is made in the good old fashioned way with pure ingredients.

You'd like to eat bread like mother used to make, because it is healthful. Perhaps the lady of the house would like to make it too—if she knew how.

Anyone can make "Home Made Bread" with a "Canuck" Bread Mixer. No previous experience or "taking lessons."

What Do You Know About This?

A dandy little Coal Oil Heater, blue enamelled, for $3.00. "Awful cheap" you'll say, when others cost $7 to $10. But we've got 'em.

Bothered with chapped or cracked hands this weather? Mule skin Mitts are good to wear but get hard after being wet, so we've got some excellent quality sheepskin one-fingered variety, nice and pliable, don't get hard, and warmer, too. 75c. Many other kinds, some with all fingers and a long cuff to protect your wrist and lower sleeve, expecially in handling corn, or around your car, $1 and up.

Do your pickers pull or cut the grapes off the vines? To pull them is very wasteful and spoils the bunch. Some bunches are left on the vines for the want of a good cutter. Get a good one from us. They have long thin blades, spring won't fly out, either. 40c.

At last we've got a lantern that won't flicker and go out. You'll be as glad to hear that as we are. Use our "Best Coal Oil" and turn night into day on the farm, and safe to take in your barn or stable. $1.25.

How many lantern chimneys do you buy in a year? We've got a few dozen a little bit better than the average kind at 15c or two for 25c.

Many women don't get a washing machine because it's too heavey to move around and would you blame them. Many kinds are awkward to use, too. But we've got one the New Idea B, that you can lift the tub off then the stand is easily moved. The tub turns on ball-bearing axle. It will wash a lace handkerchief or a blanket just as well, and for this reason is very popular with the women folks in this neighborhood and they lay it to this machine for cutting hard work on wash day in half. Take one home, try it. You can send it back if you dont think it will.

Do the children slide the chairs on the floor or oilcloth and scratch or mar it? Get some steel glides—don't cost much—from us; turn the chair upside down and whack them in with a hammer. Then the chairs will glide. Better than casters for tables, couches, chairs, etc. Sold any quantity.

One of the essential things on wash day is a clothes basket. But most baskets are bulky and clumsy. We have some nice white willow ones, nearly light as a feather. They're hard to get, that's what makes the price big; but, say, they'll last a good while.

Buying a cheap tin pail for the dairy nowadays is like poking your money down a rat hole. You never see its value. Our XXXX pails you can depend on. They won't bend in when carrying full of milk, the bottom is pressed, which takes all the spring out, ears large—don't stick out—and rivetted on; heavy bale and good handle. It is tinned, then re-tinned, has good strong rim at bottom to protect it. The strainer kind have large spout to pour out of and if screen gets damaged can be easily replaced. Different shapes and sizes. Have a look at them when you're in. $1.25 to $2.25.

Perhaps the harness you drive is getting old in spots; breaks just when you're least expecting it. For this reason we carry an assortment of parts for single and double harness. Look them over when next you're in. Maybe pieces you want is right here, and don't forget to look over our stock of halters, too. Think the one shown here would hold your horse? If it don't, it won't cost you a cent. But all the halters are not like this one. Have them for colts, drivers, old horses, and new; rambunctious or quiet.

How often you've wanted a dust mop that wouldn't smear wallpaper, carpets, etc., with oil. We've got a good one in the "Tarbox." Chemically treated, needs no further attention. When dirty, wash it, then dry, that's all. $1.35.

What's the matter with your pump? Won't hold its prime, or hard work to get water? Why, it needs a new sucker, and maybe a new valve. We got them, all sizes made from best of leather. Bring size of your cylinder.

Clevises, all sizes here. They are a necessity and very important article on a farm; form the connecting link between motive power and load, and you don't want the bolt coming out just when your team gets down to a draw, either. Pick them out of our assortment the kind that suits you.

Two big shipments of roofing just arrived before the price starts to soar upward. Lots of Mill ends now and the old price still stands. Get yours before they are gone.

Don't wait 'till cold and stormy weather starts, to put glass in where they are broken or out. Now's the time to do it right. To cut any size of glass you want is one of our hobbies.

On looking around the place perhaps you see where a board needs nailing on, a picket on the fence, a few loose shingles need tacking down, etc. A stitch in time is worth nine they say. Get a box of our mixed nails, all sizes, six pound for 25c. A very handy package to keep on hand all the time, and cheap too.

HELPING CONSERVE STEEL

In order to conserve steel and brass for war purposes, the United States War Industries Board has put into effect a conservation programme by which all makers of pens are limited to thirty styles. No new styles will be allowed during the war and the manufacture of brass and nickelplated pens must be discontinued.

What Steel Men Think of the Future

Nails and Barb Wire to be Short—Opinions as to Prices After War—World's Warehouses Empty—U.S. Interest Return $400,000,000—Foreign Market Requirements—Buyers Here From Abroad—India Short 72 Per Cent. of Normal Imports

"SUPPLIES of barb wire and nails will be short for the coming season," said H. A. Diplock, assistant manager of the Steel Company of Canada at Montreal, to HARDWARE AND METAL.

Asked as to the probable reduction in the supply of these two basic hardware lines, Mr. Diplock would not make an estimate. He intimated, however, that there would be wisdom in taking care of one's wants as early as possible, if disappointment is to be forestalled.

World's Warehouses Empty

"The storage warehouses of the world are said to be empty," said Mr. Diplock. "If this condition exists, and there is little ground for discounting the statement, can they be filled to normal pre-war capacity soon, and if so, how soon? Viewed from statements of the leaders in the great steel industry, it will be a long, long time before reasonable surplus can be laid by against demand. For even when the greater capacity of mills to produce is considered, the industrial demands and those of the community at large will require such huge supplies that the output will be quickly absorbed. In many instances the housing needs of the country have become acute.

What $400,000,000 Means

It is stated that the loans of the United States to the Allies are such, down to date, as to assure an annual interest return of not less than $400,000,000. That would be considered, in pre-war days, almost an impossible sum. It is a large amount even in the light of present day figuring and an index of what development may be expected in that country once the war has ceased. And, with an allowance for probable temporary uncertainty and even temporary inaction, there is reason to expect that constructive development will readily assume large proportions. With probable development of housing facilities on a huge scale, with office building and other requirements also great, these programmes can and will be carried out as there will be the money to pay for them and occupants clamoring for accommodation.

India's Great Needs

A striking instance of the conditions prevailing abroad was touched on by Mr. Diplock. In India, for instance, he stated that the actual pre-war imports had decreased to about 28 per cent. of normal. The country simply could not get the needed supplies of steel and other goods its great population had to have, and the markets of the world were being scoured now to augment the scant supplies being received. It would take a long time to make up the shortage after peace is declared.

Now, if this condition is reported from one part of the Far East, what must conditions be elsewhere?" he said. "It is pretty safe to assume that they are somewhat similar, for the needs of the steel-producing countries of the world have gone short a long time and those depending on them must certainly be still unsupplied. None can estimate how long a time will be required to rectify the conditions."

Buyers from Asia

Are the days of the '80's and '90's coming back, in the matter of buyers going to market? In some respects this is already the case. For, as pointed out by Mr. Diplock, buyers recently came to them from Shanghai, Japan, Australia, New Zealand. The tables were actually reversed and so bare were the home markets in these lands that representatives were sent abroad to pick up what goods they required, or as much as they could find. In one instance, illustrative of this feature, one buyer had cabled to his wife in a distant eastern country to come to America, as he expected to be kept here procuring commodities for his principals for many months. This recalls the days of 25 and 30 years when buyers went to market to a much greater extent than now.

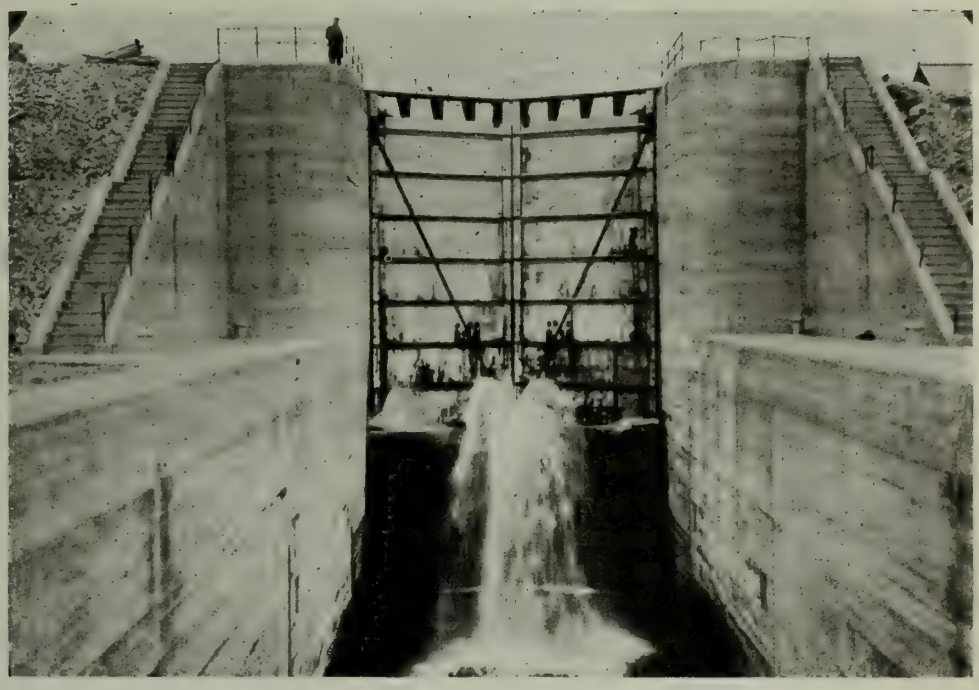
What of Prices?

"The law of supply and demand is well known and understood and prices on steel goods to-day," said Mr. Diplock, "are very much lower in Canada than in many foreign countries. Nails are selling in Europe, for instance at $6 to $7 per keg, while the Canadian trade is supplied for much less. The cost of nail kegs and labor alone has so risen as to leave a small margin only for the maker to-day. Labor is very independent and in such mood that to dictate to men unduly is to be met with practically a refusal to work. In a recent instance one man plainly intimated that he was able to make a good week's wages in three or four days of the week and that was his reason for not reporting on the remaining days. Such a condition serves to increase the manufacturer's costs materially.

Modification of Gasoline Regulations May Be Announced Shortly

HARDWARE dealers all over the Dominion who handle gasoline have written to HARDWARE AND METAL asking when the new regulations in regard to the licensing of gasoline become effective. This matter was taken up with the Fuel Controller who states that it became effective on October 2, the date on which the regulations were approved by Order in Council.

It is likely that some modifications of the regulations will be necessary in order to avert injustice to some of the distributors. The large distributors, for instance, are up against the problem, as the law now stands, of paying taxes on the same gasoline several times. This would mean many thousands of dollars a year to them. If they receive a consignment of gasoline by boat at Toronto, that amount of gasoline goes into their records at the point where it is unloaded. It may be sent from this point to a Toronto station for storage. It is again recorded here and liable for tax. It is likely to be sent from the station to another station and again has to be recorded. From this station it may go out to still another before it is finally on its way to the consumer. As the license is based on the amount of gasoline handled at each distributing point it is apparent that the gasoline figures in the records of as many stations as it may be found necessary to move it to. Millions of gallons are constantly being moved from station to station, and if the big distributing companies have to pay taxes on this basis it will mean a large sum to them annually. This question will, it is understood, be taken up with the Fuel Controller shortly, and an effort made to establish a more equitable basis for taxation. One of the most reasonable ways of taxing gasoline which is in transit several times might be to base the tax on the amount received at the point at which it comes into Canada.



The gasoline companies are still not allowed to sell on Sundays, although the ban on Sunday automobiling has been lifted. It is likely that as far as Canada is concerned, it may be necessary to again eliminate Sunday riding for a time. At many points in the West, where tractors are used, it has been necessary to delay their operations because of insufficient supplies of gasoline. Food production is one of the essentials in connection with the war, and unless there is relief from the shortage in the West it may be necessary to take action that will insure supplies.

Current Events in Photograph

LOCKS ON THE TRENT CANAL

Picture shows the upper lock of the Trent Canal at Hailey's Falls, Ont. The lift here is 27 feet. The canal has only recently been placed in operation, and connects Peterboro and Trenton. Further work is in progress which will make it one of Canada's most important waterways.

Squeeze All the Business Out of Replies

Many Hardware Firms Find That by Carefully Considering Enquiry Letters Sent In They Can Discover New Sales Possibilities — Following Up All Leads is Turning Many of These Queries Into Profitable Sales

ARE you getting all the business out of the letters that come in from customers that you should? An investigation recently made into this matter by several firms proved conclusively that a percentage, and not a small percentage of business either, was being entirely overlooked. It was overlooked because the persons reading the letter in nine cases out of ten failed to realize the hidden possibilities that lay in many of the queries for information, prices, etc. When a farmer's wife for instance, wrote in asking for information about an electric toaster or the price of floor paint it was easy enough to give her the information and make the sale eventually. A little attention to the matter however, has convinced many firms that there are huge sales possibilities hidden in the majority of these letters. The ability to recognize hidden leads, to sense the possibilities for business development in some insufficiently expressed phrase, in short to "smell out" the business, is now being turned to profitable account.

Important Feature.

The careful analysis of replies received by hardware firms who send out printed matter is a tremendously important matter. Proper reading and interpretation and prompt following up of all leads for business may mean a difference of many thousands of dollars annually in your turnover. Many people, especially farmers, who know well enough what they want, find great difficulty in making themselves clear when writing. In thousands of cases farmers, and city people too for that matter, become interested in some advertising matter or some printed matter sent out by hardwaremen and want to buy. In writing to ask about the goods, however, they very often fail to make it clear just what they have in mind to purchase. Women especially will ask for prices of half a dozen things. Very often these inquiries will reveal to the careful dealer the direction in which their thoughts are travelling and he will see big chances for interesting them in other goods. It is this ability to grasp opportunities and follow them up and convert them into successful sales that is making many hardware firms show a most satisfactory increase in their volumes of sales for the year.

Aggressive Business

The man who sells his customers what they ask for and nothing else is a typical example of the old time, easy going "store keeper." The man who sells his customers more than they came to the store to buy is a real merchant. Many firms throughout the Dominion long ago realized the "pulling" power of attractively prepared mail matter. They have developed many departments of their stores enormously by timely trade letters and circulars sent out to their customers. They have found that it was good business to send these out regularly to customers and to keep lists of prospects to which they keep adding new names. A careful going over of the letters received in reply however has convinced many proprietors that they had not fully recognized all the possibilities for "hidden" business that lay behind some of the questions asked. They are giving this side of the question more careful consideration and are increasing their sales still more.

They Wanted To Know.

Your customers of course want to know what you have to sell. Very often they are particularly interested in knowing what the goods looks like and always in

IF THE telephone company raises its rates, rings will of course be dearer.

* * *

EVERY dollar the Canadian merchant can put into the new "Victory Loan" is not only good patriotism, but good business.

* * *

AS BUSINESS insurance as well as a good investment, there is nothing in the immediate future which should make so strong an appeal to the Canadian business man.

* * *

DON'T forget that the clock has to be changed on Sunday at midnight. It will make an hour's difference in the time you have to turn out on Monday morning.

* * *

OUR idea of an accomplished man is the chap who can ride in some other person's motor car with that splendid indifference that makes the real owner look like his chauffeur.

GET BEHIND THE SOLDIERS

HARRY LAUDER has been called to the colors. He is 48 years old and has already given his only son that the world may be kept free. For months past the famous Scotch singer has been doing wonderful work recruiting and helping various war loans. Now he will have a chance to go into the army. The calling to the colors of men like this is but another example not only to Canada but to the whole world of England's determination to see the war through to a finish. The Huns are on the run but more men are needed to keep them scurrying toward Berlin and land the real knockout blow that will bring the head of the Prussian military autocracy to his knees. Britain is prepared to do her share, even though it means calling out men like Harry Lauder. Thousands of others will be called, many of them fathers who have given three or four sons on the battlefields of Flanders. We in Canada have given men and money but we have yet to learn what giving means in the way that England, France and Belgium have given. We will have another chance to give of money very shortly in the Victory Loan campaign and when we realize that every dollar we loan to the government means just that much more help and strength to the boys on the firing line, and that it is really a privilege to be able to help in this way and not a duty, our response should be generous. The United States has just passed its objective of six billions in its war loan and Canada amid her unprecedented prosperity should be able to make an equally fine showing.

GET THE GOODS.

RECENT changes and restrictions in many lines make it certain that it will soon be more of a question of getting the goods rather than a consideration of what they will cost. For this reason, dealers should look carefully to their wants for the future and make the necessary arrangements for the stock they will require during the winter and spring without delay.

If you have not given attention to your future requirements, it behooves you to do so at once. Let the manufacturers know of your requirements and specifications and you will aid not only the Government, but also those firms which are conscientiously trying by their foresight to help win the war.

CHANCES FOR YOUNG MEN

ENDLESS opportunity for advancement has been one of the results of the war for the young men and women in business life in Canada. As a result of the general speeding up which was caused by the acute shortage of help Canadians as a nation are working harder and faster than ever before. In spite of all this activity many firms have been finding it impossible to handle all the work they have on hand. In order to keep everything moving and "carry on" to the best of their ability many firms have given youths who only a short time ago were the rawest apprentices all kinds of responsibilities. Many young men to-day are handling jobs which formerly were reserved for veterans. The value of training was never perhaps more forcibly emphasized in the history of the Dominion than since the war started. The young men upon whom responsibility was thrown realized at once that one of the quickest ways of rising to the occasion and making good was to read the best books and magazines published in connection with their particular line of work. The

value of the technical books and magazines has been demonstrated in thousands of cases by the progress they have enabled ambitious young men to make. These young men have been making good because they concentrated with all their energies upon the tasks in hand and many of them have advanced more in the past four years than they would under ordinary circumstances in ten. They have taken and are still taking advantage of every opportunity to forge ahead. Many of them in the next few years will take leading places in the commercial life of Canada and they owe their chances for rapid development to the war.

RESULTS OF WASTE

ENGLAND has revised and Canada is learning ing to revise the word "rubbish." We are beginning to realize that we have been a wasteful people. Because we had a wealth of resources at hand and ready access to the supplies of other countries we were not careful. It was far less trouble to use new material than to bother about the old which was nearly always consigned to the "rubbish" heap or ruthlessly destroyed. Now we are realizing that much of this material was most useful and that we were too indolent to prepare it for further use. Some of our greatest wastes were in metal and in cloth. If we learn nothing else from the war we will have an increased respect for the value of many metals. As a result of the depletion of supplies it seems likely to be a long time before we will be in the position to have anything like as liberal supplies of many materials as were available formerly.

LEADER IS NEEDED.

IN spite of all that has been said in the business papers and magazines of the country, the Government has taken no action to solve Canada's post war trade problems or to help the business men of the Dominion extend their trade. One of the great needs in connection with the situation as it exists to-day is leadership. With the end of the war in sight and Canada in a splendid position to take care of increased trade Ottawa is doing nothing to rise to the occasion. There is no definite policy of any kind. If the Dominion's exports increase it will be due to the enterprise of Canada and not through any help from the Government. Other countries are busy getting all the knowledge they can regarding the markets that will be open and the requirements of those markets. They are getting in touch with the people who will be the buyers of the future. As a result of the war Germany will be compelled to abandon millions of dollars worth of markets developed with an enormous effort and much hard work. Canada by her position and her resources should be in a position to get a big share of the trade in some of these territories. There are many ways in which the Government by co-operating with the manufacturers and business men of Canada could assist in building up a trade that would steadily grow in the future. Action, as far as Ottawa is concerned, seems to be confined in many instances to avoiding anything that looks like work.

MAY MODIFY LUXURY TAX

TWO serious objections which have become apparent in connection with the proposed luxury taxes in England and the United States have been presented and appear to be so well founded that the governments may greatly modify their original schedules. It has been pointed out that there is a great danger that the tax, would encourage the sale of cheap trumpery articles and discourage the manufacture of articles of solid workmanship and greator durability. From the point of view of sound economics little can be said to controvert that argument. That being so, the proposal is likely to bring about a state of things which is exactly contrary to that which is desired.

Another important consideration is that in order to collect such a tax the Government would require to organize a large staff of officials in order to see that there were no evasions, and in this way the revenue would be largely eaten up in salaries.

HANDWRITING ON THE WALL

THERE are lots of jobs we would rather have these days than that of Kaiser Bill. Just imagine how pleasant it must be to get message after message, that Foch has taken this strong point or that impregnable town, or is chasing the Brandenburgers or some other of "my incomparable troops" back to the Rhine. Setback after setback has been coming with such clocklike regularity since the middle of July that even such a blinded egoist as the Kaiser must see the hand writing on the wall. It would be interesting to know just what is taking place behind the scenes at Potsdam these days. The head of the Prussian autocracy and his underlings have a lot to answer for and the day seems to be coming swiftly when they must pay in full for their crimes against humanity.

Whether the Kaiser abdicates or not, the end of the Hohenzollern dynasty is fairly in sight. The Electors of Brandenburg and their successors must be conceded to have been the architects of modern Germany; when all the qualities that made the line great and all that made it base became united in one man, the ruin of Germany stands as their latest work. Napoleon had a prophetic insight into the implications of the Hohenzollern character when he said: "I made the mistake of my career, when I had the opportunity, that I did not remove the Hohenzollerns from the throne of Prussia. As long as this house reigns and until the red cap of liberty is erected in Germany, there will be no peace in Europe."

EVENTS IN THE TRADE

Business Changes

Montreal—Wenceslas Thauvette & Co., hardware, is registered at Montreal.

Ethel, Ont.—Charles Cleaver has purchased the hardware business of John Krauter.

Obituary

The death occurred at Iroquois, Ont., of Samuel Landon, dealer in stoves and tinware.

The death occurred at Burlington, Ont., of Gordon Colton, of the hardware firm of Colton and Lorimer.

George Smith, aged 31, of Toronto, sales manager for the Ontario Wind Engine and Pump Co., died from pneumonia a few days after being taken ill with Spanish influenza.

Edward Weiss, manager of the hardware departments of the firm of William Knell & Co., Kitchener, Ont., died from pneumonia, which followed an attack of influenza. He was 31 years old, and had been with Knell & Co. for eight years.

Spanish influenza was responsible for the death of three prominent members of the National Association of Window Glass Manufacturers. Raymond Cornil, president, and Louis Lambiotte, vice-president of the National Glass Co., died within a short time of each other. Marcel Mayer, general manager of the Alliance Window Glass Co, Salem, W. Va., was also a victim.

Personals

W. Kemp, who recently resigned from the staff at the land titles office at Humboldt, Sask., has taken a position in the hardware store of E. Fletcher & Co.

C. R. Metler of the Purchasing Department of the Perfection Stove Co., Ltd., Sarnia, Ont., has resigned and becomes indentified with the management of the S. C. Williams chain of cash and carry stores.

Lt.-Col. Hon. C. C. Ballantyne, Minister of Marine and Fisheries, vice-president of the Sherwin Williams Paint Co., has been appointed a director of the Royal Trust Co.

Trade Notes

J. Hume, hardware dealer at Oak River, Manitoba, has taken the agency for a light tractor.

The John Deere Plow Co., Ltd., and the Dain Mfg. Co., of Welland, have amalgamated under the name of the John Deere Mfg. Co, Ltd.

As a result of there being more than 1,700 cases of Spanish influenza in Kitchener and Waterloo recently the big plants of the Kaufman Rubber Co. and the Merchants Rubber Co. had to close down.

A dispatch from London, England, states that the Privy Council has dismissed the application of the Canada Foundry vs. Edmonton Portland Cement Company, concerning a claim for erection of buildings.

The Haddow Brokerage Company has opened with offices in the Southam Building, 128 Bleury street, Montreal. The salesmanager is G. Nicolet, formerly manager of the tool and sporting goods departments of the Jas. Walker Hardware Co., Ltd., Montreal. His connection with the hardware business covers fifteen years, part of which was spent on the road. Adam Haddow, president of the company, has been connected with the tile and marble business for twenty years and recently decided to enter the manufacturer's agency business.

The McClary Mfg. Co., Ltd., is making extensive improvements to its Montreal plant which will provide much more room for the business served by this division. J. C. Newman stated to HARDWARE AND METAL that the changes would increase the capacity of the plant by 20,000 feet. Among other things a new galvanizing room is being arranged for and the factory part of the plant will be thoroughly overhauled. The new plans call for the addition of a full storey and the improvements will be hurried so that full advantage may be taken of them not later than the first of the year.

Montreal News

R. D. Anderson, of the office staff of the Consumers Cordage Co, died of influenza after a short illness.

Walter Ramsay, president of A. Ramsay and Son, who has been confined to his home through sickness, is recovering rapidly.

W. S. McLennan, sales manager for Brandram-Henderson Ltd., who was confined to the house for a few days this week, is at his desk again.

N. O. Philip, lately with the J. S. Mitchell Co., Ltd., Sherbrooke, Quebec, and formerly with Peart Bros. and Co., of Regina, has accepted a position as assistant in the pricing department of Starke-Seybold Ltd.

Starke-Seybold Ltd., wholesale hardware, are making extensive improvements to their offices, which, when completed, will afford more commodious and comfortable quarters. The walls are being beaver-boarded and tinted, and divisions are being made to make for efficient handling of the office work in the various departments.

R. H. Monk, manager of the lead works division of Brandram-Henderson Ltd, Montreal, has left on a trip to the Maritime Provinces, and will visit the company's eastern plant at Halifax.

The first order regarding the hours at which stores may be legally opened and at which they must close in Montreal has been changed. The latest ruling requires all stores to open at 10.30, or not earlier in any case and close at 7 p.m. Some remain open until this hour, while others close between 6 and 7. Although the measure has caused some inconvenience, it has been gladly met by the trade, which recognized that the efforts of the city commission were directed toward staying the spread of disease.

News From Regina

The Bapco Paint Co., has opened a wholesale branch on Scarth st.

Wm. Tinline, of Armstrong Smyth and Dowswell, is holidaying at Elkhorn, Manitoba.

H. James manager of R. H. Williams hardware department, has returned from a business trip east.

C. A. Speers, travelling salesman for the Champion spark plug, was here on his way east after having made the trip to the coast. He is returning by auto.

Wm. H. Munroe, of R. H. Williams, hardware department, and Perry Logan, of the Wood Hardware Co., recently enjoyed a week's duck hunting at Johnston Lake.

The Imperial Oil Co., recently handed the City Treasurer a cheque for $17,000 as its share of the cost of a pavement to its new plant. The company is erecting thirty cottages to house its employees.

Conventions Held Up By the Spanish Flu

Owing to the epidemic of Spanish influenza the conventions of the American Hardware Manufacturers' Association and of the National Hardware Association which were to have been held at Atlantic City, October 23, 25 have been indefinitely postponed. Word was received from the health authorities of the State

of New Jersey and Atlantic City that such a course was absolutely necessary in the best interests of everyone.

Big Bicycle Orders Placed in Montreal

The report from the United States that the War Service Board had ordered the American bicycle manufacturers to discontinue the making of juvenile and racing bicycles has led the Montreal trade to order an unusual quantity of juvenile models for immediate delivery from Canadian concerns. The American order does not, however, affect the Canadian industry and no move has yet been made by the Dominion Government to curtail the production or sale of bicycles in Canada. The action of the United States authorities has not made any material difference in the ordering of bicycles in Canada, except in the case of Montreal, but the Canadian makers and jobbers have received many inquiries as to possible development in the Dominion. The Canadian companies report that they are in fair shape to take care of retail demands during the whole of the coming year.

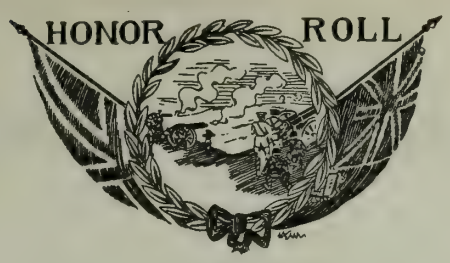
Dealers Used "Flu" To Boost Business

Toronto bicycle dealers took full advantage of the general criticism of the street railway service as a reason for the spread of influenza to give the bicycle trade a real boost. Combination advertisements of good size were run in the evening papers on two different days to point out the advantages of the bicycle over the trolley car and the names of twenty-two local bicycle dealers appeared in the ad. The wording was as follows:

"To Avoid the 'Flu' ride a bicycle."

"Get away from the stuffy, over-crowded street cars, with their danger of contagion.

"Ride a bicycle through the pure, fresh air.



"With an easy-running, long-lasting bicycle, cycling will be a pleasure as well as a benefit.

"You will need a bicycle next spring anyway and will save money by buying now."

At the bottom of the display was the slogan:—"Twice as easy as walking and three times as fast."

CARTAGE TO BE CHARGED ON STOVES

Montreal.—It has been arranged that cartage on stoves and heaters shall be charged to the buyer from now on. There has been some controversy regarding this matter and it has been generally agreed that the cartage ought to be paid by the recipient on the basis of the usual rates charged by the railway companies for such service. For instance, when a shipment is delivered at the railway station of the consignee and he desires that it shall be delivered to his warehouse, he will be required to pay the accumulated charge for such delivery.

Signaller Guy W. Garrett, son of George S. Garrett, hardware dealer, 582 College St., Toronto, was killed in action in the recent fighting. Prior to going overseas two years ago with the 169th Battalion, he worked with his father. He was formerly a sergeant-major in the Imperial School of Signalling in England but reverted in order to go to the firing line in France. Signaller Garrett was 23 years old.

Pte. Jack Evans, formerly foreman of the graniteware department of the McClary Mfg. Co. at London, Ont., was killed in action in the recent drive. He went overseas with the 10th Canadian Battalion.

Pte. Heinrich, formerly employed in Hallson's hardware store at Kamsack, Saskatchewan, was killed in action recently. He went overseas with the 188th Battalion in the spring of 1916 and soon after going to France with a draft was wounded in the head. He returned to the firing line last March.

Gunner Arthur Hare, aged 23,formerly traveller with the Ramsay Paint Company of Montreal, died in England from pneumonia. On the same days his brother, John W. Hare, died in Toronto of the same disease. Another brother is now on his way to Russia.

Terry R. Cope, salesman with C. T. Laird, hardware, Regina, was wounded in the recent fighting in France.

W. Hubb, of Lethbridge, has received his discharge from the cavalry and has returned to his position with the hardware firm of Armstrong Smyth and Dowswell, of Regina.

Turpentine Market Will Continue Firm

The following is the outlook for turpentine and rosin according to the *Naval Stores Review*:

"As to the production for 1919, no one in position to gauge the situation at all believes that more rosins and turpentine will be made than were produced this season. Consumption, even with the war still in progress, is not apt to be short of what it was this year, so the production of 1919 will be taken up even if peace does not come, and further inroads made on such stocks as may be carried over from this season. If peace comes in the next spring, or summer or fall, the position of both rosins and turpentine must be exceptionally strong, stronger, in all likelihood, than any other raw commodities will occupy. Small visible supplies, small production, American demand vigorous, and the greater part of the outside world bare of supplies and eager to rehabilitate their industries as quickly as possible, certainly paints a bright picture for naval stores at that time. And because of these conditions the American consumers who need turpentine and rosins in their factories will do well to study the situation with the utmost care. To be caught without suplies when the foreign calls come will not reflect credit upon their business foresight."

SALES CONVENTIONS CANCELLED

Several large annual conventions of various paint companies which were to have been held in Montreal this week and next, have been postponed indefinitely owing to the influenza epidemic.

Trade Inquiries

714. **Tools.**—A Glasgow firm are interested in getting into touch with Canadian tool manufacturers with a view to post-war business.

715. **Handles.**—A Glasgow firm would like to hear from Canadian exporters of pick, axe, adze and hammer handles, with a view to post-war business.

716. **Tools.**—A Glasgow firm are interested in hearing from Canadian firms manufacturing engineers' and mechanics' tools with a view to business after the war.

727. **Wire nails and iron hooping.**—A London firm wishes to be placed in communication with Canadian manufacturers of wire nails and iron hooping for wooden cases, which are required for the Persian Gulf.

736. **Steel pipes.**—There is a big demand in Japan for steel pipes of various sizes, and a Tokyo firm is anxious to communicate with prospective shippers thereof.

752. **Bicycle accessories.**—A Japanese importing house desires to obtain bicycle chains, free wheels (coaster brakes), spokes, and nickel ball bearings from Canadian manufacturers. This firm recently placed an order for yen 20,000 worth of free wheels in England and yen 70,000 of chain. They would like to receive samples of each article which they would be willing to pay for. They intimated a large business could be done if Canadian firms could supply the materials in question.

HARDWARE LETTER BOX

Ice Cream Freezers

Who makes the Jack Frost ice cream freezer? J. A. Waterhouse, Cereal, Alta.

Can any of our readers supply the information?—Ed.

A pamphlet recently issued by the Canadian General Electric Co., of Toronto, lists a number of electric air heaters especially useful for continuous use in homes, offices or factories. Designs of electric glowers and radiators are also shown.

THE CLERKS DEPARTMENT

BANK PRESIDENT AT 37, BUT BOOK-FARMER FIRST

Steps in the Path to Success of Oscar Cooper, "the Breezy Westerner" Who Controls the New York County National Bank

"BOOK-FARMING" and banking may seem a curious combination of interests for a young business man with a good legal training, but they have both bulked considerably in the career of the subject of this biographical sketch — Oscar Cooper who is at thirty-seven years of age, President of the New York County National Bank, New York City.

On the way to that position of responsibility Oscar Cooper wrestled with several decent-sized problems, and mastered them (though one did manage to floor him.) The one that floored him was not the famous San Francisco earthquake and fire. Quite to the contrary—he won distinction by the way he managed the problem that little event produced for him. But an aftermath of the earthquake set for him a further problem so entangled and perverse in its intricacies that neither Oscar Cooper or any other man could make head or tail of it. In the endeavor, to unravel it, however, he acquired invaluable experience which he has since cashed in upon as a banker.

The statement that Oscar Cooper is the son of a wealthy man would be enough to convince anyone with Bolsheviki tendencies about the brain-pan that, of course, the wealth of the father must be the reason for the success of the son. Wealthy men with sons of their own to bring up may be inclined to view the matter differently, for they are the men who can best realize just how far mere money can find place for a young man in the business world, and win for him the confidence and respect of men of affairs. And as a matter of further fact in connection with his father's wealth, Oscar Cooper gained no advantage from it whatsoever, but had to win his way entirely on his own merits from the earliest.

About him Genevieve Y. Parkhurst writes in *Forbes Magazine*:

When a lad dreams a dream and it grows up with him—*and he works*—some day that dream is likely to come true. And when it does, it usually has expanded. Which is the experience of Oscar Cooper, president of the New York County National Bank.

This is not a janitor-to-millionaire fact romance. It is the simple story of how a rich man's son made himself. His grandfather was an early California pioneer. His father, Judge James A Cooper, now an eminent jurist and ex-presiding justice of the Appellate Court of California, settled in Ukiah, California, in the early seventies, taking up the practice of law.

Judge Cooper had made his own way and his own fortune. He expected his son to do the same. The lad began to realize that a ten-thousand-acre ranch in a country rich in timber and farm production was a hard goal for a young lawyer. So he went to San Francisco, took his desk in a law office and set about making his fortune. He found it monotonous. There was slight adventure in listening to and straightening out the squabbles that find their way into the beginner's office. The one-toned restraint of doing the thing he didn't like chafed him. But with something of the courageous spirit which had come down to him from his father and grandfather, he kept at it just the same.

About that time along came the earthquake and fire which temporarily blotted San Francisco from the map. With cries of hunger from two hundred thousand people, there came the necessity for quick, effective action. Someone with a punch, someone who could handle people was needed to organize things.

Oscar Cooper was the man chosen. He was twenty-five. To assist him was named John S. Drum, also a young lawyer but some years older. He, too, by strange coincidence is now the president of one of San Francisco's leading banks.

The work that Oscar Cooper did during those first six weeks following the fire still lives in the hearts of the grateful many whom he kept from hunger. Both rich and poor were forced into the bread-line. The grocery stores, except a few in remote districts, had been burned. Young Cooper was made executive of the Commission for Relief. Respecting no personal privileges, he took command of the entire food problem, dealing it out share and share alike. At the end of the chaos the mayor and committee were able to announce that not one person had gone without his three meals a day.

Floored—For Once!

A terrifying financial slump was the next aftermath of the catastrophe. Among the institutions that went under was the California Safe Deposit and Trust Company. It carried with it the fortunes of many and the good name of a few. Desperate attempts were made to revive it. They failed. Men who were big figures in the San Francisco money market and who held the bank's securities were anxious to see it put on its feet rather than have it go into liquidation, which would yield but a small per cent. on its liabilities

Oscar Cooper's record as executive of the Relief Commission had made an impression on the minds of the city's men of affairs. They decided he would be a good man to rehabilitate the California Safe Deposit and Trust Company. For three years he worked incessantly endeavoring to get the various holders to turn in their collateral for stock in a new corporation. The depositors were a heterogeneous class, such as could be found in no place but a seaport metropolis. When one group was ready to acquiesce, another wanted to withdraw. Various trips back and forth from East to West, North to South, in search of new capital to back it would be on the point of proving effective when some faction would withdraw their support. At last capital grew tired of the vacillations. Oscar Cooper failed as any man would have failed, to readjust the corporation.

From Oil to Ranching

And here the young man's dream disappeared on a dim horizon—until a quick turn of fortune sent him scampering to face it. During the oil boom he had, for a small amount of money, bought an option on acreage in one of the remoter oil districts. Experts laughed at him, declaring that the outcroppings and the shale underneath were not high-grade indicators. But he knew a bit aobut oil prospecting. Also, among his friends were practical oil men. He took their advice and held on to his option, renewing when it ran out. A few weeks before the exhaustion of the second option oil was discovered on the adjoining property. Oscar Cooper sold the land for a comfortable fortune.

Before the ink was dry on the check, he was upstate to Mendocino County. In a week he owned his ranch.

The money had come at an opportune time. At twenty-five he had married a girl in his own set, one who had known nothing but luxury all her life. The parents on both sides were pleased with the match. But they felt that the young people should make heir own way together So no checks had come from either side.

"Book farming" and Bride Made Good

Oscar Cooper did not believe that a man had a right to marry a girl of that sort and take her into a home where she would have to do without the things to which she had been used. He married her and, although he had to work early and late, he never failed in maintaining his ideal. They went up to the ranch together. And there for five years he went in for ranching just as he had gone in for the California Safe Deposit had

Trust Company. His wife, too, did a big part. It was almost impossible to get help on the ranch, for it was sixty miles from a railroad. So for the five years Mrs. Cooper did all the cooking and housework—no light task, since there were often as many as forty hands about the ranch.

This time Oscar Cooper did not fail. Acting as his own foreman, he rode over his land, handling his herds of cattle on the range, following the plow in the orchards and the alfalfa fields. The city seldom saw him. When he returned to it at the end of five years he was the owner of one of the show places of Mendocino County and he had all the old farmers in that section scratching their heads and "allowin' as how there must be somethin' in this book farmin' after all."

The Lure of the East

The ball of fortune, once started to roll, did not stop. The scope of his vision grew. His activities in connection with the defunct bank had brought him into touch with the Eastern financial centres. In the heat-waves that danced over the hill-tops of his California ranch he visualized the trail of the cattle to the railroad, to the packing houses, to the people and back again to the nation's treasuries. He followed the redwood boles down the long flume into the mill pond, through the mill and on to the end of the empire road. He longed for the whole big adventure of it. He wanted to come to the centre of things financial. just as in his ranching he had gone deep into the heart of the open. That was a little over a year ago.

So he found a foreman and took the train for New York.

And here perhaps, he found the strangest of all the turns of fortune s wheel. The men of finance he met listened attentively to him when they talked with him. They were taken with his alert mind, his keen sense of values. Among the men he met was a high official of the Guaranty Trust Company, the largest in the city, and in the whole country. Oscar Cooper told him he would like to try banking. He asked to be put to work there to study modern business.

When he returned to California it was to say good-bye and start out on the high road of big business. There were men at home who did not want him to leave. The president of one of the large national banks offered him a vice-presidency in the institution. But his will had marked his way. He came to the waiting desk in the Guaranty Trust Company.

He worked and studied, going from one department to another, sometimes attending to the bank's outside work. Then one day men on the directorate of the New York County National Bank sent for him and asked him how he would like to be its president.

He laughed at them at first, thinking they were joking. He knew that the institution was one of the most conservative on the Atlantic Coast, that the presidency had been in the same family for over seventy years. He did not believe the conservative directors would consider a breezy Westerner for the place.

But these directors thought differently. One of them said: "You have three qualities we find necessary in modern banking; you put punch into everything you do; you get the other fellow's point of view; you know just enough, not too much, law. Besides, you have piled up a pretty good fortune for yourself with no help from anyone but yourself."

And so, since last November, he has been president of the New York County National Bank. And he is making good—this new-fashioned man in an old-fashioned bank.

SQUEEZE ALL THE BUSINESS

Continued from page 49

knowing how much you want for them. These three points form the basis of some of the most successful selling literature that has been sent out. It has more than proved its efficiency over literature sent out by firms who used their space to eulogize themselves, their store or their prices. In nine cases out of ten stuff of this kind went over their heads and was wasted. The well planned letter or circular however, with its simple yet direct appeal, invariably brings inquiries that later bring good business. Very often by going over these letters carefully merchants find that apparently vague expressions when followed up bring extremely satisfactory returns.

How It Worked.

A man wrote in recently to a hardware dealer and said "I think I will try some of your paint as mentioned in circular, send me a half gallon at price stated." The hardware man sent the paint, but he did more. He sent a man with it who could talk paint, size up the work and who was a salesman also. He went out ten miles in the country and got in personal touch with the man and found that there was a great deal of other work that needed doing beside what the farmer had in mind. He convinced him thoroughly that he could not afford to put that work off any longer as if he did he was going to have a much greater bill for repairs than the necessary paint would cost. He convinced him also that there was work in the house that should be done, implements that should be painted and other work done. He sold enough paints and brushes to pay for his time and expenses many times over, and he also got a line on other business in the neighborhood which he will follow up. All this had been overlooked and resulted from the following up of what at first glance seemed only a simple order for half a gallon of paint.

Wasted Effort

When your customers' letters are not "intensively" read and properly followed up, much of the time and expense merchants put on their letter or circular campaigns are wasted. There is also the waste of paper or postage and above all of opportunity. Letters and circulars properly handled are efficient and economical salesmen. They will draw business from all over a firm's territory,but unless the proprietor of the store or the party in charge reads them very carefully and thoroughly appreciates the possibilities that lie hidden in many of them a great deal of good opportunity for trade may be lost.

MODIFICATION OF GASOLINE REGULATIONS

Continued from page 48

The results of the "Gasless Sundays" in Canada and the United States were most satisfactory. It is estimated that more than 1,000,000 barrels of gasoline were sent to the boys on the firing line as a result of the savings made at home. Owing to the season of the year the peak load of domestic consumption is passing and in the great majority of cases the elimination of Sunday riding from now on would, it is felt, work no hardship.

Hard Fibre Prices Are on Down Grade

A market report from New York says:

"Hard fibre values have been undergoing a process of adjustment to lower levels, while the soft fibres made gains. Manila, Sisal, Maguey, New Zealand and Mauritius all are on a lower level than for some months, the declines running from ¾ cent to 4 cents per pound, while Italian jute and cotton made appreciable gains in market value, the advances ranging from 1¾ cents to 3¾ cents per pound. American Government regulation of manila and maguey prices has been removed. and the removal has been followed by lower market values, a part of the decline being due to lower Pacific Ocean freight rates. Manila fibre quotations at the beginning of this month were exactly four cents per pound lower than they were at the beginning of July. Maguey showed recessions of 2½ to 3½ cents. Mexican sisal, because of the purchase of 500,000 bales in June by the American Food administration was one cent lower. Java sisal declined 2½ cents during the three months. New Zealand quotations were down 1½@2 cents. Mauritius on spot was only three-quarters cent. lower. Italian, owing principally to a partial rectification of exchange advanced 2½@3¾ cents. Jute on spot gained 1¾ cents, while for shipment the advance was three cents. Jute's yield this year promises to be the smallest in many years. Cotton, because of serious damage to the growing crop, showed a net gain of 3 60 cents.

CONTROL LAMP CHIMNEYS

The British Government has added glass lamp chimneys to the articles under its control. Firms ordering direct from manufacturers must submit their order in duplicate to the Controller of Glassware Supply, 22 Hertford street, London, W.1, with a covering letter stating the purpose for which the goods are required, and how long the quantity ordered will meet requirements. A declaration must also be made of the quantities of British or imported lamp glass chimneys received during 1917.

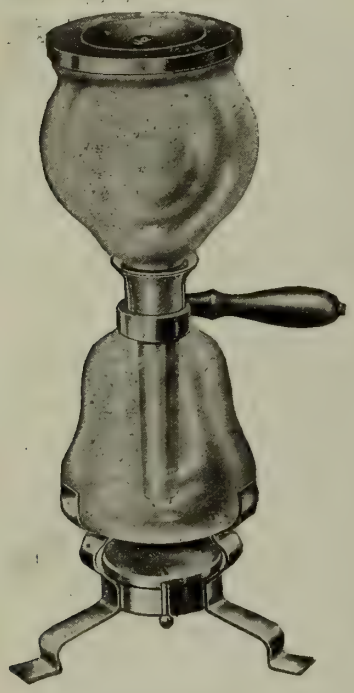
THE SPIRIT'S THE THING

Said an Irish leader: "Min, ye are on the verge of battle, will yez fight or will yez run?"

"We will," came a chorus of eager replies.

"Which will yez do?" says he.

"We will not," says they.



"Thank ye, me min," says he, "I thought ye would."

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

AUTOVAC COFFEE FILTER

The Autovac glass coffee filter it is claimed cuts coffee bills in half, makes better coffee and pays for itself in the saving of coffee within four months' time in an average family. It can be heated it is stated with alcohol, with gas or on

Coffee Filter

the top of any electric or coal stove. The Autovac flat bottom bowls can be placed firmly on the table it is claimed and will not roll off or break while being cleaned. Another point claimed for coffee making by the Autovac is that because it is all glass, no flavor of metal results and caffetanic acid is avoided by means of the quick action of the filter. This quick action is aided it is stated by the use of finely ground coffee, the boiling water reaching the coffee grains more speedily and more thoroughly than in other processes where coarse coffee has to be used. The Autovac Filter is handled by E. G. Gooderham, 24 King St. W., Toronto.

STEVENS PISTON RINGS

Stevens & Company, 375 Broadway, New York, manufacturers of automobile and cycle accessories, have put up in a convenient compartment box fifteen different sizes of non-set piston rings most in demand. From this group, it is said, over fifty different well-known cars can be fitted, including Ford, Maxwell, Overland, Buick, Saxon, Dodge, Chalmers, Mitchell, Packard and Chevrolet. From this assortment the hardware dealer can fill practically any order for frequently used rings, besides helping him to gauge the local demand for particular sizes so that he can safely re-stock according to sales experience.

The non-set piston ring is of the one-piece type—individually cast of a close-grain metal, the skin formed in casting being retained on the inner side of the ring because of the extra tough or resilient quality. Notwithstanding the accurate machining and fine metallic quality these rings it is claimed may be sold profitably at a moderate price.

It is estimated that but about one-seventh of the hardware dealers have been carrying piston rings for automobiles. Many of them have believed it necessary to stock many different sizes, which they were reluctant to do. It was to help the hardware merchant to safely stock this line without the risk of carrying many inactive sizes that Stevens & Company made up this assortment of non-set piston rings.

Piston Rings

P. D. Q. GOLF BALL

The P. D. Q. golf ball which has just been brought out by the Harry C. Lee Company, of 99 Chambers St., New York, is made in three weights; 31 dwts., which is the heaviest, and suitable for a good strong player; 29 dwts., which although a sinking weight has good distance, and the 27 dwt., a floating ball and somewhat larger in size. The latter it is claimed is especially suitable for players desiring a light ball. This ball will also float, and is used for water holes.

The P. D. Q. ball it is claimed is made of the very highest grade material ob-

P. D. Q. Golf Ball

tainable. The tension at which the rubber is wound, together with its being perfectly centered and absolutely round, makes it ideal for putting, it is stated.

COMMUTATOR WIRES

Commutator wires for Ford cars are being put on the market by Samuel Trees & Company, 42 Wellington St. E., Toronto.

Commutator Wires

Commutator wires after one or two years become oil soaked and lose their efficiency. By replacing the old with new commutator wires, the troubles in the ignition system it is claimed are reduced to a great extent. This also applies to the spark plug wires, it is stated.

COMBINATION PLIERS

The Lakeside Forge Company, of Erie, Pa., is making a new line of pliers with cotter pin extractor handle. This tool, it is claimed, is essential in kits for trucks, etc., as it combines a plier, cotter pin extractor, and a screw driver.

INVENTS TIRE CHAIN

Captain B. W. Hartley, of Haileybury, Ont., has invented a non-slip automobile tire chain. It is claimed that it absolutely prevents skidding sideways or back, or front. It is stated the chain does not bump or rattle when in use.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

WIRE nails are to the fore this week in an advance of 20c per 100-lb. keg. Manufacturers have found it necessary to revise the differentials on packing as well, 25 and 50-lb. boxes now taking an extra of 50c per 100 pounds over kegs and a charge of 25c per 100 pounds being the new extra for coating or blueing. Wire rods are extremely scarce and even at advance made indications are that market on nails rules with a very strong undertone.

Wire fence staples have also gone to higher levels, new prices issued this week providing for an advance of 25c per 100-lb. keg on both bright and galvanized. The extras on 25-lb. and 50-lb. boxes have been advanced to 50c per 100 pounds on staples in line with change made on nails.

A sharp advance in one line of planes and plane irons has been recorded, the present basis of quotations being approximately 15 per cent. over that previously ruling. This follows an advance made about three months ago and there is no indication that the peak has yet been reached. Iron and steel squares and pipe cutters are other lines of tools to record increases in prices.

Linseed oil after a period of rapid decline seems to have stiffened again. Following last week's recorded drop, a further recession of 8c was made but this has been recovered and the market seems likely to stiffen up further. The flaxseed market is on the upward move again and this will be reflected in prices on linseed oil. Prices three cents lower and three cents higher per gallon than those of last week are asked for spot deliveries.

Turpentine at primary points has stiffened materially and indications are that markets there will rule with a firm undertone. This will be reflected here although in some quarters a further decline of 2c per gallon has been made. Higher prices are almost sure to be recorded here in the course of another week or ten days.

New prices have been issued on horse blankets which show a sharp advance of 25 per cent. The scarcity and high price of jute along with continued advances in other materials and higher labor costs are factors contributing to this increase.

A decline of 5c per pound in the price of tin has been made in some quarters. The market generally is quiet and whereas supplies are none too plentiful, there seems to be ample to meet requirements. Spelter has firmed up considerably, stocks being materially reduced under influence of active demand. No change in price has yet occurred.

MONTREAL MARKETS

MONTREAL, October 24—Wire nails are up 20c and fence staples have advanced 25c per 100 pounds. A change in the extras is also noticeable. Other important changes affecting collar pads, pipe cutters, grindstones, squares have been made, higher levels being reached in each instance. Some lines of auto equipment have also come in for revision.

Shock Absorbers Up; Auto Springs, Also

Montreal.

SHOCK ABSORBERS, AUTO SPRINGS.—Springs for Ford cars are advanced. Front springs, No. 3800, are now priced at $4.20 to the trade, the old cost being $3.49 each. No. 3824 are up from $9.30 to $10.50, and main leaves for front Ford springs are quoted at $1.31, the former cost being $1.05.

Steelbilt shock absorbers are higher too. The old price of $5.40 for single sets is superseded by one of $6.12, and where sets of 6 lots are wanted $5.82 is the price. The old price for lots of six was $5.13 per set.

Air Bag Prices; Blowout Patches

Montreal.

AUTO EQUIPMENT.—The following prices on air bags will be of interest to the trade. In dozen lots the following prices obtain, each, and the trade discount is 30 per cent. Air bags 3 x 14 inches, $3.68; 3 x 16, $3.96; 3½ x 14, $4.20; 3½ x 16, $4.73; 4 x 16, $5.25; 4 x 18, $5.78; 4½ x 16, $6.06; 4½ x 18, $6.30; 5 x 16, $6.58, and 5 x 18, $7.31.

Blowout patches of Samson make are priced at 52½c for lots of 12; 4 in., 73½c; 4½ in., 91c, and 5 in., $1.02. These prices carry a trade discount of 30 per cent.

Hook on Boots, Mats, Grips, Patches Priced

Montreal.

HOOK-ON-BOOTS, MATS. — The Leader line of hook on boots for auto tires in lots of 24 are selling as follows: 3½ inch, 94c; 4 in., 91c; 4½ in., $1.16; 5 in., $1.33. Discount is 30 per cent. for this quantity.

For the lace-on variety the above prices obtain and for those wanting the lines in smaller lots prices are: 90c, 97½c, $1.24 and $1.43 each, respectively, with trade discount of 25 per cent. applying.

Grips for Ford crank holder are worth 19c in singles and in 2 doz. lots 17½c each. Usual trade discounts apply.

Rubber mats for Fords are priced at $1.68 each singly, or in lots of 6 $1.47 each with 25 per cent. discount on smaller than six lots and in quantities of 6, 30 per cent.

Prices on Cementless Patches, Pedal Rubbers

Montreal.

PATCHES, PEDAL RUBBERS.—Cementless patches of Samson make are

priced at 42c each in 2 doz. lots, with 30 per cent. trade discount, and at 39c with 35 per cent. discount for 8 doz. lots. Leader patches are similarly listed at 28c and 26c respectively with like discounts.

Pedal rubbers for Chevrolet cars are sold at 42c each in dozen lots with 30 per cent. discount; Ford rubbers at 38½c; McLaughlin H-45 at 42c; McLaughlin E-63 at 42c, and Overland 75 and 90 at 38½c each. Like discounts apply to the latter also.

Hose connections for Chevrolet cars are priced at 10½c for 1¼ x 4 inch; 14c for 1¾ x 3¾; 9 4-5c for 1¾ x 2¾; 12 3-5c for 2 x 3¼, and 14c for 2 x 3½ inch. The trade discount in these quantities is 30 per cent.

Running Board Mats; Reliner Prices

Montreal.

MATS, RELINERS.—Running board mats, 11⅜x7¾x11-32 inches, are worth $1.13 each, singly, $1.05 in lots of 12; 97½c in lots of 48. Respective discounts of 25 per cent., 30 per cent. and 35 per cent. apply to the trade.

Reliners are selling on the basis of dozen quantities at the following prices and subject to trade discount of 30 per cent.; 30x3, $1.58; 30x3½, $1.79; 32x3½, $1.89; 31x4, $2.49; 32x4, $2.52; 33x4, $2.63; 34x4, $2.70; 34x4½, $2.90; 35x4½, $2.94; 36x4½, $3.01; 37x4½, $3.15; 36x5, $3.33; 37x5, $3.36.

Fabric Patches, Floating Flaps, Talc

Montreal.

PATCHES, FLAPS, TALC.—Flat fabric patches, No. 1 for 3, 3½ and 4 inch tires are offered to the trade at 38½c each, in dozen lots with a trade discount of 30 per cent. No. 2, for 4½ and 5 inch tires are selling at 52½c. If smaller quantities are wanted the price is 3½c each higher with discount 25 per cent.

Floating flaps are selling as follows in single lots: For 28x3 tires and 30x4, $1.35; 30x3½ and 31x4, $1.35, and the same price for 30x3, 31x3½, 32x4 and 33x4½. A price of $1.46 applies for sizes 32x3½, 33x4, 35x4½ and 36x5; 34x4½ and 35x5 are priced likewise.

The above are put up in 1 pound cartons, are frictioned both sides and skim coated. They also may be had in 5 and 10 pound rolls and are sold to the consumer at $2.05 per lb. and to the trade at $1.54 less 25 per cent in the No. 1225 A style. One side coated styles are also sold at approximately the same rate.

Weldacut talc in 4 oz. size in 2 doz. lots is 35c; 6½ oz., 52½c, and 8½ oz., 70c. Trade discount is 30 per cent.

Gums, Matting, Pails On New Price Basis

Montreal.

GUMS, MATTING, PAILS—White retread and white sidewall unvulcanized gums of 1-16 inch thickness, 18 or 36 inches wide, are selling at $1.20 per lb. in small lots; $1.12 on the $12 list and $1.04 on the $50 list. This range of prices is for the carton style of one pound each. Five pound rolls are priced lower at $1.09, $1.02 and 94c, respectively, while the prices for 10, 25 and 50 lb. rolls is respectively $1.01, 95c and 88c. All the above apply to number 1268 style.

Style No. 1242 grey retread and sidewall of similar size and thickness are: For cartons, $1.20 per pound, trade; $1.12 on the $12 list and $1.04 on the $50 list; five pound roll prices respectively, $1.09, $1.02 and 94c, and in 10, 25 and 50 lb. rolls, $1.01, 95c and 88c.

The same style in black, No. 1243, is priced likewise, while prices for red, No. 1244, are slightly higher. Discounts range from 25 per cent. to 35 per cent., according to quantity.

Collar Pads Advance, Steel Squares; Planes

Montreal.

COLLAR PADS, SQUARES, PLANES—Advances are made for collar pads. No. R 9 are now worth $8.80 per dozen; No. R 10, $9; No. R 13, $9.50; No. S 9, $9.50; No. R E 10, $9.40 and No. 310, $7.

Steel squares of various makes are higher, too, the increases approximating about 10 per cent.

It is stated that the market for planes is strong and that advances for this line in the immediate future may be made.

Grindstones Higher; Pipe Cutters Too

Montreal.

GRINDSTONES, PIPE CUTTERS.—Advances are made for grindstones. The following prices obtain here: 20 to 40 lbs. x 2 inches thick, $2.75 per 100 lbs.; 40 to 200 lbs. x 2 in., $2.50; 20 to 60 lbs. x 1½ and under 2 inches, $3; 200 lbs. up to 48 inches diameter, $2.60, and 200 pounds and up, over 48 inches diameter, $2.75.

Barnes and Saunders pipe cutters have been undergoing revision in some quarters, and prices here are revised with an advance made of about 20 per cent.

Wire Nails Up 15c; Staples Up Too

Montreal

WIRE, NAILS, STAPLES. — Advances were made for wire nails of 15c per keg and the price is now $5.50 here per 100 lb. keg. Staples, too, are higher, bright being advanced to $5.75 and galvanized to $6.50. The latter advance is 25c per keg.

The advances now asked for coating and bluing is 25c extra, instead of 20c and in 25 and 50 pound boxes the packing charge is 50c per 100 lbs. instead of 25c as heretofore. The same rule applies in the matter of wire staples.

Rope Markets Quiet; Prices Steady

Montreal.

ROPE AND CORDAGE.—Nothing new marks the local rope situation either as regards prices or movement. As a matter of fact the conditions are seasonably quieter and no new movement is looked for at present.

Pure manila basis is unchanged at 39c per pound; British manila 33c and sisal 27½c.

Coal Oil Steady; Gasoline Freer

Montreal.

COAL OIL, GASOLINE.—A better demand in the country obtains for coal oil. This is selling here at the unchanged price of 19c for Royalite and 22c for Electroline and Palacine.

There is a better position with regard to supplies of gasoline, for consumption is much less than it was a couple of months ago and stocks have benefited thereby. Prices on motor grade is still 34c.

Stove Makers Hard Hit; Wares Active

Montreal.

STOVES AND WARES.—The foundrymen are having their own times these days completing fall orders. Materials were scarce and some of these have only recently been received. Now again, another trouble confronts them, that of the sickness epidemic, and some are running on staffs that are short several hundred workers. This means that orders are delayed, and the overselling of some foundries makes it impossible to undertake any new business.

Enamelled and other wares are selling freely.

Light Sheet Trading; Prices Are Firm

Montreal.

SHEETS.—Little new interest is reported in the sheet metal markets and jobbers have no difficulty in getting their price for requirements. It is simply a matter these days of securing the necessary stock and prices are forthcoming from those needing the goods. A slight revision is made in black sheets, but the range is still such as to afford favorable buying prices.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$9 75	$11 50
12 gauge	9 65	11 00
14 gauge	9 00	8 20
16 gauge	9 15	8 25
18-20 gauge	9 25	8 30
22-24 gauge	9 60	8 35
26 gauge	9 75	8 40
28 gauge	9 90	8 50
GALVANIZED SHEETS—

22 and 24 gauge		11 15
20 gauge		11 05
18 gauge		10 95
16 gauge		10 85

NOTE.—These prices are for full bundles, an extra charge of 25c per 100 lbs. is made for broken lots.

Peace Rumors Quiet Demand Lead Lines

Montreal.

LEAD PRODUCTS.—The possibility of near peace affected the trading for lead products and kindred lines, it is thought. At any rate there is not a great deal of interest and the amount of business confines itself to sorting orders of the hand-to-mouth variety. Solder is steady and quiet, too.

Lead pipe, lb.	$0 15	$....
Lead waste pipe, lb.	0 16	....
Lead traps and bends	Net list.	
Lead wool, lb.	0 15½	0 16

45-55		0 57½
Zinc sheets, casks		....
Do., broken lots		....

Note—The above prices for solder are for full boxes of 100 lbs. Jobbers will charge several cents more for small lots.

Steel and Iron Firm; Sales Satisfactory

Montreal.

IRON AND STEEL.—The markets are very firm and steady. The undertone would indicate that higher prices may be asked for some lines, steel being very firm. The trade has been fairly good, but just about seasonable until the epidemic broke out, this having the effect of putting a damper on trading. The markets are unchanged.

Common bar iron, per 100 lbs.	$4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00

Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 22

Tea Lead Brings 6c; Old Metal Quiet

Montreal.

OLD MATERIAL.—Little new interest centres around this line excepting a higher price for tea lead. This is now bringing 6c. There is nothing new in old metals, brass or copper and the volume of business has shown little improvement.

Dealers' Buying Prices:		
Tea lead		0 06
Heavy lead pipe		0 07½
Yellow brass		0 13½
Red brass		0 23½
Light brass		0 08
Scrap zinc	0 06½	0 06¾

Old rubbers, boots and shoes		0 07¼
Overshoes, lumbermen's rubber boots		0 05
Bicycle tires	0 04½	0 05
Automobile tires	0 04¾	0 05

Tin Market Quiet; Spelter Firmer

Montreal.

INGOT METALS—Trading in metals is more limited in some respects. There is little change, generally, and tin is quiet, with little price change. Spelter is reported firm, but without change.

COPPER.—The prices obtaining for this are unchanged at 28¾c to 30c per pound, with trading rather light.

TIN.—There is less talk of price fixing, although some announcement to this effect may be made in the near future. Local business is small and sales are made at from 90 to 92c per pound in small lots.

LEAD.—Requirements are small and at unchanged price of 10 to 10¾c per pound orders are being taken care of. Were the demand larger it would only be taken care of with difficulty as supplies are limited.

SPELTER — Market is reported firmer here, but there is little trading and prices are unchanged at 10¼ to 10¾c per pound.

ANTIMONY.—Outside markets are reported slightly easier. The local markets are unchanged and business is small at 17c pound.

ALUMINUM.—With price fixed on this and with local requirements small the interest is confined. Prices range from 50 to 55c per pound for small lots.

TORONTO MARKETS

TORONTO, October 24—A twenty-cent advance has been made in the price of wire nails and revised extras are now in vogue for coating and blueing and packing in 25-lb. and 50-lb. boxes. Fence staples are up 25c per 100 pounds on both bright and galvanized. A 15 per cent. advance in planes and a substantial increase in iron and steel squares have been recorded. Horse blankets are up 25 per cent. and other lines to follow the upward trend include molasses gates, wood faucets, tubular rivets and clinch rivets.

Planes Go Up About 15 Per Cent.

Toronto.

PLANES.—A sharp advance has been made in Stanley planes and irons, amounting to approximately 15 per cent. This follows an advance made a couple of months ago, and there is no indication that the peak has yet been reached. Prices which are now named to the trade on some of the more familiar numbers are as follows: No. 3, $3.80 each; No. 4, $4.10; No. 4½, $4.75; No. 5, $4.75; No. 5½, $5.30; No 6, $6.05; No. 7, $7.90; No. 8, $8.25; block planes, No. 9½ are now $1.95; No. 15, $2.15; No. 16, $2.20; No. 18, $2.40; wood bottom planes, No. 24, $2.45; No. 26, $2.80; No. 27, $3.20; No. 32, $4.10; No. 35, $3.20. Combination planes, No. 45 are now quoted at $13.85 each, and No. 55 at $27.40. Rabbet planes No. 78 are advanced to $3 15 each, and Nos. 190 and 191, $2.45

Plane irons, single, 1¾-inch have also advanced, now being quoted at 50 cents each; the 2-inch at 52c; 2⅛-inch, 59c; 2¼-inch, 60c; and 2⅜-inch, 62c. Block plane irons are also higher, the No. 103 being quoted at $2 10 per dozen, the No. 110 at $3.20, and the No. 120 at $4.25.

Sharp Advance In Horse Blankets

Toronto.

HORSE BLANKETS.—A sharp advance has been made in the price of horse blankets amounting to about 25 per cent. The scarcity of jute, along with shortage of all other materials and increased manufacturing costs are factors contributing to this change.

Revised Prices Issued on Squares

Toronto.

SQUARES.—Revised prices have been issued on both iron and steel squares. These provide for substantial advances in each case, and the present basis of quotations now being made to the trade is: Iron No. 493, $7.25 per dozen; steel polished Standard, No. 1, $26.45 per dozen; No 2, $25.80; No. 3, $25.15; No. 4, $23.65; No. 14, $22.50; No. 11, $14.75; No. 12, $19.20; No. 100, $27.80; No 100 blued, $33.80; No. 3 blued, $31.15; No. 100 nickel plated, $32 95; No. 3 nickel plated, $30.30; No. 3, Rafter polished, $30 20, and No. 100 Rafter polished, $34.15.

Rivets Up; Clinch, Tubular Affected

Toronto.

RIVETS.—Higher prices are in evidence in quotations now issued on tubular and clinch rivets. The japanned tubular rivets in cartons, assorted 3/16 to 9/16 inch, are now selling at 90c per dozen. Slotted clinch rivets, No. 9 are quoted at $1.20 per dozen, and No. 6 at $3 00 per dozen.

Pipe Cutters Move Upward

Toronto.

PIPE CUTTERS.—Prices on pipe cutters have been revised and again the upward tendency is shown. Saunders pipe cutters are being quoted for the No. 1 at $2 50 each and the No. 2, $3.75. With regard to the Barnes' pipe cutters,

present basis of quotations for the No. 1 is $3 15 each and No. 2, $4.20 each.

Molasses Gates, Wood Faucets Higher

Toronto.

MOLASSES GATES, WOOD FAUCETS.—A new basis of quotations has been established on molasses gates and wood faucets. The present range of prices on the Perfection molasses gates which provide for advances are: No. 50, $9.60 per dozen; No. 51, $11.20; No. 52, $12.75; No. 53, $14.75; No. 54, $17.60; No. 55, $24.00. Wood faucets are also higher, the new quotations reading for the IXL No. 2, $1.40 per dozen; No. 4, $1.85; No. 6, $2.30; No. 8, $2.75; prices on the Peerless wood faucets are for No. 1, $8.30 per dozen; No. 2, $9.25; No. 3, $11.00.

Wire Nails Up 20c; Differentials Changed

Toronto.

NAILS, WIRE.—An advance of 20c per 10 pounds in the base price of wire nails has been made, bringing to-day's quotations up to $5.50 in kegs. A change in the differentials has also been made. Coating and blueing now take an extra of 25c per 100 pounds as against 20c formerly effective. In 25 lb. and 50 lb. boxes the extra has been advanced from 25c to 50c per 100 pounds; in 1-lb. papers the extra now charged is $1.00 per 100 pounds, it was formerly 50c. Even on the basis now prevailing it is felt in some quarters that the peak has not yet been reached. The undertone is very strong and that further changes may be made seems quite possible. No further change in the base price of cut nails has been made, these selling at $5 85 per 100 pounds.

Staples Go Up 25c; Extras Changed

Toronto.

STAPLES. — New prices have been named on fence staples during the week which provide for an advance of 25c per 100 pounds. On this basis, bright staples are now selling at $5.75 per 100 pounds and the galvanized at $6.50 in keg lots. In 25 lb. and 50 lb. boxes the differential has been changed, the extra now being charged amounting to 50c per 100 pounds instead of 25c formerly effective.

Oils Sells Freely; Gasoline Firm

Toronto.

OIL, GASOLINE.—Sales of coal oil have been on the increase and this condition is still in evidence. Prices have ruled firm though unchanged at 18½c to 21½c per gallon, according to grade.

Motor oils are very firm and the outlook seems to be for higher prices. No change is yet in evidence, but that this will come seems probable.

Gasoline is steady. Sales are still fairly heavy and requirements of the trade being met. Prices are firm and unchanged at 33c gallon.

Stoves Unchanged; Enamelware Steady

Toronto.

STOVES, ENAMELWARE.—Stove manufacturers' difficulties are still numerous, and no easing away of the situation in regard to securing materials is yet noticeable. Demands from the trade are fair and stocks as a whole are reaching a comparatively low point.

There are no new developments in regard to enamelware. Supplies are just as hard to get, and manufacturing troubles just as numerous. Stocks grow smaller with opportunities for replacement fewer.

Cordage Quiet; Twines Unchanged

Toronto.

CORDAGE, TWINES.—Cordage markets are quiet. The demand is normal which means comparatively little moving at this time of year, and prices hold without any change at the following levels: Pure manila, 39c per pound, British manila, 33c; sisal, 27½c. There have been no changes made in the twine situation, supplies being comparatively light, and prices firm but steady.

Iron and Steel Rules Firmly

Toronto.

IRON AND STEEL.—The demand is along comparatively narrow channels and prices have held firm at unchanged levels.

TORONTO—	Per 100 lbs.
Common bar iron	$ 5 25
Common bar steel	5 50
Refined iron	5 65
Angle base	5 75
Horseshoe iron	5 50
Tire steel	5 70
Mild steel	5 50

Toe caulk steel	6 25
Sleigh shoe steel	5 50
Band steel, No. 10	5 75
Do., No. 12	6 00
Spring steel	9 50 — 11 50
Mining drill steel	19 00 — 30 00
Sheet cast steel	0 42 — 0 45
Tool steel	0 20 — 0 42

Situations in Sheets Is No Better

Toronto.

SHEETS, PLATES.—The situation is no better—the feeling prevails that it can't be much worse. There have been one or two odd cars of sheets arrive but these are merely "a drop in the bucket," almost an aggravation when they are stacked up against business waiting to be taken care of. The outlook is by no means good. The method of securing sheets has been changed, and whereas ultimately the new process may be easier, these changes usually cause considerable confusion. One thing they do not assure any shipments which is the point all importers and manufacturers can't get away from. Prices are unchanged with little prospect of an easing away even after the war, according to some of the best informed authorities.

BLACK SHEETS—	Per 100 lbs.
10 gauge	$10 00
12 gauge	9 60
14	9 85 — 10 85
16 gauge	8 50- 8 55
18-20 gauge	8 05 — 8 30- 8 80
22-24 gauge	8 10 — 8 35- 8 85
26 gauge	8 15 — 8 40- 8 90
28 gauge	8 50- 9 00
3-16 inch plate	10 00
¼ inch boiler plate	10 00

Prices shown are for full cases. An extra charge of from 25c to $1 per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—	
10¾ oz.	$11 00 — $12 75
U.S. 28	10 70 — 12 50
22 and 24	10 25 — 11 25
18 and 20	10 10 — 11 10
16	9 95 — 10 95
14 gauge	$8 40- 8 90

Prices shown are for full cases An extra charge of from 25c to $1 per 100 lbs. is made for less than case lots.

Difficult Situation in Corrugated Sheets

Toronto.

CORRUGATED SHEETS.—Depending as they must on flat sheets, manufacturers of corrugated sheets and other manufactured sheet metal lines face a situation which grows steadily worse. Stocks are being depleted and opportunities for replacement virtually nil, so the outlook is considered worse. Quotations are only nominal and all orders carefully scrutinized before acceptance.

TORONTO— Corrugated Sheets—	Per 100 Sq. Feet Gal'zed	Painted
No. 28 gauge	$ 9 00	$ 7 50
No. 26 gauge	10 00	8 50
No. 24 gauge	15 00	11 25
No. 22 gauge	18 00	14 00
No. 20 gauge	21 00	17 50
No. 18 gauge	27 00	21 00

Discount, 7½ per cent.

Wrot. Pipe Firm; Boiler Tubes Moving

Toronto.

WROUGHT PIPE, BOILER TUBES.—Wrought pipe is very firm and unchanged. Manufacturing troubles are many, shortage of raw materials being a factor which is only aggravated by scarcity of labor. Prices appear in current market quotations.

Boiler tubes are steady with no arrivals reported. A very fair movement is reported but these are going forward only under government supervision. Quotations follow:

Toronto—	Per 100 feet Cold drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00
1¾ inch	43 00	36 00
2 inch	50 00	36 00
2¼ inch	53 00	38 50
2½ inch	55 00	42 00
3 inch	64 00	50 00
3¼ inch	....	58 00
3½ inch	77 00	60 00
4 inch	90 00	75 00

Solder Unchanged; Lead Products Firm

Toronto.

ZINC AND LEAD PRODUCTS.—The market on solder is without any particular feature. There is a slightly easier price on tin being made, but as yet this has not exerted any influence on solder. Manufactured lead products are firm, the difficulty in securing pig lead being a factor to uphold prices. The demand on all lines shows a slight improvement after a couple of weeks of rather quiet trading.

Lead pipe, lb.	0 15
Lead waste pipe, lb.	0 16
Lead traps and bends	Net-list

Tin a Little Lower; Lead Tight

Toronto.

INGOT METALS.—A lower price is noticeable in tin in some quarters though supplies generally are not considered any too plentiful. Lead is in none too good supply and quotations rule with a firm undertone. Spelter has firmed up though prices are unchanged.

COPPER.—There is little of particular interest in this market. Supplies continue to go into war work and there is little to report commercially. Locally prices are firm and unchanged at 30c to 32c per pound.

TIN.—Lower prices are in evidence on this metal in some quarters which has served to widen the range somewhat. Quotations are now being made as low as 90c, and go as high as $1 per pound. Supplies generally are none too heavy but as the market is quiet there is ample for present demands.

SPELTER.—The market has firmed up as a result of better demand. Local supplies have been heavy, but this condition is largely overcome now and stocks are none too heavy. Quotations are firm though unchanged at 11c per pound.

LEAD.—The market is very tight. Practically the entire production is being absorbed in war work and this leaves commercial users in a position of uncertainty as regards getting any deliveries. Nominally quotations range around 10½ to 11c per pound, but this may stiffen slightly as it is said premiums have to be paid to secure supplies for other than essential war industries.

ALUMINUM.—There is no feature of interest in this metal. Supplies go to government and quotation of 50c per pound can only be termed nominal.

ANTIMONY.—The market is quiet. The demand is light and interest lacking. Ample supplies are available to meet requirements and price is unchanged at 18c per pound.

PIG IRON.—Government demands for iron and more iron are insistent, with the result that production of pig is largely going to essential war industries of one type or another. The line on commercial enterprises is drawn more tightly every week. it seems.

LONDON MARKETS

LONDON, October 24—A decline of 25 cents per 100 sq. feet has been reported in price of screen wire cloth. Lower prices are also noted on linseed oil and turpentine. Other lines which have changed but which go to higher levels include—horse-shoe nails, light and heavy tee and strap hinges, horse rasps, grindstones and canvas gloves. A 20-cent advance in the price of wire nails has also been noted, in addition to the change on the differentials for coating and blueing and packing in 25 and 50-lb. boxes.

Business throughout this district has been very good although a slowing up from the epidemic of sickness and general trade conditions is noted.

Heavy and Light Hinges Revised

London.

HINGES. — New prices have been named on light and heavy tee and strap hinges, the present discount being 10 per cent. off list. This provides for an advance in the net prices, the present basis on the heavy tee and strap hinges being given herewith:

	Hinge—Tee.	Hinge Strap.	
4-inch	$2 30	$2 70	doz. prs.
5-inch	2 88	3 33	"
6-inch	3 24	3 60	"
8-inch	3 69	4 86	"
10-inch	6 57	8 64	"
12-inch	10 44	10 71	"
12-inch	10 62	12 24	"

Horse Shoe Nails; Horse Rasps Up

London.

HORSE SHOE NAILS, HORSE RASPS.—New prices now prevailing on shoe nails provide for an advance of 50 cents per box of 25 pounds. The steel situation and manufacturing conditions are such that this step was found necessary. The new prices which are now being quoted on M.R.M. horse shoe nails based on this advance are as follows: No 4, $10.00 per box; No. 5, $5.00; No. 6, $4.75; No. 7, $4 50; No. 8, $4.50; No. 9, $4.25; No. 10, $4.25; No. 11, $4 25 and No. 12, $4.25.

A change in horse rasps has also been made affecting the Globe and other Canadian brands. This provides for an advance, the new discount now being 70 per cent. from list.

Lower Prices on Wire Cloth; Roofing Caps

London.

WIRE CLOTH, ROOFING CAPS.—At least one change that will be welcomed by the retail trade is that put into effect on screen wire cloth. The new prices which are now out for spring booking business show a decline of 25 cents per 100 sq. feet. On this basis black cloth in 100 ft. rolls is now quoted at $3.25 per 100 sq. feet, and in 50 ft. rolls, $3.30.

New prices are also out on tin roofing caps, these selling in 100 pound bags at 9½ cents per pound, and in small quantities, 10 cents per pound.

Nails Up 20c; Rope is Steady

London.

NAILS, ROPE.—An advance of 20 cents per 100 pounds has been made in the base price of wire nails. This makes to-day's quotations $5.50 per 100 pounds in kegs. A revision in the differentials on smaller packages is also noted; 25 and 50 pound boxes now take an extra of 50 cents in place of 25c per 100 lbs. formerly ruling; 1 pound packages are advanced from an extra of 50 cents to an extra of $1.00 per 100 pounds. For coating and blueing, the extra has been advanced from 20 cents to 25 cents per 100 pounds.

Business on rope is normal, which means that this is rather quiet at the present time. There has been no change made in the base price of any grade and range is as follows: Pure manila, 39c per pound base; British manila, 33c; New Zealand hemp, 33c and sisal, 27½c.

Staples Go Higher; Wrench Parts Too

London.

STAPLES, WRENCH PARTS.—A new basis of quotations has been arrived at on fence staples. This provides for an advance of 25 cents per 100 pounds, the present basis for the bright being $5.75, and for galvanized $6.50. Extras for packing in 25 and 50 pound boxes have been changed from 25 cents to 50 cents per 100 pounds.

A new discount has been adopted on repair parts for Trimo and Stillson wrenches. This discount, which is now 40 per cent off list, provides for an advance in the net prices.

Grindstones, Canvas Gloves, Axe Handles Up

London.

GRINDSTONES, GLOVES, HANDLES.—A higher basis of quotations has been arrived on grindstones. New prices which are now being named to the trade are for the 40 to 200 lb. stones, $3.00 per 100 pounds, and up to 40 pounds in weight, $3.25.

A sharp advance is also noted in canvas gloves, new prices on the cheapest line of 8 oz. white being $1.70 per dozen pairs.

Higher levels have also been named on axe handles, 2nd growth now being quoted at $6 50 per dozen.

White Lead in Oil Steady; Putty Moving

London.

WHITE LEAD IN OIL, PUTTY.—The market on white lead in oil rules with a firm undertone. Difficulty in securing the pig lead is still the big factor in this condition, as prices on linseed oil have declined materially during the past couple of weeks. No change in white lead is provided for in present prices which for the pure, in ton lots, are $17.80 per 100 pounds, and in less than ton lots, $18 15.

Putty is moving fairly well and prices are holding at levels recently established. The standard putty in 25 pound drums is selling at $7.00 per 100 pounds, and in 100 pound drums, $6.75. Pure putty shows an advance of $2.00 per 100 pounds over the price of standard.

Turpentine Down 2c; Linseed Oil Steady

London.

TURPENTINE, LINSEED OIL.—A decline of 2 cents per gallon has been made in the price of turpentine. This is in direct opposition to the markets in the south which show a gradually firming tendency. However, stocks are in very fair shape and the requirements of the trade are being met quite readily. Just how long this low price may be in effect is still somewhat uncertain. The present basis of quotations for 1 barrel lots is 98 cents per gallon, two to four barrel lots 97 cents, and in five gallon lots. $1.08.

Linseed oil, after a further decline of 8 cents per gallon from last week's prices, has recovered this 8c and is being quoted on same basis as that prevailing last week. The raw linseed oil in 1 to 2 barrel lots is now quoted at $1.87 per gallon, and the boiled, $1.90; in 3 to 5 barrel lots the price of raw is $1.86 and the price of boiled, $1.89; in smaller quantities than barrel lots there is an additional charge of 10 cents per gallon.

WINNIPEG MARKETS

WINNIPEG, October 24—Price changes for the past week are again numerous with all lines showing an upward trend. Included are many staple lines, such as barn door hangers and track, door checks and padlocks, hat and coat hooks, cut nails, wrenches, buck saws, buck saw blades and frames, files and bolt clippers.

Business is reported to be brisk in all seasonable lines with about the usual sorting demand.

Dry Battery Prices Revised

Winnipeg.

DRY BATTERIES.—Quotations recently issued on dry batteries were incorrect, prices adopted by the manufacturers providing for a higher scale of figures. The correct basis of quotations on the Columbia lines is given below:

Ignitor No. 6.—Less than 12....$49 35 per 100
Less than 50.... 44 35 "
Less than 125.... 43 35 "
Barrel lots ..... 40 85 "

If covered by contract for one year, irrespective of quantity, a better price of 1c per cell is made on standard barrel lots.

Ignitor No. 8—Less than 12...$126 40 per 100
Less than 25... 106 90 "
Less than 50... 103 90 "
Barrel lots..... 100 40 "

Contracts for one year, irrespective of quantity, 87c each, in barrel lots of 50.

All above prices subject to change without notice.

Barn Door Hangers, Track Go Higher

Winnipeg.

BARN DOOR HANGERS, TRACK—Prices on barn door hangers and track as well as parlor door hangers, show a further revision during the week. These have moved up from 5 to 10 per cent. due to increased manufacturing costs and advanced freight rates. Prices now in effect are given below:

Barn Door Hangers (doz. prs.)—No. 543, $18.00; No. 843, $12.00.

Barn Door Track (ft.)—No. 31, 22c; No. 643, 15c.

Barn Door Brackets (doz.)—No. 31, $2.65.

Parlor Door Hangers (per set)—R. W. No. 11S, $2.80; No. 11D, $5.60.

Five Per Cent. Jump in Hat and Coat Hooks

Winnipeg.

HAT AND COAT HOOKS—Further advances have been recorded during the week on hat and coat hooks. New prices show approximately a 5% advance. To-day's quotations to the trade on some of the more familiar numbers are as follows: No. 476½, $8.90; No. 976½, $8.90; No. 102, $11.90; No. 103, $14.90; No. 104, $18.45; No. 221, $6.05 gross.

Door Checks, Padlocks Advance

Winnipeg.

DOOR CHECKS, PADLOCKS—New prices have just been issued on door checks and padlocks, which show an upward trend of approximately 5 per cent. over former quotations. The Yale door checks and padlocks are the lines affected, new prices to become effective at once. The following are to-day's quotations on door checks and a few of the more familiar lines of padlocks:

Door Checks (each)—No. 12, $6.30; No. 13, $7.45; No. 14, $8.95.

Padlocks (dozen)—No. 225, $7.45; No. 805F, $16.75; No. 813, $18.75; No. 823, $20.65; No. 833, $23.50; No. 853, $29.05; No. 8434, $15.85; No. 8454, $19.60; No. 853½, $33.05; No. 326, $11.20.

Higher Prices on Cut Nails, 25c Up

Winnipeg.

CUT NAILS—Prices on cut nails which have remained firm for some time past, moved up 25c a keg during the week. There have been two advances in freight rates since the previous change which has largely influenced this step. To-day's price on cut nails is $6.80 base per 100 pounds.

Wrenches Up 5 to 10 Per Cent.

Winnipeg.

WRENCHES—Largely due to increasing costs of production new prices have just been established on several lines of wrenches including agricultural, knife handle and engineers, which move up from 5 to 10 per cent. Quotations to-day are at the following figures:

Agricultural Wrenches (doz.)—6-in., $7.00; 8-in., $8.40; 10-in., $9.80; 12-in., $12.60; 15-in., $16.80.

W. & B. Knife Handle Wrenches (doz.)—6-in., $12.75; 8-in., $15.30; 10-in., $17.85; 12-in., $23.00; 15-in., $30.65; 18-in., $40.85.

Farmers' Field Wrenches (doz.)—8-in., $15.30; 10-in., $17.85; 12-in., $23.00.

Engineers' Wrenches, Single End (each)—No. 0, 10c; No. 1, 52c; No. 3, 18c; No. 4, 22c; No. 5, 26c; No. 6, 31c; No. 7, 40c.

Engineers' Wrenches, Double End (each)—No. 25, 17c; No. 29, 25c; No. 31, 30c; No. 34, 46c; No. 37, 66c.

Twin Bull Dog (doz.)—10-in., $9.75.

Revised Discount Issued on Files

Winnipeg.

FILES.—Prices on Globe Brand files show a further advance during the week, after remaining firm for the past year. This advance is due to the difficulty of obtaining the high grade materials necessary in the manufacture of same as well as the shortage of skilled labor which has been the cause of slow shipments from all the makers. To-day's discount on Globe files is 40 and 5 per cent. off list.

Buck Saws Up 10 to 20 Per Cent.

Winnipeg.

BUCK SAWS—Further advances in production costs have again forced up prices on buck saws and frames from 10 to 20 per cent. over former prices. To-day's selling prices are as follows:

Buck Saws (doz.)—Prince Rupert, $16.00; Watch Spring, $12.50; Maple Leaf, $13.20; Happy Medium, Plain, $12.00; Swedish, $37.75.

Buck Saw Blades (doz.)—Prince Rupert, $9.75; Maple Leaf, $6.85; Lance Tooth, No. 2, $6.85; Happy Medium, $6.70; Watch Spring, $7.00; Swedish, $17.75.

Buck Saw Frames, Complete (doz.)—Prince Rupert, $7.00; Happy Medium, $5.25; Maple Leaf, $6.75; Swedish, $20.00.

Bolt Clipper Prices Revised

Winnipeg.

BOLT CLIPPERS—The manufacturers of "New Easy" bolt clippers have again been forced to advance their prices as a result of increased manufacturing costs. New prices now effective are given as follows: No. 1, $4.30 each; No. 2, $5.75; No. 3, $8.05; No. 4, $10.35.

Linseed Oil Holds Steady; Turpentine

Winnipeg.

LINSEED OIL TURPENTINE — No change is recorded during the week on linseed oil despite the fluctuations in flax seed and is still quoted on the local market as follows: Raw, $2.20 gal.; boiled $2.23 gal. in single barrel lots.

Turpentine prices remained firm durthe week and show no disposition to change, although stocks are reported below normal. Prices ruling are as follows: Barrels, $1.10 gal.; ½ barrels, $1.13 gal.; 5 gal. lots, $1.15 gal.; 1 gal. lots, $1.15 gal., plus the usual extras for containers.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Oct. 24.—Peace talk has attracted relatively little attention in the steel industry in the past fortnight. The steel producers are as anxious for peace as any, and face great complications and uncertainties in the markets and trade conditions generally in the period of re-adjustment, but they have no time to consider these matters being so busy endeavoring to swell production and distribute their output in strict accord with the regulations.

War Orders Heavy

In the matter of placing war orders for steel the Government has certainly shown no signs of relaxation for, if anything, orders have been heavier since the German peace drive started than the average of preceding months. Three large batches of orders for sheets have been distributed, making the buying the heaviest for months. Recent orders include 32,000 tons of 80-pound rails, for General Pershing, together with 150 locomotives. The 40,350 cars for General Pershing, on which bids were recently taken, are likely to be allotted shortly and the filling of the orders may further delay completion of the 100,000 freight cars which have been on order for domestic roads for several months.

Shell Steel

Fresh pressure is being exerted to secure still more shell steel. One important wire producer in the Pittsburgh district, which was kept off shell steel business for a long time on account of the need for its wire products, began making shell rounds a trifle over a month ago on one of its continuous billet mills formerly serving its rod mills, and this interest has now been asked to increase its shell steel production by 40 per cent. A little information has leaked out as to the actual tonnages of shell steel produced. It appears that in the early months of the year the total production was running at the rate of about 350,000 tons a month. The rate increased until recently it passed 500,000 tons a month, and a rate of 600,000 tons is expected to be attained this month or next. The indication is that the total shell steel output in the calendar year will be about midway between 5,000,000 and 6,000,000 tons. At 600,000 tons a month the output would represent approximately 18 per cent. of the total finished rolled steel output. The proportion of the ingot output involved in making shell steel is considerably larger than 18 per cent., by reason of the heavy discard required, but in practically every instance all the discard steel that can possibly be utilized is rolled into one finished form or another, chiefly for war purposes. The War Industries Board for several months past has been keen to find war uses for shell discard steel and has been quite successful. As a rule, when fresh orders are given a mill to roll shell steel, orders are given at the same time for the utilization of the discards, and only the material that cannot be rolled goes back to the open-hearth furnace as scrap.

Scrap Supplies Slightly Better

Reports from consumers in the past week are of slightly better supplies of scrap. The mills still claim they are very short of scrap, but on the whole the situation is a trifle easier. One theory to account for the improvement is that many railroads, finding labor so scarce, have adopted a practice of selling their scrap as gathered, without attempting to sort it, and this gets the material into the market sooner, though, of course, the supply in the long run would not be increased by the new practice. The Pennsylvania Railroad continues to sort and grade its scrap, and has been canvassing consumers with a view to their making contracts to take offerings in one grade or another, the contracts to run for three to six months. Hitherto the system has always offered its accumulation monthly, as a fresh offering. Another observation made as to increased supplies of scrap is that with the heavier deliveries of cars and locomotives to the railroads the roads are scrapping more old equipment. The scrap dealers have been thinking rather keenly on the subject of peace and recognize that when peace comes consumers of scrap will be prompt to "get back" at dealers for the trying experiences they have had, particularly in the matter of dealers holding extremely indifferent grades of scrap at the full heavy melting steel price of $29 delivered, material which mills say would frequently not bring $10 a ton in ordinary times. Just now, with all mills striving for the last possible ton of output, they are forced to buy the scrap that is offered, but when opportunity comes to let down on the pressure their policy in the matter of buying scrap will be quite different.

Priorities for Controlled Consumers

For several weeks past the conservation division of the War Industries Board has been making agreements with various manufacturing consumers of iron and steel, whereby these consumers would limit their operations to certain rates, based on former practice. In many instances the arrangement has been for the consumer to operate during the last four months of this year on an average, at not to exceed one-half the average rate in a four-month period in 1917, i.e., production in the four months to be "50% of four-twelfths of the production in 1917." In the majority of cases these manufacturing consumers had no definite prospect of getting any steel, under the present regulations, to operate at all, and questions have been asked whether they were to be given any assistance.

The War Industries Board has now undertaken to grant certain priorities to manufacturing consumers who have entered into these arrangements. The degree of priority that will be given is not announced, but whatever it is it will be helpful to consumers who otherwise would have no claim for steel except through their being on the preference list. With nearly all the mills the priority orders are absorbing the output, leaving nothing for the preference list. The agricultural implement trade is an exception to this practice, as it already has B-2 priority, given as "automatic priority" in circular No. 4 of July 1 last. This industry is limited to a 75 per cent. operation in the twelvemonth beginning October 1, 1918.

When Peace Comes

There are very few in the steel trade who think that the diplomatic interchanges of the past fortnight indicate a balance of probability that peace will come in the near future. The strongly preponderating feeling is that there is several months of hard fighting ahead, the actual time on the calendar depending largely upon weather conditions, which will determine how much of the fighting can be done this winter.

One thing, however, these diplomatic interchanges are regarded as suggesting rather clearly is that when peace does come, eventually, it will come suddenly. There will not be a long period of uncertainty. Acordingly, the change from war time to peace conditions in the market, and in the trade generally, will be a sudden change, not a gradual one. There have been strong intimations lately from Washington that the Government purposes to retain control of industry for a while after peace becomes

WEEKLY PAINT DEPARTMENT

Shows Farmer How to Save $75

Sheet Mailed by Live Wire Hardwareman to Farmers in His District Contains Irrefutable Arguments Why They Cannot Afford to Neglect Painting Their Barns This Fall

HERE is a little paint talk that a live wire hardware dealer in a small Western Ontario town mailed to every farmer in his district this week.

"Farmers have been the favorite victims of sharpers from time immemorial. When I say to any man that I can put $75 of actual profit in his pocket this fall if he will take a little common sense advice, I mean just what I say. I want first of all to call your attention to your barn. Do you remember what that barn cost to erect? Just compare the figures with the price to-day if you had to build that barn of the same materials.

A STRONG CONTRAST.

"It is no exaggeration to say that more expensive material is in the barns that were built by farmers ten years ago than is going into modern bungalows or most other houses to-day.

"Yet behold how these same expensive barns are neglected. Many of them have never seen a coat of paint. It is only because they were built of very excellent material that they have stood the ravages of time for so long. Had the average man considered that the building of his barn was not complete before it had three coats of paint on it he would have been dollars ahead.

NEGLECT IS FOOLISH

"To neglect painting your barn is as foolish as to let your horses stand exposed to a howling winter blizzard without a blanket. The horses may not last so long but the barn's life is shortened just the same. Now I want to tell you something. The cheapest lumber worth considering for building purposes (hemlock) sells at $45 per thousand feet to-day. The lumber in the barns built five years ago costs twice as much now as it did then. Figuring from a common sense point of view, the average unpainted barn to-day costs its owner $150 a year in the loss he sustains in not protecting it. Figure it out for yourself.

A STRONG ARGUMENT

"I will guarantee that if your barn receives but one good coat of specially prepared barn paint a year for the next three years a saving of $75 and more will be effected. After the third year, two years can be skipped, then another good coat should be applied.

"Barn paint is not expensive even now, and painted buildings are not only attractive to the eye, but mean dollars to the owner from a protective point of view alone. It is just as foolish to neglect to paint your barn as it is to neglect to place insurance on it.

"The next time you come in to town, bring the height, width and length of the surface of your barn and I will tell you exactly what it will cost to paint it. Better still, drop me a card, now, asking about the cost. Enclose the dimensions of the building and the information will be forwarded to you at once."

AFTER THE TRADE

The sheet on which this paint talk was forwarded contained a cut of the paint handled by this dealer. It is made by one of the best firms in the business. He has got a stock of paint he can guarantee to the limit and it will not be this dealer's fault if he does not double and treble his sales of paint this fall. He is prepared also to back up his arguments by service. Every farmer who comes in to inquire about the paint will be fully advised about the best way to proceed with the work, the best brushes to use and other little points that will help him to make a satisfactory job and bring him back in the future for more paint.

STEADILY EXPANDING

This dealer's paint trade is steadily expanding because he keeps everlastingly boosting paint. Incidentally he is just as good a booster for other lines and always has some seasonable goods he is pushing. He is a great believer in the value of well directed advertising and has found that it pays and pays well to keep the things he has to sell before the people of his district all the time.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Oct. 24.—Lower prices have been named here on linseed oil, although a queer feature of the situation is that several of the large local firms have nothing to offer for spot delivery and are only quoting against November or December delivery. Turpentine is scarce and firm, prices being unchanged. White lead in oil and putty are all steady and the outlook for business is satisfactory. Several conventions slated for this week and next have been postponed on account of epidemic of sickness.

Linseed Oil Lower; Outlook Higher

Montreal.

LINSEED OIL.—The market, in sympathy with lower seed prices, has declined and quotations are $1.87 for raw and $1.90 for boiled, on spot order basis. Several companies are not quoting at all for spot delivery, November and December business being the nearest they will entertain. For this some are naming a price of $1.77 for raw in lots of one to four barrels. The feeling prevails that there may be some further downward movement but that the market would react very soon. One big crusher stated that stocks would last perhaps a month if the present rate of shipment was cut off. With the prospects of all transportation facilities being taxed in carrying necessities in the near future, many feel that oil will rule considerably higher about December 1. It is generally conceded that markets are low but temporarily, and the fact that several have no oil to offer until November would reveal small holding of seed in any case.

Linseed Oil—	Raw Imp. gal.	Boiled Imp. gal.
1 to 2 barrels	$1 87	$1 90
Nov. and Dec. delivery	1 77	1 79½

Add 10c per gallon in smaller quantities.

Little Turpentine Holds Prices Up

Montreal.

TURPENTINE.—While there is no actual change in the local quotations on this, the scarcity in some quarters has suggested an advance. The trade requirements at this season are not very large and the greatest users probably are the paint men themselves. Primary markets have ruled strong and the situation is such as to make the available supplies higher in price.

Turpentine.	Per Imp. Ga.	
1 to 4 barrels	0 95	0 98	1 00
5 barrels and over	....	....
Small lots	1 01	1 06

(Packages extra)

No Lower Putty Though Oil Down

Montreal.

PUTTY.—Although the oil market tendencies are usually reflected more or less directly on putty, the present position on English whiting, its high price and scarcity will serve to hold putty prices up. This is generally expressed, and while no advances are looked for the market is firm under an active, seasonable demand.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Steadiness Marks White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—There is a steady and unchanged market. The fluctuations in the oil market are negligible, broadly speaking, and unless there is a considerable change in oil prices the effect on this commodity is not great. Also, at the present time the scarcity of pig lead is such as to offset any slight advantage in oil prices that may obtain. Five-ton lots sell on the basis of $17 per 100 pounds; ton lots at $17.35, and smaller lots $17.85.

Paints and Varnishes On Firm Basis

Montreal.

PAINTS, VARNISHES.—A steady basis characterizes the markets although the tendency has been towards higher quotations for varnish. When the recent differentials were arranged for containers some felt that this would take care of the increased necessary costs for various varnish, but others feel that there will be further advances to cover raw costs and for labor and boxing. A good deal of booking has already been done on Spring business.

TORONTO

TORONTO, Oct. 24.—Lower levels are shown in some quarters on turpentine this week, but with markets at primary points showing increasing strength, higher prices may be looked for here. Linseed oil is down and up another three cents, indicating a wider range of prices, though strength now apparent in seed market would indicate that bottom had been reached. Booking orders for mixed paint, Spring delivery, are fair, but could be better.

Linseed Oil Both Up and Down

Toronto.

LINSEED OIL.—After a further slump from prices shown in last week's issue amounting to 8c per gallon, the market has stiffened and this amount recovered, making basis of quotations same as last week. A decline of 3c is noted in some quarters, however, while others again report an advance of 3c. It looks as though early peace had taken wings and as a result the drop in the market halted. Tuesday and Wednesday advances in the price of seed amounting to about 20c per bushel were made and an even higher basis is looked for. A fairly active demand may be expected from now until the close of navigation and this will probably have a firming influence on the market for seed. Range of quotations to-day is as follows:

Linseed Oil—	Raw Imp. gal.
1 to 2 barrels, gal.	$1.84-$1.87-$1.90
3 to 5 barrels, gal.	1.83- 1.86- 1.89
	Boiled Imp. gal.
1 to 2 barrels, gal.	$1.86½-$1.90-$1.93
3 to 5 barrels, gal.	1.85½- 1.89- 1.92

Add 10c gallon in smaller quantities.

Turpentine Lower; May Go Higher

Toronto.

TURPENTINE.—Lower prices have been named in some quarters on turpentine this week, but all tendencies point to early movement the other way. Markets in the south have been going up ¼ and ½c per day and rule with a very firm undertone. Favorable war news, presenting as it does possibilities of overseas shipments will tend to keep markets strong and that slightly higher levels may be reached seems probable. Until actual shipments are assured, however, no sharp upward movement is expected. Indications are that prices

The CAN that CAN BUILD UP BUSINESS

YOU do not need to be told how important it is to have attractive labels on the goods that you put on your shelves. You know the selling value of a good label. Look at the new B-H "English" Paint label pictured above. It is handsomely lithographed in four colors. Think of how "classy" your shelves would look, if filled with such attractive packages.

B-H "English" Paint is just one of our products. The complete line is put up in packages just as attractively labelled as the can shown above.

A high quality product, extensively advertised and attractively labelled, must appeal to your best merchandising instincts.

It will pay you to look into our proposition carefully, for you cannot fail to be interested in our method of co-operating with B-H Agents.

Ask us for particulars of the B-H Agency proposition.

BRANDRAM-HENDERSON, LTD.

Montreal Halifax St. John Toronto Winnipeg Medicine Hat Calgary Edmonton Vancouver

locally will go to higher levels, too, within the course of another week or so. Range of prices to-day is as follows:

Turpentine—	Imp. gal.
1 barrel (barrel included)	$0 96-$0 98
2 to 4 brarels (barrels included)	0 95- 0 97
5 gallon lots	1 06- 1 08

Sales Maintained At Fair Levels

Toronto.

MIXED PAINTS.—Sales for immediate delivery are comparatively small, a seasonable condition. Manufacturers and jobbers report booking business for Spring coming along a little slowly. There seems to be a feeling among the trade that possibilities of an early peace may mean a sharp decline in prices. It has been pointed out that manufacturers have already largely contracted for their supplies for next Spring and prices on this basis were issued to the trade recently. No recession from these values is looked for for some time to come and early buying will assure, to a better extent, satisfactory deliveries. Altogether the volume of business handled during the past year was entirely satisfactory and the outlook for the coming year should be equally as good.

No Easing Away In White Lead in Oil

Toronto.

WHITE LEAD IN OIL.—Corroders point to the scarcity of pig lead and premiums necessary to pay to secure delivery as the main factor in offsetting lower priced oil as it might affect prices on white lead in oil. Business just now is quiet and quotations are steadily maintained as follows: Pure white lead in oil, ton lots, $17.80 per 100 pounds; in smaller quantities $18.15 is the price.

Glass Unchanged Locally; Putty Moves

Toronto.

GLASS, PUTTY.—Conditions, it is said, warrant higher prices on glass and the feeling prevails that these must come. Locally, however, there has been no change, some attributing it to comparatively heavy stocks and small demand while others point to the limited demand only, indicating that stocks are small. Prices appear in current market quotations.

The movement of putty has been very good and continues fair. Prices are firm and unchanged as follows:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

Brushes Rule; Very Firmly

Toronto.

BRUSHES.—The market on brushes is unquestionably very firm. Manufacturers report increasing difficulty in securing bristles and the range offering is greatly curtailed. All tendencies point to higher levels, but as yet there has been no revision made. An advance in some lines of waxing brushes is reported amounting to about 15 per cent.

PITTSBURGH MARKET LETTER

Continued from page 63

assured, but the nature of the contemplated control is not known. While it has been pointed out that shell steel orders would probably be cancelled instantly, while orders for shipbuilding and for the domestic roads would, of course, stand, there is thought in some quarters that the Government would early make a stand for lower prices, on the ground that with peace conditions and less pressure for tonnage output, steel could be made somewhat more economically.

Priorities Certificates Being Granted for Making Household Necessities

PRIORITIES certificates which will go a long way toward ending the difficulties under which many firms have been working owing to shortage of materials, have been authorized by the United States War Industries Board. It is understood the ruling will apply to many Canadian firms which have been trying to secure supplies from across the line.

The official announcement from Washington is as follows:

"Judge Edwin B. Parker, priorities commissioner, announces that with fulfillment of named conditions the priorities division of the War Industries Board will issue industry priorities certificates authorizing purchase of quotas of materials and give preference ratings to manufacturers in these industries:

1. The gas range, water heater, room heater, hot-plates and gas appliances industry.

2. The metal beds, cots, couches, and bunks, and metal springs for beds, cots, couches, and bunk industry.

3. The wire-bound box industry.

4. The black galvanized and enameled ware and tin-plate household utensils industry.

Contains No Guaranty

Each of these industries, says a special circular, issued by the priorities division, can supply essential needs if it can obtain certain limited quantities of materials and if such materials are properly distributed among the manufacturers in the industry with a view of balancing and equalizing stocks. No guaranty will be given the industry that the materials called for in any priorities certificate issued can be supplied.

A manufacturer to obtain the certificate must file with the priorities division a statement of stocks on hand, in storage, or in transit owned by such manufacturer, his 1917 consumption of materials and output of product, and quantities of materials needed to balance stocks to manufacture reduced outputs ordered.

Pledge By Manufacturers

The manufacturers must pledge themselves also to observe regulations as to curtailments, economies, and substitutions of materials; to devote products to essential uses; not to furnish products for re-sale to dealers without obtaining a similar pledge from them.

The curtailments ordered for the last four months of the present year are: Gas ranges, etc., industry to reduce its consumption of iron and steel used in the manufacture of its products to a basis of not exceeding 50 per cent, of four-twelfths of its 1917 consumption of such materials for such products. Metal beds, etc., industry, to reduce its production of metal beds, etc, and metal springs not exceeding 50 per cent. of four-of four-twelfths of its 1917 output of such products. The black galvanized and enameled ware and tin-plate household utensils industry to reduce its consumption of iron and steel, and tin-plate used in the manufacture of its products to a basis of not exceeding 50 per cent. of four-twelfths of its 1917 consumption of such materials for such products.

In connection with the use of brass and copper the Priorities Division says to the gas-range manufacturers:

"It appears that your industry uses considerable quantities of brass and copper, and brass and copper products. It will be exceedingly difficult for your requirements of these commodities to be supplied, and, for that reason it will be advisable for you to review your requirements of these materials with great care and eliminate every use of them which can be eliminated. Brass and copper tubing in particular will not, because of the war demands, be available to your industry for use in the manufacture of water heaters or other commodities. Such supplies of brass or copper tubing as your manufactures may have on hand should be reserved for repairs and replacements in their products which are already in use. This ruling may result in the shut-down of factories or departments using such materials, in which event the War Industries Board will extend any assistance within its power to aid any such factory or department to procure war work."

Metal-Bed Manufacturers

The metal-bed manufacturers are advised:

"The materials which are used by your industry are of such importance, and the constantly increasing demand for them is so vast, that it is imperative that you should put forth every effort to avoid any unnecessary or wasteful use of such materials and to encourage consumers and users of your product everywhere to utilize to the fullest extent during the period of the war stored, second-hand, or temporarily discarded articles rather than purchase new ones.

Hydro Should Be Taken Out of Politics

THIS is the pith of a powerful leading article in THE FINANCIAL POST for October 19th. The constructive thought is expressed that the whole matter of Hydro service ought now to be placed under the War Trade Board. The problem, as THE POST indicates, should be handled now by "experienced, fearless business men." The differences between Sir Adam Beck and Sir Henry Drayton, and their disadvantages are dealt with. Upon the right control of Hydro power much Canadian industrial prosperity depends. Send for a copy of THE POST and study this article. Order your subscription to THE POST and keep in touch with important developments in this and all Canadian business matters.

THE FINANCIAL POST THIS WEEK CONTAINS—

Make a Display

NOW of

Automobile SKATES

It has been proven by experience that a nice display of skates EARLY in the season, results in greater sales when the selling season actually opens.

A full assortment of display card, hangers, etc., will be sent on request, if not already received with skate shipment.

Have You Tried This New Line Yet?

Inside or Outside

It's a Dandy

This is the season of the year when stop and wastes are most in use.

Sell your customer one of these improved Empire S and W, and make a real good job of that repair. At the same time you're creating an extra sale and giving better service and satisfaction to your customer. **It's service that counts.**

It is made of the best material we can buy and it's made right to stay tight. It really is the last word in a Compression Stop and Waste. Said one of our friends, "Inside or out, it's a dandy."

We can make prompt deliveries. Write us for prices.

"A Beautiful Clear Finish that Will Not Wear Out"

Two Strong Selling Points that Make for Sales!

One customer says:

"Once Wa-ko-ver has been applied it seems almost impossible to wear it out. Whether on floor or woodwork it continues to display a beautiful clear finish that is always just like new."

You can have Wa-ko-ver making permanent friends for you if there is no Stephens' Agency in your locality. Write us to-day about our interesting proposition.

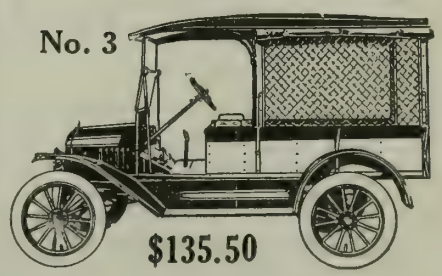
"Can You Send It At Once?"

This Style Body, $146.00.



Quick Delivery Pleases Your Customers

"MOTOR DELIVERY IS THE GREATEST TRADE WINNING ASSET ANY MERCHANT CAN ADD TO HIS BUSINESS EQUIPMENT"

The famous, steel-ribbed, patented Babcock Commercial Body for Motor Delivery is now made in Canada, exclusively by ourselves. If you want good looks, style, impressiveness and a long-lasting body on your delivery chassis, get

Babcock Commercial Bodies

Steel foundation (patented) makes rigid, unbreakable, strong, enduring frame. In the style illustrated, the side panels are beautifully finished, roof is solid, covered with heavy duck, windows both sides of drivers' seat, full length rear door. This is the handsomest full panel body made, and for the money cannot be equalled anywhere. Write us for further particulars.

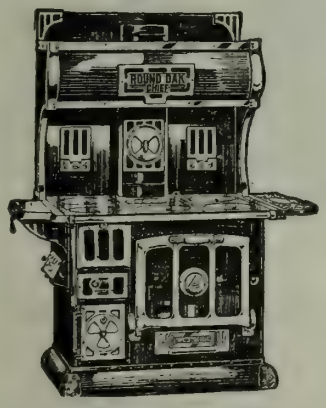
TARRED FELT

SPECIFY DOMINION BRAND

J. H. McCOMB, LIMITED Manufacturers of all kinds of Building Paper, Pitch and Coal Tar **MONTREAL**



THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace—made for Machine. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Only through your jobber to-day.

Round Oak Goods

Here is another internationally advertised line of exceptional merit. This firm is one of the original manufacturers in the market putting all their efforts behind one range, one heater, one base burner and one furnace, and we feel that with their many years' experience they should be able to turn out a good article. They do not use scrap iron and for that reason get a material, which while a little higher in price, gives genuine satisfaction, and always brings back the neighbor as a customer as well as the one to whom you have made the sale. We carry a full stock of repairs and that feature recommends it. Since this firm started doing business in Canada many years ago there never has been a time when you could not get their repairs in a hurry. We would be glad to co-operate with you in any local advertising scheme you wish to put on. If you need any advertising matter write us.

Talk No. One Hundred and Seventy

The good days are coming again—not artificial, but real prosperity—with a real world peace. Then you can get all the "PREMIER" GALVANIZED SHEETS you want—war uses come first now.

TINKER TOM.

Look for Talk No. 171 next week.

DOMINION SHEET METAL CORPORATION, Limited
HAMILTON, CANADA

Built for *Service* That's why it *sells*

You will always find it easier and more profitable to sell an "Anthes" Tank Heater. Its superiority is so apparent stock raisers and ranchers choose it every time as the best for their business.

The Anthes Tank Heater is made of high-grade Cast Iron, and every Heater is tested and guaranteed before leaving the factory. Made in two sizes:

Dia.	Height	Weight
12"	22"	120 lbs.
14"	24"	150 lbs.

In stock for prompt shipment. Specify "Anthes" when ordering from your jobber.

TO THE WESTERN CANADA DEALER

Does a connection with a progressive and aggressive, amply capitalized and fully equipped concern, grown to be the largest paint and varnish factory in Western Canada, appeal to you?

BRITISH AMERICA PAINT CO., LIMITED

Wants more live dealers in Western Canada. It co-operates with its dealers to make bigger and better business. Join up with a pushing selling organization that will help you put 'em over. Send for booklet "The Evidence." Tells the story in fac-simile letters from Bapco dealers.

DISTRIBUTING POINTS

Established at Victoria in 1900 the British America Paint Co., Ltd., has found ever-widening markets. To care for this trade branches have been opened at VANCOUVER, B.C., CALGARY and EDMONTON, ALBERTA, and REGINA, SASKATCHEWAN.

TO SELL AND RE-SELL

Paint MUST give satisfaction.

Bapco Pure Paint and Bapco Varnish are of the highest possible quality. To insure this the raw materials undergo chemical laboratory tests. Skilled makers see that the ingredients are perfectly proportioned and modern machinery insures proper grinding and blending. Rigid machine and chemical tests are made during process of manufacture and the completed mixtures are subjected to comparative tests with the fixed Standards. One big roof of the factory is devoted to weather tests.

The growth of the British America Paint Co. and its constantly expanding trade territory is convincing evidence, not only of the quality of its goods, but of its resourcefulness and enterprise as well.

The Pump on the Threshing Tank should be a

MYERS

for in Myers Tank Pump is found pumping service of exceptional merit inasmuch as Myers Cog Gear Double Acting Low Down Tank Pumps operate 33 1/3 % easier, have larger capacity and last much longer than the ordinary every day tank pump.

Myers Tank Pumps are built for hand or power operation, in several styles, and are distributed by leading jobbers throughout Canada.

It's an easy matter for you to get them quickly, just as it is for you to sell them. Circulars and name of Jobber gladly supplied.

Ashland, Ohio

DON'T WORRY

about the Embargo on Steel

For you know that wrought iron is better than steel for toughness, endurance, resistance to shocks and vibrations, because steel is crystaline, relatively brittle, difficult to weld, and has less resistance to corrosion.

London Bar Iron

is tough, fibrous as a rope, ductile, easily welded, resists corrosion, withstands vibration better than steel, and

The Story of War Under The Earth

THE German sappers had discovered and broken into a Canadian tunnel. They had planted a machine gun at their end and sent a shower of bullets down the dark, narrow passage whenever the Canadians made any effort to enter their underground galleries. The story of how two Canadians nailed steel snipers' shields to the front of a push cart and shoved it ahead of them up to the very teeth of the gun, and how they dropped a can of deadly explosive, hopped on to the cart, and let it coast back down the tunnel, while bullets rattled on the shield like hail and, finally, how the explosive blew up the machine gun and its crew and blocked the passage again—this remarkable story is told by Lieut. C. W. Tilbrook (who was one of the two) in the course of an article, "An Underground Tank," in October MACLEAN'S.

Recently a Toronto newspaper declared editorially that the public was tiring of war books and war stories because of the sameness of them. The newspaper was right. But the public literally devours any story of the war that is new. The series of articles that Lieut. Tilbrook has done for MACLEAN'S has been read with an astonishing amount of interest *because they are different from anything that the public has yet read.* Warfare in the tunnels is a terrible business—grim, silent, cruel. It is a strangely technical phase of warfare and the "sappers" go about their business with queer instruments that might have figured in a Jules Verne phantasy. To read of underground fighting, as Lieut. Tilbrook tells of it, is to get a vision of a new kind of war altogether —something gripping, fearsome and mystifying.

"An Underground Tank," is the best of his series. But, after all, it is only one feature in a long array that makes the October issue of MACLEAN'S one of unparalleled interest.

A STRANGE CHANGE IN WOMAN'S WORLD. By Agnes C. Laut.
The new status of women, arising out of the war, is treated in the powerful style of this famous writer, who came from the Canadian West. It introduces a new thought.

CONSCRIPTION AFTER THE WAR. By Brigadier-General A. C. Critchley.
A young Canadian who rose from Lieutenant to General in three years and originated the "Critchley Method" of military training, tells what he thinks about the need for compulsory service after the war.

THE LIFE OF MARY PICKFORD. By Arthur Stringer.
The second of a series of articles on Canada's most famous woman. No expense has been spared to produce the beautiful illustrations specially posed for the photographs.

THE FOUR FACTIONS AT OTTAWA. By J. K. Munro.
That the House will split into four, more or less, distinct groups is the guess of the author, a trained political observer. He outlines the reasons, humorously, pungently and impartially. It is a political article on new lines and will be found refreshing.

BONEHEAD BILL—Another Service Poem.
Robert W. Service, most popular of poets, sends all his war verse to MACLEAN'S. In "Bonehead Bill" he depicts the grief of a soldier for his fallen foe.

THE EVENTS OF A MAD WORLD
are summed up in the "Review of Reviews" which gives reprints of the best articles from the magazines of the world. All the best and most important articles are selected—five dollars' worth for twenty cents!

IF YOUR HARDWARE BUSINESS IS FOR sale, who is more likely to buy it than a hardware man, be he merchant, clerk, or traveller? It is only hardware men who read Hardware and Metal, and a condensed advertisement in this paper offering your business for sale, will put you in touch only with the people who will be most interested.

HARDY PICK HANDLES

Sold under the
Registered Trade Mark
"EXCELSIOR"
All kinds of pick handles for miners.
Made from Best Quality Canadian Timber.

St. Marys Wood Specialty Co., Ltd.
ST. MARY'S - ONTARIO, CANADA
High Grade Wood Specialties—Walking, Hockey Sticks, Ball Bats, Handles and Hardwood Lumber.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

INDEX TO ADVERTISERS

Occasionally advertisements are inserted in the paper after the index has been printed. The insertion of the advertiser's name in this index is not part of the advertising order. The index is inserted solely for the convenience of the readers of the paper.

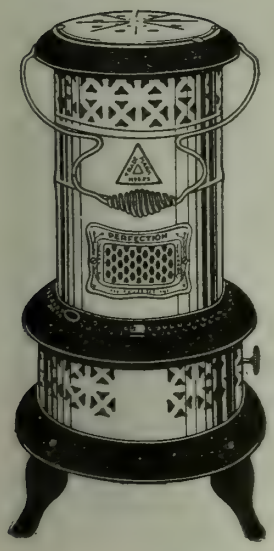
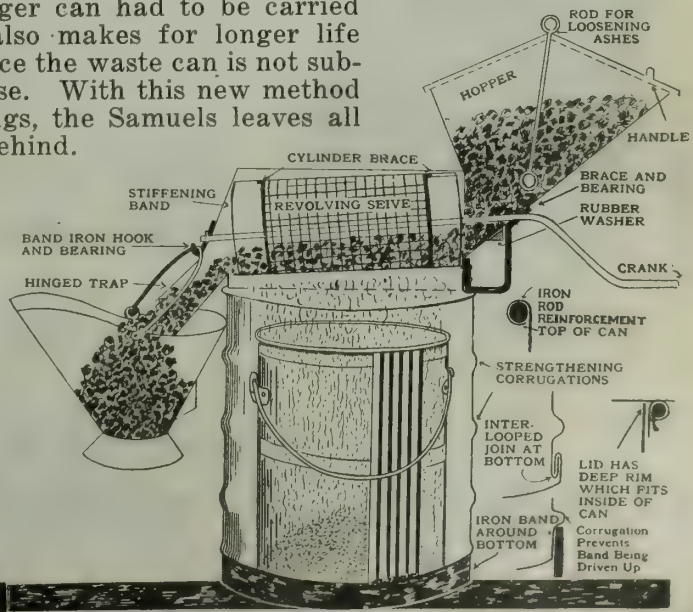
Again, we Suggest these Non-fuel Burning Devices to Beat the Coal Shortage!



Here is an opportunity for both you and your patrons to avoid the trouble that has loomed up big because of lack of coal.
Your customer can use non-fuel burning heating devices and you can sell them, together with an assurance that they are the first and best in their respective lines on the market.

The photo on the right illustrates the nifty appearance of a Majestic Electric Heater, one of a line that has proven 100% efficient in satisfaction and sales.



Perfection Oil Heaters

Every dealer knows the sales record and reputation of the popular Perfection Oil Heater.
We have numbers 520, 525, 530 and 630 in stock for immediate delivery. Order your winter's supply now.

The Famous Samuels Sifter

Another coal-saving device that pays for itself in a very short time. Fine screen has been adopted in making the Samuels Sifter, which saves much more of the fine cinders, and is stronger. As the illustration indicates, the smaller ash can or pail may be placed inside the waste can and so catch all the screenings, which can then be removed more easily than when the larger can had to be carried out. The new feature also makes for longer life for the Samuels Sifter, since the waste can is not subject to the ash-man's abuse. With this new method of collecting the screenings, the Samuels leaves all other sifters hopelessly behind.

Ammunition

If you are having any difficulty in securing 30-30 cartridges, do not forget that we can supply all you want in Winchester 30-30 Hard Point Smokeless, and we are selling them in increasing quantities.

"Belleville" Hardware

A "Made-in-Canada" Product Equal to the Best in the World

We are all apt to look up to imported goods as superior to home-made lines. Pause before you concede anything to foreign products over "BELLEVILLE" HARDWARE. Here is a Canadian-made product that is as good as the best.

"Belleville" hardware is meeting the demand of the most particular architects and builders, and is recording wonderful success throughout Canada. It is a worthy Canadian product, worthy of the best Canadian patronage. All hardware looks very much alike to builders and architects until they have had experience with "Belleville."

Best line for dealers to handle. Has greatest demand. Get our proposition.

Lend your money and your influence

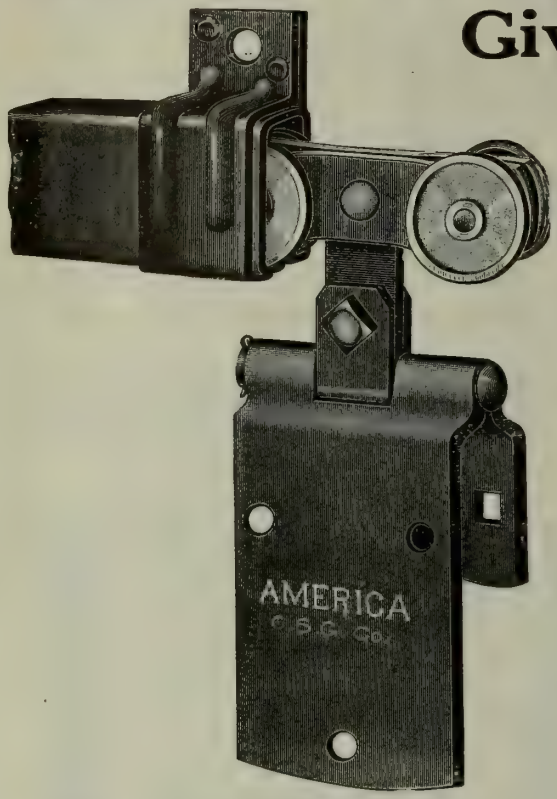
The Victory Loan keeps business going.

It is through the Victory Loan that money is put back into circulation.

The Victory Loan finances our immense exports of farm products and munitions.

The Victory Loan pays wages — sustains trade, commerce and agriculture.

It is because of the Victory Loan that your customers have money to buy the goods you sell.



And, overshadowing every business consideration, is the fact that it is through the Victory Loan our fighting forces are equipped and maintained.

The destiny of our country—the present and future welfare of our business—demand that all our influence, all our enthusiasm, all our moral and financial support be put squarely behind the Victory Loan 1918.

Issued by Canada's Victory Loan Committee

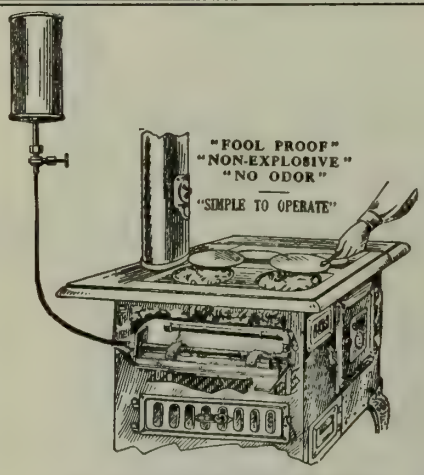
America Hangers Sell Easily and Give Life-time Service

The roller bearing tandem truck hanger is constructed entirely of steel and built to carry heavy doors.

The adjusting screw below the track is always accessible and allows increasing or decreasing the space between door and building.

The detachable drop strap permits door to swing out at right angles and prevents tearing down.



America hangers run on the famous Hatch Trolley Track, supported with corrugated brackets.

Swing in to-day. Hitch your efforts to the biggest selling, profit-making line of door hangers.

Manufactured by

Canada Steel Goods Company
LIMITED

HAMILTON, CANADA

ARMONT'S BLUE FLAME GASMAKER

fits into the fire-box of **any** stove, range or furnace without the slightest alteration to the stove. It is in effect like a carburetor, generating a blue flame Vapor-Gas, burning 10% of the gas thus generated and 90% of air, drawn from the draft. No wicks. Controlled by valves, same as the ordinary gas range. It will cook, roast and bake nicer, quicker and cheaper than coal or wood and heat your home in your own stove for $15. It uses common kerosene and water. It is **absolutely safe!** A child can handle it!

No kindling drudgery! No smoke, no dust, no dirt, no ashes! Strike a match and have a bright fire in a minute. A hot bath any time. stove for $15, which is no price for it. It uses common **kerosene and** water. It is **absolutely safe!** A child can handle it!

Kerosene is **plentiful** while **coal is scarce** and harder to get this Winter than ever before! So burn kerosene and save coal for our ships. Armont's is portable. You can carry it from your kitchen range to the stove or furnace. You can take it along when camping and use it for heating and cooking in your tent, or in the open air.

EVERY HOME, EVERY FARM AND EVERY SHACK NEEDS IT!

There is a long, cold Winter coming. Are YOU ready for it? Don't risk hardships, illness and suffering when you can avoid it for a paltry few dollars.

ORDER NOW AND BE PREPARED

Price to dealers: $10—f.o.b. New York; net cash with order.

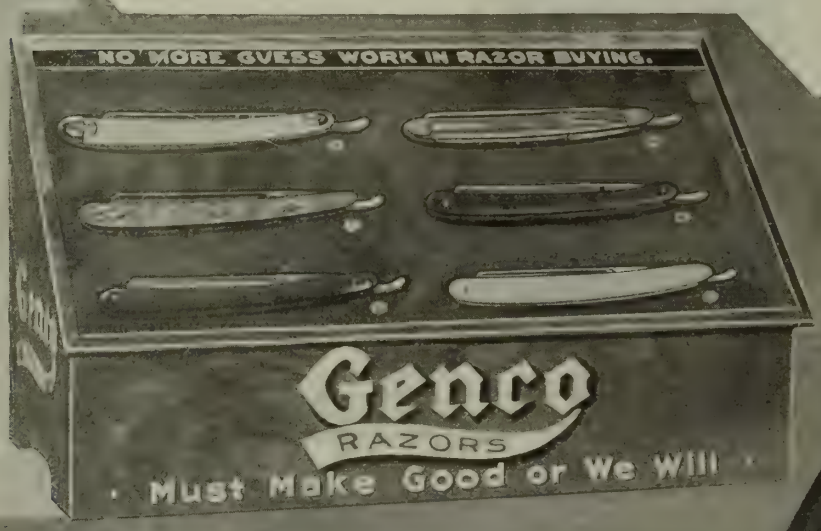
Genco RAZORS

A Square Foot of Selling Space

That Can Be Made Very Profitable In Your Store

THE space occupied by this Genco Razor Display Case is about one square foot. Besides containing and protecting the razors, it catches and holds the eye and gives the goods a pleasing display. As a salesman it is on the job every minute.



The case is made of pressed steel, with handsome Circassian walnut finish. It holds six Genco Razors of different design on constant display against a background of Royal Purple plush and there is ample room beneath for carrying stock.

All current Genco Razor advertising features this case prominently. It goes to work for you the minute it appears on your counter. Let it be a reminder to your customers of the 500 master cutlers who, in the largest high grade razor factory in the world, grind the quality in and the guess work out of Genco Razors.

We are making a special proposition which included one of those display cases free with your first order. Write for the details of this offer now, while the matter is fresh in your mind. It's quite a good thing. Mention the name of your jobber when writing us.

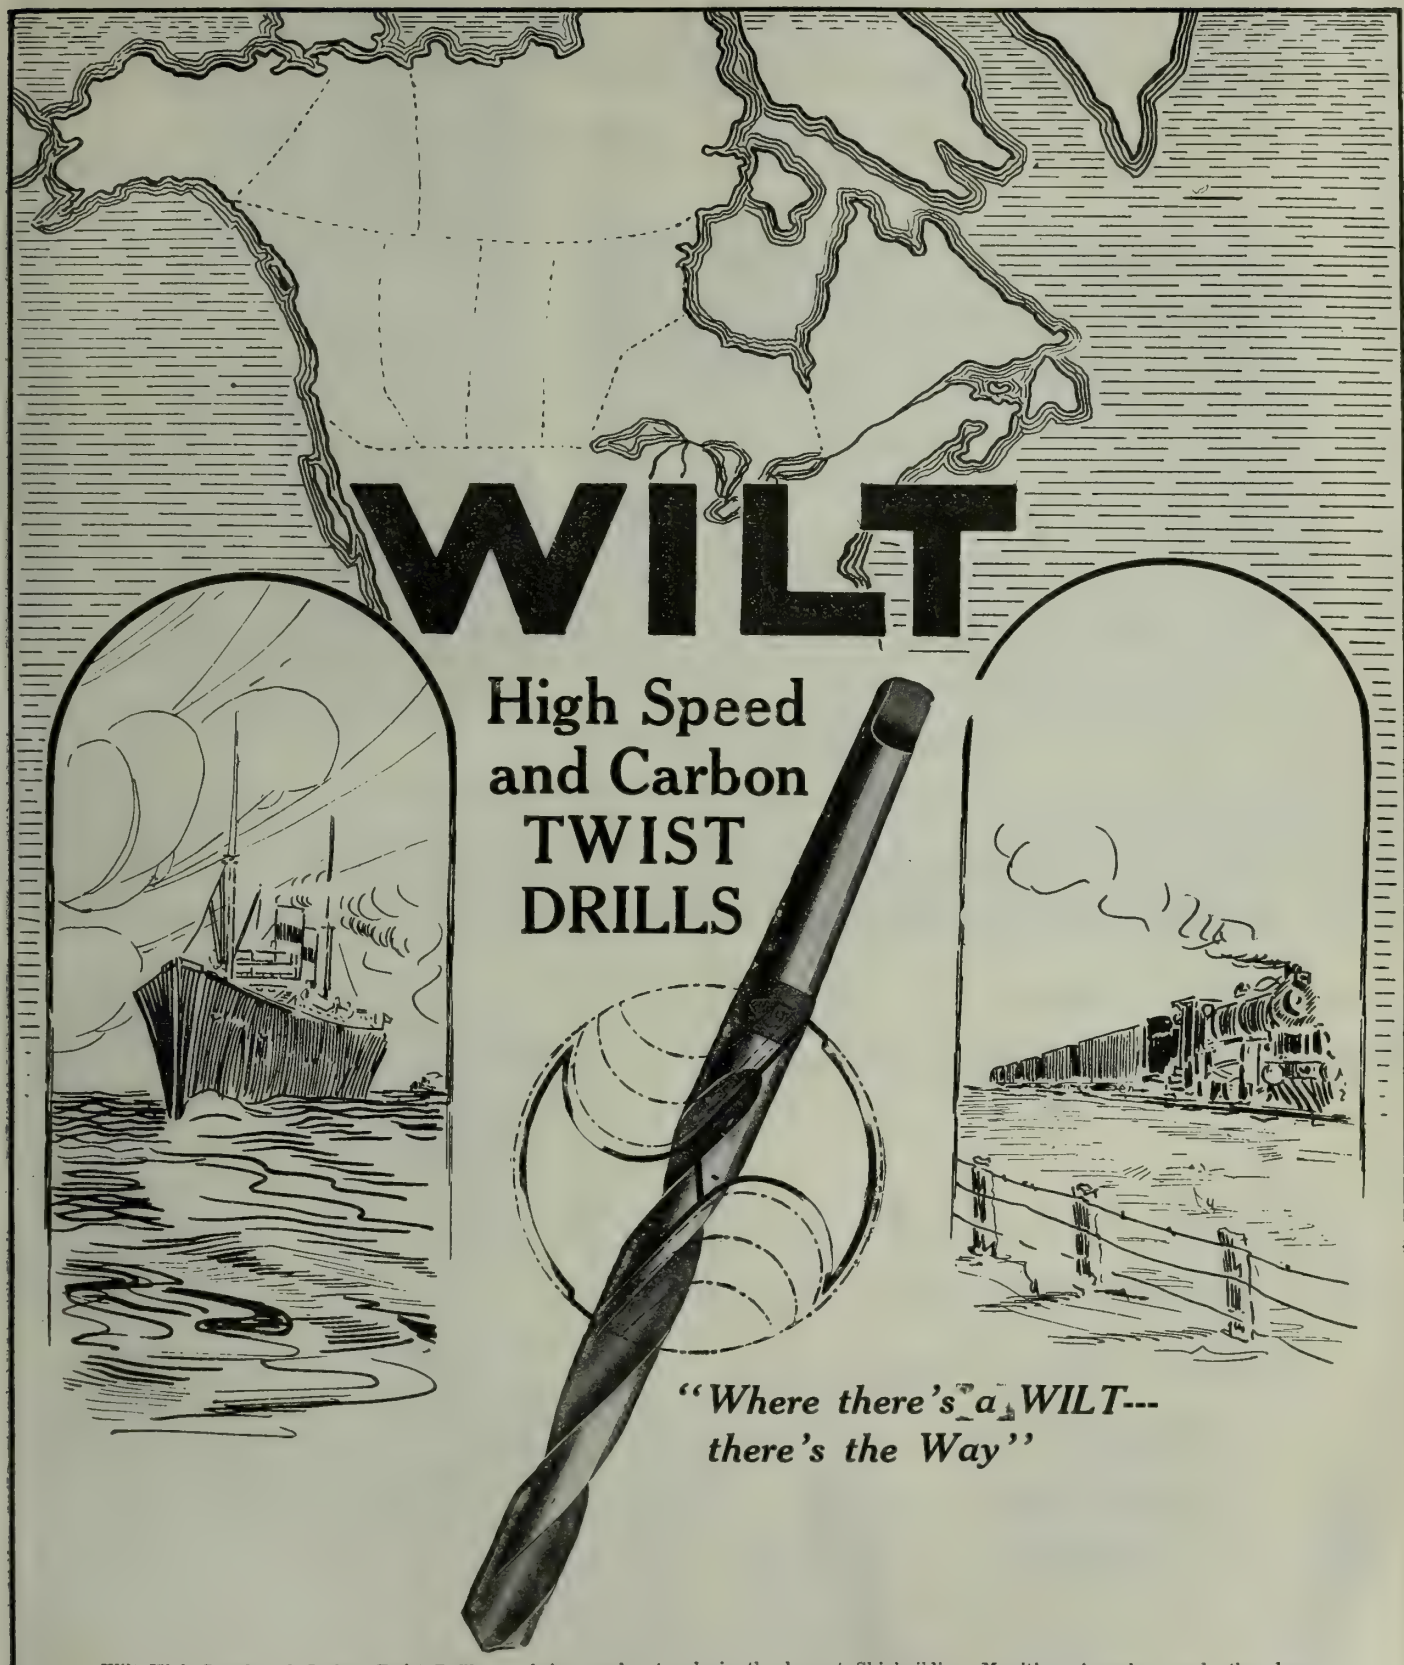
THE STAR MAKES NEW HACK SAW RECORDS

We are making a new record in the hack sawing efficiency with the Star Blade. And we are making a new record in hack saw advertising in telling users the Star achievements.

Every hardware dealer has an interest in both these records because they give him a new understanding and a new enthusiasm in pushing the Star Hack Saw which has been the standard for thirty years.

In the Saturday Evening Post alone we are using full page space every month to reach the 2,000,000 subscribers and 6,000,000 readers of the Post, many of whom are your own customers or purchasers from your own neighborhood. Whenever a mechanic or an amateur tool buyer comes into your store, suggest a Star Saw to him and see how often the suggestion will be readily accepted.

Millers Falls Bit Braces and other tools are also strongly advertised in the Saturday Evening Post and elsewhere. It is the advertised line that it pays you to push.



Pocket catalog and valuable booklet, "How to Sell Tools," free on request.

WILT

High Speed and Carbon TWIST DRILLS

"Where there's a WILT--- there's the Way"

Wilt High Speed and Carbon Twist Drills are being used not only in the largest Shipbuilding, Munition, Aeroplane and other large manufacturing plants throughout Canada, but also in similar industries throughout the Allied countries.
Wilt Drills are now being specified by some of the largest exporting houses throughout Canada, United States and Great Britain for shipment throughout the world.

Why?—Because they are Drills of Quality

Only the best materials are used—the highest class workmen employed—and they pass through a most rigid inspection before they are allowed to leave the plant.
This is a double assurance to you and a bonafide guarantee to your customers.

Wilt Twist Drill Company of Canada, Limited, Walkerville, Ontario

London Office: Wilt Twist Drill Agency, Moorgate Hall, Finsbury Pavement, London, E.C. 2, England.

The quickest way to win the respect and permanent trade of customers is to carry standard grade tools.

Men don't want you to SELL them tools. They want to come in and buy them by the maker's name.

They know as well as you do, those that have the quality reputation.

In files, they want the "Famous Five," because they are the standard File and give satisfaction.

So specify "Famous Five" Files when ordering from your jobber.

Handle all your cash and records by machinery

A National Cash Register system will take care of every detail of your store records. It will enable you to handle all your cash and records by machinery.

Every sale—cash or charge—is accurately recorded.

At the end of every day a glance at the register shows you the exact amount of your sales. The register also gives a printed record of every charge, received on account, or paid out transaction. It shows you how much cash should be in the drawer.

The N.C.R. system saves time, saves money and conserves labor. It stops store leaks. It makes you careful, and your employees careful.

National Cash Registers help merchants overcome war-time troubles

Neōlin Half Soles

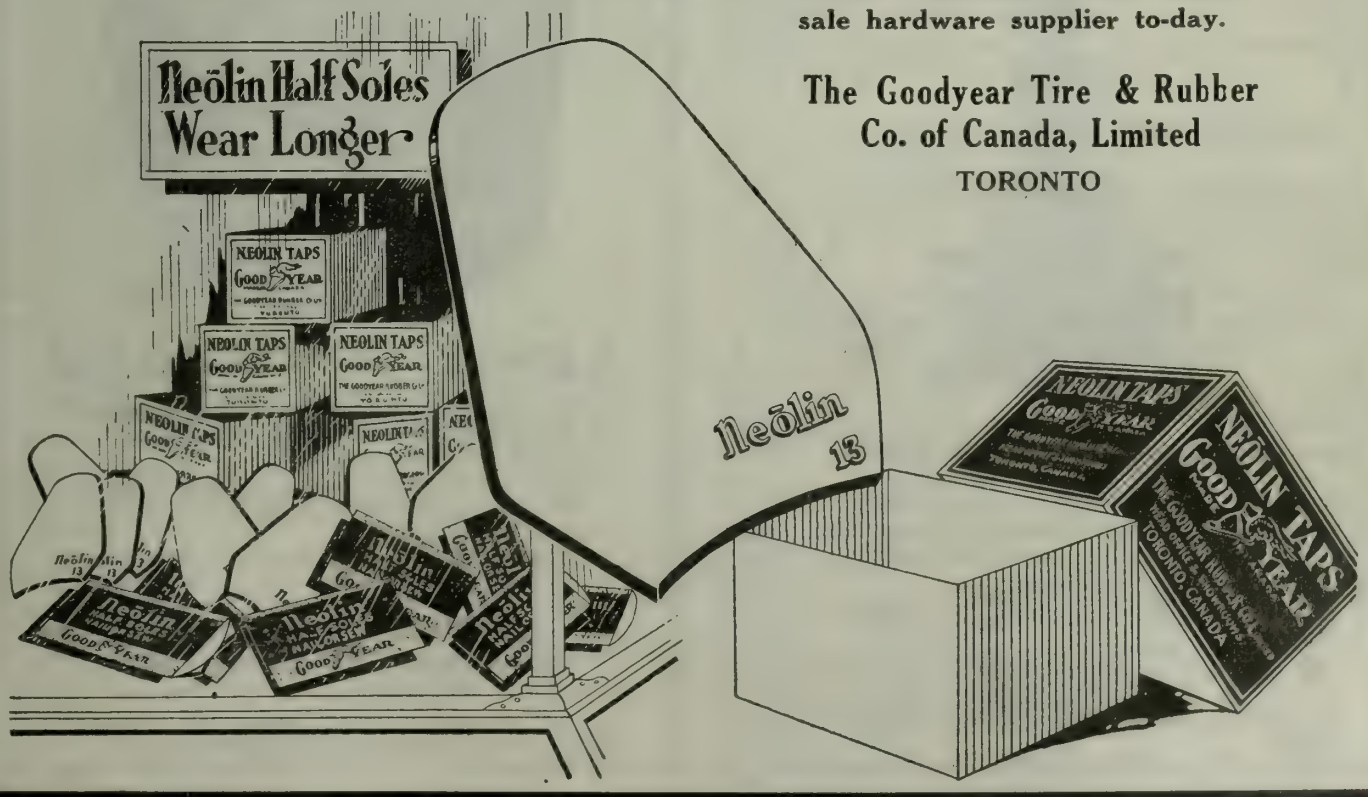
A New Stimulus for Your Business

NEOLIN Soles have been a sensational success. Everybody in Canada has heard or read about them. Thousands of folks have worn them—and like them. Over 400 shoe manufacturers are putting Neōlin Soles on their product.

Now we announce a new feature—Neōlin Half-Soles.

A big advertising campaign in the newspapers and farm papers has been launched to sell this new economy of Neōlin Half-Soles.

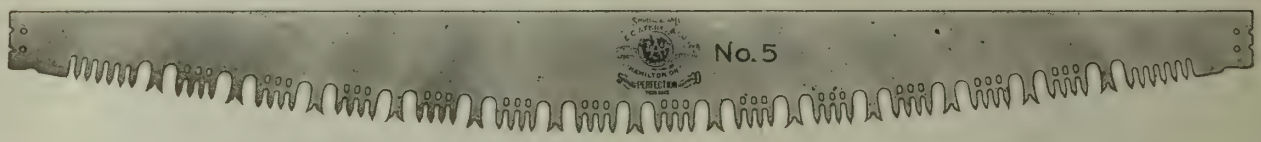
You can cash in on this campaign. There are scores of your customers who do the shoe-mending for the whole family. There are other customers who will be "sold" on the idea of re-soling their shoes at home.



A carton of Neōlin Half-Soles displayed on your counter or in your window will give a new stimulus to your trade. Not only will you sell lots of Neōlin Half-Soles, but you also sell shoe repair outfits, tools, and many other profit-bearing items in your stock.

Make a drive on Neōlin Half-Sole business.

Cartons contain a dozen assorted sizes.



Send an order to your wholesale hardware supplier to-day.

What the Guarantee Behind Laco Lamps Means to the Retailer

Our name and reputation back of every lamp you sell—the assurance that we will not risk "falling down" in the smallest degree.

Our promise to stand behind every replacement you make, based on our guarantee.

It proves the confidence we have in Laco Lamps.

It shows our belief that your **replacement troubles will be few and far between.**

Makes sales easier — Your clerks speak with greater assurance when backed by the manufacturer's absolute, definite guarantee.

Adds to your prestige and makes increased business—for one satisfied customer tells others.

It is the Most Liberal and Helpful Guarantee Given on Lamps

Increased knowledge of the Laco guarantee, through extensive newspaper advertising, is teaching the public to be satisfied with no lamp that falls below the Laco standard, and is turning trade to the merchants who stock

LACO LAMPS

Full Information on Request—Write for Our Proposition

Canadian Laco-Philips Co., Limited

Montreal Toronto Winnipeg Vancouver

Any four watches can be displayed in this case—the price tickets are interchangeable. It displays the watches attractively and shows the prices of them plainly. There is a compartment for storing extra watches.

Made of metal—finished in a beautiful dark brown — with glass sides and top. This is indeed a handsome display case as well as a splendid silent salesman. The tray on which the watches are displayed is removable and the case can be locked.

MAKING EXTRA SALES

Suggestion sales are one of the easiest and most inexpensive methods you can employ to increase your profits. Dozens of men come into your store every day with their minds made up to make certain purchases. If they buy only what they come in to get, you lose profits that should be yours.

Put this display case on your counter and it will remind your customers to buy an Ingersoll Watch and make many extra sales for you. Your customers, carpenters, plumbers, skilled workmen in all trades, are the very class of people who buy them.

This Display Case at Half the Actual Cost

With the following assortment of four fast selling Ingersolls we will send you one of these display cases at half the actual cost. It costs us $1.00 in very large quantities, but with this assortment you can have one for 50c.

Here is the Special Assortment

You get—	Sell for
4 Maple Leaf—The watch that everybody knows	$2.00 each
3 Radiolite—The watch that tells the time in the dark	3.00 each
3 Triumph—A dependable and good-looking time piece	2.50 each
2 Waterbury—12 size—jewelled—and unusually sturdy	4.50 each

This Completed Assortment Costs You $22.05 and Sells for $33.50

Robt. H. Ingersoll & Bro.,
128 Bleury Street, Montreal, P.Q.
Send me:

—special assortments with show case at half cost.

—materials for window display.

Also send me the following extra watches:

The Best Season

of the year for the sale of Ingersolls is just starting. Ingersoll watches have always been one of the most popular of Christmas gifts. Get your share of this extra holiday profit. Order this assortment to-day.

With your order for 2 assortments we will also send you material for a corking good window display—a display that will bring people into your store for Ingersoll Watches and other things, too.

Westwo

It Pays The Dealer To Buy Wagon Sets In Crates

The price per set is very slightly more than where shipped loose — while the crated sets reach the customer in as good shape as when they leave the factory.

Westwo products are made from the best selected hickory and oak. Irons used are the best manufactured in Canada. Painted and striped — they look better and last longer.

No Bruised Woods
No Marred Finish

All Sets Guaranteed
Defective Parts Replaced

Goods Represent The Highest Quality

Westwo goods represent the highest quality. Every piece backed by the manufacturer's guarantee. You will have requests for these goods. Write your dealer to-day for illustrated folder and catalogue. If he does not handle, write us direct.

Why Buy Stanley Products?

YOUR customers may not know that they ask themselves this question, but they do. When you show them hardware

They mentally inquire, Is this what I want?

You inform them
The Stanley line comprises butts, bolts, hinges, latches, pulls, door holders, etc.

Is the article reliable?

Stanley products have been famous for years for their correct design, superb service, substantial strength and suitability for difficult requirements.

Is the price right?

Stanley products are sold at a fair price, and they can be relied on absolutely.

It pays to have Stanley Products on sale
They sell quickly, easily, and net a good profit to you

Today send for Stanley Hardware Catalog. Free on request

THE STANLEY WORKS
NEW BRITAIN CONN., U.S.A.
New York Chicago

Manufacturers of Wrought Bronze and Wrought Steel Hinges and Butts of all kinds, including Stanley Ball Bearing Butts. Also Pulls, Brackets, Chest Handles, Peerless Storm Sash Hangers and Fasteners; Screen Window and Blind Trimmings; Twinrold Box Strapping, and Cold Rolled Strip Steel.
Stanley Garage Hardware is adaptable for factory and mill use.

Cutting Out Unnecessary Credits

What Hardwaremen Are Doing to Eliminate a Trouble That Has Caused Retailers All Over the Country Losses, Worry and Much Inconvenience — Letters From Firms Now Operating on Cash Basis Tell of Good Results Obtained

REALIZING that business conditions at the present time are such that limitation of all unnecessary credit is not only advisable but imperative, many hardwaremen have been adopting the cash basis plan. There are some accounts which, as pointed out in HARDWARE AND METAL at various times, cannot be put on a strictly cash basis, but there is no excuse for hardwaremen and other retailers having to suffer heavy losses or unnecessary delays in getting in their money at a time when there never was so much cash in the country. Every man, woman or child who can work has been able to work all the time he or she wanted to and get a rate per hour for their efforts that not long ago would have been regarded as extreme.

Worst Offenders

It would appear from what hardwaremen state that in most districts the farmers are the worst offenders in regard to asking for credit. Recently some decidedly interesting figures have become available that indicate in no uncertain manner the condition of the average farmer's bank account.

The fall fairs are events to which the farmer and his family always look forward. No matter what else he may miss the farmer will not willingly miss the district fair. This fall more than one bank manager and more than one secretary treasurer of country fairs was astonished at the number of large bank notes which were taken in at the ticket offices. It is not so very long ago that the "quarter" required for admission was in ninety-nine cases out of a hundred tendered in silver, not infrequently in small silver. The children would often hand over a string of coppers that had been carefully counted and more carefully saved.

Change Takes Place

Proceedings of this kind are now out of date if happenings at fairs this year are to be taken as any guide. The currency which many of the ticket sellers were called on to handle was not "quarters" but "five spots" and "ten spots." One ticket taker who took $150 in silver with him to meet his needs in making change had to send back for bills. At the end of the day when the crowd was all in, its contribution was a big pile of bills, and the ticket taker reported that throughout the whole day he had only received about $2 in silver from people going in. He also reported that country boys and girls frequently came to him with bills wanting him to change them so that they could buy various fair trinkets, candy, or other things that took their eye.

It is stated that at the fairs this year more autos were in evidence than ever before. Practically every one of them was owned by farmers, who drove in with their families for the show. Buying an auto is unquestionably good business for any farmer, but when whole communities of farmers buy them it shows one thing above everything else, and that is that those farmers are prosperous.

There is another indication of who has the money also. Tax collectors in the country districts say that good crops and good prices are reflected in the way taxes are streaming in this fall. Taxes are one thing that the farmer always hates to pay, and most of them put off paying to the very last minute. Imagine the surprise of one collector when a farmer came to his house before the tax notice was sent out and said he wanted to settle up. The same tax collector says that this fall he has found money more plentiful than in any of the fourteen years he has been on the job.

"In the first two days," he said, "I got more money than I would often get on my entire rounds."

Seems a Paradox

It seems an unaccountable trait of human nature that a great many of these people with plenty of money, good bank accounts, and prosperity on every hand would still have nerve enough to walk into the store of a hardware man and, after making purchases, ask the hardware man to wait for his money. Yet that is what is being done, not only in one case, but in hundreds, according to hardwaremen. The hardwaremen have learned by experience in the past that waiting often means weeks or months. While he is waiting he is put to the annoyance of trying to finance his business on money he needs and is entitled to. He is put to the trouble of either writing for it or asking for it eventually, which puts him in a position that is not always pleasing, and in which he need not be put if he would take the necessary stand and simply do business in a business-like way.

Many hardwaremen are realizing that they should regulate any credit business that is done in their stores. They are profiting by the good results that have

Macpherson's Hardware Store

BUSINESS ON A NEW BASIS

Announcement.

Present trade conditions make it absolutely necessary to make some changes in existing methods of doing business. Manufacturers and Wholesale Dealers have realized this, and in consequence have so shortened credit terms, that in order to purchase goods in the right markets and at right prices, settlements must now be made upon a cash basis. Then again, the high prices of goods now prevailing means a much larger investment of capital, and in an effort to keep prices within bounds the percentage of profit now obtained is materially reduced when compared with profits obtained under normal conditions before the war, and in face of this reduction in profits, the overhead expenses of doing business has increased.

In any healthy retail business the stock should be turned over at least three times per year, so it is self evident that stocks of today are to all intents and purposes, purchased in the high markets prevailing during the past year, and with few exceptions any additional profits which might be made on goods bought when prices were lower, and sold on a basis of present costs, are a thing of the past.

During the past four years I can honestly say that no excessive profits have been taken in my business, and I am firmly convinced that the same can be said of the other retail merchants in our town.

After a most careful study of the situation and with a firm conviction that the necessity for credit no longer exists, I wish to announce that after November 1st, my business will be conducted on a CASH basis. Monthly account terms will, as usual, be given to Factories, Contractors and Customers building or painting houses, or making electrical installations. Goods ordered by phone or letter will be due at end of month in which ordered. Settlements of Monthly accounts to be made by 10th of month following purchase.

I trust that my customers and the public in general will appreciate the fact that I am taking this step in an endeavor to give them better prices and better service than would be possible under other conditions, and would solicit a continuance of the splendid patronage accorded me in past years.

W. F. MACPHERSON.

Macpherson's Hardware Store

Reproduction of advertisement recently inserted by leading Prescott hardware merchant.

SUNDAY SELLING OF GASOLINE ILLEGAL

"SUNDAY selling of gasoline is contrary to law," is the official warning issued at Ottawa. The Fuel Controller has been informed that since the removal of the ban on Sunday motoring some dealers have assumed that they could sell gasoline on that day. This is a mistaken impression. The regulation states that the retail sale of gasoline on Sunday is prohibited. That regulation is still in force, the only exception that has been made being in cases where doctors have unexpectedly run short of gasoline supplies on Sunday during the influenza epidemic. The Fuel Controller announced that no action would be taken by him against dealers who supply gasoline in such emergency cases, but no other sales of gasoline on Sundays are permitted.

WOULD PLACE BAN ON GERMAN MADE TOYS

IMMEDIATE passage by Congress of a law prohibiting the landing at American ports of German-made toys and other German-made merchandise "until the central empires have submitted to an allied peace," was urged in a resolution adopted at a convention in New York of the Toy-Makers' Association of America. Many of the manufacturers want German-made goods banned altogether.

STOVE MANUFACTURERS ARE FEELING THE PINCH

STOVE manufacturers are facing a serious problem as a result of their inability to get supplies, especially sheets. Recent appeals to the War Board at Washington were unsatisfactory. There seems to be a feeling that Canadian stove makers, in view of the need of materials for war needs have been using up too much steel in "frills." Now the attitude of the War Board at Washington is that only essentials can be considered and that absolutely no materials will be given out for stoves or any other articles unless the applicants can show exceptionally good reasons why the proposed work cannot wait until the war needs are supplied. This may result in many stove makers having to standardize a great deal more than they have done. In view of the tremendous demands for steel and the inability of the huge American mills to handle anything like the orders that are steadily piling up it does not look as if there was any relief in sight for those requiring sheets for some time.

GRANTING PRIORITIES WILL NOT HELP SHORTAGE

THE situation in regard to steel is being watched by manufacturers all over the country with the keenest interest and developments that will affect the future are expected in Washington. It is rumored that the United States is considering granting priorities for steel to Belgium and France to aid those countries in reconstruction work and help them get back as quickly as possible in a position where they can take care of themselves to a large extent. Unless Belgium and France get help of this kind from outside sources it would take them many years to get on a footing even approaching the pre-war period. Even with the gigantic steel production in the United States priorities of this kind would be felt in shortages in many lines for some time. It would mean that many American firms and many Canadian firms would get greatly reduced supplies. So much work is being held up now in the United States and Canada because supplies are unavailable that it will take the mills a long time to catch up, leaving the needs of Belgium and France out of the question. In addition to all this there is the shortage that needs filling in other countries. This amounts to many million tons. England will not be able, it is estimated, to give much help to France or Belgium as she will have too much to do to look after her own requirements. Altogether the steel situation just now is such that even those in closest touch with it do not care to venture predictions as to what may happen.

BIG TURPENTINE SALES TO BRITISH INTERESTS

REPORTS just in from the Southern States show that peace talk is being followed with keen interest as a return to normal conditions means much to the turpentine and resin producers. The opinion generally prevails that it will be among the first to feel the effect of improved demand from foreign sources when some of the restraints on international commerce are removed.

A report from Savannah says: "During the week it is reported there were substantial sales of turpentine in tanks to English interests, with further inquiries as to room available or offerings already in tanks. The extent to which the present stocks of rosins are held for British or other foreign interests is not known, but there is reason to believe that supplies so carried are not heavy enough to preclude decided activity the moment it is evident that better facilities for a movement abroad are to be had. Indeed, it would not be surprising to see considerable rosins now carried by American dealers changing hands in the near future if the English interests are willing to pay a sufficient bonus for select lines. The dearth of supplies of both rosins and turpentine not only in the United Kingdom but in Italy, Netherlands and the Scandinavian countries, as well as among the minor consuming and distributing centers, can mean but one thing in the comparatively near future, and that is a demand in the markets of this country considerably in excess of any fresh supplies, current or prospective."

NEW ZEALAND WANTS CANADIAN HARDWARE

WRITING from Auckland, New Zealand, Consul-General Alfred A. Winslow says: "There is a very great shortage in New Zealand of all lines of hardware. Within the last few days there has been a jump of $24.33 per ton in the price of wire nails that sold previous to the war at 5 cents per pound or 5 pounds for 24 cents, while 1-inch nails are now worth 14 cents per pound and 2-inch nails 18 cents per pound.

"The pre-war price of corrugated iron was $87.60 per ton, and now this iron is selling at $389.32 to $437.98 per ton, and almost impossible to obtain at these figures.

"Ordinary 2-inch wire netting that sold prior to the war at $1.82 per roll of 50 yards now sells at $8.15 per roll. All tools have increased in price from 300 to 400 per cent., and are difficult to procure at that. Household hardware such as pots and

pans has increased in price about 200 per cent. and enamelware in the same proportion."

SHEFFIELD TO CONTROL STAINLESS STEEL TRADE

THE Firth-Brearley Stainless Steel Syndicate (Lim.), of Norfolk Works, Sheffield, which was established to work the foreign patents granted to Mr. Harry Brearley for stainless steel and articles made from stainless steel, has secured patent rights in the United States, Canada, France, Italy, Japan, Spain, Argentina, and Brazil, and many others are pending. The Japanese patents have been sold to the Kawasaki Dockyard and Shipbuilding Co., and the United States patents, linked with other correlated patents, have been disposed of to the American Stainless Steel Co., in which the Firth-Brearley Syndicate is a large shareholder. The American company, like the Syndicate, is not a manufacturing concern, its function being to grant licenses to manufacturers to make stainless steel under royalty, and the Sheffield syndicate is associated in the American company with powerful steel interests such as the Bethlehem Steel Co., the Crucible Steel Co., the Carpenter Steel Co., the Firth-Sterling Steel Co., the Washington Steel and Ordnance Co., and Haynes & Son.

So far as America is concerned, the parent syndicate will act as agents in Britain for the American company and grant licenses to export stainless cutlery and stainless steel in other forms, and as similar arrangements will be made with other countries the Sheffield cutler will find no market closed against him.

The Syndicate proposes to safeguard the interests of the Sheffield cutlers by ensuring that the right to export stainless cutlery shall be reserved for them no matter what arrangements are made otherwise for working foreign patents.

WAR BOARD MODIFIES AUTO IMPORT RULING

AN important ruling just issued by the Canadian War Trade Board modifies the order issued on June 3 in regard to the import licenses for automobile bodies and chassis.

By the order-in-council of June 3 the importation of automobiles valued at $1,200 and upwards at place of manufacture was prohibited except under license by the War Trade Board. A memorandum of the department, issued September 17, declared that this prohibition also applied to the bodies and chassis of automobiles when the body or chassis, together with the usual parts required to complete the automobile, amounted to $1,200 or upwards, f.o.b. at place of export.

Regarding these restrictions on the importation of automobiles, bodies and chassis, the War Trade Board has decided that where an automobile is for use on a chassis imported into Canada prior to June 16, 1918, upon proper evidence being submitted of the facts, license for importation will be recommended.

Furthermore, the War Trade Board will be disposed to recommend import license for bodies or other parts of cars not obtainable in Canada, which are an essential requirement for the production of automobiles by bona fide manufacturers of automobiles in Canada.

HOT FIGHT ON OVER HIGHER PHONE RATES

IT looks as if the Bell Telephone Company in its effort to increase its rates has stirred up a real hornets' nest. Toronto took the lead in the fight against the proposed increase and municipalities all over the country are lending their aid to prevent higher telephone rates becoming effective. Some of them are going even further. They propose to make big increases in the company's taxes. London, Ont., for instance has asked Toronto, Hamilton, Windsor and other municipalities to support a movement to compel the Bell Telephone Company to pay a tax of $25 per pole a quarter and $25 a quarter per hundred feet for conduits. This is rather a boomerang as far as the telephone company is concerned and may be as far as London is concerned a measure designed to compensate for alleged damages done to streets by the telephone company. It is stated that many of the business men all over the country are joining in the fight against the Bell Company's appeal for higher rates and that strong representations will be made to Ottawa urging that no action be taken. The question of the service the telephone company has been rendering will it is stated figure largely in the arguments to be advanced and also its treatment of employees.

HARDWARE EXPORTS TO SOUTH AFRICA INCREASE

A REPORT just issued by the British Commissioner in South Africa says in part:

"Canada has shown considerable expansion in her exports of hardware to South Africa. Since 1914 she has taken rank as a regular and considerable supplier of bar iron, bolts and nuts, wheelbarows, enamelled ware, cutlery, fencing wire and material, horseshoes, nails and screws, baling wire, pipes and piping, and galvanized iron. Canada also supplied shovels to the value of £16,000 out of £22,000, and one-fifth of the picks, in addition to agricultural implements and tools to the value of £369,000, and agricultural machinery to the value of £67,000. The American share of implements, however, is very much larger, being more than half the total. Sweden has increased her trade in cutlery, enamelled ware, lamps, and machinery, and Switzerland in high-lift pumps. From Japan have come cheap cutlery, brass manufactures, cordage, electrical fittings, and enamelled ware in increased quantities; whilst an agency has been established in the hands of a Johannesburg firm for electric cable and wire, although the import statistics for 1917 do not record any shipments as having arrived."

NEW RULING GOVERNS SECOND-HAND STEEL

THE United States War Trade Board announces, in a new ruling that on and after November 1, 1918, all applicants for licenses to export second-hand articles composed of iron or steel will be required to state on Form X that the commodity to be exported is "second-hand." Failure on the part of the applicant to describe second-hand material as such will be regarded as an inaccurate description of the goods, and the applicant will be subject to the prescribed penalty therefor.

339 Sizes of Oil Stoves Cut Out

Latest Order of American War Board Aimed to Save Large Quantities of Iron, Steel, Aluminum and Brass For War Needs—Canadian Firms Seeking Supplies at Washington Get Little Satisfaction

THE new schedule issued by the United States War Industries Board for makers of oil burning stoves and heaters indicates that a saving in the oil-stove industry of at least 25 per cent. in the quantity of iron, steel and other metals and of between 40,000 and 50,000 pounds of aluminum will be effected by a conservation program.

Under the schedule prepared by the Conservation Division of the War Industries Board with representatives of the industry, there will be an elimination of 339 sizes and styles of oil stoves, heaters and ovens and of 127 sizes and styles of gasoline stoves and heaters. The saving in aluminum will result through the substitution of zinc for aluminum for name plates.

Changes in Parts

The finish of all stoves or heaters is to be plain Japan or Japan enamel, or vitreous enamel, without nickel trim, and the use of nickel is to be eliminated. Use of brass in the manufacture of stoves or heaters is to be confined to the burner parts.

The Conservation Division has been introducing conservation programs in many industries with the purpose of simplifying products, conserving material, and labor and releasing capital through reduction of unnecessarily large manufacturers' and dealers' stocks.

Manufacturers' Schedule

Following is the schedule for manufacture of kerosene oil cooking stoves, gasoline cooking stoves, kerosene oil heaters, portable oil stove ovens, kerosene oil-burning water heaters, and gasoline-burning water heaters:

1. All articles that are to be eliminated but which are now in the process of manufacture or are completed and in stock, may be sold, but no more material for any of these articles is to be purchased, except to balance up stocks on hand and their manufacture is to be discontinued entirely, February 1, 1918.

Class A—Kerosene-Oil Cooking Stoves

2. Sizes.—Each manufacturer to restrict his output of kerosene oil cooking stoves to the following styles and sizes:

(a) Small one-burner size in one style employing the minimum of steel.

(b) Two-burner size in one style without built-in oven.

(c) Three-burner size in one style without built-in oven or one size of range stove with built-in oven, but not both.

(d) Four-burner size in one style without built-in oven.

3. Warming shelves.—Each manufacturer to restrict his output of warming shelves to two sizes in one model, as follows:

(a) For three-burner stove.

(b) For four-burner stove.

4. Splasher backs, subbase pans, and removable drip pans all to be eliminated.

Class B—Gasoline Cooking Stoves

5. Sizes.—Each manufacturer to restrict his output of gasoline cooking stoves to one style in three sizes, as follows:

(a) One burner.

(b) Two burner.

(c) Three burner.

Note.—All of the smaller or junior design.

Class C—Kerosene Oil Heaters

6. Sizes.—Each manufacturer to restrict his output of kerosene oil heaters to one style in three sizes.

7. Founts.—Founts to be made of steel, lead, zinc coated, or galvanized, excepting the burner parts of the fount where brass is necessary.

Class D—Portable Oil Stove Ovens

8. Sizes.—Each manufacturer to restrict his output of portable ovens to one style in two sizes, as follows:

(a) One-burner, approximately 21 by 13 by 18.

(b) Two-burner, approximately 21 by 13 by 18.

9. Doors.

(a) To be made of steel or with glass panels, but not in both designs by any one manufacturer.

(b) To be made in either the so-called drop or swing door type, but each manufacturer to use only one type.

Class E—Kerosene Oil Burning Water Heaters

10. Sizes.—Each manufacturer to restrict his output of kerosene oil burning water heaters to one size of burner capacity.

Class F—Gasoline Burning Water Heaters

11. Sizes.—Each manufacturer to restrict his output of gasoline burning water heaters to one size of burner capacity.

AFFECTS CANADIANS

This new schedule contains much that is significant for Canadian firms, especially those requiring sheets and other materials from across the line. The United States War Board apparently intends to cut to the bone and its orders indicate clearly that every ounce of metal that can be saved for war needs is going to be saved. Canadian firms who have been in touch with Washington in an effort to get supplies have already found out that the War Board is dealing in the firmest possible manner with all requests. "Patch your old stoves," is what some makers were told according to information given to HARDWARE AND METAL. In addition to the immense pressure that is being put on the big American mills endeavoring to maintain maximum production for war orders there has been trouble resulting from thousands of employees being off work from attacks of influenza. This has considerably lessened the output in many cases. Plate production suffered most in the east and at Youngstown two shops were closed for nearly a week. The big Carnegie Steel Co., had ten per cent. of its employees affected by "flu."

Want Special Steels

Inquiry for special steels has been a feature in the past two weeks. At Pittsburgh 1,500 tons of vanadium spring steel and 2,000 tons of chrome-silicon and chrome-silicon-manganese steels for tractors and tanks for France are about to be closed. Several thousand 6-ton tractors have been let to automobile companies and the total may run to 25,000. Seamless tubing has been bought for 5,000 axles.

The makers of agricultural implements who secured preferential prices on finished steel have protested to the War Industries Board the prices on malleable castings as scheduled by the associated malleable foundries. Conferences have been held with the War Service Committee of the malleable interests but with no definite decision. The makers of malleable castings had re-affirmed for the fourth quarter the schedule of prices promulgated about the middle of the third quarter.

Working to Capacity

The distribution of 137,000 tons of barbed wire to the Allies—65,000 tons to Italy, 50,000 tons to France and 22,000 tons to Great Britain—and the setting aside of 60,000 tons for the United States have tied up most of the wire capacity for some time.

Current Events in Photograph

WORLD'S RECORD FOR TONNAGE

This shows the waterfront at Windsor, Ont., which has the world's record for shipping tonnage. At any given point here a vessel more than 600 feet long passes on an average of every seven minutes, night and day. These are the big lake freighters with their cargoes of iron ore, wheat, coal and other commodities. The tonnage that passes up and down at Windsor is greater than that handled in London, Eng., New York and Hong Kong combined. It is greater than that which passes through the Suez Canal, which some years ago took a secondary place. The exact figures for the last year available are 100,907,270 tons, valued at $1,069,617,157. In addition to the big lake boats, there are so many smaller craft bound for Detroit and Windsor that at any given point a boat passes one way or the other every four and a half minutes.

Service and Honest Deal Spell Success

Mackenzie & Milne Hardware Firm at Sarnia Steadily Expanding After Seventy Years of Good Work—Recent Changes in the Store Arrangement to Keep Everything Right Up to the Minute—Keep the Goods Says Vice-President and You Can Sell Them

THE hardware firm of Mackenzie Milne & Co., at Sarnia, Ont., has just celebrated its 70th birthday, and a few of the points in connection with the celebration are of special interest. The last year has been one of the best and most prosperous years in the history of the company, and many and extensive changes have been made to take care of the steadily growing trade. A large addition was made to the warehouse, and radical changes in connection with the store. These include complete new offices, a large increase in the shelving accomodation and the installation of handsome new combination show cases and counters.

One of the corner stones upon which the business has developed has been the unwavering policy that has become known far and wide all over the Sarnia district, that all goods sold by Mackenzie and Milne are exactly as represented. Service has been another feature in the firm's growth. It has been quick to size up the needs of the trade in its district, and prompt to stock the goods necessary to meet all requirements. In addition to its big wholesale and retail hardware trade, Mackenzie and Milne Co., is engaged in tinsmithing and sheet metal work. It recently acquired the business of Watt & Sons, at Collingwood, manufacturers of life boats, and has been engaged on large contracts. Owing to its location at Sarnia, marine trade has always been a big item in connection with the firm's business, and it is bigger now than ever before.

Right After Business

The value of keeping in close personal touch with customers all through the district has been followed by the Mackenzie Milne Co. with much success. The firm always has one of the best exhibits at the county fair and makes a point of keeping its name before the farmers by means of the prize lists which are distributed in large numbers. It also keeps in touch with the district trade by means of mailing lists which are sent out regularly.

"We have found the advertising we get through the fair most valuable," said vice-president George S. Samis to HARDWARE AND METAL. "We also depend upon our large store windows to display to advantage seasonable goods. We find we get direct results.

Our window displays are changed regularly."

Keep Store Bright

Rearrangement of the store recently has been along the line of the latest ideas. Hardware men for some time past owing to the demands on space and a realization of the great value of light have been getting away from everything that tends to make a store dingy. There has been splendid development in the best stores that has resulted in a bright cheery atmosphere being maintained by the display of attractive goods in a manner calculated to make even casual visitors become interested and buy. An effective way to do this and to create a favorable impression of the store from the moment a customer enters is to have counter show cases filled with bright, shining goods, right at the front of the store. The counter show case idea is one of the greatest sources of profit to retailers, and it also has the added advantage of saving space while at the same time proving a source of undoubted ornamentation to the store.

A Good Arrangement

As will be seen from the photo, Mackenzie Milne Co. had all these ideas in mind in the re-arrangement of their store. As soon as a customer comes in by the large front doors he finds himself directly in front of a large and exceptionally attractive counter show case filled with all kinds of bright and shining household goods, spoons, casseroles, etc. If he turns to the left he finds himself looking into a smaller, but no less attractive, counter show case in which bath room fixtures of all kinds are displayed on glass shelves. Behind the counter it will be seen from the picture are shelves containing shining percolators, tea pots, trays, brass goods and similar lines. The same idea is carried out on the right side of the store. No matter which way the customer turns he sees something that looks good to the eye.

Makes Hit With Women

Such an arrangement just naturally makes a hit with women, and in Sarnia just as in all Canada to-day women are among the biggest buyers. By the use of the counter display cases and the glass front show cases behind them the firm also gains another important advantage. The goods are under glass and while they can easily be seen are not handled, and are kept free from dust. In view of the labor situation and the difficulties in securing help at the present time, this saves a lot of time and trouble.

The counters are easily moved and are frequently changed around. This also creates a favorable impression with the buying public. People get the idea that the stocks are kept new and fresh and nearly everybody will buy a brand new shining article in preference to something that is dusty or fingermarked, and cries out every second "I am shop worn."

Seasonable Moving

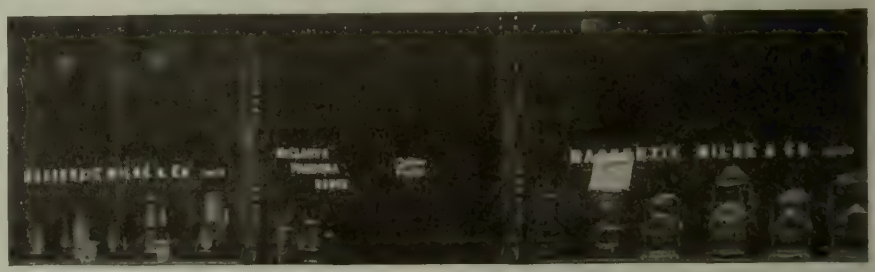
Besides moving the counters the firm also moves the stock frequently. Just now, for instance, as the picture shows, an attractive line of heaters is right up in the front of the store. In another corner is a nice display of carpet sweepers. On the counter is an assortment of brushes. All these little plans boost sales and can be practised with good results and much profit by any hardware man.

As stated above the company takes every care to look after the trade of Sarnia city, and of the farmers all over the county. It does more. For some time past there has been a lot of oil drilling and prospecting for oil in an adjoining county, West Middlesex. Mackenzie and Milne have had a lot of experience in supplying the wants of oil men both in Sarnia and Petrolia, so they went right after the business in Mosa Township, where most of the new work is being done. Because they went after it, they got it, and it has been good business too. The firm also saw an opportunity for business in supplying pumps and other goods required by farmers who drill for water. They got the stock and because they got the stock they got the business.

Keep Big Stocks

"We always made it a point to study the needs of our territory and provide for what our customers are likely to want," Mr Samis said to HARDWARE AND METAL. "In spite of the fact that the war is on we have done a splendid business. One of the best ways to get business is to maintain stocks. If you have the goods and the people know it, they will come. Many dealers just now are wondering what to do in the way of buying, on account of war conditions. We are not speculating at all but we are keeping our stocks in shape to handle as big a business as ever, if not a little more."

The firm has always done business on practically a cash basis. If there is any credit to be granted the firm has the say, but knowing the firm's policy very few people ask for time.



Founded In 1848

The business was founded in 1848 by the late John Mackenzie, who was later joined by the late Charles Mackenzie, the firm being known as the J. & C. Mackenzie Co. up to 1871, when it was known as C. Mackenzie & Co., business being continued until 1882, when a new partnership was formed. In the spring of 1872 David Milne entered the company, followed by George S. Samis in 1873, and T. F. Towers in 1882, J. A. Farquharson in 1886. The death of the founder of the concern, John Mackenzie, in 1877, was followed by the death of Charles Mackenzie in 1900, and up-

Continued an next page

Mackenzie and Milne in their store arrangement work on the idea that keeping seasonable goods displayed in the ir front windows and in the front of their store, surrounded by counters filled with bright and attractive looking goods has an immediate effect in favorably impressing customers regarding the firm and its stock.

Note how the firm uses both its large display windows to keep seasonable lines before the public. These window displays are changed weekly. Splendid sales of stoves and heaters have followed the firms window displays of these goods.

New Prices For Burlap in Car Lots Are Set by War Board

THE United States War Industries Board, through the jute, hemp, and cordage section, has accepted the offer of the burlap importers and bag manufacturers to establish the following basis of maximum prices for burlap in carload or larger quantities, effective immediately:

Per yard, 40-inch 8-ounce, 13.6 cents Pacific coast; 14 cents Atlantic and Gulf ports.

Per yard, 40-inch, 10½-ounce, 16 cents Pacific coast; 16½ cents Atlantic and Gulf ports.

Other sizes and weights in equal proportion.

Other points in United States based on freight from Pacific coast.

Quantities less than carload at prices slightly higher to cover cost of handling.

These prices to be effective until about February 1, 1919.

This resolution is voluntarily made by the trade because much lower prices are expected to prevail as the result of purchases to be made after January 1, 1919, through assistance of the War Industries Board, and, therefore, does not affect the validity or integrity of contracts made prior to October 4, 1918.

In its announcement the Board says:

"In its aim to secure much lower prices for all purchasers of burlap in the United States, the War Industries Board realizes that this voluntary reduction represents very heavy losses to importers and bag manufacturers. That the losses may be the more equitably distributed, it is therefore the duty of each citizen to stand loyally by any contract for burlap made prior to October 4, 1918.

"Dealers in secondhand bags and burlap attended a conference with the War Industries Board October 10, and after a full explanation of the situation, placed themselves on record as being in accord with the action taken, and pledged their loyal support to the maintenance of maximum prices on the basis of these prices for new burlap, and in the usual proportion thereto.

Bag manufacturers established maximum prices on bags, f.o.b. factory, on the following basis:

Maximum prices on burlap, f.o.b. factory, plus cost of manufacturing, plus 5 per cent. margin.

The War Industries Board will make further announcements on burlap about February 1, 1919.

Veteran Stove Maker Predicts Big Drop in Prices After the War

JOHN McCLARY, of London, Ont., who recently celebrated his 90th birthday, and is the head of the largest stove firm in the British Empire, has written as follows on conditions which will prevail when the war ends:

"I predict that at the close of the war there will be such a rejoicing that for a time the disturbed future will be overlooked. The war has created a condition that will require the united wisdom of our ablest statesmen to meet and do justice as far as possible to our returned soldiers, to labor, and to the general public.

Soldiers' Return

"Bonar Law, many months since, issued a statement to the British public that after the return of their triumphant soldiers it would be as great, or nearly as great, a task to absorb them as it was in the first place to create them. They would have to be kept employed and well paid if they did not earn half their salaries—intimating the necessity of producing merchandise beyond the requirements of the limited, disturbed world's market, and citing pig iron as an illustration which would not depreciate in carrying. These conditions apparently could only be carried through by the action of the Government. These views reflect to some extent what we may look forward to at the close of the war.

The First Effect

"The first effect on our cities will be the stoppage of production of war materials. These highly paid artisans engaged in this work would be thrown idle. The inflated prices of merchandise, running from one to three hundred per cent., must suffer a gradual sinking back to more normal levels. The raw materials of the McClary Manufacturing Company average, upon the whole, fully three times normal prices of metals and other products consumed.

"The first effect of the closing of the war will be to create a waiting condition. Outside of food, the average consumer will purchase only for immediate requirements. The manufacturer, in most lines, will only produce reduced outputs to even up his stock, looking forward to his raw materials, gradually shrinking back to the former normal prices.

Reduction in Wages

"While he has a duty to perform to employees as far as conditions reasonably permit, there is likely to be a largely reduced number of operatives, with a corresponding reduction in salaries, having an unfavorable influence on trade in our cities. Many trades now doing apparently a prosperous business will find their sales reduced and their stock carried depreciating from month to month, causing, I fear, many failures, especially among traders who have kept their stocks up to normal, assuming the present inflated prices would continue.

"The depressed conditions will continue more or less for a period, I assume, of twelve months or more.

"The farmer will continue to be comparatively prosperous, the purchaser of merchandise for immediate requirements.

Financial Conditions

"Our soldiers, being in England, supported there by our government, will mean a largely reduced circulation of money compared with the vast sum paid in wages and supplies, if circulated at home instead of in England.

"The British Columbia lumber interest is likely to be an exception to other manufactures. The world will require the product, and probably there will be plenty of shipping capacity released by the cessation of the war to carry it.

"I anticipate that within twelve months we will have a largely increased immigration to our Western country, increasing from year to year, which will be a great factor in creating unrivaled prosperity through the development of our unlimited resources of land, forest and minerals, which are of commercial value beyond comparison with any other part of the world in proportion to our comparatively small population.

"I venture the prediction that the war will close triumphantly within the next twelve months."

TO DEVELOP TRADE

The first step in the establishment of Australian trade agencies in America has been taken by the Commonwealth Government in the appointment of H. Y. Braddon, as Commissioner. His headquarters will be in New York. Canadian firms desiring to develop trade in Australia should get in touch with Mr. Braddon.

SERVICE AND HONEST DEALING

Continued from page 42

on the death of the latter a joint stock company, known as Mackenzie, Milne & Co., Limited, was founded, Messsr. David Milne, Geo. S. Samis, T. F. Towers, Charles and Malcolm Mackenzie and J. A. Farquharson being the stockholders.

Recent Changes

The business prospered and grew under their directorate, and on February 1st, 1918, owing to the ill-health of the senior member of the company, Mr. Milne, another change was made, Mr. Milne disposing of his interest, as did also Messrs. Charles and Malcolm Mackenzie, Peter Paton coming in as president of the concern, with the following officers: vice-president, Geo. S. Samis, secretary, T. F. Towers. The above officers with J. A. Farquharson and Hugh Calderwood of Barrie form the board of directors.

After 36 years of continuous service Secretary Towers retired last week.

LOOKING AHEAD TO THE CHRISTMAS WINDOW CONTEST

HARDWARE AND METAL'S *annual Christmas window display contest will be conducted as usual this year. The growing interest evinced by Canadian retail hardwaremen in this contest is evidenced in a wider and more representative response each year.*

Two contests will be conducted in accordance with past custom—one for stores in places under 5,000 *population; the other for places of* 5,000 *and over. No restrictions are set on the style of display or the goods used in the arrangement, except that each window must be arranged with goods for the Christmas trade.*

ARE YOU GOING TO ENTER?

Eight Prizes Will be Offered as Follows:

Places under 5,000		Places of 5,000 and Over	
First Prize	$10.00	First Prize	$10.00
Second Prize	5.00	Second Prize	5.00
Third Prize	3.00	Third Prize	3.00
Fourth Prize	2.00	Fourth Prize	2.00

Contestants will note that an equal number of prizes are offered to the small town trimmer as to those in the larger towns and cities.

The contest closes Wednesday, January 1. *No photos received after that date will be entered unless there is proof that they have been delayed in transit.*

All matter should be addressed to "The Editor, HARDWARE AND METAL, 143-153 *University Avenue, Toronto," and marked "For Christmas Window Contest."*

What Hardwaremen Are Doing

Big Drive in Tea Kettles Made by Windsor Firm, Who Sold Over 300 by Putting Them in Window With Big Card Showing Bargain Price—Monster Trout Drew Crowds to Hardware Store at High River, Alberta

The Windsor Hardware Co., of Windsor, Ont., sold over 300 kettles fair week. A big card in the centre of a pile of kettles in the window did the trick. The card read "$2.75 kettles for $1." Women came from all parts of the city to get those kettles. They were nice looking, good sized, blue enamel kettles and the staff of the store was kept busy wrapping up and delivering kettles from the time the card was put in the window. You can trust a woman to find a bargain and when the bargain is put right in the front window of a big store on a busy corner, the women of Windsor simply couldn't help seeing it. If they didn't happen to need a kettle themselves they told some friend about it, and the results all round were most satisfactory to the hardware company.

The Manitoba Hardware Co., of Hamiota, Manitoba, got excellent results from a third of a page advertisement in the local paper. The firm put on a sale of furniture, which it handles extensively, featuring especially a line of brass beds. These were most attractively illustrated with good sized, well made cuts. Prices of every article were given in large figures. The top portion of the ad immediately above the cuts read as follows: "It is not necessary to send to the mail order house for furniture, when you can get the goods you want in your own town. When you compare our goods and the quality, we believe you will find our prices just as good as you will get by sending away for furniture. The goods we are carrying are the most reliable goods we can purchase and are bought from the leading manufacturers of Canada. You can inspect the goods and see the finish and quality before you lay out your cash. If you intend buying furniture this fall, we would like you to look over our stock, which is a pleasure to show you." The invitation was accepted and many sales were kept from the mail order houses, once again demonstrating that the firms who fight these stores can beat them every time and keep the home trade, provided they have the goods to back up their advertising.

A Western Ontario hardware man who is modest and who asked that his name be withheld gave HARDWARE AND METAL a little suggestion this week that might turn a good many hundred dollars into the Red Cross coffers. It might also rid many hardware offices of a lot of junk that is at present cluttering up the premises and occupying good space. This man recently had a "ridding up" and collected all the old price lists, catalogues and letters that had been accumulating for about fifteen years. He was really surprised when he got at the work to find just how much useless literature he had stored away. He made a big pile of it and then called in some Red Cross workers who were only too glad to get it. The hardware man was surprised and delighted later to find that he had supplied the Red Cross with paper that weighed almost a ton and a half.

J. G. Steel & Co., hardware, of London, Ont., have built in front of their store what might be called a show window case. People can walk around on three sides of it and the fourth side is the wall of an adjoining store. Mr. Steele keeps this window filled with an attractive display of cutlery and household goods such as silverware and other lines which make a nice showing. It is changed once a week.

"The difference in the cash sales we made paid for the window in a very short time," Mr. Steele stated to HARDWARE AND METAL, "It has increased our sales in these lines in a most satisfactory manner."

The Ripley Peck Hardware Co., of Windsor, Ont., has put in recently a handsomely finished show case which is filled with Mackinaws. The coats are all quality coats. There is absolutely nothing cheap about them and they are intended to appeal to the best class of trade. They make an attractive showing and the firm is finding a good sale for them. The coats are warm, comfortable and serviceable, the sort of goods that make satisfied customers who will come back for other things they need in the hardware line later on.

The High River Hardware Co., High River, Alberta, drew crowds of citizens to its store by placing on exhibition the biggest trout ever caught in the district. It was 20½ inches long and weighed 5½ pounds. The fish bore marks of four previous fights for liberty, as four hooks with broken leaders were still dangling from its mouth when it was finally landed. The hardware store was the scene of attraction all day long. Up to noon on the first day Mr. Farquharson said that over 150 people had been in to take a look at the fish.

The Miller Hardware Co. of Virden, Manitoba, has been running a series of three line fillers lately throughout the reading columns of the local paper. They are well worded and should prove good business "pullers." Here are some samples:—If you do not deal with us, and are paying higher prices elsewhere, it is not our fault—THE MILLER HARDWARE CO." "Our goods are all marked in plain figures, no hidden prices, one price to everybody—THE MILLER HARDWARE CO." "Remember the prices quoted in our usual advertisement are not specials, they are our usual every-day prices—THE MILLER HARDWARE CO." "If you see similar goods elsewhere at higher prices, do not be surprised, they are worth it—THE MILLER HARDWARE CO."

The following is appearing in a two column box on the front page of many of the large American daily papers in connection with the Government's campaign for paper conservation:

YOUR TRADESMAN'S SAVINGS
ON PAPER NOT PROFITEERING

Your grocer does not want to offend you. You must ask him not to wrap up package goods. Take a shopping bag or basket with you.

Your merchant does not want to offend you. Don't ask him to wrap up small purchases. Have some war pride and carry your package home, unwrapped with extra wrapping paper, or let him deliver simply tied with a string.

Your furniture man does not want to offend you. Ask him to use burlap and cloths in delivering furniture to you. He can use them over again.

Your hardware man does not want to offend you. Ask him to deliver hardware without wrapping or take it home with you.

All paper must be saved, to help win the war. The War Industries Board has declared that we must all save paper; that the production is only about 50 per cent. of the requirements for war industries; that we must stop using many grades of paper in order that papermaking machines may manufacture paper required to move food and clothing to France. Profligate use of paper has been abnormally stimulated.

Curb that appetite for wasting paper.

Every bit of wrapping paper that you save, every bit of paper that YOU save, saves coal, labor, chemicals and emphasizes your patriotism.

EDITORIAL COMMENT

REMEMBER you are helping to make the world better by every Victory Bond you purchase.

* * *

ONE might almost believe from the ruthless manner in which it acts that the Spanish flu is really German flu.

* * *

THE whole world knows by this time that burglary is one of the great national industries of Germany, and the display of her proficiency in this branch, as shown in Belgium, France and many other countries, is sure to be remembered much longer than will be agreeable to the Germans.

* * *

IF your star clerk has left your counter to help in the delivery of a man's sized load of bullets and a keen edged bayonet to the Prussian Guards or some other favorite regiment of Kaiser Bill, right now you have a particularly fine chance to help along the good work by buying VICTORY BONDS.

DOING THEIR BIT

BUSINESS men all over Canada have their coats off and are doing their share in the big Victory Loan drive. Among the very hardest workers in towns and cities all over the Dominion are the hardwaremen. They are not only doing their share but they are inspiring others by their example. Hardwaremen have always been ready to take a leading part in civic or patriotic work and it is not at all surprising that when a national call comes, such as the Victory Loan, they are to be found in the forefront of the workers. No class of retailers comes more closely in touch with the home makers of Canada than the hardwaremen and the home makers have a vital interest in the Victory Loan and in the success of the war. The hardwaremen are making good use of their position in relation to their customers to urge generous purchases of Victory Bonds.

BUYING FOR THE FUTURE.

THE secret of the success of many of the biggest retail merchants in Canada to-day has been their ability to look ahead and prepare for the future. They anticipated the needs of their customers and prepared for them and when the time came the merchants were ready with the goods. Probably at no time in the history of Canada has the question of buying been studied more keenly than right now. With the end of the war in sight, merchants all over the Dominion are endeavoring to plan for the future. They have learned from the past that it always pays to be prepared. Many of the best firms in the country are continuing to base their business policy of the future on this idea and are buying accordingly. While their smaller competitors are figuring and figuring and wondering whether they had better lay in a smaller stock of this or that so that if the war ends they will not be caught with a lot of goods on their hands bought at war prices, the big men are going right ahead and are buying with a view to handling a bigger business than ever. They realize that the merchant who has the goods is the man who is going to get the trade. The only thing they exercise extreme caution in is in buying goods that will meet the requirements of their customers. They are studying this side of the question with the greatest care and endeavoring to decide just what goods will be needed. Once they decide on this they place large orders. Scores of these firms have done a record business during the war, simply because they did not get panicky when the fight started and quit buying. Because they had good stocks from which to draw they were able time after time to take trade away from other firms who had bought too cautiously and were sold out. Much of the trade the big firms secured in this way they will hold permanently. They realize that as far as the future of Canadian business is concerned they cannot afford to be caught without the goods.

HOW IT HELPED.

RELIABLE figures which have just been prepared show that setting the clock ahead resulted in an immense saving of coal. It is estimated that as a result of "daylight saving" fully one and a half million tons of coal were saved in the United States and Canada between March 31 and October 27, when the clocks were changed.

Among the many places which kept close watch on the operation of "daylight saving" very definite facts were obtained from one community of about 1,000,000 population. It was shown that in this one district the saving of coal was 17½ tons per 1,000 population over the period of seven months. These figures were checked against records obtained from other places in widely separated districts having the same relative conditions, and from the mass of facts thus gathered the estimate of coal saved is determined.

CUTTING OUT UNNECESSARY CREDITS

Continued from page 37

followed when other hardwaremen whom they know went on a "cash basis." Indications are that many more hardwaremen will adopt this policy from now on.

The advertisement which is reproduced on page 37 appeared in a four column lay-out in big type on the front page of the "Prescott Journal" of October 17. W. F. Macpherson is secretary of the Ontario Retail Hardware and Stove Dealers' Association. He has been considering the situation very carefully for some time and his conclusions are summed up in his big display advertisement as shown:

Will Try It Out

The "Deloraine Times" of Deloraine, Manitoba, contained the following in a three-column display on the front page of its issue for October 24.

CHALMERS' HARDWARE
Announcement

"Eighteen months ago when we purchased the E. C. Arthan business we decided to continue giving 10 per cent. discount for cash on all goods in the stock purchased as that was the policy of the store at the time we took it over. While excluding some lines we have been continuing it on most of our stock to the present time.

"The Arthan stock is now sold out and, owing to the heavy advances in prices on all lines we find we are unable to do this any longer. Hereafter our goods will be sold at prices marked for cash and we are going to adopt the cash system for the next six months. Why not? You intend to pay some time, why not now? We have accommodated you during the summer when cash is not so ready and we hope that we can depend on you now to favor us with your trade on a cash basis.

"We appreciate the inconvenience this might be to some of our farmer customers and we still intend to accommodate them when it is necessary sometimes to telephone or send in for some article badly needed.

"Remember our policy for the next six months. Cash for honest goods at honest prices.

"Thanking our customers for past favors and hoping through sincere service to still merit your confidence, we are,

"Yours truly,
"WM. CHALMERS."

How It Works Out

Many hardwaremen, especially those in smaller places depending upon farmers for their trade were extremely nervous about making a start in curtailing credit. Their letters showed that they feared that if they asked farmers to pay cash the farmers would transfer their trade to other stores. This appears to be a groundless fear. HARDWARE AND METAL in response to various letters advised firms who explained their difficulties over "carry accounts" to eliminate them as far as possible.

Below are some letters received recently which show what merchants in different parts of Canada are doing and the results obtained. The letters tell their own story:

Thomas D. Pierce, of Port Rowan, Ont., writes:

"Hardware and Metal, Toronto: I have been reading your information in HARDWARE AND METAL regarding doing cash business instead of credit. I beg to say that I started the cash system on October 1, and up to the present time it is very satisfactory. In fact I would rather quit the business than go back to the old way.

"I have been a subscriber to your trade papers for a number of years and wish to thank you for the valuable information that I have received from them.

"If you think my experience would be of any value to any of your subscribers you may publish this note.

"I also enclose notice sent to all customers before starting cash system.

Here is a Copy of Circular Mr. Pierce Sent to Customers

A NEW SYSTEM OCTOBER 1, 1918

"At the present time, perhaps as never before, you are interested in buying goods at the lowest price. We want to help you. One of the most effective ways in which we can do this is by the proper handling of our accounts.

"Granting credit is an accommodation which adds to the cost of doing business, that means that we have to increase the price in order to stay in business. That affects you. In order to help you to get the very lowest prices after October 1, 1918, we will sell for cash and produce only. There will be no credit given to any one after that date except by bankable notes, which will be taken the same as cash.

"In order to purchase our goods at the lowest price we pay cash for them. If you buy for cash you can buy for the lowest price too.

"We do not mean by our new policy to reflect in any way upon any person's financial condition.

"This is a straight business proposition by which you and I can save money, and we trust you will fall in line with our views. If so it will work to our united advantage.

"Therefore, after October 1, 1918, we will grant no credit to anyone, but will make the price right.

"Hoping that you will accept this message in the spirit in which it is given, thanking you for your many past favors, and soliciting your trade in the future,

I Remain, Yours Truly.
THOS. D. PIERCE,
Port Rowan.

WELSH & WELSH, OF BARONS, ALBERTA, say

The Editor, Hardware and Metal, Toronto, Ont.: Having read your article, "This Situation Needs Remedying" in your issue of September 14, we thought we would pass along to you our experience after having been on a strictly cash basis for three months. We took over the business on February 16 of this year and carried same until July 1 on a wide open credit. The writer saw by the way things were going that before the year was out we would have our entire capital out in the country, so decided to go into cash. We advised our customers by personal letter that on the first of July everything would be cash; of course we lost some of our customers as the towns on all sides are running on credit; also Lethbridge is only thirty miles to the south and quite a number went there to do their buying, but time is a great healer, and we have most of our old customers back again, and as far as we can learn, that is from people that intend paying their accounts as they mature, they are satisfied with the new system.

Our big accounts, say where a farmer is sending in his help to do the buying, we handle as deposit accounts. We have the customer give us a deposit of say $25 or $30 which we credit to him, and as each purchase is made it is deducted from the deposit. When the credit account begins to run low the customer is advised by phone or letter, when he has to come in and give us another cheque.

Under the old system of retailing the merchant in Western Canada was doing the banking business for the public at his own expense.

Hoping that this information may be of use to some of your readers, we are,

Yours truly,
WELSH & WELSH.

SEND DUPLICATES

Sinking of merchant vessels by the enemy has been responsible for many misunderstandings in foreign trade. Letters that never arrived, because carried on vessels that fell prey to the U-boat, were not answered, and in consequence business opportunities were lost for lack of the information or goods sought. The foreign merchant in not a few cases, doubtless, laid the blame on business methods of this country, while Canadian firms for a similar cause often wondered why weeks or months passed without response from their overseas customers to important communications. In neither case would the annoyance have been long continued if a duplicate of the first letter had followed on a succeeding steamer. Many concerns still follow the custom that was universal in the days of the copying press of mailing a copy of every letter by the following opportunity. However, this practice fell generally into disuse because of the certainty with which mails of every sort reached their destination. That situation, however, no longer holds good as to marine mails, and duplicates of all business letters and other business documents for overseas, therefore, should be sent by a following mail, or by a different route.

CORRECTION

A wrong illustration inadvertently appeared in the advertisement of the Canada Steel Goods Co., Ltd., Hamilton, Can., on page 6 of last week's issue. A cut of the Great West Hanger was used to represent the America Hanger. This is properly shown on the same page in the present issue.

EVENTS IN THE TRADE

Business Changes.

Waldheim, Sask.—P. B. Heppner, hardware, has disposed of his business.

Hamilton.—The Garland Hardware Company has been purchased by F. C. Jelfs.

Blairmore, Alberta.—L. Dutil, of the Blairmore Hardware Co., has purchased the hardware business of H. G. Goodeve Ltd., at Coleman, Alberta, which will be carried on under the name of The Coleman Hardware Co.

Obituary.

Harold F. Blanchard, general sales manager of the Thermoid Rubber Company, Trenton, New Jersey, died recently.

Alfred Kroetsch, aged 30, for several years a clerk in Fennell's hardware store at Kitchener, Ont., died from pneumonia, which followed an attack of influenza.

After an illness of only ten days James Houston, city traveller for the Vokes Hardware Co., Toronto, died of pneumonia. He was 29 years old.

The death occurred at Port Arthur, Ont., of Mrs. Dunn, wife of Percy E. Dunn, of the Dunn Hardware Company She was a former resident of Port Hope, Ont.

John L. Ginge, former proprietor of the Canadian Auto Devices Co., at London, Ont., died at Phoenix, Arizona. About a year ago he sold his business owing to failing health and went West.

Pneumonia which followed a short illness with influenza, resulted in the death at Newmarket on Tuesday of Charles M. Osborne, son of Richard Osborne, hardware. His wife died a week ago.

The death occurred at Edmonton, after an illness of only two days, with influenza, of William Peter, assistant manager of the Marshall Wells Alberta Co., Ltd., wholesale hardware.

Frank T. "Barney" Oldfield, of Galt, Ont., manager of the Oldfield Auto Sales Co., died after a short illness with influenza. He was 31 years old and a native of Hamilton, Ont.

Mrs. Nicholas Rainsberry, mother of Thomas J. Rainsberry, manager of the Van Tuyl & Fairbank hardware store at Petrolea, Ont., died at her home in Sarnia township.

John A. Kelly, of Listowel, Ont., died from heart weakness following a severe cold from which complications developed For many years he was in the implement business at Palmerston. Later he was travelling salesman for the Brockville Carriage Co., and recently was with the Chevrolet Motor Co.

Charles L. Lavelle, accountant of the St. Marys Cement Co, of St. Marys, Ont., and a member of the firm, died after a brief illness with influenza, which developed into pneumonia. He was 38 years old.

Frank McNicol, aged twenty-seven, who was in the hardware business with his brother, Everton McNichol, at 2339 Dundas street West, Toronto, was a victim of influenza. He was a well-known hockey player and was a member of the Broadviews when they won the city championship. Later he was one of the best players on the Nova Scotia team in the Bank League.

Brandram-Henderson Advertising Manager

A. N. Creamer, recently appointed advertising manager of Brandram-Henderson, Limited, who has taken up his duties in succession to J. G. Lorriman, resigned, has made special study of

merchandising problems under some of the leading instructors. Some very successful campaigns for various large firms were conducted under his direction. His effort has been specially directed in the promotion of co-ordinated campaigns of advertising for linking up the dealer with the consumer.

Personals

M. C. Fuller, manager of the Renfrew Refrigerator Co., has returned after a month's trip through the West.

C. A. Whitwam, of the Hobbs Hardware Co., London, is back after spending some days in Montreal and Atlantic City.

The wedding took place in Edmonton recently of Miss Katherine Thompson and T. J. Davenport of the hardware firm of A. E. Fee and Killam, Alberta.

J. Leonard Paul, Winnipeg, manager for Brandram-Henderson Ltd., who has been ill with influenza since his return from the east, shows considerable improvement.

James McAllister, who has been with the hardware firm of Rundle and Chambers at Alvinston, Ont., is leaving to take up farm work.

Karl Kirkwood, for several years with the hardware firm of Wyman and Small, at Ponoka, Alberta, has gone into business for himself and has opened a tin shop at Ponoka.

George McDonald, a returned Canadian soldier, has joined the staff of A E. Bregent, of Montreal, Canadian distributor of Pope and other bicycles, and will be the travelling representative of the company. Mr. McDonald will shortly make a trip through to the Pacific Coast.

Hon. W. J. Hanna, of the Imperial Oil Co., was in Sarnia this week to inaugurate the Victory Loan campaign. The Imperial Oil Co. has taken $3,000,000 worth of bonds. Last year the firm took $1,250,000.

J. Newmarsh, traveler for the Canadian Cement Company, narrowly escaped death at Windsor, Ont., when he lost control of the steering gear of his automobile and it plunged over a 20-foot embankment on to the Grand Trunk tracks. He escaped with a few bruises and a severe shaking up.

E. C. Atkins & Co., saw manufacturers, Indianapolis, are issuing buttons and certificates to all hardwaremen and others who wish to join the "Swat the German Lie Club" and subscribe to the "Ten Demandments of Americanism," the creed of the club.

Lieut. T. J. Moulds, M.C., formerly with H. S. Howland Sons & Co., Ltd., of Toronto, who was reported wounded two weeks ago, has died of his wounds. He enlisted in the 3rd Battalion and had only been back at the front a week after qualifying for his commission, when he was wounded.

Pte. Arthur D. Robbins, son of Fred Robbins, of the Hobbs Hardware Co., London, Ont., was killed in action in the recent advances made by the Canadians. He was twenty-four years old.

Fire Losses

The plant of the Victor Saw Works at Hamilton, Ont., was damaged by fire.

Fire which was discovered about 3 o'clock in the morning in the basement of McKinley & Mitchell's hardware store at Biggar, Sask., completely destroyed the building and also a large store adjoining. The cause is unknown. The loss will be about $10,000.

A fire which started from spontaneous combustion in the woodworking shop completely destroyed the factory of the Canada Carriage Company at Brockville, Ontario. The loss will be half a million. The flames spread to the gear shop, the blacksmith shop and into the paint shop, where hundreds of gallons of turpentine, oils and varnishes were stored. From here the fire traveled to the mounting and striping departments, and then into the government bond building, where five hundred automobile bodies and other finished products awaited release from the Customs Department.

Regina News

Leslie Robson, of Peart Bros. staff, is out again after ten week's illness.

Henry Sandburg, with Armstrong, Smyth & Dowswell, is back after being ill with influenza.

W. Cooper, of the North American Machinery Co, Winnipeg, is calling on the hardware trade of the district.

Arnold Smith, salesmanager in the West for Benjamin Moore & Co., was in the city for a few days recently.

Owing to the epidemic of influenza all stores except druggists and confectioners have been asked by the medical health officer to close at six o'clock on Saturday.

Frederick Lane died at his home in Flint, Michigan, from pneumonia following an attack of influenza. While living in the city a few years ago he worked with Potts and Smith.

Charles B. Edmunds Victim of Influenza

Chas. B. Edmunds, for the past twenty-three years an esteemed employee of Frothingham and Workman, Limited, hardware and iron merchants, Montreal, and for many years their representative in the Eastern Townships, passed away at his home in Huntingdon on October 23. Mr. Edmunds was a victim of the Spanish influenza and was ill but a few days.

The late Chas. B. Edmunds

Mr. Edmunds, through his long connection with this firm, was a well-informed hardware man, and having traveled throughout Quebec, was well known to the trade. He had served in various capacities with the above firm, whose manager, George C. Davis, stated that his loss is keenly felt.

Montreal News

D. A. Whittaker, assistant general manager of the Sherwin Williams Co. of Canada, Ltd., is in Winnipeg.

W. H. Newton, manufacturing sales manager for the Canada Paint Company is a visitor to Toronto this week.

Mr. Sutherland, formerly with Canada Foundry and Forgings, Ltd, at Brockville, has accepted a position with J. S. Mitchell and Co., Sherbrooke, Quebec.

Geo. A. Marshall, proprietor of the Sanitary Brush Co, Toronto, was in Montreal this week conferring with Richardson and Bureau, the Montreal agents.

Ernest Bureau, of Richardson and Bureau, manufacturers' representatives, Montreal, who has been ill with a severe attack of grippe for two weeks, is expected back at his desk this week.

Montreal firms report much disorganization among the outside trade owing to the epidemic. Some stores have been temporarily unable, to continue operations, proprietor and staff, it is reported, being ill or away to attend their sick at one and the same time.

In an explosion at the plant of the Beaver Oil Company, 900 De l'Epee Ave., Montreal, two men were killed. One of these was the son of the proprietor, W. V. Henderson. Enquiry of the management failed to reveal the cause of the accident, it being considered a mystery. Fire followed the explosion and damage to the property of several thousands of dollars was done.

Edward Charlton, representative of Brandram-Henderson Ltd., is recovering from the serious accident sustained recently when he fell through a trap door in a store while covering his territory, sustaining a broken arm and rib. He was in the hospital for three weeks but expects to resume his duties within the next two or three weeks.

Trade Notes

T. McAvity & Sons, Ltd., St. John, N.B., sent a cheque for $100 for the Firemens' Relief Fund in recognition of the efficient work of the department at the recent fire in their King Street store.

In addition to their present stock of general hardware lines, Starke-Seybold Ltd., Montreal, will add a line of automobile accessories and plan to have the department in working order at an early

The John Morrow Screw and Nut Co, Ltd., of Ingersoll, Ont., has purchased the plant of the Noxon Company, implement manufacturers.

The Coleman Fare Box Co., Ltd., 1191 Bathurst street, Toronto, has purchased the patent rights, assets, stock in trade, patterns and dies of the Doust Specialty Co., Ltd., 77 York street, Toronto. All products of the Doust Specialty Co., Ltd., will be manufactured by the Coleman Fare Box Co., Ltd., including the J. D. lawn rake, the Doust self-winding clothes reel, Dreadnought line grip, rink scrapers and snow shovels. F. Tissington is manager of the Coleman Fare Box Co., Ltd.

ASKING FOR TENDERS FOR 5,000 SANITARY PAILS

The municipality of Johannesburg, South Africa, wants tenders until January 8, 1919, for 5,000 sanitary pails and 500 lids.

A limited number of tender forms, specifications and blue prints covering the above have been received from Trade Commissioner W. J. Egan, Cape Town, South Africa.

The Johannesburg council has been unable to obtain any of these pails from British sources since the commencement of the war, and this appears to be a good opportunity for Canadian manufacturers of this line to secure a footing on this market.

Tenders may be made direct or through the medium of a representative on the spot. The name of such representative may be obtained, together with specifications, etc., on application to the Commercial Intelligence Branch, Department of Trade and Commerce, Ottawa, quoting File 21011.

THE CLERKS DEPARTMENT

INTENSE THOROUGHNESS IS THE GIFT OF EARL D. BABST

President of American Sugar Refining Co. Spends Hours in the Stores of Retail Grocers, Getting Big Value From Little Details

"ONE can learn a lot about any problem in a short time if one thinks about that problem— and nothing else. It is perfectly possible to acquire the habit of automatically slamming a mental door in the face of intruding thoughts."

There is a thought for the harassed business man with crowded desk and incessant calls on his attention!

Men who turn out a large amount of important work are able to do it because they have learned how to concentrate.

The sentence with which this article opens was spoken by Earl D. Babst, President of the American Sugar Refining Company, and regarded as one of the very ablest business men in the United States. As a young man he did some wonderful things. He developed his powers of concentration very early, and used them to valuable purpose in acquiring his training.

There was a time when, looking very crest-fallen,he stood in perplexity before the members of the faculty of a great American University just before Commencement Day. That was in 1894. Fred C. Kelly tells the story in the "American Magazine."

From the stern attitude of the faculty members, one would have thought that the young man had just been caught in some serious prank.

"We are very much surprised," said one, shaking his head lugubriously, "that you should have done this thing. It's—it's—well, it's entirely unprecedented."

"If you think I owe an extra year's tuition, I'm willing to pay it," suggested the young man.

"It isn't a matter of money," expostulated the faculty member. "The idea is that the thing simply isn't done, and there is no rule that covers the case."

The young man was Earl D. Babst, and his offense was simply this: he had quietly taken a two-years' law course in one year! And he had passed all the examinations with high grades, too.

His Time Was Precious

There was just one large lecture room in the law school in those days. A lecture would be given for first-year men, and the following hour one for second-year men, throughout the day. Babst simply went to the lecture room and remained there. He explains that this was a matter of necessity because he could afford only one year to devote to law, and so was obliged to complete the course in that year.

At the present time, as president of the American Sugar Refining Company, Earl Babst is regarded as one of the ablest business men in the United States.

Born in Crestline, Ohio, he worked in his father's bank before he went to college, and in that way got a glimpse of business before preparing for his law career.

"I think this was a big advantage," he once told me, "over getting all one's education first and never being quite certain what it is for. I had enough business training before I went to college to see that the possession of general information was certain to be highly useful."

In college he developed the power of concentration which enabled him to hump himself and to do two years in one. When I asked him how he acquired this ability for concentration, he said:

"One can learn a lot about any problem in a short time if one thinks about that problem—and nothing else. It is perfectly possible to acquire the habit of automatically slamming a mental door in the face of intruding thoughts."

After completing his college work—first at Kenyon and later at the University of Michigan—Babst went to Detroit to seek a law practice. He knew no one in Detroit, and the movement of business toward his office was for a time somewhat sluggish. One of the first cases he contrived to get hold of involved the collection of three dollars. Naturally such a case did not suggest a large fee, but Babst went to work on it with as much energy as if it had been a million-dollar proposition.

His Thoroughness Paid

There were two or three rather complicated points which required looking up, so he went to the library and trailed to its lair all the law in the case. In a few days he got another case, of more importance, because his client in the first one had told somebody what a lot of trouble he went to over so small a matter. Then and there it dawned on Babst that thoroughness might in time be made to pay good returns.

He made a little compact with himself that whenever a case was entrusted to him, no matter how trivial it was, and no matter if he knew he would get nothing for his work, he would go to the bottom of it. He treated every case as if his whole future depended on it. And the funny thing was, as it turned out, that his whole future did depend on these cases. For as he began to get more important business he usually found that this was because some client had been pleased with the interest and energy he had put into some comparatively trifling matter, and had spoken to friends about him.

A Growing Clientele

On starting away from his boarding house his first morning in Detroit, Babst fell in with a man from Cleveland, Ohio, owner of a prosperous farm magazine. He was there to buy a similar magazine to be combined with his own. On learning that Babst was just starting to practice law, the man employed him to look after the legal details incident to the magazine purchase. Later the publisher arranged with him to conduct a department dealing with legal problems. In doing this Babst was able to make use of much information he had learned in running down the facts in trivial cases that had paid little immediate reward.

Sudden Prominence

All of a sudden, Babst shot into prominence by organizing the State of Michigan to combat the free silver issue in 1896. It is interesting to note that his first step toward gaining a state-wide reputation came by doing the most primary organization chore imaginable. He did not try to break into big league affairs all at once. His starting point was —where do you suppose?—his table at the boarding house!

Finding that there were several other young men at the table who felt, as he did, that the silver issue was making too much headway, Babst proposed that they get as many recruits as possible in the Second Ward. As a result, they formed an organization which served as a nucleus for a larger one that finally took in the entire State of Michigan, with Babst as head of the speakers' bureau.

Babst's law practice took him to Chicago, where he became associated with the National Biscuit Company, then in the midst of a series of lawsuits about trade-marks and patent infringments. He soon saw that if he was to stick to his rule of going to the bottom of things, he would have to do much more than merely read all the law bearing on trade-marks. He must know the grocery business—for grocers were the main distributors of the goods his company had to sell.

So he visited thousands of grocery stores from coast to coast, hobnobbing with the grocers and interviewing the customers. His idea was to find out, among other things, how long it would take a customer to get into the habit of asking for a certain brand, and just what the standing of the average grocer was among his customers. In this way he became an authority on the grocery business.

Sugar Refining Co. President

Three years ago, the American Sugar Refining Company, probably the largest manufacturer of a single food product in the world, asked Babst to become its president. In that way he found himself the biggest figure in the

production and marketing of a commodity which is said to make up one-fourth of the grocery sales. And inasmuch as biscuits and sugar are sold largely through grocers, here was an opportunity to make use of his experience in the industrial food field. So he went to Cuba and Porto Rico, saw the sugar grown, went through numerous refineries, had experts explain the processes to him, went to other refineries in Louisiana, learned something about the chemistry of sugar, and then—he started out once more to visit grocery stores!

In big cities and small hamlets he went to them, made purchases, and got information in all the various details. He went to so many groceries that the habit became a part of him, and to-day if Babst finds himself in a strange city with an hour to put in between trains, he usually spends it visiting grocery establishments.

My impression is that he got every possible fact about the grocer sugar barrel short of making an actual count of the number of flies around it. He got samples of the sugar on top of the barrel, and put them into little vials for purposes of comparison with the color of sugar that had not been so exposed. He ascertained exactly how much string and paper and how much time grocers had to use in tying up the sugar they sold, how much was wasted by spilling, or by leaving a little in the bottom of the barrel.

After getting every fact he could, Babst later arranged for sending out crews of men to record such facts on a much more comprehensive scale. Then, to make certain of accuracy, he sent out other men to check up on these reports. The things the one crew proved and the other crew was unable to disprove, he assumed to be sound. Until he was satisfied beyond a shadow of a doubt that his facts were unassailably accurate, he did not have them offered to customers. Because, as he pointed out, nothing could be more fatal to a business than to tell a customer something which he may later find is not altogether true. Complete confidence once lost is not easily won back.

From all this it will be evident that Babst is a stickler for thoroughness and accuracy.

Cool, Calm, Thorough

A few months ago he was summoned to appear before an investigating committee of the United States Senate to supply facts about the sugar industry. Examinations of this sort are often embarrassing to a witness. Senators frequently find it good sport to use a witness as a kind of burnt offering—to burn them to a nice crisp in full view of the audience.

The calm way that Babst handled himself on the witness stand in the face of a fusillade of questions which might have sorely harassed one less well prepared excited much comment.

The thoroughness with which, as a young man, he handled trivial law cases is now an important feature of the policy of the great business, with ten thousand employees, of which he is the head.

"If I were to try to compress a lot of advice into the smallest possible space and hand it to some young person who could use it," Babst recently told me, "I should say: Be thorough. There is no better slogan for an individual or for a business institution than the comment of Josh Billings, which went something like this: 'It's better not to know so many things than to know so many things that ain't so.'

Approximate Knowledge Not Enough

"It is really astonishing how many intelligent people nevertheless fail to make their knowledge definite and certain. They know that a thing is approximately this way or that way, and they think that is near enough. Half the lawsuits are due to the fact that people do not think or observe accurately. Two persons see a thing happen, or come to an agreement about something; a month later they take entirely different views of what was done, and carry their dispute into the courts. Each is sincere in believing he is right; but he never was trained to that degree of precision which might have obviated just such misunderstandings.

"I feel certain that if the great mass of employees realized how greatly accuracy is in demand by employers, and how willing employers are to pay for it, there would be a vast increase in the number of strictly accurate people available.

"Take, for example, two stenographers. Both are competent to take dictation rapidly, and to transcribe it on a typewriter; but one is careles sabout the item of punctuation—about getting every comma and semicolon exactly where it ought to be. The one who punctuates with one hundred per cent. accuracy may be worth easily twice as much salary as the other one, who is otherwise a high-grade worker. A letter, poorly punctuated, or carelessly written, is not unlikely to disgust the big business man who receives it. And a careless or indefinite statement may lead to a very definite loss.

"I know of a big concern that had metal stencils made for its mailing list, which included many thousands of names. It was a reasonably accurate list, but all through it were such things as J. M. for John M., Jos. for Joseph, and Geo. for George. It was a big expense to throw out all its thousands of stencils and to make an entirely new mailing list, but the concern did it. The truth was that it would have been too great an expense not to do it.

"Many persons are accurate in some things but not in others. An accountant or bookkeepr may show hairbreadth exactness in matters pertaining to figures, but be very inexact in repeating verbal orders or recalling the substance of a conversation. In other words, he is precise in so far as the demands upon him have made him so. If he were careless about his figures he couldn't hold his job.

"Accuracy in a business soon becomes visible to the naked eye. A big factory where there are grass plots and flowers out in front, instead of tin cans and rubbish, is likely to be a factory in which people think with a good deal of definiteness and know exactly what they're about.

"Whether at a law office, a retail store or a big factory, the customer who makes a twenty-five cent. purchase and feels that he has been treated with genuine courtesy and consideration is certain to boast about such treatment to his friends. We are a nation gossips and have a love for conveying information. If you hear a friend say he is about to buy an overcoat or to have his tonsils removed, you are almost certain to offer him advice where he ought to go.

"I have frequently been impressed, too, with the fact that nothing one finds out is ever wasted knowledge. Scarcely a week goes by that I don't find important use for a bit of knowledge that I had acquired only a few days before, and so I have often wondered how much we fail to accomplish because of things we haven't yet found out.

"It is unfortunate that young men in school are not more disposed to take this view. They feel that much of the matter they are studying has no bearing on what they are going to do afterward. The truth is that everything you learn can be applied to whatever you are going to do. It has always semed to me that the person who goes through school or college and learns only enough to squeeze through his examinations is much like the fellow who goes away on a sight-seeing tour and never leaves his hotel room unless somebody makes him.

Grocers Are Clever Merchants

"My visits to thousands of grocery stores over a twenty-year period gave me information not only about food products but about retail merchants in general. Grocers are as honest a lot of people as are to be found in the world. And there is an important reason for this. They deal largely with women. Only an honest man can long survive that! Women are the buyers for American homes, and their intuition soon tells them, even if there is lacking any other evidence, when they are not getting a square deal.

"Once a woman is satisfied that her grocer looks after her interest when she gives him an order, you can scarcely drag her to another store.

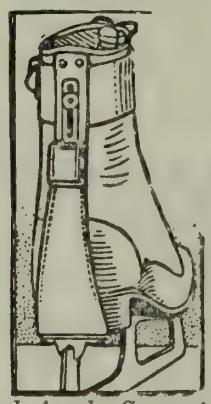
"Many of the cleverest merchants in the world are conducting small grocery establishments. They may have practically no capital, and yet make comfortable livings because of their ability to keep turning over their stock. The large number of retail failures is due in most instances to one great cause—careless buying. I remember going once to the store of a cross-roads grocer who had just been forced into bankruptcy. His shelves were lined with goods for which there was no demand.

HARDWARE LETTER BOX

Wire Nails.—Will you please give me the names of the actual manufacturers of wire nails in Canada?—Toronto.

Manufacturers of wire nails in Canada are: Steel Co. of Canada, Hamilton; Graham Nail Works, Toronto; Toronto Wire Nail and Tack Co., Toronto; Northern Bolt and Screw Co., Owen Sound, Ont.; Laidlaw Bale Tie Co., Hamilton; P. L. Robertson Mfg. Co., Milton, Ont.; Maritime Nail Co., St. John, N.B.; Western Wire Sheet Co., London; Imperial Steel and Wire Co., Collingwood, Ont.

Toy Distributors.—Can you inform us what companies in Canada handle toys? —J. H. Duitman Hardware Co., Haynes, Alta.



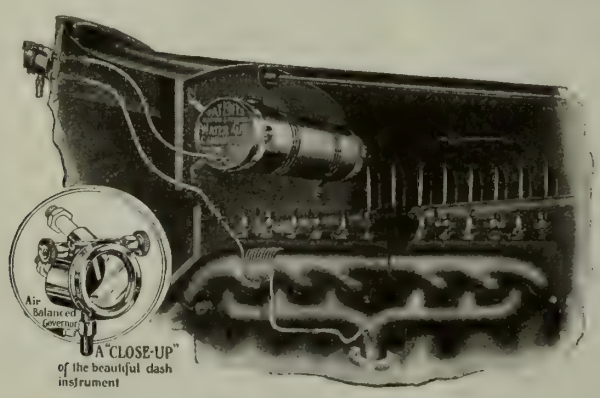
Toys are handled by the following firms: Revillon Wholesale Ltd., Edmonton, Alta.; J. N. Ashdown Hardware Co., Calgary, Alta. and Winnipeg; Western Fancy Goods Co., Winnipeg; Consolidated Stationery and Fancy Goods Co., Winnipeg; The Davidson Mfg. Co., Winnipeg; Clark Bros. & Co., Winnipeg; Lumber Products Ltd., Winnipeg; J. E. Beauchamp & Co., Montreal; A. C. Gilbert-Menzies Co., Toronto; Gendron Mfg. Co., Toronto; Geo. Borgfeldt & Co., Toronto; Wm. Croft & Sons, Toronto; Dominion Toy Mfg. Co., Toronto; Fancy Goods Co. of Canada, Toronto; G. R. Gregg & Co., Toronto; Manual Construction Co., Toronto; Toy Products of Canada, Toronto; Wilson & Cohen, Toronto; L. G. Beebe, Toronto; Torcan Fancy Goods Co., Toronto; R. A. Phillips, Toronto; G. T. McGovern & Co., Toronto; The Arlington Co., Toronto; Fiberoid Corp., Toronto.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

ANKLE SUPPORTS

The Perfection Steel Ankle Support which is manufactured by the Owen Sound Steel Press Works, Owen Sound, Ontario. is made of steel and is so devised that by means of a hinge and sliding attachment it is stated that the ankles may bend forward or backward but cannot bend sideways. It is claimed the "Perfection" does away with all old time cumbersome devices and also



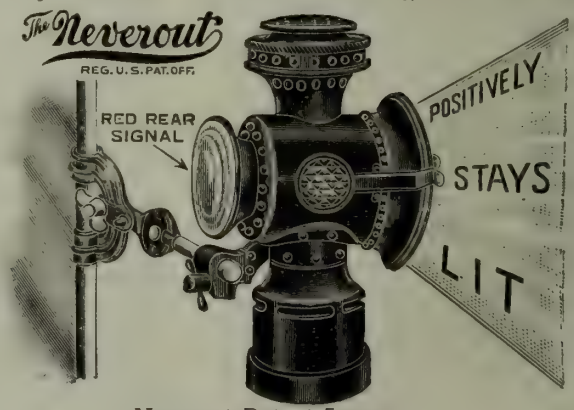
Steel Ample Support

the fatigue which prevents many from taking advantage of skating. It is stated that the method of attaching the support to skate and shoe is exceedingly simple. The "Perfection" is said to be invaluable to all skaters especially hockey players, as they prevent tiring quickly and also falls often caused by boots coming in contact with the ice.

WATER GAS CARBURETOR

The Water Gas Carburetor which is being put on the market by the Water Gas Carburetor Co., of 347 Fifth Avenue, New York, is claimed as the greatest foe yet discovered for carbon. The apparatus, it is stated, will furnish with every explosion of the engine just the right quantity of oxygen to consume all the carbon even if such fuel as a fifty-fifty mixture of kerosene and gasoline is in use. Another advantage claimed for the carburetor is that its installation does not necessitate the disturbing of any of the equipment, or even readjustment of any parts. The outfit includes the water gas carburetor, nine pint tank with special filter, universal tank brackets, ten feet of copper tubing and special solderless fittings.

Gas Carburetor



RACCOON COAT

Holt, Renfrew & Company, Department K, Quebec City, announce that they have placed on the market for the hardware trade a line of raccoon coat made it is said, of carefully selected full furred pelt, and that the coats are light in weight, soft and well fitting.

Complete details, prices, etc., will be supplied upon request.

NEVEROUT PATENT LAMP

The Neverout lamp made by the Rose Manufacturing Co., of 910 Arch st., Philadelphia, is made of drawn brass of heavy gauge and is designed for use as an auto standing light for attachment to windshield, or as a carriage dash light. It burns kerosene, but because of an insulated kerosene reservoir it is claimed the lamp is entirely free from grease and can be taken apart and cleaned instantly. It has a bright clear lens in front and large red semaphore in rear, and red and green side lights. It is made in two styles nickel plated or finished in black enamel. The bracket shown above is packed with each lamp, and can be used on either the right or left side of windshield.

Neverout Patent Lamp

POST HOLE AUGER

The "3 in 1" adjustable post hole auger is being manufactured by the Hall Manufacturing Co, of Monticello, Iowa. It is stated that it takes the place of three augers, that is that the one auger bores three different sized

Adjustable Auger

holes. In this way it is claimed it is a great labor saver and a conserver also of material. The auger it is claimed is perfectly balanced with the pressure scientifically equalized on all working parts. The blades are of crucible steel forged to a cutting edge and are locked together with an improved hinge which it is claimed prevents spreading and wedging. The augers are made in three sizes weighing 8, 10 and 12 pounds.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

LOWER prices are again in evidence on linseed oil this week after a week of rather uncertain conditions in the seed market. Declines range from four cents to seven cents per gallon. Uncertainty as to how flaxseed may go seems to be the only certain feature in this market. The feeling is strong that unless an immediate cessation of hostilities develops the market is about as low as it will go, and higher levels are looked for later on.

Turpentine has advanced 2c per gallon in some quarters. This is in line with firm tendencies outlined last week, and follows closely on the strong feeling in evidence at primary points. Continued strength seems probable, it being reported that English interests have bought up large stocks to be stored in tanks awaiting shipping space, and this will provide a firm undertone to the market. Local conditions are affected, too, by increased charges for warpage, marking and barrels which have now become effective.

Horse shoes are again prominent this week in an advance of 50c per keg. This follows on the heels of a similar increase about three months ago, and is some criterion of conditions generally applying in iron and steel industries. Further evidence as to the trend of these markets is given in an advance of about 20 per cent. in steel game traps, one of the sharpest increases yet recorded in this line.

New prices issued on roofing cement and paint for spring provide for an advance in these two lines. Creosote has also gone to higher levels, and the market in all roofing products rules with a very firm undertone.

A decline in drop shot is recorded in some quarters, more it is felt, in an effort to clean up on stocks than a market condition. Some lines of Canadian-made builders' hardware have been changed, new prices providing for advances which, it is indicated, amount to as much as 15 per cent.

Other lines to join the list of those on the upward trend are axle pulleys, tin roofing caps, hand saws, foot valves, planes, tower bolts, thumb latches, and chain pipe wrenches. A 15c increase in the price of cement is also effective, as applied to certain territory.

Business as a whole has been very good in spite of adverse conditions brought about by epidemic of sickness. Manufacturing interests seem to have suffered the most in a curtailment of their operations.

MONTREAL MARKETS

MONTREAL, Oct. 31.—Builders' hardware is higher and revised quotations on harness or saddlery hardware also show increases. Rivets, butter bowls, forges, blowers, wood blocks, wrought iron latches, rosin, game traps, cotton gloves, planes, plane irons, fibreware, railroad lanterns, boot calks, and auto accessories are additional lines that have scored advances. All markets are very firm.

Jobbers have been enabled to take care of business very well, under trying circumstances at present obtaining. Victory Loan effort is taking much attention, and the restricted hours of business are somewhat of a handicap, too.

R.R. Lanterns, Traps, Fibreware Higher

Montreal.

LANTERNS, TRAPS, FIBREWARE.—Railroad lanterns are revised upward, the present price for these being $15.75 per dozen.

Game traps are moved upward. Newhouse No. 0 are priced at $5.25 per dozen; No. 1, $6; No. 1½, $9.25; No. 2, $13.50; No. 3, $18; No. 5, $196, and No. 50, $110 Oneida Jump are selling at $3.30 for No. 0; No. 1, $3.85; No. 1½, $5.75; No. 2, $8.50; No. 3, $11, and No. 4, $13.20. Victor, with chain, are priced at $2.40 per dozen for No. 0; No. 1, $2.85; 1½, $4.40; 2, $6.00; 3, $8.25, and 4, $9.35; without chain No. 0 is priced at $1.90 and No. 1 at $2.20.

Indurated fibreware is up about 10 per cent.

Gloves, Latches, Wood Blocks, Advance

Montreal.

GLOVES, LATCHES, BLOCKS.—Cotton gloves are higher. No. b12 are selling at $2.85 per dozen; S4, $2.75; G.I.S., $1.80; 4K, $2.30; B8, $3.10; G10, $3.60 and G5, $3.

Wrought iron latches are selling at 10 per cent. off list, the former discount being 15 per cent.

Wood blocks, with a previous price of net list, are revised to list plus 10 per cent.

Magneto Parts Higher; Timer, Magneto Mountings

Montreal.

MAGNETO PARTS.—Higher prices obtain for Atwater-Kent magneto mountings of various kinds. Comparative prices are as follows: No. K2 4 Cyl, old price $36, new price $45; K2 6 Cyl, $38.25--$48.37; K2 4 Cyl, $33.75-$42.75; H-6 Cyl, $36-$36; H-4 Cyl, $30.35-$38.25; H-4 Cyl, $28.10-$36. These are for the coil magneto mountings.

The following comparative prices obtain for coil timer shaft mountings, the old and new prices respectively, appearing in order: K-2 4 Cyl, $30.38-$37.99; K-2 4 Cyl, $28.12-$35.81; H-4 Cyl, $24.75-$30.38; H-4 Cyl, $23.06-$28.12; F-3 Cyl, $24.75-$30.38; F-3 Cyl, $22.50-$28.12; H-2 Cyl, $24.75-$30.37; H-2 Cyl, $22.50-$28.12.

K2-KS coil ignition prices are now $41.25 to the trade, the old price being $33.75. Comparative prices for K-2-P-S are $39.38-$31.50; H-K-S, $33.75-$27 and H-F-S, $31.50-$24.75.

Windshield Weatherstrip Up; Grease Guns, Too

Montreal

WEATHERSTRIP.— Windshield weatherstrip of McCormick Allmand make is higher. The trade price was 67c per set and is now 74c; in dozen lots the comparative prices are 63c and 69c, and in 4 dozen lots 57½ and 63c.

Samson screw grease guns are up somewhat. Ordinary trade price on single lots is advanced from $1.03 to $1.14; in lots of 12 from 97c to $1.07, and in lots of 48 from 89 to 98c each.

Auto Screwdrivers Up; Washers, Gauges

Montreal.

SCREWDRIVERS, WASHERS, GAUGES.—Screwdrivers of Four-in-one make are higher in price. The trade quotation for single lots is now 80c each, whereas it was previously 70c. The price on lots of 24 is 75c each and that for 8 dozen lots 69c. Twin screwdrivers are up to 14c from 11½c and in 2 dozen lots from 10½c to 13½c. Pump gauges No. 2are priced now at $1.20 each, for $1.13 each in dozen lots and $1.04 in 4 dozen lots. This is an increase of about 40 per cent.

Romort rubber washers are worth 33c now to the trade, the previous price being 30c.

Various Valves Higher; Shock Absorbers

Montreal.

ABSORBERS, VALVES. — Advances are made on various valves, valve parts, nuts, deflating caps, etc., of Schraeder make. The increases are various and total from 15 per cent .to 20 per cent. Sample prices as obtaining under the advance are as follows: Universal valve insides No. 1801, in boxes of five ,30c box; Universal repair tool, No. 2395, 26½c per box; Universal tire pressure gauges, $1.27 each, and Universal 3-way pump connections, each, 45c.

Adjustment of price on Steelbilt shock absorbers has been made. The trade price is now $5.94, and was previously $6.12 and the price on lots of six is now $5.65 each, former price being $5.82.

Auto Clocks Higher; Air Hose Is Up

Montreal.

AUTO CLOCKS, AIR HOSE.—Advances for automobile clocks of various kinds have been made. Number 9 is advanced from $12.57 to $13.20; No. 12-B from $11.62 to $13.31; Denver, $6.37 to $8.07; Rear Wind. $8.05 to $9 27; Frisco No. 2, $3.38 to $5.19 and Frisco No. 1 and a companion style each are now priced at $4.05.

Double armoured air hose is up. In small cut lots the price is increased from 32½c to 38c per ft. and in 100 ft. lots from $30.85 tot $36.13.

Various Spark Plugs Advanced 10%-15%

Montreal.

SPARK PLUGS.—Advances of various proportions have been made for spark plugs. These approximate 10 per cent. to 15 per cent. and the various styles used on different cars and the usual sizes are subject to the changes so made.

Spark plug cleaner is priced now at 75c in small lots and at 66c in lots of 10 and over. This is for the 'Minute' brand.

Priming plugs are priced at $1.15 each for single lots of No. 32152 and priming plug porcelains at 50c in lots of less than 10 and at 48c each in lots of ten or over.

Boot Calks Higher; Planes and Irons

Montreal.

BOOT CALKS, PLANES.—Advances for boot calks have been made. The present price for screw calks is $6.50 per M all sizes, and that for drive calks is $4.75 per M.

Planes, plane irons and other various lines of Stanley make are up. The advance approximates about 10 to 15 per cent.

Mounted Grindstones, Horseshoes Advance

Montreal.

HORSESHOES, GRINDSTONES.—Advances for some lines of grindstones of one mounted variety are announced. This applies to the No. 35 and the new price is $11.70 each. The former quotation was $9.50.

Horseshoes have taken on an advance of 50c per keg all around and present prices will be found in the current markets quotations.

Saddlery Hardware, Rivets, Builders' Hardware Up

Montreal.

VARIOUS LINES.—Saddlery harness hardware has again advanced, the approximate increase being about 10 per cent.

Clinch and tubular rivets are higher, and the price now to the trade is $1.20 per M. net for No. 9B.

Various lines of Canadian made hardware are advanced about 15 per cent., the items affected being mostly in builders' hardware lines.

Blower, Forges, Bowls Make Advances

Montreal.

FORGES, ETC.—Advances are made for Canadian Buffalo line of forges and this will approximate about 15 per cent. The same advance applies to this line of blowers.

Maple butter bowls are up also. The prices on these are as follows: 12 inch, per dozen, $2.65; 15 inch, $13.20; 17 inch, $13.20; 19 inch, $15.40, and 21 inch, $19.25.

Stoves, Wares Firm; Makers Oversold

Montreal.

STOVES, WARES.—The difficulties confronting the makers of stoves have by no means been few of late. They have been using every effort to overtake the business in hand. In addition to the great shortage of men in the foundries they have been handicapped through the recent sickness epidemic, and long for an improvement, which now is more promising.

For wares of all kinds there is a steady and splendid demand. In some instances the demand could not be met and this was caused partly because of the shortage of material that was delayed in shipment from the United States. The trade will doubtless receive supplies in the course of time, but will have to exercise patience.

Rope Basis Maintained; Likely to Hold

Montreal.

ROPE AND CORDAGE.—The present basis for rope is steady. The manufacturers feel that there will be no change for they have bought supplies in high producing markets, and quotations will have to be based on this buying. The recent changes reported for hard fibres were adjusted to meet very large orders for governmental work in the United States and the conditions in no way affected the trade situation.

British manila basis still is 33c; pure manila 39c and sisal 27½c per pound.

Lubricator Oil Up; Gasoline Holds

Montreal.

OILS, GASOLINE.—Coal oil and gasoline hold on a steady and unchanged basis. Royalite coal oil is still 19c; Palacine and Electroline 22c per gallon. Gasoline is firm and steady, and with the present consumption surtailed considerably, owing to weather and sickness conditions, the supply is fairly well maintained. Some strain on local stocks was made recently, because of the necessity of overtaking the shortage in outside points.

Changes have been made in the basis for various lubricating oils. Most of these are advances, but there have been a few declines. Castor machine oil, for instance, is down 1c per gallon; Junior red advanced 1c; leather oils advanced 2c and some engine oils declined 1c. A few paraffine oils are up two to six cents per gallon.

Wire Nails Steady On Firm Basis

Montreal.

NAILS AND WIRE.—At the advance of last week, nails are steady and the undertone of the market is firm. Supplies are fair, but there is evidence of a shortage developing ere long, if the demand is even seasonable from now on. Soon, some will be asking for the forwarding of their early spring wants to take advantage of the water route rates, and this will tell on available stocks. Base price is now $5.50 per keg for standard wire nails and for cut nails $5.85. Standard smooth wire is based at $6.25 per 100 pounds.

Iron Supplies Fair; Hold Firmly Here

Montreal.

IRON AND STEEL.—The market holds firmly, with supplies limited to staple sizes for the most part. It is stated that some difficulty obtains from time to time when special sizes are wanted and that it is necessary to substitute in such cases. Trading is just fair.

Common bar iron, per 100 lbs.	$4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 22

Lead Products Hold; Trade is Light

Montreal.

LEAD PRODUCTS.—There is little new in the situation. All lines are held on an unchanged basis and the volume of business is limited, jobbers report. This is due to the severe and unusual conditions now prevalent everywhere, and the peace talk has had something to do with reduced buying, it is stated. Solder holds steady.

Lead pipe, lb.	$0 15	$....
Lead waste pipe, lb.	0 16	....
Lead traps and bends	Net list.	
Lead wool, lb.	0 15½	0 16

45-55		0 57½
Zinc sheets, casks		....
Do., broken lots		....

Note—The above prices for solder are for full boxes of 100 lbs. Jobbers will charge several cents more for small lots.

Old Metals Quiet; Unchanged Prices

Montreal.

OLD MATERIAL.—The market is very quiet and there is little doing. Changes of any kind are absent and the dealers have not been able to report a favorable change in market activity or prices for some time as it was expected they would. The outlook is for a continuance of quiet.

Dealers' Buying Prices:

Tea lead	....	0 06

Overshoes, lumbermen's rubber boots	....	0 05
Bicycle tires	0 04½	0 05
Automobile tires	0 04¾	0 05

Sheets Hold Firmly; Stocks Declining

Montreal.

SHEETS.—Firmness still characterizes the situation and there is increasing scarcity of supplies, some jobbers being unable to obtain anything like adequate requirements for their trade. In any case there is an ever-increasing dearth of supplies as the various jobbers become sold out, and it is only when the shelves are clean of stock that many realize the difficulty of replacement. Tendencies are toward further firming of the market.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$9 75	$11 50
12 gauge	9 65	11 00
14 gauge	9 00	8 20
16 gauge	9 15	8 25

22 and 2 4gauge		11 15
20 gauge		11 05
18 gauge		10 95
16 gauge		10 85

NOTE.—These prices are for full bundles, an extra charge of 25c per 100 lbs. is made for broken lots.

Pig Lead Scarcer; Ingot Markets Quiet

Montreal.

INGOT METALS.—The markets are quiet and with little change from the position attained last week. Lead is scarce and firm.

COPPER.—The continuance of the set price in the United States has steadied the situation and this will leave little likelihood of a change transpiring here until the first of the year. Local trading is steady at 30 to 31c per pound according to quantity.

TIN.—Dullness characterizes the market. There is enough, apparently, to meet requirements and these are light. For small lots 90 to 92c per pound obtains, and for large quantities better prices may be had.

SPELTER.—There has been some fluctuating, a slight firming, and latterly an easing of the tone in the States. Local interest is small and the market is based around 10½ to 11c per pound.

LEAD.—Difficulty in getting adequate requirements is still reported. The basis of trading here is around 10½c to 11c per pound.

ALUMINUM.—The small demand reported for some weeks still obtains. Prices are unchanged for very small lots, but from 48c to 50c per pound will cover for average quantities bought.

ANTIMONY.—No new interest attached to this item aside from a little reported easiness outside; the price of 18c per pound still rules.

TORONTO MARKETS

TORONTO, October 31.—Horse shoes are up 50c per keg, and a sharp advance is also noticeable in game traps, which move up about 20 per cent. Another line of planes has gone to higher levels, along with foot valves, creosote, cement and axle pulleys. Spring prices on roofing cement and paint just out are higher.

Business has kept up very well, and whereas increasing difficulty in getting goods is noted, volume of trade represents very nice total.

Horse Shoes Go Up 50c Keg

Toronto.

HORSESHOES.—New prices are in effect on horseshoes. The present basis of quotations shows an advance of 50 cents per 100 pounds over prices formerly ruling. The light iron shoes No. 2 and larger are now quoted at $7.75 per keg, and the No. 1 and smaller $8.00. The medium iron shoes, No. 2, and larger are quoted at $7.75, and No. 1 and smaller $8.00. The No. 2 and larger heavy iron shoes are now $7.75. The snow shoes No. 2 and larger have now advanced to $8.00 per keg, and the No. 1 and smaller $8.25. The light "XL" shoes No. 2 and larger are now up to $8.20, and the No. 1 and smaller $8.45. The complete list appears in the current market quotations

More Planes Revised Upward

Toronto.

PLANES.—Another line of planes has joined the list of those which follow the upward trend. New prices are now available on the Siegley planes which provide for an advance of about 12½ to 15 per cent. Quotations on some of the more familiar numbers are: No. 3 $3.25 each; No. 4, $3.55; No. 4½, $4.10; No. 5, $4.10; No 5½, $4.65; No. 6, $5.15; No. 7, $6.00; No. 8, $7.10; No. 9½, $1.75; No. 9¾, $2.00; No. 15½, $2.15; No. 19, $2.15;

No. 24, $2.20; No. 26, $2.45; No 28, $2.95; No. 30, $3.25; No. 32, $3.50; No. 35, $2.75; No. 101, 33c; No 102, 65c; No. 110, 87c; No. 130, $1.25; No. 220, $1.25.

Foot Valves Revised; Axle Pulleys Up

Toronto.

FOOT VALVES. AXLE PULLEYS.—A revision in prices on iron foot valves, painted, has been made, the present basis representing an advance. Quotations now prevailing are: ¾-inch, 46c each; 1-inch, 48c; 1¼-inch, 65c; 1½-inch, 72c.

Common Sense axle pulleys are higher the 2-inch now selling at 52c per dozen net.

Slight Revision in Tower Bolts, Latches

Toronto.

TOWER BOLTS, LATCHES.—New prices have been issued on tower bolts which provide for a slight advance. Selling prices named to the trade are, on the No. 1105, 4-inch, $1.35 per dozen; 5-inch, $1.80; 6-inch, $2.00.

Steel thumb latches have also undergone a slight adjustment in price, the No. 2 now selling at $2.05 per dozen; No. 3 at $2.75 and No. 4 at $4.75.

Chain Pipe Wrenches Higher; Roof Caps

Toronto.

CHAIN PIPE WRENCHES, ROOF CAPS.—Higher prices are in evidence on the Vulcan flat chain pipe wrenches, these now selling to the trade as follows: No. 30, $3 25 each; No. 31, $4.55; No. 32, $6.50; No. 33, $9.10; No. 33½, $11.70.

Tin roofing caps are again on the upward move, quotations to-day being made at $10 50 per 100 pounds.

Game Traps Up About 20 Per Cent.

Toronto.

GAME TRAPS.—An advance of between 15 and 20 per cent. is noticeable in the new prices which are now prevailing on game traps. This is one of the sharpest increases which has been made in this line of goods since the war broke out. Conditions in regard to getting supplies of steel, and the heavy demand of labor are factors which have brought about this change. Quotations which are now being named to the trade on the new basis are as follows:

GAME TRAPS—

Victor, with chain—No. 0, $2.20 per dozen; No. 1, $2.60; No. 1½, $3.90; No. 2, $5.45; No. 3, $7.25; No. 4, $8.55; No. 91, $3.65; No 91½, $5.20.

Jump, with chain—No. 0, $2.95 per dozen; No. 1, $3.45; No. 1½, $5.15; No. 2, $7.60; No. 3, $10.10.

Game Traps—

Hawley and Norton, with chain—No. 0, $3.45 per dozen; No. 1, $4.05; No. 1½, $6.10; No. 2, $8.55; No. 3, $11.35; No. 4, $13.40.

New House, with chain—No 0, $4.75; No. 1, $5.55; No. 1½, $8.35; No. 2, $12.30; No. 3, $16.45; No. 4, $19.40; No. 81, $6.45; No 91, $7.05; Bear, No. 5, $11.80 each; No. 50, $8.35 each.

Adjustment in Hand Saws; Shot

Toronto.

HAND SAWS, SHOT.—An adjustment in prices recently issued on S. & D. hand saws has been made, providing for a slight increase over prices formerly quoted. The No. 10 saw, 18 and 20 inch are now quoted at $12.10 per dozen; 22-inch at $12.25; 24-inch at $12.40; 26-inch, $12 50; 26-inch rip saw, $12.50 per dozen.

Lower quotations on shot are in effect, the common drop AA to 12 selling as low as $16.45, and AAA and larger $17.25 per 100 pounds, with usual list of extras effective.

Cement Goes Up; Plaster of Paris

Toronto.

CEMENT, PLASTER OF PARIS.—An advance of 15c has been made on cement affecting territory west of Trenton and north of Parry Sound. Quotations for this ground on new basis are $2 95 per barrel, in carload shipments. The demand during the past ten days has shown great improvement with the result that October totals will aggregate a very nice volume of business.

Plaster of Paris is steady and rules without change. Supplies are coming through sufficiently well to take care of the demand which is considered fair.

Creosote Higher, Roofing Cement Too

Toronto.

CREOSOTE, ROOFING CEMENT.—Higher prices have been established on creosote, the crude selling at 45c, and clear creosote at 55c. New prices are also announced on roofing cement for spring delivery. The Everlastic roofing cement, 1 dozen 1 gallon cans, are quoted at $9.00 per dozen, and 1 case 2 dozen small tins, $2.00. The Everjet paint is also being quoted for spring shipment as follows: barrels, 65c gallon; ½ barrels, 70c; 5 and 10 gallon cans, 80c; 1 dozen 1 gallon cans, $9.50 dozen.

Nails Steady, Wire Unchanged

Toronto.

NAILS, WIRE.—The market on wire nails is holding firm at advances recorded last week. The demand is fair and supplies generally are equal to business offering. The undertone to the market is strong, with to-day's base price being $5.50 per 100 pounds. Cut nails are steady and unchanged at $5.85 per 100 pounds base.

No revision in the situation on wire is noted, the smooth steel base holding unchanged at $6.25 per 100 pounds.

Coal Oil in Good Demand; Gasoline

Toronto.

OIL, GASOLINE.—There is no let up in the demand for coal oil apparent. Sales are heavy and increasingly so, with the market ruling firm though unchanged at 18½c to 21½c per gallon according to grade.

Steadiness is to be noted in the gasoline situation, the consumption continues fairly heavy and no shortage has yet developed. Price rules unchanged at 33c per gallon.

Stoves Sold Up; Wares Are Firm

Toronto.

STOVES, WARES.—Manufacturers report available stocks of stoves, ranges, heaters and furnaces pretty well sold up. There is some raw material coming and the hope is expressed that enough will be released to maintain a fair output. Just now there is a slight lull in the trade, and with an opportunity now of figuring costs it may be found that margins have been pared too closely. The result of such disclosures will probably be higher prices. At any rate the market is very firm and no recession from present values is looked for. The outlook generally is considered fairly good, and the market is expected to rule pretty steady.

Wares of all kinds are firm and no developments of a particularly new or interesting nature are reported. Prices are unchanged at levels shown in current market quotations.

Market on Cordage Quiet; Demand Fair

Toronto.

CORDAGE, TWINES.—The market remains very quiet and no new developments are noticeable. The demand is only fair, a seasonable condition, and prices steady at following basis: Pure manila, 39c per pound; British manila, 33c; sisal, 27½c. The twine list is firm and unchanged.

Few Shipments of Bars Coming

Toronto.

IRON AND STEEL.—There are a few arrivals of bars reported but these do not represent a very heavy total. However, immediate requirements of the trade are being fairly well taken care of and prices rule without change.

TORONTO—	Per 100 lbs.	
Common bar iron	....	$ 5 25
Common bar steel	....	5 50
Refined iron	....	5 65

Sheet cast steel	0 42	0 45
Tool steel	0 20	0 42

Sheets Grow Scarcer and Scarcer

Toronto.

SHEETS, PLATES. — Sheets grow scarcer. Light sheets are decidedly

short and no improvement for the immediate future is anticipated. Whether the new system of securing priority orders will work out to advantage is a question. Some feel that it may ease the situation somewhat, others again that the line is drawn even tighter. Quotations are unchanged but very firm.

BLACK SHEETS—	Per 100 lbs.
10 gauge	$10 00
12 gauge	9 60
14	10 85
16 gauge	8 50- 8 55
18-20 gauge	8 05 8 30- 8 80
22-24 gauge	8 10 8 35- 8 85

14 gauge	$8 40-	8 90	

Prices shown are for full cases An extra charge of from 25c to $1 per 100 lbs. is made for less than case lots.

Outlook Same in Corrugated Sheets

Toronto.

CORRUGATED SHEETS.—No material change in the outlook on corrugated sheets is reported. Stocks of materials to work with are smaller and manufactured lines consequently are affected. There is a fair amount of business being done and so far actual requirements of the trade are being largely met on manufactured goods. Nominally quotations remain as follows on corrugated sheets.

TORONTO— Corrugated Sheets—	Per 100 Sq. Feet Gal'zed	Painted
No. 28 gauge	$ 9 00	$ 7 50
No. 26 gauge	10 00	8 50
No. 24 gauge	15 00	11 25

No. 20 gauge	21 00	17 50
No. 18 gauge	27 00	21 00

Discount, 7½ per cent.

Steady Tone to Wrought Pipe; Tubes

Toronto.

WROUGHT PIPE, BOILER TUBES.—The market remains firm and without change on wrought pipe. Supplies continue in the class of goods hard to get and the labor situation is no better. Prices range at figures shown in current market quotations.

Boiler tubes are moving out but there are none coming along to replace present depleted stocks. The market rules unchanged as follows:

Toronto—	Per 100 feet Cold drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00

3¼ inch	....	58 00
3½ inch	77 00	60 00
4 inch	90 00	75 00

Solder Holding Steady; Lead Products

Toronto.

ZINC AND LEAD PRODUCTS.—Solder is holding steadily though a further reduction in tin is a factor which may influence prices to lower levels. Sales are fairly well maintained and quotations below unchanged. There is nothing new to report in manufactured lead products. Prices are steady and demand only fair.

Old Materials Very Weak; Little Trading

Toronto.

OLD MATERIALS.—Old materials are very weak and business is practically at a standstill. Little trading is going on and dealers generally are not anxious to buy. A general decline in another week or ten days seems probable.

Tin Again Lower; Antimony Down

Toronto.

INGOT METALS.—A little firmer feeling is reported in tin, though in some quarters a further decline in prices is recorded. Antimony is down 1c per pound. Spelter is very firm though no quotable change is in evidence. Lead, copper and antimony are unchanged, supplies of each being largerly absorbed in war work.

COPPER.—War work continues to absorb supplies. Postponement of price fixing has had the effect of getting trade back into routine channels. The output has been seriously affected through epidemic of sickness, one source estimating this loss at 20 per cent. The situation locally is unchanged, quotations ranging nominally around 30-32c per pound.

TIN.—Supplies are again reaching the stage where they are comparatively scarce. Indications are, too, that October shipments will show a market falling off from September and as stocks go lower, the market may go higher. However, although the situation has a stronger tone, declines have been made in some quarters, quotations varying from 85c to $1.00 per pound.

SPELTER.—The market is firm, all cheap metal being pretty well cleaned up. Conditions at primary points are a little easier but under present basis of small stocks locally, this is not reflected here. Price to-day holds at 11c per pound.

LEAD.—Supplies are scarce for commercial uses. War demands continue to absorb bulk of output so prices, though unchanged, can only be called nominal. Quotations range around 10½c to 11c per pound

ALUMINIUM. — Government work absorbs practically all supplies, quotations being nominally held at around 50c per pound.

ANTIMONY.—The market is easier, quotations being down 1c per pound to 17c. Business is still moving but in very small quantities.

PIG IRON.— Efforts to increase production have been counteracted by epidemic of sickness, but even with this handicap it is possible tonnage may amount to September figures which was a record. Government needs continue to absorb output and war program shows no signs of easing away.

LONDON MARKETS

LONDON, October 31.—Higher prices are again the order of the day. This is noticeable in game traps, which are up about 20 per cent. New prices are also out on planes, which represent an increase over former quotations of about 15 per cent. Horseshoes have advanced 50 cents per keg, and other lines which have gone to higher levels are plaster of paris, valve parts, tire gauges and clothes pins.

Business during the past week has been very good. In fact better than expected. Many lines are very scarce, and the situation in this respect is getting worse.

Clothes Pins Up; Plaster of Paris, Too

London.

CLOTHES PINS, PLASTER OF PARIS.—Clothes pins have joined the list of advancing products and new prices are now out which provide for a substantial increase in these. Quotations now being named to the trade on the common wood pin are at $1.45 per box. Plaster of Paris has recorded an advance of 30 cents per barrel and is now quoted at $3.45. The recent increase in freights is the main factor in this advance, although cost of getting this out has advanced materially.

Valve Parts, Tire Gauges Advanced

London.

VALVE PARTS, TIRE GAUGES.—New prices have been established on Schraeder valve insides, these now being quoted at $6.00 per hundred. A higher basis of quotations has also been arrived at on the Schraeder tire gauges, the No. 1561 now being quoted at $1.27 each to the trade.

Fifteen Per Cent. Advance in Planes

London.

PLANES.—Higher prices are the order of the day on Stanley planes. Prices now prevailing to the trade show an advance of about 15 per cent. over former quotations. The present basis on some of the more familiar lines are given herewith.

No. 3, $3.80 each; No. 4, $4.10; No. 4½, $4.75; No. 5, $4.75; No. 5½, $5.30; No. 6, $6.05; No. 7, $6.90; No. 9½, $1.95; No. 9¾, $2.40; No. 17, $2.45; No. 18, $2.40; No. 19, $2.55; No. 26, $2.80; No. 27, $3.20; No. 28, $3.55; No. 35, $3.20; No. 36, $3.60; No. 100, 46c; No. 101, 37c; No. 102, 70c; No. 103, $1.00; No. 110, 99c; No. 120, $1.40; No. 130, $1.45; No. 140, $2.55; No. 220, $1.45; No. 603, $4.30; No. 604, $4.60; No. 605, $5.30; No. 606, $6.70.

Game Traps Go Up 20 Per Cent.

London.

GAME TRAPS.—New retail prices are out on steel game traps. These provide for an advance of about 20 per cent. This is one of the stiffest advances yet recorded in this line, but conditions affecting the getting of supplies and scarcity of steel for all purposes other than direct war work have been the big factor in bringing this about. New retail prices were not available at the time this report was sent forward.

Horse Shoes Record 50c Advance; Calks

London.

HORSE SHOES, CALKS.—A further advance of 50c per keg is noticeable in new prices now issued on horse shoes. On the present basis the light iron shoes No. 2 and larger are quoted at $7.75 per keg, and the No. 1 and smaller $8. The light XL steel shoe No. 2 and larger are now $8.20, and the No. 1 and smaller $8.45 per keg. Sales of horseshoe calks are coming along quite well. There has been no change on the price of these, the Neverslip line being listed at the following prices: 5-16-inch, $2.60 per 100; ⅜-inch, $2.60; 7-16-inch, $2.80; ½-inch, $2.80; 9-16-inch, $3, and ⅝-inch, $3. All of these are subject to a discount of 15 per cent.

Sink Prices Adjusted; Ash Sifters

London.

SINKS, ASH SIFTERS.—A readjustment of prices on cast enamel sinks has been effected. This does not provide for any material change, and quotations which are now ruling are given herewith:

	16x24"	18x30"	18x36"
1 in shipment.....	$4.92	$5.62	$9.72 each
2 in shipment.....	4.86	5.56	9.60 each
3 in shipment.....	4.80	5.50	.... each

A very good sale of ash sifters is still in evidence. There has been no change in price recently, the common wood side sifter selling at $2.50 per dozen, the Banner sifter $3.45 each, and the Rocker No. 1 at $5.50 each.

Glass Very Firm; Putty Unchanged

London.

GLASS, PUTTY.—The market on glass is very firm. Jobbers report sales as representing a very nice total, and whereas discounts below show no change, a revision to higher levels would not come as any surprise. Single diamond is still quoted at 25 per cent., double diamond at 25 per cent., and cut lights at 10 per cent. discount from list. There has been no change in the situation on putty. Sales are very fair and prices unchanged, the standard in 100-lb. drums selling at $6.75 per 100 pounds and in 25-lb. drums $7. Pure putty takes an advance of $2 per 100 pounds over the price of standard.

Skates, Hockey Sticks, Sleigh Bells Moving

London.

WINTER LINES.—A very good movement of winter lines is now in progress to the retail trade. This applies to skates, hockey sticks and sleigh bells. Prices on these lines show no change, quotations ranging as follows: Starr skates are still quoted at a discount of 30 per cent; hockey sticks, the boys' red or white, are quoted at $1.25 per dozen; men's rock elm, $3.20; Spalding, $5.75, and the Rex, $7 25. Quotations on sleigh bells are given as follows: Collar No. 2, $1.35 per dozen, and No. 3, $1.50; team No. 7, bronze, $1.35 per dozen; rough No. 2, $3 50; No. 3, $4; No. 4, $5.75; No. 5, $6.75; Swiss No 2, $4.75; No. 3, $6; No. 4, $7.75; No. 5, $11 per dozen; Swedish chimes No. 1400, $2.35 each; No. 1500, $2.65 each; No. 1700, $3.50 each.

Linseed Oil Lower; Turpentine Higher

London.

LINSEED OIL, TURPENTINE.—Fluctuations on the seed market are still noticeable. Linseed oil has shown a decline of 4 cents per gallon, quotations now in effect being given below. Turpentine is very strong and this is shown in a change to higher levels of 2 cents per gallon. Quotations which are ruling are given herewith: Linseed oil, 1 to 2 bbls. raw, $1.83, boiled $1.86 per gallon; 3 to 5 bbls raw, $1.82, boiled $1.85; 6 to 9 bbls, raw, $1.80, boiled $1.83. Add 10c per gallon in smaller quantities. Turpentine, 1 bbl. lots $1 per gal.; 2 to 4 bbl. lots 99c; 5 gal. lots $1.10.

WINNIPEG MARKETS

WINNIPEG, Oct. 31—Price changes are again very numerous, and with one exception are all on the upward trend. Most prominent among the lines to go up are grindstones, turpentine, calf weaners, weather strip, lawn mowers, welding compound, bread makers, shaft couplings, sweat pads, mops and saddlery hardware. Leather belting shows a slight decline.

Business is reported as normal, with a good demand for heaters, lanterns, horse blankets and other seasonable lines.

Higher Prices on Sausage Stuffers

Winnipeg.

SAUSAGE STUFFERS.—New prices have been issued during the week on Enterprise sausage stuffers. These show an advance of approximately 7½% being quoted to-day as follows: No. 15, $10.00 each; No. 25, $12.50; No. 35, $15.00

Spring Prices on Lawn Mowers Up

Winnipeg.

LAWN MOWERS.—New prices have just been issued on lawn mowers for next year and orders are now being taken for spring delivery. Prices in effect are given herewith: Empress, 14-inch, $11.00 each; 16-inch, $11.50; 18-inch, $12.00; Woodyatt, 14-inch, $8.50; 16-inch, $9.00; Star, 14-inch, $7.50; 16-inch, $8.00; Daisy, 12-inch, $6.00; 14-inch, $6.60.

Leather Belting Registers Decline

Winnipeg.

LEATHER BELTING.—Due to the abnormal demand for leather for war purposes prices generally on this commodity have been steadily increasing. However, this week's prices show a slight decline on all lines of leather belting. Discounts which are now prevailing follow: Agricultural or No. 1, 30-10-7½ per cent.; Standard, 27-10 per cent.; Extra, 27 per cent, off list.

Saddlery Hardware Up 5 to 10 Per Cent.

Winnipeg.

SADDLERY HARDWARE.—Due to increased manufacturing costs, a general advance has just been announced on sad-

dlery hardware including such lines as buckles, snaps and rings. These move up from 5 to 10 per cent. making to-day's prices to the trade as follows:

HARNESS BUCKLES—

	No. 50 Jap.	No. 50xC.	No. 51 Jap.

SNAPS—

No. 422—½-inch, $5.25; ⅝-inch, $5.25; ¾-inch, $5.25; ⅞-inch, $5.70; 1-inch, $6.15 gross.

No. 444—¾-inch, $6.40; ⅞-inch, $6.40; 1-inch, $6.40; 1¼-inch, $9.60; 1½-inch, $11.30; 1¾-inch, $13.05; 2-inch, $15.00 gross.

No. 292—¾-inch, $5.75; ⅞-inch, $8.00; 1-inch, $8.80 gross.

No. 290—¾-inch, $5.40; ⅞-inch, $5.40; 1-inch, $5.40; 1¼-inch, $9.20; 1½-inch, $10.25; 1¾-inch, $11.30; 2-inch, $12.80 gross.

No. 424—¾-inch, $5.20; ⅞-inch, $5.20; 1-inch, $5.20; 1¼-inch, $8.90; 1½-inch, $9.95; 1¾-inch, $10.95; 2-inch, $12.40 gross.

No. 16—¾-inch, $14.85; ⅞-inch, $18.15; 1-inch, $28.35 gross.

Sweat Pads Move Upward

Winnipeg.

SWEAT PADS.—Owing to the difficulty experienced in getting raw materials together with the heavy advances in same, a further advance is now effective on sweat pads. These show an upward trend amounting to from 5 to 10 per cent. To-day's quotations are as follows: Ventiplex, 10-inch, $6.50 dozen, $75.00 gross; Brown and White, 12-inch, $8 55 dozen, $98.50 gross; Red Edge, 12-inch, $9.00 dozen, $104.50 gross.

Grindstones Up 75c; Welding Compound Up

Winnipeg.

GRINDSTONES, WELDING COMPOUND. — Recent advances in freight rates are reflected during the week in the price of loose grindstones, which move up 75c per 100 pounds. This makes to-day's price $3 20 per 100 pounds.

Climax welding compound again shows further increases, due to advanced costs. Present quotations are up approximately 5 per cent. over former prices, making to-day's selling basis as follows: Climax welding compound, 1 lb. boxes, 16c pound; 5 lb. boxes, 12½c pound.

Shaft Couplings, Calf Weaners Higher

Winnipeg.

SHAFT COUPLINGS, CALF WEANERS.—Prices on shaft couplings which have remained firm for the past year again move up approximately 5 per cent. over former quotations. To-day's selling prices are as follows: No. 1, $9.10 dozen pairs; No. 2, $9 95; No. 3, $13.70; No. 4, $16.55

Further advances in manufacturing costs have forced prices on Shaw's calf weaners to higher levels and new prices now effective are given herewith: No 1, $6.60 dozen; No. 2, $7.70 dozen.

Bread Mixers Go To Higher Levels

Winnipeg.

BREAD MIXERS.—The recent advance in tinware is reflected in the new prices issued on Universal bread mixers. These are now selling on the local market at $3.50 each for the 4 loaf size and $4.00 each for the 8 loaf size.

Mops and Cloths Up 5 to 10%

Winnipeg.

MOPS AND CLOTHS.—Recent advances in cotton as well as other materials have forced up prices on mops from 5 to 10 per cent. Selling prices to-day are as given herewith: Mops, "self-wringing, $5.75 dozen; crank wringing "A," $8.25 dozen; extra cloths for self-wringing mops, $3.25 dozen.

Weather Strip in Sharp Advance

Winnipeg.

WEATHER STRIP.—Swan weather strip has shown a strong advance during the week due to the extreme difficulty experienced in obtaining a supply of felt and the advancing prices of same. To-day's ruling price on Swan weather strip is 90c set.

Turps Up 5c; Linseed Oil Firm

Winnipeg.

TURPENTINE, LINSEED OIL.—Owing to the shortage of stocks as well as the transportation difficulties a further advance in the price of turpentine was predicted some time ago by HARDWARE AND METAL. New prices issued during the week confirms same, present quotations being up 5c per gallon over former quotations. To-day's selling prices are as follows: Barrel lots, $1.15 gal.; ½-barrel lots, $1.18 gal.; 5 gal lots, $1.20 gal.; 1 gal. lots, $1 20 gal., plus the usual extras for containers.

Although prices on flax seed have shown a drop in price, no change is recorded in the price of linseed oil, which still holds firm on the local market at the following levels: raw linseed oil, $2.20 gal.; boiled linseed oil, $2.23 gal. in single barrel lots.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Oct. 30.—The epidemic of "Spanish influenza," or "flu' for short, is rather general throughout the east and the central west. The spread seems to depend upon climatic conditions, whereby it has not extended north beyond certain latitudes. The epidemic seems to follow main arteries of travel very largely, and to be severe in accordance with the density of population. Some health authorities have estimated that in the end 15 per cent. of the population will have been affected. As a result of these vagaries of travel some of the steel mills and blast furnaces have been very seriously affected as to their working forces, while others have escaped wholly or largely, and no general average can be struck. As an extreme case the Duquesne Steel Works of the Carnegie Steel Company may be cited, where of late an average of 15 per cent. of the working force of about 5,100 men have been off duty, absence being attributable in nearly all cases to the "flu," but managers feel that there is a disposition to attribute to the "flu" absences that may be due to some other cause, while furthermore some of the absences are due to sickness in the family, rather than to the workman himself. The next most serious case is that of the Homestead Steel Works proper, employing about 8,000 men, and with an average of fully 800 absent. Subsidiary plants, somewhat removed from the main plant, like the Shoen steel wheel department, the Howard Axle Works, etc., are much less affected. In the Shenango valley the epidemic has scarcely been felt, but the Mahoning valley has had some serious experiences.

Altogether the curtailment in production has been much less, in percentage, than the curtailment in working forces. The remaining men seem to work harder. October was expected to show a materially better production rate than the very favorable September showing, in both pig iron and steel ingots, and a rough estimate is that with the curtailment due to the epidemic there will still be shown some slight increase in the rate of production, after allowance has been made for the fact that the month contains one more working day than September, in the case of blast furnaces, and two more in the case of steel works.

Reflected Priority

The War Industries Board seems to have regarded its circular No. 4, dated July 1, but not actually circulated until late in the month, as susceptible of clear and exact interpretation, but it has developed that many, if not the majority, of manufacturers concerned have misinterpreted certain provisions, and it has been necessary to issue precise interpretations, which will materially alter the manner of securing priorities in a great many cases.

The circular provided "automatic priority" for material for a great many war contracts and activities, including, for instance, the following: Turbines, locomotive construction and repair, Fleet Corporation vessels, cranes, farm implements, etc. For these various cases "automatic priority," was prescribed, whereby the buyer, instead of securing an individual priority certificate from the War Industries Board for

WEEKLY PAINT DEPARTMENT

Are You Cashing In On Auto Business?

Many Thousands of Cars Are Being Fixed Up This Fall Because it is Impossible to Buy New Ones—Business is Steadily Increasing and Many Dealers Are Boosting Their Sales by Going Right After This Trade

ARE you cashing in on the automobile business this fall? Since the war orders went out reducing the number of new cars to a fraction of the normal output, many hardware dealers have been doing a record business in auto paints and varnishes. They realized that if there were going to be fewer new cars coming out of the factories, there would be a tremendous increase in the painting of the old ones and laid their plans accordingly. This has been a steady business ever since the order went into effect and instead of decreasing it seems to be increasing. Many dealers stated to HARDWARE AND METAL that they are selling more paints and varnish for autos now than ever and that the demand is growing.

EASY AS CAN BE

One man stated that in connection with his campaign to round up the auto business he featured the small cost and the ease with which the work can be done. His advertising and window displays were calculated to demonstrate in the most effective manner to any car owner that with a couple of dollars' worth of paint or varnish and a clean brush he could in a few hours roll his auto out of the garage looking like new. He also pointed out that the job would in every way be satisfactory as far as durability and lasting qualities were concerned. In talking to prospective customers who dropped in to inquire about materials, etc., he impressed upon them that at a very small expense they could produce results on their cars equal to a professional painter's efforts.

SAVING OF MATERIAL

He also pointed out to them that a professional painter would likely put on half a dozen or more coats, involving not only expense to the car owner, but the using up of a large amount of paint at a time when it is every one's duty from a patriotic standpoint to conserve supplies as much as possible.

"It would take more professional auto painters than there are in Canada," he said, "to paint all the autos that need painting this fall. There is absolutely no question about our materials. They are made by one of the best firms in the business. If everything is not exactly as I tell you and if you are not satisfied with the job come back and let me know and we will give you your money back."

GOT GOOD ADVERTISING

After the first half dozen or so car owners had made their cars look like new, they not only talked about it to their friends, but were satisfied customers to whom the dealer could refer others. He cashed in on this feature of it too.

Another point he always brought out was the range of colors and very often he would suggest combinations which appealed to the car owner.

"The best part of the whole thing," he said to HARDWARE AND METAL "is that I have created a permanent business for this sort of material. No matter if fifty per cent. of these people sell their cars some time in the future they will get others and every time they think their cars are beginning to look a bit rackety they will be around to my store for some more paint and varnish to fix them up."

LOTS OF BUSINESS

One paint manufacturer estimates that his firm at its present rate of sales is selling enough auto paints and varnishes to renew at least a quarter of a million automobiles before the first of the year. His only trouble so far is in keeping up with the orders that are coming in and he attributes the great majority of this business to the aggressive work done by hardware dealers in boosting this end of the business this fall.

"I Can Guarantee This Boeckh Brush To Give Satisfaction In Every Way!"

Boeckh Brushes are just what the name implies — **"Steel Grip" Rubberset Brushes.**

The Bristles cannot come out—the job cannot be spoiled by imperfections and streaks caused by falling bristles.

Don't forget, you can guarantee Boeckh Brushes with perfect confidence that they will "make good."

CANADA'S "SCRAP OF PAPER"

GOOD AS GUINEA GOLD

IN Canada, as in all right-thinking nations, *good faith* is the foundation of all our business dealings. Without a sound basis of credit our whole financial structure would crumble and decay.

Credit is the belief of the creditor in the borrower's intention and ability to pay.

You do not hesitate to exchange four silver quarters for a Dollar Bill, because you know that Dollar is as good as Guinea Gold. Yet a *Dollar Bill* is only a "scrap of paper" bearing Canada's statement that it will pay *one hundred* cents for it.

You have read that statement so often that you have come to *accept* it without question.

And Canada has always *made good* its promises concerning every "scrap of paper" it has ever put on the market.

Canada is now offering to investors Dominion of Canada Bonds, bearing interest at 5½ per cent. per annum. The interest is payable half-yearly, and the Bonds are issued in denominations of $50, $100, $500 and $1,000, making a most attractive and profitable investment.

It is Canada's desire that Bonds of the Victory Loan, 1918, be distributed as widely as possible among private individuals.

The last Victory Loan, which was largely over-subscribed, had more than 800,000 subscribers, or 1 in 9, of the entire population of Canada.

Every available dollar of private capital in Canada is urgently needed to surpass that record. *Buy Victory Bonds*—they are good as Guinea Gold.

From the standpoint of Patriotism your duty is clear. But, apart from any consideration of duty and patriotism, Canada's Victory Bonds represent the safest, surest and best investment in the world to-day.

This space donated to the Victory Loan 1918 Campaign by

BENJAMIN MOORE & CO., LIMITED, West Toronto

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Oct. 31.—Linseed oil is steadier and there is no change on immediate delivery basis. For November an easier basis rules. It is just possible that the immediate future will see a somewhat easier tendency, but this is wholly dependent upon the delivery of seed down the lakes. Turpentine is very scarce, some not quoting, but there is some available still at held prices. Glass is firmer, putty is steady, and varnishes seem likely to go up.

Linseed Oil Holds; Tendencies Easier

Montreal.

LINSEED OIL.—There is little change from the situation attained a week ago and prices for spot oil are still held. An easier situation obtains regarding November and December oil, the lowest quotation being that of $1.75 for raw and $1.77½ for boiled. It is fully anticipated that seed movement will have so improved as to make for a readjustment of stocks in the hands of crushers, so that wants may be promptly taken care of for the coming season—the early part of it at least. There is quite a little fluctuation from day to day in seed markets, but not so much as in the ten days preceding last market report. Some of the large paint houses are still out of the market for immediate business.

Linseed Oil—	Raw Imp. gal.	Boiled Imp. gal.
1 to 2 barrels	$1 87	$1 90
Nov. and Dec. delivery	1 75	1 79½

Add 10c per gallon in smaller quantities.

No Turpentine Held By Some Jobbers

Montreal.

TURPENTINE.—But little change has developed in the local situation. Some jobbers are still out of the market and have no supplies beyond their own requirements. All are looking to protect themselves in the manufacturing season immediately ahead, and it is said to be doubtful if any marked improvement will be brought about in the matter of supplies for some months. No change of price has been made here but the market is quite firm and steady.

Turpentine.		Per Imp. Gal.
1 to 4 barrels	0 95	0 98 1 00
5 barrels and over	....	....
Small lots	1 01	1 06

(Packages extra)

Steadiness Marks White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—A routine amount of business at unchanged prices is the only element to report. Various quantities are moving, but these are scattered and light for the most part. The basis of $17 per 100 pounds for five tons, still obtains; for ton lots $17.35, and for smaller than ton quantities the quotation is $17.85.

Much Putty Business At Steady Prices

Montreal.

PUTTY.—The price basis for putty is held without change and the trade feels that it can hope for the present basis holding if the scarcity of whiting does not become greater. The easing of linseed oil prices has been a favoring factor in balancing the makers' costs, and yet the position is steadily firm. Movement has been heavy for several weeks, and this is expected to continue for the coming month or two.

Mixed Paint Bookings Continue Satisfactory

Montreal.

MIXED PAINT.—There is a steadiness to theh market and orders have passed in to the various makers freely. The talk of peace has had little apparent effect on the future booking business it was pointed out by a large maker, and this was taken to indicate that the rumors have not unsettled the retail trade regarding the conditions to obtain in the immediate future. Another factor that some have observed is that of the readiness of the trade to pick up what they can in the half gallon containers, and as stocks of halves are daily vanishing there will be little available in this size packages within a few weeks.

Varnish to Cost More; Outlook Difficult

Montreal.

VARNISHES, SHELLACS.—The position is a very serious one as far as supplies are concerned, and if the present difficulties are continued as to raw material shortage there is every reason to anticipate, not shortages only, but much increased costs. The position on shellacs, particularly, is one that the manufacturers view with more or less alarm. It is not easy to secure supplies for other than war requirements at present. Advances may be looked for not later than the first of the new year, and probably before.

Glass Markets Firm; Deliveries Fair

Montreal.

GLASS.—The market is steady and high, the recent advance as reported two weeks ago still holding. It is unlikely that any decline of price can be looked for because the difficulty of obtaining glass is more acute as time passes. The jobbers have provided themselves with fair stocks, and many retail dealers have also been protected, it is stated. Plate glass rules steadily, no change having been made, the readjustment of two weeks ago being on sheet glass only. Present discounts to the trade on sheet glass are: Boxes, 20 per cent.; sheets, 5 per cent.

TORONTO

TORONTO, Oct. 31.—The range of prices on linseed oil has widened with lower prices in evidence. Turpentine has gone up 2c per gallon and a continued firm market is looked for. Booking business on mixed paints is coming along fairly well. Glass is very firm though unchanged. Putty is moving out fairly well, whereas white lead in oil is quiet.

Lower Prices on Linseed Oil

Toronto.

LINSEED OIL.—Lower prices are in evidence on linseed oil ranging from four to seven cents below quotations of last week. This has served to widen the range materially as raw oil is now quoted at from $1.77 to $2 per gallon in single barrel lots. The market on flax seed is decidedly erratic but the feeling generally seems to be that higher prices are probable. However, if the Central Powers throw up their hands the market may tumble temporarily. Uncertainty seems to be the only certain thing about seed just at the present moment. Linseed oil is in fair supply and quotations range as follows:

Linseed Oil—	Raw Imp. gal.
1 to 2 barrels, gal.	$1.77-$1.83-$2.00
3 to 5 barrels, gal.	1.76- 1.82- 1.99
	Boiled Imp. gal.
1 to 2 barrels, gal.	$1.79½-$1.86-$2.02½
3 to 5 barrels, gal.	1.78½- 1.85- 2.01½

Add 10c gallon in smaller quantities.

Turpentine Goes Up 2c Gallon

Toronto.

TURPENTINE.—Locally high prices have been named on turpentine amounting to 2c per gallon in some quarters. This is in line with tendencies outlined in HARDWARE AND METAL last week when strong tendencies in southern markets with probable effect here were given. Primary points continue to show marked strength. It is reported that English interests have placed orders to be held in tanks until shipping space is available and this provides a strengthening influence. Warpage, marking, and cost of barrels have materially increased too and laid down costs locally are influenced on these accounts. Altogether the outlook seems to be for a firm market with steady though small advances a prospect for some little time. Prices on the market range as follows:

Turpentine—	Imp. gal.
1 barrel (barrel included)	$0 96-$1 00
2 to 4 barrels (barrels included) ..	0 95- 0 99
5 gallon lots	1 06- 1 10

Mixed Paint Fair; Some Hold Off

Toronto.

MIXED PAINTS.—There is comparatively little doing in mixed paints just now. Sales for fall have been very good and energies now are being exerted on spring business. The trade seems to be holding back somewhat according to some manufacturers. Retailers generally are exercising great caution and it seems as though buying may be more than ever of the hand-to-mouth variety. The question of a possible early peace with uncertainty as to what may immediately follow is chief reason assigned for this attitude. It is also evident from other manufacturers' reports that peace talk is not entering into the question of spring business very largely, retailers whom they have solicited showing a disposition to protect themselves against further possible advances and insure good deliveries.

Situation in White Lead in Oil Steady

Toronto.

WHITE LEAD IN OIL.—The market is steady and no feature of particular interest is reported. Trade at the present time is along rather narrow lines. Prices have been firmly held and there seems to be no immediate change contemplated, pure white lead in oil, ton lots, selling at $17.80 per 100 pounds, and smaller quantities at $18.15.

Glass Very Firm; Putty Steady

Toronto.

GLASS, PUTTY.—Indications are that stocks of glass are becoming pretty well depleted and replacement of these is considered the main factor which will mean advanced prices. The present selling basis is just a fraction over what it would cost to buy and, this means a decidedly firm undertone with probable increase in price at an early date. Sales have been only fair. Putty is still selling fairly well and the market rules firmly though unchanged at the following levels:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

Brushes Hold Steady, Unchanged

Toronto.

BRUSHES.—The market is without change during the week and that an immediate revision of values will be made seems only a remote possibility now. Spring business is being accepted on today's selling basis up to the limit of the manufacturer's ability to secure and supply the goods so it now looks as though any price changes will be withheld until around the first of the year. The selling season will soon be over, travelers coming to headquarters shortly, and reports are to the effect that business they have so far secured and are securing daily represents a mighty nice total.

WEEKLY MARKET REPORTS

Continued from page 59

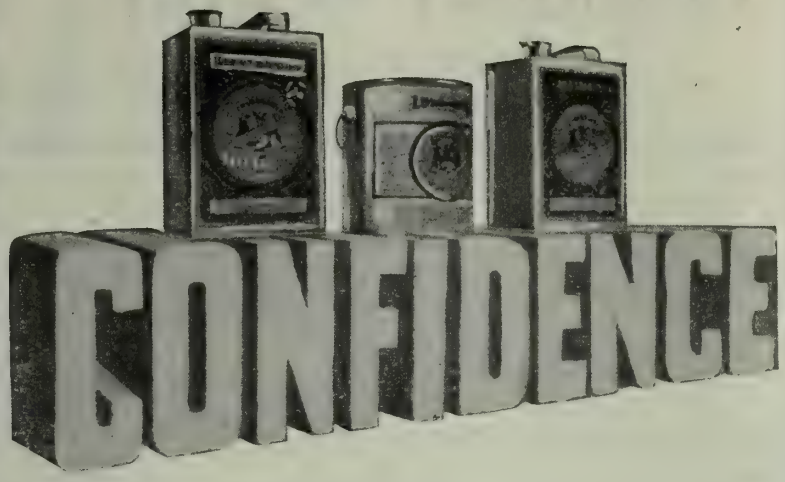
material, etc., desired, could place his order with merely an endorsement, by affidavit, showing that the material was for the designated purpose, and stating the prescribed priority for the activity, such priorities ranging from A-4 down to B-2.

Many interests interpreted this to mean that the priority would work all along the chain or line, in case material passed through successive hands, for instance, a shipyard could place an order with "automatic priority," and the manufacturer receiving the order could in turn order supplies, to be used in filling the order, with "automatic priority," and the second manufacturer could in turn use the "automatic priority," and son on indefinitely, as long as the identity of the material could be preserved. Such practice accordingly came to prevail in many cases.

Maurice Hirsh, secretary of the Priorities Division of the board, has lately issued a series of rulings cutting all this out. The automatic priority must work but once. The shipyard working for the Fleet Corporation, for instance, may order bolts or rivets with A-5 priority, but the bolt or rivet maker cannot order steel for his goods with an automatic priority. He must secure a priority certificate for the material direct from the Priorities Division, just as would have been necessary before the system of automatic priority was established. The bolt and rivet makers, to continue using them as an illustration, were not named as being accorded any automatic priority. Then there is another clas of cases in which the manufacturer with whom the order is placed has been accorded an automatic priority of his own. Crane building, for instance, is given B-1 priority. Thus the shipyard can order a crane as A-5, and require the crane builder to furnish the crane before he fills other orders that have lower priority or none. The crane builder can place orders for material attaching B-1 priority thereto, and he gets this same priority on all his material, irrespective of which crane order the material is used for filling.

Some of the steel mills appear to be considerably exercised over the new rulings, aserting that there will be a multiplication of small orders upon the mills, from various manufacturers who must secure individual priorities instead of lumping their orders for steel, but the War Industries Board insists that the priorities will be granted promptly, and even states that some cases may be arranged whereby priorities will be granted to cover a succession of individual orders.

More Steel Conservation



Announcements have been made of many additional agreements made between the War Industries Board and manufacturing consumers of iron and steel, whereby the operations of manufacturing consumers will be curtailed more or less. Making lawn mowers is restricted to a 40 per cent. rate to January 1, and the manufacturers are then expected to stop entirely and get into war work. The making of phonograph needles on the other hand is merely restricted to the 1917 rate. Thus there is recognition of the fact that an old lawn mower can be used over again while an old phonograph needle should not be. These agreements are altogether too numerous to summarize. Only in quite exceptional cases is there any intimation that when the restriction has been put into effect provision will be made for furnishing the steel.

Shipbuilding Activities

Recent developments in the matter of shipbuilding should not be interpreted as suggesting that there will be any decrease in the pressure to secure more ships. A batch of contracts for wooden vessels was recently cancelled, but simply because the yards were evidently unable to carry them out in reasonable time. An order for steel for a shipyard extension has been cancelled, likewise an order for steel for building a boiler plant, but these developments simply indicate that existing facilities, or facilities nearing completion, are regarded as sufficient to utilize the labor and materials available. The September completions of vessels for the Fleet Corporation amounted to 360,000 tons deadweight, a new high record, all being from United States yards except one 6,000 ton vessel built in Japan under contract. British shipyards completed over 240,000 tons deadweight in the month, making over 600,000 tons for Britain and the United States, plus the one Japanese vessel for American account. Japan also built other vessels no doubt, and Canadian building is not included.

Quick Results

If you want to buy or sell a business, dispose of overstocks, hire a clerk or manager, use the "Wanted" page of HARDWARE AND METAL. There is no other way in which you can get in touch, more quickly or thoroughly with the best prospects, than by using the "Wanted" page of HARDWARE AND METAL. Cost is only two cents per word for first insertion, and one cent per word for subsequent insertions, with 5c additional for Box Number or Address.

THE large and constantly growing demand for Berry Brothers' varnishes is based upon a foundation that cannot be shaken. Their earned record for high and uniform quality has created confidence in all "Berry" products.

For over half a century Berry Brothers' label has been universally accepted among buyers and users of varnishes, enamels and stains as a guarantee of dependability, and protection against inferior finishes.

You can increase the volume of your varnish business by making a leader of Berry Brothers' line.

NOW of

Automobile Skates

It has been proven by experience that a nice display of skates EARLY in the season, results in greater sales when the selling season actually opens.

A full assortment of display card, hangers, etc., will be sent on request, if not already received with skate shipment.

Canada Cycle & Motor Co.

LIMITED

Montreal, Toronto WESTON Winnipeg, Vancouver

TO THE WESTERN CANADA DEALER

Does a connection with a progressive and aggressive, amply capitalized and fully equipped concern, grown to be the largest paint and varnish factory in Western Canada, appeal to you?

BRITISH AMERICA PAINT CO., LIMITED

Wants more live dealers in Western Canada. It co-operates with its dealers to make bigger and better business. Join up with a pushing selling organization that will help you put 'em over. Send for booklet "The Evidence." Tells the story in fac-simile letters from Bapco dealers.

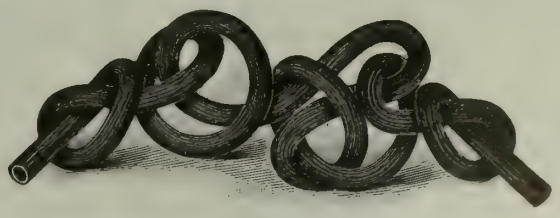
DISTRIBUTING POINTS

Established at Victoria in 1900 the British America Paint Co., Ltd., has found ever-widening markets. To care for this trade branches have been opened at VANCOUVER, B.C., CALGARY and EDMONTON, ALBERTA, and REGINA, SASKATCHEWAN.

TO SELL AND RE-SELL

Paint MUST give satisfaction.

Bapco Pure Paint and Bapco Varnish are of the highest possible quality. To insure this the raw materials undergo chemical laboratory tests. Skilled makers see that the ingredients are perfectly proportioned and modern machinery insures proper grinding and blending. Rigid machine and chemical tests are made during process of manufacture and the completed mixtures are subjected to comparative tests with the fixed Standards. One big roof of the factory is devoted to weather tests.



The growth of the British America Paint Co. and its constantly expanding trade territory is convincing evidence, not only of the quality of its goods, but of its resourcefulness and enterprise as well.

Terms 2% 30 days, approved credit.

Freight equalized on Chatham, Guelph, Hamilton, London, Montreal, Toronto, Welland.

While the foregoing prices on iron pipe are the nominal prices, it has been found in practice that prospective buyers should ask for quotations on sizes 2½ inches and larger on account of the shortage of these sizes and the extra difficulty of procuring supplies.

REPRINTED BY REQUEST

A Message to Canadian Dealers

At this time, when Canada and the United States are so closely linked, it is especially fitting that Canadian dealers should recognize the superiorities of the Separator and Milker that are every inch American.

P. M. Sharples, President of the Sharples Separator Company, invented the first American Cream Separator. For over a third of a century he has been manufacturing and improving this remarkable saver of butterfat.

Likewise, the Sharples Milker was the earliest prefected modern milking machine in the United States.

Dealers in the United States are urging their customers to install Sharples equipment, as it aids towards saving butterfat, maintaining milk production, and rendering real aid in winning the war.

Sharples' Suction-feed Separator is the **only** separator that **skims clean at any speed.** All other separators lose butterfat when turned **under speed**—the annual waste from this cause being over 80,000,000 pounds of butterfat. Universal use of the Sharples Separator would save it all. No discs or blades in the Sharples bowl makes it easy to clean.

Sharples' Milker is the only milking machine that squeezes and massages the teats while milking. It is the world's fastest milker —and a big labor-saver.

The United States and Canada have largely the responsibility for providing the Allies' food supply. Through the elimination of waste and the saving of man-power, the Sharples Separator and the Sharples Milker are doing yeoman service. It is especially wise now to urge upon your customers the purchase of machines that will do the most efficient work at the least cost and produce the greatest amount of food.

If you are not acquainted with the Sharples dealer proposition, and the remarkable work which Sharples machines are doing on thousands of farms, write us to-day.

Lend Him A Hand

Your hand---my hand

Every hand in the land stretched out to help him to VICTORY! That is the way that we are going to win this war. It is the only way we can win it.

We are fighting a united German people. Until every Canadian is backing the boys in the trenches, until every hand in the land is stretched out to help, we cannot expect our armies to defeat the German armies strengthened by the toil and sacrifice of the one hundred and fifty million people of Germany and her allies.

This is a war of national resources, and everyone must add his share to Canada's fighting strength if we are to make our superior resources count. Every hand in the land must be stretched out to help our boys if we would send them over the top to early and certain VICTORY.

Save for the VICTORY Loan. Invest in the VICTORY Loan. That is the way to lend a hand. That is the way to make a nation invincible for freedom and justice.

Every bond bought now is a direct fighting aid to this boy in the trenches in France.

Lend Him a Hand

Conservation

lies at the very base of the Government's War Program. The Allies must have more oil. Production of oil is at its height. More oil for war purposes can be had only by rigid conservation.

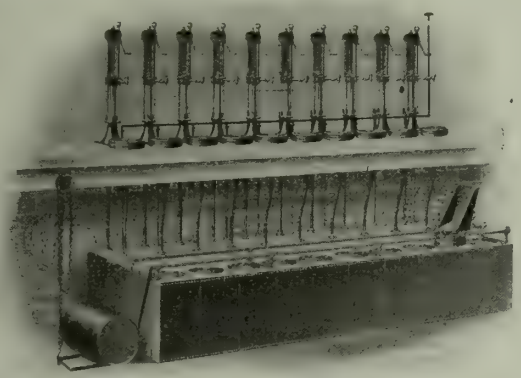

Figure 115. Battery for Paint, Oils or Lubricants

For more than thirty years

BOWSER ESTABLISHED 1885

SYSTEMS

have been conserving the nation's oil and gasoline.

They also conserve

Time
Labor
Space

BOWSER SYSTEMS are

Leakproof
Lossproof
Fireproof
Evaporation proof
Deterioration proof
Convenient
Rapid
Highly Efficient

Tell us your problem. We'll help you CONSERVE OIL. A system for every requirement.

TRADE **CHICAGO** MARK

SPRING HINGES

A SUGGESTION

Have you a stock of Spring Hinges that have distinctive selling features which your salesman can offer and which would make the prospective purchaser buy them and no other?

Chicago "Triplex" Spring Butts

offer this advantage to you. The appearance, durability and finish of this article are unsurpassed, and in consideration of prices that are conservative in respect to value, the up-to-date dealer cannot afford to neglect this profitable business.

Send for Catalogue M. 32. It fully illustrates and describes the most complete line of Spring Hinges manufactured.

Chicago Spring Butt Company.

CHICAGO TRADE C.S.B. CO. MARK NEW YORK

Built for *Service* That's why it *sells*

You will always find it easier and more profitable to sell an "Anthes" Tank Heater. Its superiority is so apparent stock raisers and ranchers choose it every time as the best for their business.

The Anthes Tank Heater is made of high-grade Cast Iron, and every Heater is tested and guaranteed before leaving the factory. Made in two sizes:

Dia.	Height	Weight
12"	22"	120 lbs.
14"	24"	150 lbs.

In stock for prompt shipment. Specify "Anthes" when ordering from your jobber.

ANTHES FOUNDRY LIMITED

Manufacturers of Soil Pipe and Fittings, Tank Heaters, Feed Condensers, etc.

Saskatchewan Ave., Winnipeg

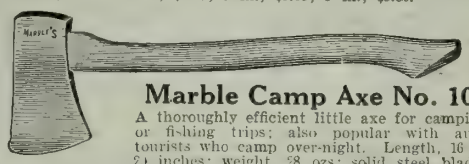
Good Men

DO you need the services of a good retail salesman, traveller, or manager. The best of them read HARDWARE AND METAL each week from cover to cover. Incidentally they also note the condensed ads. in the "Wanted" section. You can use space in this section at a cost of two cents per word for the first insertion, and one cent a word for subsequent insertions. Add five cents for box number or address.

You Can Safely Recommend

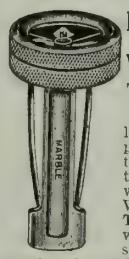
TRADE MARBLE'S MARK



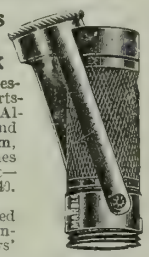
Specialties for Sportsmen

They are known, sold and used all over the world and will give absolute satisfaction to all your customers. Any Canadian jobber will fill your order promptly.

Marble's Ideal Hunting Knife



A big seller everywhere. Unexcelled in quality of material, workmanship and design. Blade is adapted to sticking and skinning. Back of point oval-ground for chopping bone. Leather handle, with or without hilt. List prices, including sheath, 6 in. blade, $2.75; 7 in., $3.05; 8 in., $3.30.

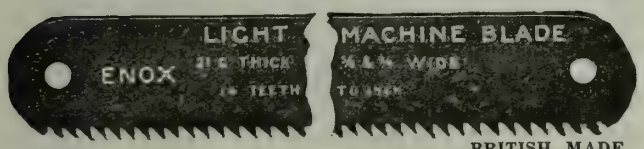


Marble Camp Axe No. 10

A thoroughly efficient little axe for camping or fishing trips; also popular with auto tourists who camp over-night. Length, 16 or 20 inches; weight, 28 ozs; solid steel blade, 3¼x4¼ in. List price $1.95. With sheat $2.50.

Marble Handy Compass and Waterproof Match Box

Two specialties that are an essential part of every sportsman's outfit. Canadian and Allied Soldiers—both officers and privates—use thousands of them, too. The handy compass attaches to the coat—always in sight—waterproof. List price $1.40. With revolving dial, $1.65. The matchbox is guaranteed waterproof and strongly constructed. Holds several days' supply of matches. List price, 55c.



Trade Supplied by Jobbers. Liberal discounts to dealers. Write us direct for catalogue of complete line.

A NATIONAL ADVERTISING CAMPAIGN FOR

Kwik-lite

THE QUALITY FLASHLIGHT

This attractive 3 panel display screen about 2½ feet high by 3½ feet wide is ready to set in your window. It will help you to tie-in with our National Advertising.

With an order for our No. 4 assortment of KWIK-LITES you receive this handsome sales cabinet.

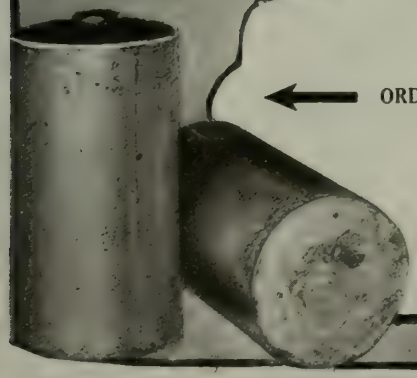
The Kwiklite Advertising Campaign is bigger than ever. Our advertisements are appearing in the Saturday Evening Post, Colliers, Literary Digest, American, Metropolitan, and other popular publications. These advertisements will tell millions of people why Kwiklite stands supreme among flashlights and will create a big demand for this quality light. You can direct this demand *your way* by using the attractive window display, counter case and other sales help we are prepared to furnish you.

Here's What We Are Doing To Help You Sell

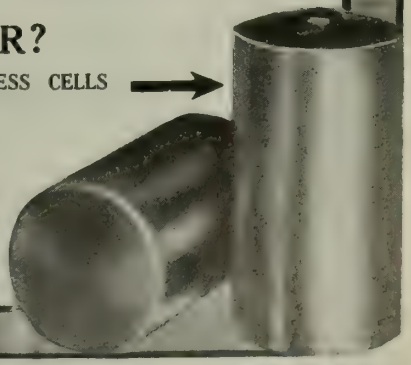
Kwik-lite

THE QUALITY FLASHLIGHT

1. National Advertising to the consumer.
2. Furnishing you with an attention-getting window display and a handsome counter display case.
3. Furnishing, also, a complete line of business-getting sales helps for local advertising such as folders, booklets, lantern slides, etc.
4. Supplying you with copies of the most complete and attractive catalog ever issued on flashlights.



Now is the time to tie-in with our Advertising Campaign and sell "The Quality Flashlight." The BIG Kwiklite BOOK tells the whole story—prices, discounts, sales and advertising plan, everything. Write to-day for your copy of this interesting and profitable book and catalog No. 08.



THE USONA MANUFACTURING COMPANY

WINDSOR, ONTARIO, CANADA TOLEDO, OHIO, U.S.A.

WHICH DO YOU PREFER?

ORDINARY SOLDERED CELLS *OR* Kwiklite SEAMLESS CELLS

Kwiklite seamless, one-piece batteries are guaranteed to give 25% more service than ordinary soldered batteries. They are made in standard sizes and will fit any make of flashlight case on the market.

WANTED

Fall Orders for Hardware such as follows:

Snow Shovels,
Lanterns and Globes,
Weather Strip,
Axes, Mitts and Gloves

A good stock on hand, and orders promptly shipped.

Thos. Birkett & Son Co. Ltd.
Wholesale Hardware Merchants
Ottawa **Ontario**

CARTER'S

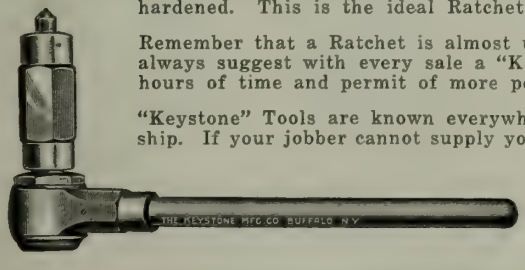
QUALITY
THE BEST

Your customers will need Red Lead to protect the iron work around their homes. The Painters want a Genuine Red Lead for their work. Are you prepared for this demand? If not, put in a good stock of

Carter's Genuine Dry Red Lead
and
Carter's Genuine Powdered Litharge

They are the best quality you can buy. Made in Canada from the best grade of Canadian Pig Lead.

Do you know the quality of these goods? Your customers know it and will insist on using Carter's Brands. Look over your requirements and order now.



Manufactured by
The Carter White Lead Company
of Canada Limited
91 Delorimier Ave. **Montreal**

Here's the strongest Ratchet Drill made

Bridge builders, ship builders, boiler makers, and all who ask constant heavy service from Ratchet Drills are proving the "Monarch" Square Sleeve Single Acting Ratchet to be the strongest Ratchet made. The body is made of Drop-forged Steel, and handle of solid Bar Steel. Parts subjected to wear are extra hardened. This is the ideal Ratchet Drill for heavy work.

Remember that a Ratchet is almost useless without a drilling Post. Therefore always suggest with every sale a "Keystone" Drilling Post. It will save many hours of time and permit of more perfect work.

"Keystone" Tools are known everywhere for quality of material and workmanship. If your jobber cannot supply you, write direct to us.

The KEYSTONE MFG. Co.
BUFFALO, N.Y.
Postal Station B.

"KEYSTONE" Drilling Post or "OLD MAN"

The Publisher's Page

TORONTO, CANADA NOVEMBER 2, 1918

What is the True Meaning of the Victory Loan?

We are within sight of Victory, and now, less than ever, can we afford to rest in a false atmosphere of security.

Now is the moment for a grand rally, an irresistible push forward with men and money.

The men are there—and always fresh ones go. They must continually be fed, clothed, and supplied with ammunition. The work of supporting them, the EASY PART, is ours. Shall any one of us fail them at this end?

NO, A HUNDRED TIMES, **NO!**

And what are we asked to do? What is it that Canada asks of us?

Simply to LEND to our own country, more money, that the great fight may be finished for us, and that the sacrifices made for us in four years of war shall not be in vain. No thinking man or woman who realizes this can fail to respond to the limit of his or her ability.

And Canada makes it very easy for us to do this through

THE VICTORY LOAN 1918

She will pay us interest at 5½ per cent. on any amount we lend. She offers us Bonds backed by the country itself, the highest security in the world, Bonds issued in convenient denominations of $50, $100, $500 and $1,000, repayable in 5 or 15 years, as we may desire.

Let us get right down to business, OUR OWN BUSINESS—AND HELP TO OVER-SUBSCRIBE THE VICTORY LOAN 1918. And let us do it NOW.

BUY VICTORY BONDS

4 Good Reasons
---READ 'EM!

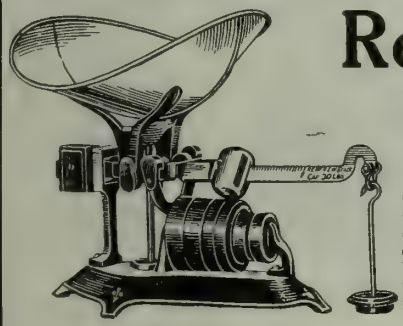
Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.



THE NORTHERN BOLT, SCREW AND WIRE COMPANY, LIMITED - OWEN SOUND, ONT.

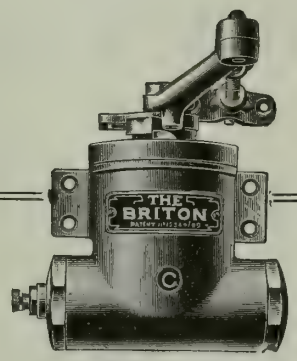
Show Her the Way

FOR goodness' sake, cries the average housewife, show us how to save money out of the deluge of sky-high prices for meats, sugar, flour—everything. And seldom a thought has she of what a tidy sum can be saved every little while by checking up the honest mistakes of grocer, butcher, etc. Show her.

Just a bit of enterprise, pushing the Renfrew Scale to the front—displaying it—and showing her how it soon pays for itself will stir up a tidy lot of sales worth while. Right now is the "psychological moment."

Clinch your sales by showing the Government Inspector's Certificate of correct weights accompanying every Renfrew. Scales supplied in black or all nickel-plated finish. The

Renfrew
HOUSEHOLD SCALE



Capacity ½ oz. to 30 lbs. Government inspector's certificate accompanies every scale.

Food Choppers and Presses

DOUBLE TINNED

New Standard Food Choppers have two particular features that make instant appeal to housewives. They open wide making them easy to clean, and their cone shaped feeders prevent tearing and squeezing. The food is fed to the knives at a regulated speed, the knives are shear cutting, self-sharpening and non-clogging—they cut the food as fast as it's fed to them. Fitted with positive clamp that holds firm, is double tinned and guaranteed rust proof, and is made in sizes 1, 1½, 2, 3, and 4, with stuffers for size 3.

New Standard Fruit and Lard Presses are made in 2-quart and 4-quart sizes, have very few parts, are easily cleaned, and sell at about half the price of others of equal quality. We would appreciate your order for samples.

Canada Can Supply the Goods You Need

Now is the Time For Importers All Over the World to Get in Touch With Canadian Firms—No Country Has Richer Resources With Which to Fill All the Needs of Distant Lands—Big Scramble Coming For Raw Materials

CANADA is a good country to buy from. Dealers in all parts of the world have been finding out that it is to their advantage to get in touch with Canadian firms. They can get stocks of all kinds from Canada, get them quickly and always find the goods dependable and of the highest quality. As a result of their war activities firms in all parts of Canada find themselves now in a better position than ever to handle export business. Since the war many firms have had to treble and quadruple the capacity of their factories. In doing so they were careful to instal the most modern machinery and equipment of all kinds. As a result they are now ready to handle a greater share than ever of the world's business and are expanding their market in all parts of the globe. In this issue of HARDWARE AND METAL will be found the advertisements of a large number of the very best firms in the Dominion. Dealers and manufacturers outside of Canada will find it interesting and profitable to read carefully what these Canadian firms are offering and to get in touch with the advertisers in HARDWARE AND METAL as quickly as possible.

Now is the Time.

Events have been moving so rapidly in the war theatre of late that the end is in sight. No one can tell just when hostilities will cease, but one thing seems to be apparent to those in close touch with trade conditions all over the world and that is that there is going to be a tremendous scramble for raw materials. In many countries supplies have become so depleted owing to war conditions, lack of shipping facilities and other causes that it will take a long time to meet their requirements. No country in the world has such ample resources to draw from as Canada and with her factory capacity tremendously enlarged her manufacturers are looking forward to a record after the war trade. Now is the time to get in touch with these firms. It takes time, under present conditions more time than usual, for mail to travel to and from distant parts of the world. By going through the pages of this issue of HARDWARE AND METAL you will find any number of lines of goods offered in which you are interested. If you want to get them and get them shipped at the earliest possible moment you should write the Canadian firms as quickly as possible. Those who get their orders in first will naturally get the goods first.

Are Sure To Be Busy.

As soon as the war ends there is going to be a demand that will call for huge quantities of materials. So much work has been left over in order to look after war work, and so much material will be required for reconstruction purposes that apparently many factories will be deluged with orders. Canadian firms with the wonderful resources of the Dominion at their backs, increased factory capacity and the army of workers who have made such a splendid production of war materials possible, will be in a particularly happy position to help take care of the needs of others. In the big programme of reconstruction that every country has to face in a greater or lesser degree, the products of Canada are going to play no small part. There seems little doubt that in many of the belligerent countries whose resources have been drained during the four years' struggle that a national supervision of all possible sources of materials at home will be established. It will be a long time before many of them will be in a position to supply outsiders with an appreciable quantity of exports.

Taking Hun Trade.

The great trading nations of the world, England, the United States, France and others, are already busy with plans for re-establishing the commercial activities which they dropped in order to defend themselves against the Hun. They are planning for more than this. Germany by years of effort and the spending of huge sums of money had built up a tremendous export business. Much of this is lost to the Huns forever and will have to be taken care of by other nations. The business is there and the firms who formerly bought from the Huns will never have any more relations with them, commercial or otherwise. In Canada scores of manufactures which were formerly imported from Germany are now being made at home, and the goods are much better than those made by the Huns. The factories making these things will be able to take care not only of the Canadian trade, but to supply other needs in all parts of the world.

Canada Is Ready.

Canada stands ready to meet any demands that may be made upon her. In spite of four years of the most strenuous war efforts the commercial, financial and industrial equilibrium of the Dominion is established now on a broader and firmer basis than ever. The war has awakened Canada to an appreciation of her possibilities. She has accomplished things that four years ago would have been thought impossible and not the least of these things is her manufacturing and industrial expansion. Canadian business houses are building for the future. They want to get in touch with them. They want a chance to supply your needs. They want to show you what they can do, the quality of goods they make, the fair prices they can quote. They are manufacturing many products that you can buy in Canada better and more economically than from any other nation and if you get in touch with them they can prove this to your satisfaction. Correspondence will be of mutual advantage to all and the sooner you get in touch with such firms as are represented by their advertisements in HARDWARE AND METAL the better.

Get Busy Now.

One of the easiest mistakes for buyers in distant countries to make just now is to argue "it's no use planning to buy until after the war." This is a vital mistake. Now is the time to get busy. The importer who gets in touch with Canadian firms now and finds out just what he wants and has his plans all made for early shipment of goods will be in the position when the war ends of being ready to start right off. This will give him an immense advantage over rivals who see the possibilities of business but have to wait for weeks until they can get in touch with the Canadian firms and place their orders. The business possibilities of the future are beyond any question going to be infinitely greater than in the past and the rewards will go to those who are ready to meet the demands. By arranging now for the goods they will need they will be in the position of being able to take orders and handle the trade while their rivals are still trying to find out what they can obtain.

Shows Big Increases.

Some idea of the manner in which Canada has responded to the call for more and still more production to meet the demands of the war may be gained from the following figures showing the tremendous jumps in exports:

Produce of mines—1913, $57,000,000; 1914, $59,000,000;

1915, $51,000,000; 1916, $66,000,000; 1917, $73,000,000; 1918, $85,000,000.

Animals and their products—1913, $44,000,000; 1914, $53,000,000; 1915, $74,000,000; 1916, $102,000,000; 1917, $127,000,000; 1918, $172,000,000.

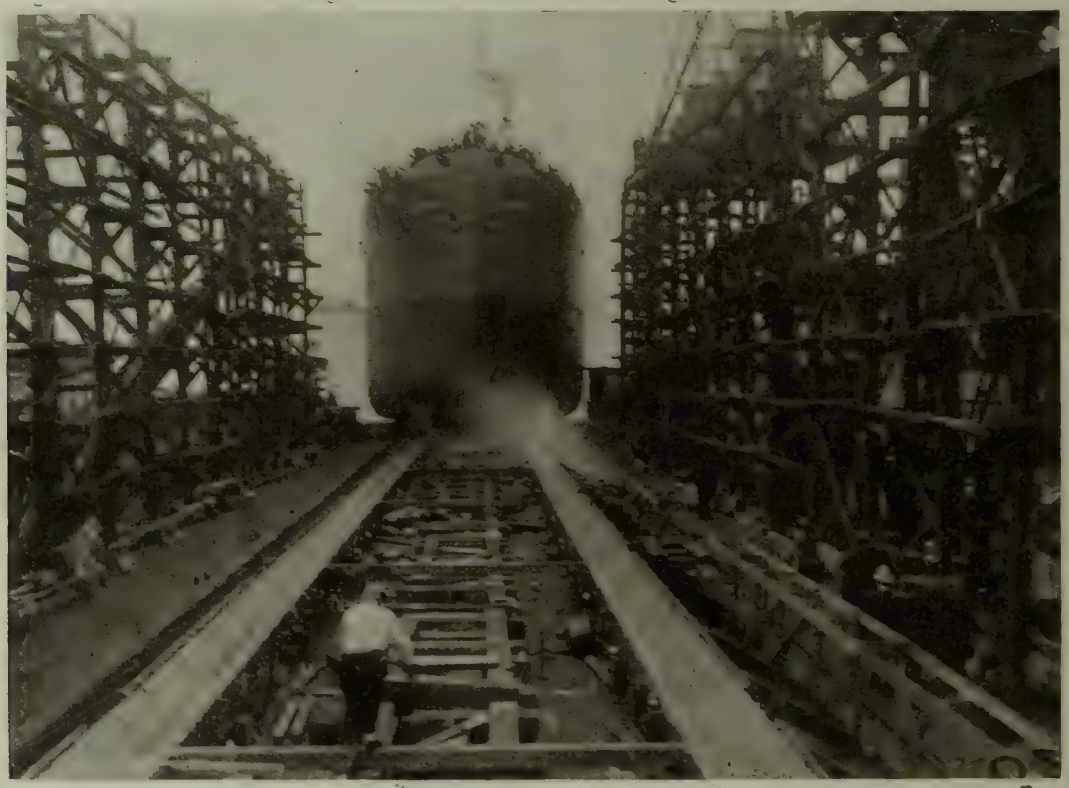
Agricultural products increased from $150,000,000 in 1913 to $567,000,000 in 1918.

Manufactured goods—1913, $43,000,000; 1914, $57,000,000; 1915, $85,000,000; 1916, $242,000,000; 1917, $477,000,000; 1918, $636,000,000.

Many Inquiries.

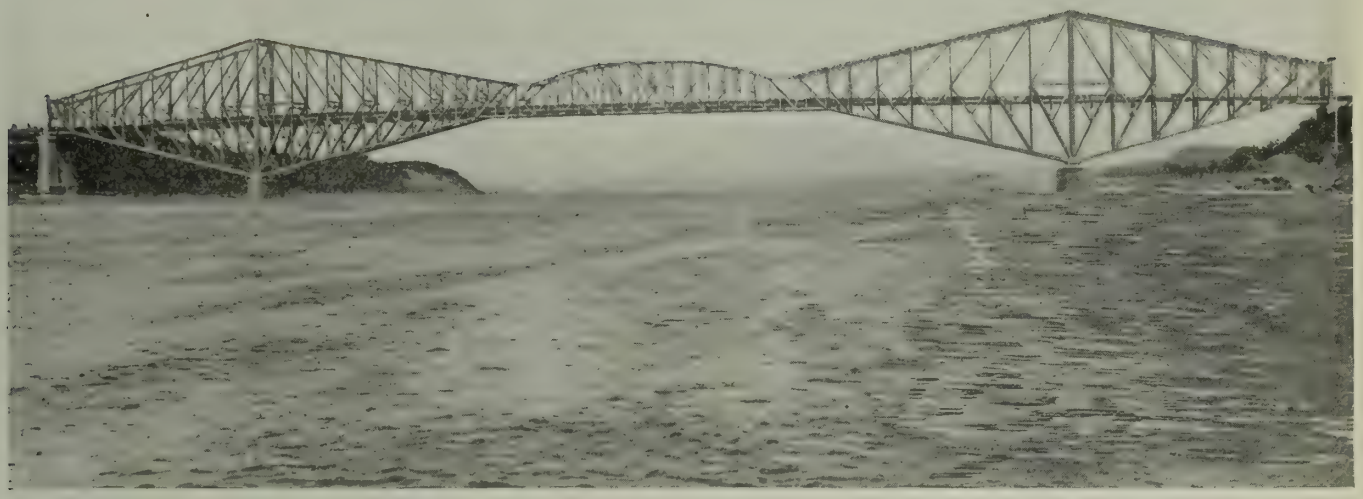
The greater number of inquiries that are being received by Canadian firms from all parts of the world are one of the best indications of the place Canadian products are winning for themselves in foreign markets. In spite of the shortage of shipping space plans for the handling of ships are being formulated in such a way that every available ton that can be used for commercial purposes will be taken. On both the eastern and western coasts and at many points on the Great Lakes large numbers of new ships of all kinds are under construction. Everything points to Canada fully maintaining the stride she has struck since the war started and to her exports steadily growing. Already Canadian manufacturers with an eye to the future are gradually transforming their plants from a war basis to a peace footing. The transition is not a rapid one as the war production is not being interfered with in any way, but the plans under way provide for the changes required being made quickly and with minimum inconvenience.

To Extend Markets



The Canadian Manufacturers' Association has formed a representative committee to consider the whole question of export trade after the war, with a view to finding a market for Canadian products. Senator Frederic Nicholls, who has delivered a number of speeches on the question in the Senate, has accepted the position of chairman of the committee.

The committee is very active and only this week sent a delegation to Ottawa which was joined by representatives from the Canadian Industrial Reconstruction Association, the Labor Council of Canada and the Independent Labor Party, to confer with the Cabinet with a view to the framing of a co-operative scheme under which a commission might be appointed to send trade representatives to European countries to represent Canadian industrial interests so that this country may secure its proper share of the large orders that will be available in connection with reconstruction work.



Well Received

The delegates held a joint conference, when the whole scheme was discussed, and afterwards waited upon the Cabinet in the Privy Council chamber. There was a full attendance of the Cabinet, and Sir Robert Borden, prime minister, presided. After hearing various speakers, including Senator Nicholls, Mr. S. R. Parsons, Major L. L. Anthes of Toronto, and Mr. McTavish of Montreal, Premier Borden expressed the pleasure of the Cabinet at receiving so influential a delegation, and said that some of the matters referred to were already receiving the attention of the Government. He suggested that the delegation and all interests it represented should themselves nominate a committee which would act in co-operation with the Development and Reconstruction Committee of the Senate of which Hon. Senator Robertson is chairman. The joint committee could then arrange to discuss the whole plan and in this way the country would have the benefit of their joint views and experience.

The trade of the Dominion for the first six months of the present fiscal year, which ended September 30, amounted to $1,087,232,880. For the month of September alone, the trade figures show an increase of more than twenty millions over the same month of last year, the total being $212,054,292, as against $191,370,412 in 1917. This is largely due to the jump in the export of domestic manufactured articles during the past month, which increased more than thirty-five million dollars.

Canada has under construction scores of ships which will be used to carry goods of all kinds to the Allies and after the war will be diverted to help handle the export trade. On both the Eastern and Western coasts and at points all along the great lakes launchings are taking place regularly.

NUMBER TWO

JOHN P. HOLLAND

ON August 12, 1914, two weeks after the outbreak of the European War, John P. Holland, inventor of the submarine, died at his home in Newark, N. J. Holland was born in Ireland in 1842—and at the age of 20 he commenced to concentrate on the submarine idea. He came to America in 1864; and in 1898 completed his first successful submarine at Elizabeth, N. J.

Holland's entire life was dramatic and in a sense, tragic. As a result of his great genius, he will become immortal as the inventor of the most terrible war-machine the world has ever known.

The dominant trait in this wonderful man's character was

CONCENTRATION

As Holland's invention has gained the approval of practically every nation, so has the Victor Hack Saw Blade won the admiration and confidence of mechanics and technicians all over America—and all over the world.

Like Holland, we have concentrated on one thing. For over twelve years we have been experimenting, testing, improving. In practical tests, the Victor Hack Saw has seldom been equalled—and never excelled. It is the result of a large organization of technicians and skilled mechanics concentrating on one idea—which is—to make the most honest and efficient hack saw blade in the world. We do not scatter our energies. We make hack saws for every metal-cutting purpose.

VICTOR SAW WORKS, Ltd.
HAMILTON, CANADA.

GOOD LINES TO HANDLE

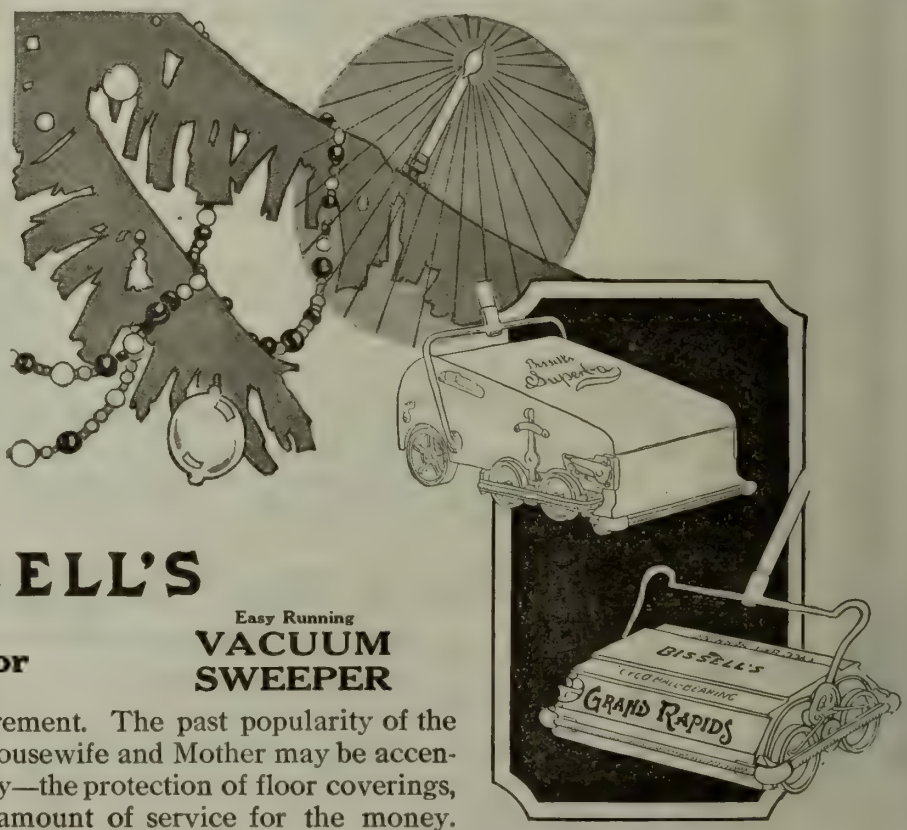
Wakyte Products have not been advanced in price so far this year.

ORDER FROM YOUR JOBBER NOW.

The Wakyte Kitchen Rack

properly displayed in your store is a silent salesman—it sells itself and the utensils that are on it.

The Waykte



COMBINATION BARREL HOIST, TRUCK and STAND.

PATENTED

A most useful and inexpensive piece of store equipment. Indispensable for stores that sell gasoline, oils, vinegar, etc. Used with satisfaction all over Canada.

Wakyte Mfg. Co., Ltd., - Winnipeg

A *USEFUL* GIFT

Usefulness will be the keynote of Christmas giving this year. This natural inclination of the people will be intensified by the request of the Council of National Defense to confine gift selections to things of real usefulness, except for young children.

BISSELL'S

"Cyco" Ball Bearing **CARPET SWEEPER** or Easy Running **VACUUM SWEEPER**

fully meets the spirit of this requirement. The past popularity of the Bissell Sweeper as a gift for the Housewife and Mother may be accentuated by the argument of economy—the protection of floor coverings, saving of brooms and the great amount of service for the money. Never was the time more opportune for selling Bissell Sweepers.

BIG

RESULTS
from small investments. Read Hardware & Metal's Want Ad. Page.

Canada Magnificent!

THE heroic courage and splendid achievements of Canada's sons on the bloody battlefields of Europe have earned the admiration of the entire world. The glorious records of her sons' mighty deeds have won for Canada, undying fame.

Canada's soldiers have set the pace. Every Canadian worthy of the name Canadian, with them, will carry on. Those of us who do not fight have other duties. These duties will not be shirked. We can do but little compared to what our soldiers are doing. But we may and *will* see that our men have everything that money can buy to make the results of their sacrifices surer and greater and to lessen their privations and make their lot more bearable.

Victory Loan of 1918

Non-Taxable 5½% Bonds Denominations—$50, $100, $500, $1000

Five Year or Fifteen Year Maturities

The 1918 Victory Loan is another opportunity to prove your right to share the glory of Canada. See that you take full advantage of this opportunity. The question is not "Will you buy Bonds?"—that may be taken for granted. The only question is, "How large will your subscription be?"

That Victory Bonds are gilt-edged securities and an excellent investment need concern us but little. Forget the commercial side of it. Prove your patriotism and loyalty to Canada and her soldier heroes by subscribing to your *utmost* and by inducing others to subscribe to the 1918 Victory Loan.

Space Donated by Gargoyle Mobiloils

What Will We Tell the Boys?

SOON, we hope, our soldier boys will be coming back. They will not come, nor do they wish to come, until the Boche is fully crushed—until the complete victory has been won. But some day our soldier boys will return from the hells of battle-fields, vermin-infested trenches and filthy prison camps. What will they be told—what news will they have of us when they come back?

Will Canada's returning heroes learn with pride that we who stayed at home did our full part; that we provided everything that money could buy to help them to victory; that we kept Canada prosperous; that Canadian records at home compare, at least in a small way, with the glorious records that Canada's sons have created in Europe?

Victory Loan of 1918

Prove yourself worthy of *your* soldier boys. The 1918 Victory Loan is bound to be another splendid success. Have your full share in this success by subscribing and by inducing as many others as possible to subscribe for Victory Bonds. Victory Bonds will be concrete evidence of your loyalty and patriotism when our soldier heroes return.

We shall not be judged, in years to come, by our sorrows when the boys departed for the front, nor the cheers with which we greeted their return. Our patriotism will be measured by how well we performed our duties while our boys were away. What will we tell the boys about *your* share in the Victory Loan of 1918?

Space Donated by

Gilbert & Barker, Gasoline and Oil Storage Equipment

Why You Should Be A Michelin Dealer

No. 29

Michelin One of Canada's Best Advertised Tires

During 1918 about 10 million advertisements of Michelin Tires are appearing in Canada.

This is about seven advertisements for every family in the country—or about 50 advertisements for every motor car owner.

Each of these advertisements carries a definite message as to some point of Michelin superiority.

Every motorist in Canada will soon know (if he does not already know) why he ought to use Michelin Tires.

A permanent number of ***NEW*** Michelin users will thus be made.

Are you going to cash in on this opportunity?

Write us for details of the Michelin Proposition.

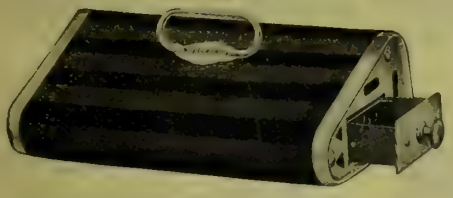
Clark Indestructible Steel Heaters

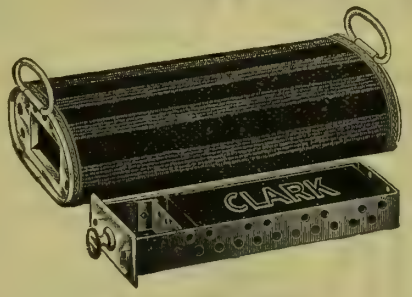
For Automobiles, Carriages, Sleighs and all Vehicles

Dealers! *This has been a good selling and profitable line with the Trade for 25 years, and Clark Heaters are more popular than ever.*



DEALERS ORDER NOW

Your Jobber Can Supply You



No. 8XX Clark Automobile Heater—The Duchess

The handsomest heater ever built. Covered with rich velvet plush in blue, green or maroon shades. Extra wide, highly finished, nickel-plated flange at ends. Side and end adjustable ventilators. Re-inforced steel body. Extra heavy asbestos lining. All outside metal parts quadruple nickel-plated. De luxe finish, 24 inches long. Weighs 12 lbs.

No. 7D Clark Heater—Slanting Top

Clark indestructible riveted steel body. Drawn steel ends, heavily nickel-plated. Side and end adjustable ventilators, allowing perfect regulation of heat. Thick asbestos lining. Covered with extra quality of green Brussels Carpet. A beautiful heater. 14 inches long. Weighs 9 lbs.

No. 5B Clark Heater

Strong, durable, and of good appearance. Covered with Brussels Carpet. Asbestos lining. A good heat giver. Used extensively by farmers, mail carriers, cab drivers, etc.
Light and handy. 12 inches long. Weighs 4 lbs.

Case Containing 100 Bricks

Clark Carbon

The World's Best Heater Fuel

A scientifically prepared carbon densely compressed into bricks yielding a much higher percentage of heat than any other heater fuel. No known substance contains so high a caloric value. One brick in a Clark heater will furnish a strong and steady heat for a period of from 12 to 16 hours.

The New Carton and Container for Clark Carbon

For the convenience of dealers and customers, Clark carbon scores another big hit in the new package. Three bricks are packed in a neat cardboard carton, and four of these cartons, or one dozen of the bricks, are packed in the larger cardboard container.

This package preserves the brick from breakage in shipment and makes it clean and convenient to retail in packages of ¼ dozen bricks.

Only our Clark Carbon is put up in this way.

SINGLE BRICK
Sizes 7½ x 2½ x 1¼ inches

CARTON
Containing 1 doz. Bricks

Another Rapid Marvel Seller

Marvel dealers have demanded a reliable, cold patch outfit that would give the motorist the utmost in convenience and economy—and HERE IT IS. The MARVEL

THREE Trusti-*patch* SIZES

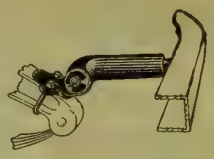
Comes in sheets from which the motorist cuts any size or shape patch he wishes. There is no waste. Pin holes, tears, and blowouts all look alike to the Trusti-*patch*.

The repair material is of a high-grade, semi-cured gum on a Khaki or Rubber backing. To make a repair, simply cut a patch the exact size required by the injury—no more—clean tube and prepare with Marvel Cement that comes with every outfit; then apply the Trusti-*patch*, pressing down firmly with the fingers.

You can supply your trade with Trusti-*patch* to meet every requirement.

Khaki back Trusti-*patch* comes in three-priced sizes; Rubber back in two sizes.

Selling the Marvel Trusti-*patch* is good business for the dealer because the motorist is quick to see the fallacy of carrying a big assortment of various sized and shaped patches when he can cut any size required by the particular injury—with no waste. By selling him just what he needs you will make a satisfied customer—one who comes back for other Marvel Accessories—and the other products you stock.



Marvel dealers have a big advantage—every item in the Marvel Line is made right, is reliable, a good seller and profit maker. It includes the Marvel Junior, Steam, and Jumbo Vulcanizers; Junior and Universal Valve Grinders; Wiping Cloth; Windshield Cleaner; and many other necessary accessories.

Order from your jobber to-day a quantity of Marvel Trusti-*patch*. The list of Marvel jobbers in Canada is given below. Write the one nearest you to-day.

Why It Pays!

ADVERTISING in HARDWARE AND METAL is economical because it reaches, and the advertiser only pays for, a circulation of tremendous buying power, which is always on the lookout for new lines and information regarding goods which are already in stock.

Manufacturers and wholesalers cannot afford to side-step the dealers. In nine cases out of ten, the customer accepts the retailer's recommendation.

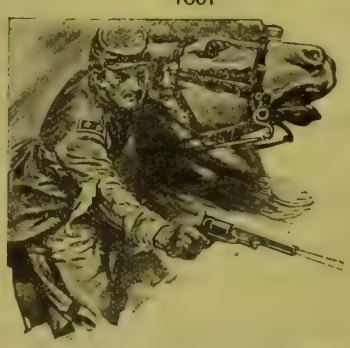
1848

Colt's Firearms



1898

have been supplied to the United States Government for many years. Troops were equipped with Colt made arms in the Mexican War, 1848; during the great struggle from 1861 to 1865, and in the war with Spain, 1898. Through all the years of this Company's existence we have been developing arms which have been adopted by the United States Government and which have made many thousands of friends for the Colt Company.

This great experience now seems to have been but preparation to enable us to serve the United States Government during the present world war. The Colt Company manufactures the Colt, Browning and Vickers Machine Guns in addition to the Colt Automatic Pistol and Colt Revolver, Caliber .45. To the maximum extent of our capacity we are making these essentially military weapons for the Government, and at their request are daily enlarging our facilities. In doing this, which is our d ıty to the Government, we are each day having to disappoint many friends who wish to procure some particular model of Colt revolver or automatic pistol for their own use. We are sure, however, that all those who have the best interests of the country at heart prefer that at this time our whole effort be expended in making our part of the equipment for the boys who are going to use it "over there."

SHALER

5 Minute Vulcanizer

Mends Tubes in 5 Minutes

Complete (With 12 Patch-E-Heat Units) $2.00 in Canada

The Vulcanizer, 6 Patch and Heat Units of round shape for punctures and 6 of oblong shape for long cuts and tears are included in the outfit. Each unit is complete—ready to use. No gasoline, acid, cement or flame required.

The Patch and Heat unit is placed over the puncture—the vulcanizer clamped in position and a match applied. *In 5 minutes* you have a perfect, lasting, "feather-edge" repair.

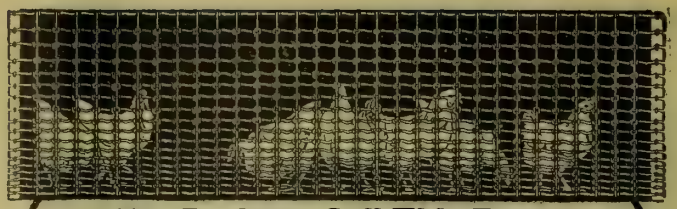
The SHALER 5-Minute Vulcanizer sells itself. You only need to place the display case on your counter or in your window.

The 12 Patch and Heat Units that go with the outfit are soon used up—and the motorist comes back to you for more.

This repeat business pays you a good profit and brings motorists to your place regularly—who will also buy other goods!

Place Your Order With Your Jobber NOW!

Don't delay! The enormous demand for SHALER 5-Minute Vulcanizers has exceeded our factory capacity to make deliveries. We are building a large 3-story addition to our plant—but to make sure of prompt shipments—place your order with your jobber now—specifying date of shipment desired.



Catalog describing the complete line of SHALER Vulcanizers for Motorists and Tire Repair Shops—Sent FREE on request.

Stanley Tools

Stanley Mitre Boxes

MADE IN CANADA

Every mechanic that visits your store would be interested in a STANLEY MITRE BOX. They are strong, durable and accurate, and have a number of striking features that appeal to those who handle tools.

Special Circular upon request

STANLEY RULE & LEVEL CO.
NEW BRITAIN, CONN. U.S.A.

The Samuels' Sifter Has Three Superior Selling Points!

Fine screen has been adopted in making the Samuels' sifter which saves much more of the fine cinders than ordinary sifters, and is stronger. As the illustration indicates, the smaller ash can or pail of a Samuels' may be placed inside the waste can and so catch all the screenings which can then be removed more easily than when the larger can had to be carried out. The new feature also makes for longer life for the Samuels' sifter, since the waste can is not subject to the ashman's abuse.

With this new method of collecting the screenings, the Samuels' leaves all other sifters hopelessly behind. The Samuels' is undoubtedly the sifter for sales and satisfaction, both from your own and your cutomer's point of view.

Order from your jobbers.

J. SAMUELS 275 Queen Street West **Toronto**

"Keystone" Dandy

Here is why Keystone Dandy brushes stand hard work. They have a solid, one-piece hardwood back, and are carefully filled with good tough material, fastened with steel wire.

STABLE BRUSHES

The whole line of Keystone Stable Brushes is made just as carefully—everything that the stableman needs in the way of brushes.

"Delta" Files

—we'll help you sell them

TRADE MARK
DELTA

If the "Delta" Dealer never said a word about these good files but just kept handing them across his counter day by day he would gradually build up an enviable reputation for the quality of files he sells. But we believe in hurrying up that good reputation by telling our agents' customers facts about "Delta"—facts which interest file users and induce them to buy "Delta."

If you want to take on the "Delta" File Agency in your district we will help you make it the most profitable line in your stock. We'll help you interest all the big users of files and show you how to close them up.

This is a genuine plan we want you to try, so write and get full particulars.

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

IF YOUR HARDWARE BUSINESS IS FOR sale, who is more likely to buy it than a hardware man, be he merchant, clerk, or traveller? It is only hardware men who read Hardware and Metal, and a condensed advertisement in this paper offering your business for sale, will put you in touch only with the people who will be most interested.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

INDEX TO ADVERTISERS

Occasionally advertisements are inserted in the paper after the index has been printed. The insertion of the advertiser's name in this index is not part of the advertising order. The index is inserted solely for the convenience of the readers of the paper.

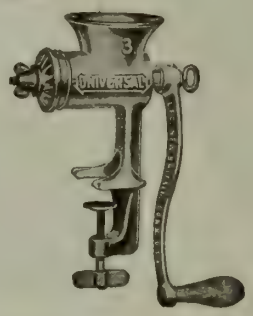
Patriotic Steps to Food Conservation

Every Victory in the Kitchen in the "War Against Waste" is a step toward a greater victory by our soldiers in the field.



The great nation-wide movement for food conservation is being carried on by patriotic Canadian women everywhere. Have you shown them the Universal way to national economy?

It is our patriotic duty to help direct raw material into channels where it will help most in the prosecution of the war and increase the production and distribution of war essentials.

UNIVERSAL Bread Maker

Conserves the nation's wheat supply. The woman who makes bread doesn't cheat herself by using inferior mixtures; nor does she pay a big price for a small loaf. The turn of a crank for three minutes and the dough is thoroughly kneaded.

UNIVERSAL

UNIVERSAL Food Chopper

Utilizes all left-overs into delicious, nutritious dishes. Bits of food thrown away may make a meal some other day—want on waste invites woe and want. Universal Food Choppers are self-sharpening, self-cleaning and easy to operate.

UNIVERSAL Percolator

Produces a rich, clean as amber, fragrant beverage; uses one-third less coffee than the ordinary coffee pot; most practical pumping process, which extracts full strength and flavor before the water boils. The economy of the Universal Percolator is three-fold: saving of coffee, time and money.

Landers, Frary & Clark

New Britain, Conn.

Lend Him A Hand

Your hand---my hand

Every hand in the land stretched out to help him to VICTORY! That is the way that we are going to win this war. It is the only way we can win it.

We are fighting a united German people. Until every Canadian is backing the boys in the trenches, until every hand in the land is stretched out to help, we cannot expect our armies to defeat the German armies strengthened by the toil and sacrifice of the one hundred and fifty million people of Germany and her allies.

This is a war of national resources, and everyone must add his share to Canada's fighting strength if we are to make our superior resources count. Every hand in the land must be stretched out to help our boys if we would send them over the top to early and certain VICTORY.

Save for the VICTORY Loan. Invest in the VICTORY Loan. That is the way to lend a hand. That is the way to make a nation invincible for freedom and justice.

Every bond bought now is a direct fighting aid to this boy in the trenches in France.

Lend Him a Hand

The Victory Loan: A Business Builder

All the money subscribed to the Victory Loan is spent in Canada.

It is distributed direct to YOUR customers.

By making possible the placing of big orders for munitions and other supplies, the Victory Loan keeps the workers in every trade employed at good wages.

By financing Britain's purchases of farm products, the Victory Loan gives the farmers a market for their crop at good prices.

This healthy condition of business brings immediate benefit to every man engaged in the retail trade.

The Victory Loan circulates money among all classes, and much of it must find its way across your counter.

Buy Victory Bonds to insure Canada's continued prosperity.

Buy Victory Bonds to stimulate your own business.

Buy Victory Bonds and encourage your customers to buy Victory Bonds, because healthy business conditions are necessary to enable Canada to successfully maintain her efforts to win the war.

Issued by Canada's Victory Loan Committee in Co-operation with the Minister of Finance of the Dominion of Canada.

Our War and We Must Win It

Canadian vessels have been destroyed, Canadian soldiers and sailors killed and captured, and our casualty lists are being published, yet in the face of this many of us go on from day to day, living in an atmosphere of smug peace, making the war effort that comes to us, that is forced upon us, even as if we refused to realize that this IS our war and we must help to win it.

THE DUST-FREE STORE

DUST can never be kept out of the store, but it can be effectively controlled by the use of

STANDARD Floor Dressing

which when applied to your floors, definitely lays and holds 90% of atmospheric dust. This is a condition of affairs that the old fashioned mop and feather duster can never bring about. They only disturb the dust to settle elsewhere.

Standard Floor Dressing is economical. A single gallon suffices for 500-700 square feet of space or shelving, and lasts for several months. It may be applied with an ordinary floor sprayer. To keep the dressed surfaces in order, all that is necessary is to sweep off the accumulated dust and dirt regularly with a stiff brush or broom.

Floors treated with Standard Floor Dressing help to promote a fresher, tidier store, and cleaner, quicker-selling stock on the shelves.

Supplied in one and four gallon cans, and in barrels and half barrels.

Canada's "Scrap of Paper"

Good as Guinea Gold

IN Canada as in all right-thinking nations, **good faith** is the foundation of all our business dealings. Without a sound basis of credit our whole financial structure would crumble and decay.

Credit is the belief of the creditor in the borrower's intention and ability to pay.

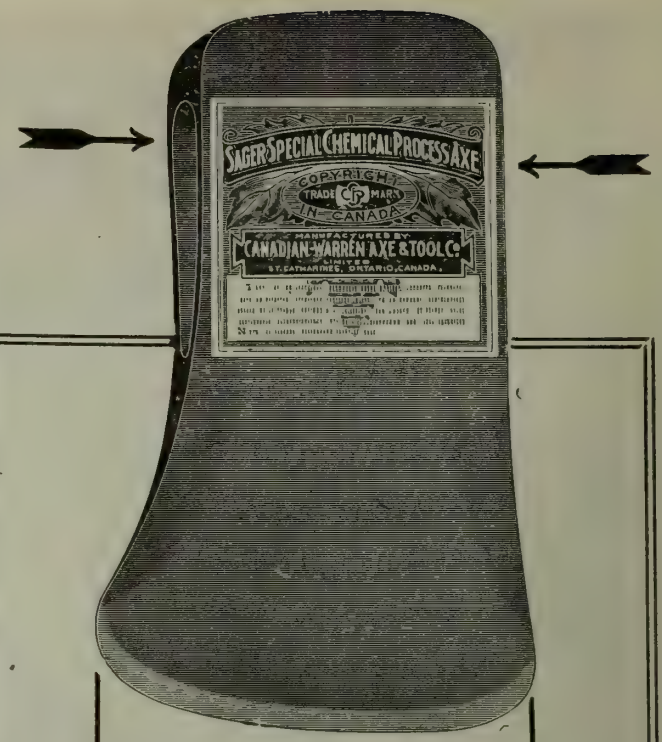
You do not hesitate to exchange four silver quarters for a Dollar Bill, because you know that Dollar is as good as Guinea Gold. Yet a **Dollar Bill** is only a "scrap of paper" bearing Canada's statement that it will pay **one hundred cents** for it.

You have read that statement so often that you have come to **accept** it without question.

And Canada has always **made good** its promises concerning every "scrap of paper" it has ever put on the market.

Canada is now offering to investors Dominion of Canada Bonds, bearing interest at 5½ per cent. per annum. The interest is payable half-yearly, and the Bonds are issued in denominations of $50, $100, $500 and $1,000, making a most attractive and profitable investment.

It is Canada's desire that Bonds of the Victory Loan 1918 be distributed as widely as possible among private individuals.



The last Victory Loan, which was largely over-subscribed, had more than 800,000 subscribers, or 1 in 9, of the entire population of Canada.

Every available dollar of private capital in Canada is urgently needed to surpass that record. **BUY VICTORY BONDS**—they are good as Guinea Gold.

From the standpoint of Patriotism your duty is clear. But, apart from any consideration of duty and patriotism, Canada's Victory Bonds represent the safest, surest and best investment in the world to-day.

CANADA
FOUNDRIES & FORGINGS
LIMITED

THE war has brought great prosperity to Canada. Millions of dollars in war contracts have come to her doors. Wages were never so high. Money was never so plentiful.

This is not the gift of the gods. It is a prosperity that must be used and conserved for the nation's welfare. No man lives for himself alone. He must share in the common sacrifice, in the common endeavor to make that nation great in War and in Peace.

Canadians are to-day asked to loan for Victory, to loan for Continued Prosperity, to loan for Progress in time of peace. They can do this through the purchase of Victory Bonds. It is everyone's duty to buy Victory Bonds to the full extent of his ability. That is the civilian's part. It is the only way he can recompense those who have fought his battles. The security offered is Canada.

Sterling Spark Plugs

Showing the sturdy center electrode of a Sterling Spark Plug

How I Back Up my Claims for Sterling Spark Plugs

A size and style for every car

Recently I told you that, as a dealer, I began selling the Sterling Spark Plug because I could recommend it on my own personal knowledge.

There was the long-established Lockwood-Ash Motor Co. behind it. Then, there was the plug itself. I'm going to tell you something specific about it.

A spark plug is valuable in proportion to its length of service.

Easily Cleanable

Being cleanable, over and over, Sterling Spark Plungs are long lived. If a spark plug is to live a long time, every part must contribute to long life.

Take the center electrode for instance. It is very rugged; it is a **permanent** electrode. Its composition of Monel metal is such that it will maintain its adjustment in any heat —will not disintegrate or corrode.

It is strictly a one-piece electrode — no possibility of its separating in the combustion chamber and scoring the cylinder wall.

Its large size guarantees against wearing away from electrolic action.

Its anchorage is positive, permanent and proof against leakage.

This is one of the reasons why I sell Sterling Plugs. Progressive garages and supply dealers everywhere have them for sale.

What Is The True Meaning of Victory Loan?

We are within sight of victory, and now, less than ever, can we afford to rest in a false atmosphere of security. Now is the moment for a grand rally, an irresistable push for men and money. The men are there and always fresh ones go. They must continually be fed, clothed and supplied with ammunition. The work of supporting them—**The Easy Part**—is ours.

Shall any one of us fail them at this end?

No. A Thousand Times, No!

And what are we asked to do?

What is it that Canada asks of us?
Simply to **lend** to our own country, more money, that the great fight may be finished for us, and that the sacrifices made for us in four years of war shall not be in vain.

Canada makes it very easy for us to do this through

The Victory Loan 1918

She will pay us 5½ per cent. on any amount we lend. Let us get right down to **business—our own business, and help to oversubscribe the Victory Loan 1918.**

And let us do it now.

BUY VICTORY BONDS

What are you doing—are you doing your full share for them

Why You Should Be A Michelin Dealer

No. 30

Michelin Tubes Recognized as the Best

Michelin Red Inner Tubes are recognized everywhere as best because:

1st: They are Made of More Durable Rubber. Ordinary rubber grows brittle and porous with age, as evidenced by the decay of rubber bands and other rubber articles. Not so Michelin rubber. The House of Michelin—the world's leader in the scientific compounding of rubber—long ago discovered a process by reason of which Michelin Red Inner Tubes retain their velvety softness and elasticity, unimpaired by years of use. This process is a Michelin secret.

2nd: Michelin Tubes Fit their Casings Better than any others. Ordinary tubes are simply pieces of straight tubing cemented at the ends, and are **forced** by inflation into the ring shape of the casing. Michelin Tubes, however, are made on a ring-shaped core by a patented process, so that they are **naturally** circular in shape and fit without stretching or wrinkling. This exclusive Michelin advantage gives superior durability and reduces the possibility of pinching the tube.

ARE YOU HELPING TO DEFEND YOUR OWN FREEDOM?

Or Letting Someone Else do it for You?

LAST year over 800,000 people helped to defend their freedom through the Victory Loan, 1917. If you were one of these you will now be one of the million or more patriotic Canadians who will help to **over-subscribe**

Canada's Victory Loan 1918

The same principles, the same love of your country, and the same anxiety to do your share, however small, towards the great work, will guide you now as it guided you then.

It is the privilege of every Canadian man and woman to help to provide the means by which our gallant boys are enabled to finish their great fight for freedom.

Money has been and is the greatest asset in the greatest war in the history of the world.

Your money is needed.

We will do our best also to see that others come forward, we will tell them of the security of the investment which Canada offers to us, of the 5½ per cent. interest their money will earn, and the absolute certainty of the repayment of their loans. But above all else, we will ourselves, **each and every one of us, buy to the extent of our ability.**

Thus shall we be able to look our boys in the face when they come home again and show them that **we did what we could to help** while they fought for us.

Prepare For Peace

AS individuals the advent of peace will take a load off our shoulders.

Our Boys will no longer be under the fire of the Hun.

But from a national standpoint the demobilization period will be nearly as expensive as another year of war, and demobilization cannot be thought of while there is any possibility of German treachery.

The soldiers must be fed and clothed. Ships must be supplied to bring the men home. The wounded must be cared for and nursed back to health and strength.

The problems of the reconstruction period will tax the ability of our best minds and hearts. We must play the game here as our men have played it over there.

Not to buy Victory Bonds now would be like deserting a friend who is exhausted after fighting to defend us.

Lend your money now as you never did before.

"Keep The Home Fires Burning"

TO-NIGHT there will be Canadian boys in lonely listening posts far out in the desolation of No Man's Land, Canadian boys in the darkness and the mud and the cold of the trenches under the ceaseless thunder of guns and the scream of shells, Canadian boys tramping along the pitch-black, shell-torn roads. Through the long, dreary hours, as they wait and watch in the dark, their thoughts turn to the homes they have left behind, homes on distant farms, in little, scattered villages, in great cities, and they see in imagination the pleasant home lights shining out into the night.

They are Fighting to Keep Those Home Fires Burning

You, back here in the peace and safety of the homes they love, can help in the bitter struggle that our boys must face to-night, and to-morrow night, and every day, and every night, until the final VICTORY is won. You, too, must work to keep the home fires burning—for our sons in France.

They need guns and more guns, shells and more shells, they need tanks and transports and airplanes, good food and warm clothes and medicines and hospital supplies—an ever-increasing abundance of all the vital materials of war, if they are to drive the ruthless German invaders back within their own borders, and establish for all time the sacredness of Canadian liberty and the safety of Canadian homes—their homes, our homes.

OUR FORMIDABLE WEAPON—

Keep It Bright

All Canada thrills to the story of what Canada's Army has done in France.

The glorious victories of that Army have earned for it the respect and admiration of the world. It is recognized as one of the most formidable "weapons" of its size on any of the battle fronts to-day.

"To keep that weapon bright" is the duty confronting us who remain at home.

It is more than a duty—it is a privilege—to help provide the fighting gear that enables our brave Canucks to fight on to final Victory.

Victory Bonds are offered you as security for the money you loan "to keep our weapon bright."

By purchasing Victory Bonds, you will help to shorten and win the war; for, besides financing our important industrial undertakings, the Victory Loan provides the munitions and equipment that keep our army in fighting trim.

By investing in Victory Bonds you will not be giving anything away—you are merely asked to **loan** money to the Government at a rate of interest that makes the Bonds a real opportunity as an investment.

You can buy Victory Bonds at any bank—on the partial payment plan if you desire.

THE VIKINGS
are here
We also have them in Toronto

The wires are "hot" with Rush Viking orders.

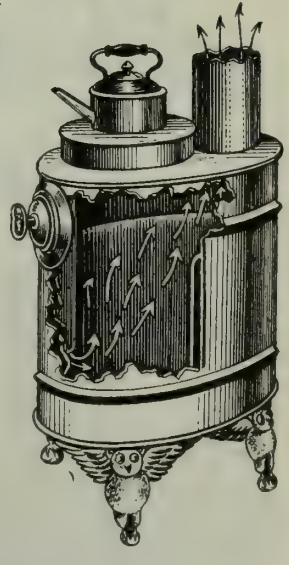
The Viking story is now being told to your customers—all of them—in a clear and intelligent way. You should read it.

You should have Viking Cream Separators on your floor.

The Dairy Farmers will be after the Viking dealer. They want to see the Vikings. They will be practically "sold" when they come into your store.

The proposition is good. And—don't forget the fact that you, the dealer, make a larger profit on every Viking sale.

Every Dairy Farmer will buy a Better Separator at a Better Price. Viking selling points make sales easy—low price, simplicity, thorough construction, ease of operation and cleansing, larger capacity than any other separator of equal rating and the strongest guarantee ever written. Every Viking is guaranteed for a lifetime.



Write us at once for full particulars and Dealer's Terms.

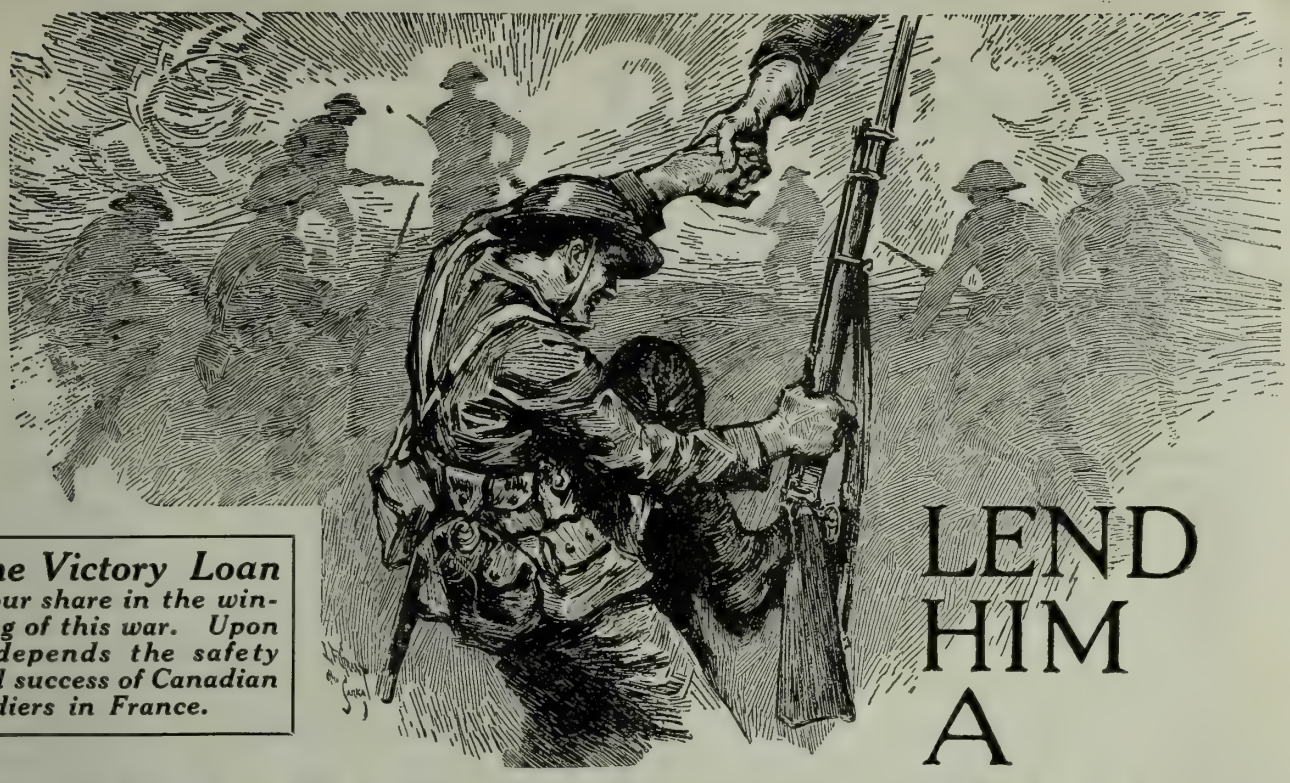
4 Good Reasons ---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:



BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

THE NORTHERN BOLT, SCREW AND WIRE COMPANY, LIMITED - OWEN SOUND, ONT.

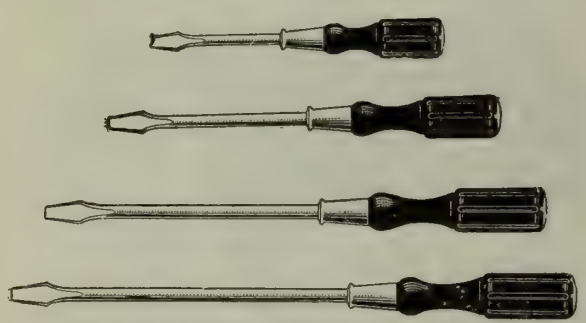
The Dispute Settler

Here is a scale that captures confidence the minute you show it. And confidence "sells good." In a dispute over correct weights, for instance, the owner of a Renfrew can defend its accuracy against any other scale, no matter how elaborate. The Government Inspector's Certificate, accompanying every Renfrew, is indisputable evidence of accuracy in every weight from ½ oz. to 30 lbs. That is one reason why the Renfrew sells like everything, these days. The housewife is ferreting out every leak due to honest mistakes in weighing. Get the



Renfrew
HOUSEHOLD SCALE

Capacity ½ oz. to 30 lbs.
Government inspector's certificate with every Renfrew.
Finished in black or all nickel plate styles.

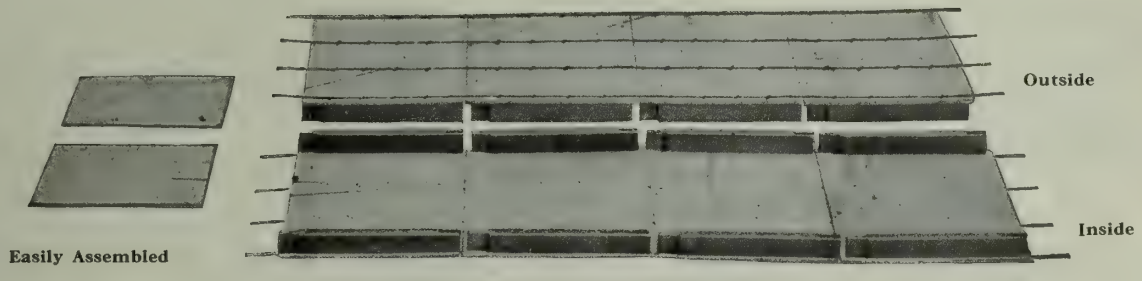
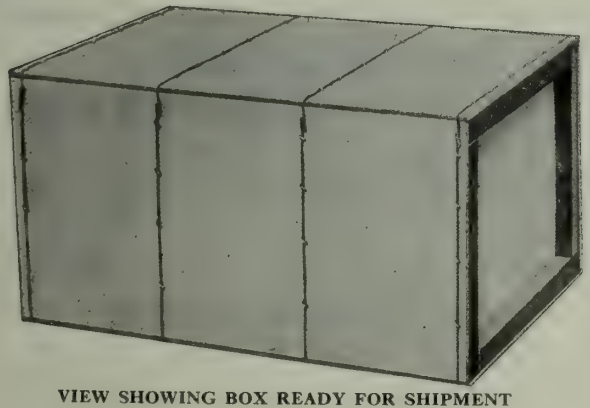
Good Men



DO you need the services of a good retail salesman, traveller, or manager. The best of them read HARDWARE AND METAL each week from cover to cover. Incidentally they also note the condensed ads. in the "Wanted" section. You can use space in this section at a cost of two cents per word for the first insertion, and one cent a word for subsequent insertions. Add five cents for box number or address.

If interested tear out this page and place with letters to be answered.



How the

4-One Wirebound Box

Helps Manufacturers and Shippers

VIEW SHOWING BOX IN KNOCK-DOWN

VIEW SHOWING BOX READY FOR SHIPMENT

It reduces freight charges by 50%.

It reduces storage space when stored in the knock-down.

It reduces complaints from customers; goods arrive in good condition.

It reduces claims, no more damaged goods while in transit.

Above we show you a 4-One Wire-bound Box. One view shows the box in "knocked down" condition, the other assembled ready for shipping. The principle of construction is such that external strain and bulging strain cannot injure contents.

That's why you will find 4-One Wire-bound Boxes the safest shipping method for your product, no matter what its nature.

We'll quote you prices and send you samples on request.

"FALL IN"

Way back in 1914 came the thrilling call—"Fall in." To the beat of the drum men flocked from all quarters. God bless them, how they came—came in their thousands—to fight for all that men hold dear—for country and home and freedom. Valcartier sprang up in a day. Out of the night a great armada gathered to carry our brave lads "over there" into the fog of battle, into the darkness of strife.

Inspired by the same spirit, led by their glorious example, battalion after battalion rallied to the flag. Camps sprang up like mushrooms, and men prepared to follow their brethren into the hell of war. Four years have passed and still they come and go.

"Fall in!" Piercing the din of battle, out from the shell-torn fields of Flanders comes the call to us at home. Ours is an easier task, but we dare not fail. We must insure an abundant, never-failing stream of supplies and comforts. We must put our **dollars** into the fight.

VICTORY LOAN OF 1918

Right nobly have Canadians responded to each and every call. The fifth year finds Canada true to purpose, constant in endeavor, determined to maintain to the utmost her share in the struggle. And now that Victory is in sight the unbounded support of every loyal citizen to the present loan should be assured.

Although the Victory Loan offers an excellent investment, it has for **you**, for **all** of us, a sterner call. You cannot expect a place with those who will welcome home our heroic men unless you answer it. The Victory Loan is Canada's pledge of faith to her soldier boys. The bonds you buy are your share of that pledge. The most you can do is the least you should demand of yourself.

Listen, then, to the call. Give heed to its appeal. It may be your last chance. Don't let it pass. Buy Victory Bonds to your utmost. "Fall in."

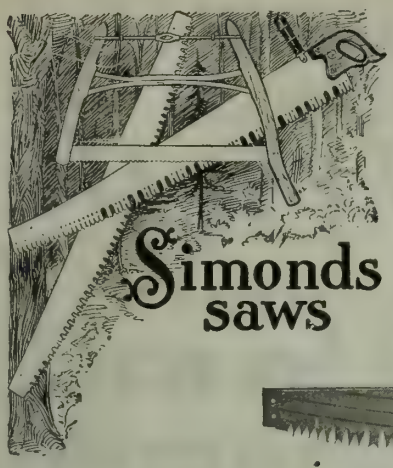
Store and handle Kerosene Safely and Conveniently

Safety, convenience, economy in storing and handling kerosene or coal oil—those are the advantages a Gilbert & Barker T-244-K Pump and Storage outfit gives you.

Storage in a G&B underground tank insures cleanliness—minimizes fire risk. Tank is of best quality of open-hearth soft steel, galvanized by the hot process. All seams are welded by the oxy-acetylene process. Tank may be filled from outside.

The T-244-K Pump delivers the oil directly into the consumer's can without overflow or waste. Eight turns deliver an accurate Imperial gallon. No measure or funnel to handle or lose. The recording meter and discharge register records in gallons and pints the total amount of oil pumped up to 1,000 gallons and then repeats.

Such an outfit pays for itself many times in the saving of oil, time and labor it gives.



Write for catalogue or call at any branch of Imperial Oil Limited.

Twelve Cents Per Word!

Several weeks ago a firm in Vancouver, B.C., telegraphed a want ad to Hardware and Metal. They wanted a clerk in a hurry and wished to catch the earliest issue.

The cost of a telegram from Vancouver to Toronto is ten cents per word, added to this was our charge of two cents per word.

This firm had faith enough in Hardware and Metal's Want Ad column to pay *twelve cents per word,* for an announcement in this column. This little story speaks for itself. Mail or wire your want ads, we will accept them until Thursday noon for the current issue.

Food Choppers and Presses

DOUBLE TINNED

New Standard Food Choppers have two particular features that make instant appeal to housewives. They open wide making them easy to clean, and their cone shaped feeders prevent tearing and squeezing. The food is fed to the knives at a regulated speed, the knives are shear cutting, self-sharpening and non-clogging—they cut the food as fast as it's fed to them. Fitted with positive clamp that holds firm, is double tinned and guaranteed rust proof, and is made in sizes 1, 1½, 2, 3, and 4, with stuffers for size 3.

New Standard Fruit and Lard Presses are made in 2-quart and 4-quart sizes, have very few parts, are easily cleaned, and sell at about half the price of others of equal quality. We would appreciate your order for samples.

A WORD ON

BRUSH VALUES!

Do you, Mr. Buyer, realize that the quality, good or bad, of an article bought and resold by you is distinctly in evidence long after the price and conditions of sale have been forgotten?

It is the wear and tear of rough and extended usage that brings out quality and establishes merit and it is inevitable that the recognition of them brings with it a recognition of the source from which they came.

A buyer's reputation is built up in proportion to his ability to buy quality goods and market them at fair prices, and there is no better reputation builder than

TRADE SIMMS SET IN RUBBER MARK **BRUSHES**

They are produced in quantity and under modern conditions of manufacture that takes full advantage of the economies of a quantity product, hence

SIMMS' "BETTER BRUSHES"

are sold at a price no higher than is asked for the poorer kinds.

In these times, as in no other, it behooves you to buy from old-established houses that you know will deliver quality goods.

Don't Say It!

DON'T SAY IT! If you feel you "can't afford" to buy a Victory Bond, don't say it! It simply WON'T go. We're through with that excuse in this land forever.

If you can afford to LIVE you can afford to buy Victory Bonds. If you can afford to pay rent, buy food or wear clothes you can afford to subscribe to the Victory Loan.

We're getting down to brass tacks with this loan. We're beginning to count noses in this country. And the person who "can't afford" to LEND FIFTY OR ONE HUNDRED DOLLARS TO SAVE HIS OWN SKIN AND BLOOD will shortly find there is mighty little elbow space in good old Canada.

Let's get rid of this hero stuff—as applied to Victory Loan purchases—right now. Let's get down to bed-rock. Let's realize that we are face to face with the greatest crook of all ages—a masked murderer with a gun leveled at our hearts who, in true thug style, is snarling between his teeth the command: "Your money or your lives!"

"Won't you PLEASE buy a Victory Bond?" Oh, the mockery of it!—cajoling, urging, begging people to LEND fifty or one hundred dollars at 5½ per cent. interest to SAVE their lives, their honor, their very souls!

We have reached the "MUST" stage in this fight. Either we LEND our money to Canada now—at fair interest—or we GIVE it to the Kaiser later and PAY INTEREST for the privilege. There is no middle course. There is no neutral ground. We either LEND now or GIVE later.

Sacrifice? Of course—SACRIFICE! Sacrifice till it hurts. Sacrifice till you haven't a dollar left. Sacrifice till you know what real, honest-to-goodness sacrifice is like.

That's the spirit we must have in this loan. And don't sleep at night till YOU get it!

Yours for Victory Bonds

Where Will You Stand On The Day of Victory?

THERE will come a day when the news of VICTORY will thrill the world, and linked with that VICTORY will be the immortal glory of the Canadian people.

There will come a day when Canada's conquering army will come home, and that will be a proud day in the long calendar of Canadian achievement.

Upon that day all Canada will be divided into two classes. The first class will include those who gave their sons, or lent their dollars, freely and unselfishly, for their country, and for the flag, to establish it as the emblem of freedom and justice for all mankind.

Where will you stand on that day of VICTORY

?

Attract the Women's Trade

Many hardware dealers have gone so far as to equip Women's Rest Rooms in their stores, in order to attract the trade of the fair sex. This shows how valuable women's trade has come to be in Canadian hardware stores.

You, too, can attract more women to your store by concentrating on window and store displays of such lines as O-Cedar Products.

O-Cedar Polish

The leading women's magazines of Canada, as well as a big list of important dailies, are teaching more women all the time, how they can lighten their household work by using O-Cedar Mops and Polish. They are familiar with the O-Cedar Trade Marks and Packages, and a good display of these products will at once gain their attention.

BY buying Victory Bonds you are performing a greater service to yourself than to your country. As an investment it is the best thing the small investor has a chance to buy. It is safer than a bank, and more secure than a first mortgage. The revenue from these bonds is not taxed.

Bomb the Tottering Hun With Bonds

EVERY retailer and every manufacturer can help smother the Kaiser and his followers in a storm of Victory Bonds. No one comes more closely in touch with the public than the merchants, especially the hardware dealers. Stores are ideal strategic points from which to talk about the needs of the Dominion supporting the boys on the firing line and also maintaining an unbroken front at home. The "personal" element can be introduced through the stores in a most effective way and much good work done to help along the subscriptions.

Business men of all classes have been co-operating heartily in the work of selling bonds. Many hardwaremen have given their time freely, have used their windows for Victory displays and have backed up their work and their talk by subscribing generously. Any number of hardware dealers have helped effectively also by paying for large advertisements in their home papers.

The campaign is now on its last lap. It is always the effort put forth in the final days that makes or breaks a campaign such as is on now. To do her share in clinching the Victory for the Allies and round out the work she has done in the past, Canada needs more money to "Carry On." The boys on the firing line are giving all that they have. Those at home are not asked to give, merely to lend money on security that is unquestioned and at splendid interest rates.

One of the few things we at home can do is to save and sacrifice and buy Victory Bonds and fill the nation's purse and help pay the debt Canada owes to her soldiers and the Empire. Perhaps you have bought. Think it over and see if you are not in a position to do more. Every dollar you have is of draft age. Put them into khaki. You may never get another chance and the time to help is NOW.

Is Gasoline a Losing Proposition?

Many Hardwaremen Believe Fuel Controller's Limit of Ten Per Cent. Profit is Unsatisfactory—Do Not Find That it Helps Sell Other Lines

THE action of the Fuel Controller in limiting the profit of all those handling gasoline to ten per cent. is causing a great deal of discussion among hardwaremen all over Canada. The complete regulations of the new licensing system for gasoline were given in HARDWARE AND METAL in the issue of October 12. Under the new ruling hardwaremen are allowed to charge a price that is considerably higher than most of them have been charging. On thinking the matter over they have come to a realization of the basis on which they have been handling gasoline and are finding out that from a business standpoint it is questionable. Many hardwaremen stated to HARDWARE AND METAL that they have been handling gasoline for nothing. Others say they have been handling it at an actual loss.

How It Figures Out

"I have been handling gasoline on the theory that it brought people to the store," said one dealer. "I figured out that by putting in a gasoline pump and equipment I would bring auto owners to the store. I brought them all right but in a great many cases the car owner rushes in, gets his gasoline and is gone again without even looking around the store. Any hopes that I had that selling gasoline would bring other trade soon disappeared. There is no money in handling gasoline even at ten per cent. profit, which is more than we have been making in the past. The turnover is not large enough. When I figure the cost of installing the equipment, shrinkage from evaporation, cost of handling, and overhead, I am out of pocket at the end of the year, especially if I have to pay an additional tax for a license."

On a Wrong Basis

Another dealer argued along the line that it is unreasonable to ask any merchant to handle gasoline or any other product on a ten per cent. basis. He admitted that the new ruling allows the dealer more profit than he has been taking but even at that, says it is unsatisfactory.

"We have been asleep in regard to this matter," he said. "When the government set the limit at ten per cent. we began to realize just how small a profit we had been making."

It is one of the lines dealers put in to render a service to their customers. It is a great convenience for owners of autos but from the standpoint of the hardware dealer it is an unprofitable line. Why should we be asked to handle a product that has in many cases to be handled at a loss? Why also are the smaller distributors hardwaremen, garages, etc., limited to ten per cent, and nothing is said about the profits that the big companies may make?

Another Viewpoint

Another hardwareman took the view that the whole licensing proposition is a move on the part of the big producers to drive the hardwaremen and small distributors out of business so that the big firms can have the trade entirely to themselves.

"Gasoline here in Toronto," he said, "costs us 33 cents a gallon. We sell it at 35 cents. Some dealers get 36 cents. Figure it out for yourself. On the lowest possible basis, figuring the time a man would put in looking after the work, cost of pump, loss, from evaporation, interest on investment, a hardwareman would have to sell 700 gallons of gasoline a day to break even. Mighty few of them are selling half or quarter of that amount. Therefore we are doing business at a loss. If we had other lines that showed a similar loss we would unload them and quit handling them. Just what we will do in regard to gasoline I do not know, but the situation is not as it should be."

Helps Sell Accessories

Another Toronto dealer stated that after putting in equipment for handling gasoline he also stocked auto accessories. His experience is that car owners who come in for gasoline frequently look around the store and buy other goods.

"As far as gasoline is concerned, I do not make a cent out of it," he said, "but I partly make up the loss by the trade in accessories. There is no money in handling a few hundred gallons of gasoline a year, paying a license tax, a city tax of $5 per annum, and keeping up the store to do it. It is something like wire nails. The turnover is too small and the margin of profit too small for me to make anything out of it."

Charging Too Much

One man stated that he has been charging 38 cents a gallon. When told that he was breaking the law he was surprised and said he had never figured it out. He declared that there was no money in handling the small quantity of gasoline he disposed of each year even at 38 cents and intimated that if the law prevents him from making sales at 38 cents he will quit handling gasoline.

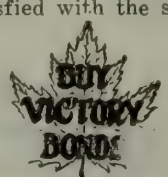
Garage Men Hit Too

Inquiries made by HARDWARE AND METAL indicate that the garage men are not satisfied with the situation. In Toronto they plan to charge more. The limit according to the new regulations will be 36 cents. They are not satisfied with this and a meeting will likely be called shortly to see if anything can be done to improve conditions.

A dispatch from Sarnia, Ont., dated November 5, says:

"All garages locked up their gasoline tanks to-day, having decided to sell no gasoline until the government order limiting the profit to ten per cent. is amended. They claim that owing to shrinkage, ten per cent. is not enough profit."

At Chatham Too



A Chatham, Ont., report is as follows:

"Local garage men report that they have received orders that they must not charge more than 10 per cent. over cost for gasoline. They now pay 30 cents, and they figure that in three-gallon lots they get $1.09 for what costs them 99 cents. They declare that the profit is not enough to take care of shrinkage, to say nothing about the cost of handling. This absorbs all the profit.

They say they pay 30 cents for the power fluid, and that if they sell in single gallons they cannot get the 34 cents, as it would be against the law, and at 33 cents they are losing, so some of them are refusing to sell in gallon lots."

Going to Ottawa

The Retail Merchants' Association of Ontario is taking the matter up and has sent out letters to merchants all over Ontario, asking for expressions regarding the proposed ten per cent. limit for profit. Letters are also being sent to the garage proprietors. Replies received so far would indicate that at the very lowest eighteen per cent. is necessary in order to break even. Many favor a higher profit. It is likely that a delegation be sent to Ottawa shortly to take up with the Fuel Controller the question of revising the regulations in respect to the ten per cent. profit clause and it is planned to make strong representations that this is much too low.

ORDERED TO PAY UP

An interesting case involving the sale of a motorcycle came up in the Toronto Police Court when William Inwood was charged with obtaining money under false pretences. Inwood bought a used motorcycle from Percy A. McBride, the local dealer, and resold it to Thomas Enright without informing the latter that McBride held a lien on the machine for a balance due. Inwood received a week's remand during which time he was required to make restitution of the amount due McBride.

How About Business if the War Ends?

Are Canadian Firms Ready to Face the Problems of the Readjustment Period From a War Basis to a Peace Footing?—What Has the Future in Store For the Merchants and Manufacturers?

IS Canadian business ready if the war ends next week, in a month, or in two months? What shape will the Canadian retailers and manufacturers be in if Germany decides to accept the allies terms and the great four years' struggle ends?

These are questions one hears on every side in the business world these days. The answer of those who are in closest touch with conditions is that Canadian business is in splendid shape to face the period of readjustment that seems now to be much nearer than anyone thought two months ago. Canada was caught entirely unprepared for war, but business men declare the Dominion is not unprepared for resuming its normal condition, and that the problems of the period of transition from a war basis to a peace footing need cause no alarm. Without in any way slackening her war efforts to back up the boys on the firing line, both industrial and mercantile Canada is looking forward to the future most optimistically.

No Wild Speculation

While business has been exceptionally good in Canada there has been no wild speculation among merchants. They have been buying with a view of meeting only the needs of the trade. One of the big troubles with many of them has been to get the goods. The same applies largely to manufacturers. War needs have made speculative accumulations practically impossible. Probably never in Canada's history have stocks of steel for instance been so low. Many manufacturers have more orders on hand now than they can fill in a year, to say nothing of additional orders which might pour in if the war ends.

Have Reached Peak

That prices in many lines have reached their peak is commonly believed. While no sudden change downward is likely many do not look for any large increases from now on, but rather for a gradual lowering, especially in articles which can be produced quickly once the war demand is lifted.

Many Canadian firms are only waiting for normal conditions to undertake plans for big industrial expansion. The oil companies for instance plan a greatly enlarged activity but have been held up owing to the impossibility of getting steel for tanks and other purposes.

Hardwaremen Optimistic

Hardwaremen regard the future optimistically. Building it is believed will boom, and there will be a big demand for hardware, paints, cement and other lines. There seems little doubt that the automobile industry, curtailed to meet war demands will take a tremendous jump. The farmers have now and will continue to have an unlimited market for all they raise and farmers have been buying autos in thousands.

Then the tractor business which is as yet simply in its infancy is expected to develop into an industry as great, if not greater than the automobile trade. Both the auto business and the tractor business hold big possibilities for the hardware dealer and many firms are busy with plans to cash in on the accessory end of these lines.

Electrical Business

It is pretty generally admitted that there will be an enormous increase in Canada's electrical business. Huge projects that were in preparation when the war cut them short will, it is expected, be gone on with, with the result that in the country districts power will be available. This will mean that the hardware men, who have been leaders in distributing electrical specialties of all kinds will have a greatly enlarged field of operations. The war has shown the farming community, especially the farmers' wives, the importance of labor saving utilities and the big increase in the sales of washing machines, vacuum cleaners, and similar goods that has taken place in the past two years is simply regarded as a forerunner of what is to come.

Better Business

Generally speaking it is difficult to use business in well-known staples as barometers of either industrial or commercial conditions. Hardwaremen however, who have been asked by HARDWARE AND METAL declare business has never been better than since the war, and especially during the past two years have sales shown big increases. The hardwaremen attribute this to the high wages that are being paid and the general prosperity of the average working man and the farmer. Hardwaremen have been shrewd enough and far sighted enough to turn this prosperity to excellent account in two ways. They have got rid of all dead stock and they have eliminated unnecessary "credit" accounts. The outbreak of war found many firms with large quantities of goods on their shelves for which there was slow sale. In addition hardwaremen were carrying great numbers of accounts. They soon realized that under war time conditions carrying accounts of this kind was a costly proposition. In the past year they have realized it more and more, and they have taken the steps necessary to end this sort of business. This unloading of dead stocks and elimination of credit has put the hardware business in general in much better shape than it was formerly. As far as buying is concerned the hardwaremen for many months past have been buying wisely. They are meeting all the needs of the trade but they are not speculating. All those in touch with the hardware trade declare that firms all over Canada are in good shape to return to peace conditions.

No Serious Disturbance

The industrial situation under ordinary conditions would have reacted immediately upon a return of peace in a way to cause wild excitement but no one looks for it now.

The moment any form of peace pact is signed, for instance, the demand for munitions will absolutely cease and in all probability Government contracts will be immediately cancelled. Such action would cause a flurry in the labor market, but there are prospects that in a short time it would be adjusted.

Are Well Protected

As far as munitions contractors are concerned, most of them are protected by clauses in their contracts against direct loss. Largely inflated plants are quite commonly owned by the Government and would probably go on the market for sale, either at bargain rates for their occupants to pick up as private enterprises, or for conversion into cheap raw building materials, machinery, power plants, etc. Many of the Government contractors are not even interested in the ownership of the raw material, it being owned by the Government, or bought on account of the Government on an agency basis.

Employment Problems

As for the problem of unemployment for help suddenly thrown out of work, it is the common belief that there will be a rapid absorption of all into other lines of industry, though almost certainly at some recession in wage scale. It is believed that the needs of reconstruction will virtually offset the decline of war industries and that there will be strong demand for plants and machinery. Take machinery plants, for instance, there is bound to be a slump when munitions and ordnance requirements are ended. but most of the plants will be adaptable for serving the tremendously increased demand for agricultural implements and machinery for the European rehabilitation, and therefore will not be lost.

Strong Financially

From a financial standpoint Canada is strong. In spite of war debts the Dominion in the opinion of many will enjoy the greatest prosperity for many years. Canada's resources are comparatively untouched, and resources are assets of the greatest importance at any time, and more than ever just now in view of the depleted resources of many countries. There is no evidence of weakness in credit and banking circles. There is ample money for all needs of merchants, while the outstanding accounts of wholesalers and retailers are re-

(Continued on page 83.)

PEACE IS EXPECTED AT ANY MOMENT NOW

PEACE it seems may be just around the corner. The question of whether the war is to go on will be decided in a few hours at the outside. The representatives of the German Government were received by Marshal Foch on Friday and learned on what terms they could secure an armistice. That Marshal Foch does not want them to accept the terms is indicated by his remark at the Versailles council where he said, "Why an armistice, I have got them." Last minute reports from London, England, indicate that the feeling there is that peace is only a matter of a short time. Latest dispatches from Germany say that that country is in a process of revolution.

NEW RAILWAY ORDER WILL HELP SHIPPERS

THE Railway Board has fallen in line with suggestions made by the Manufacturers' Association and the Windsor and Winnipeg Boards of Trade and modified its ruling in regard to the general railway switching service. The new judgment permits a team track shipper to allow his shipment to be interswitched to a carrier other than the initial carrier.

The amended order changed the interswitching practise in that it compelled railway companies to give interswitching, instead of extending it at certain points as a matter of grace. It was provided, among other things, that the railway on which traffic originated is entitled to the long haul. The Shippers' Section of the Winnipeg Board of Trade objected to this on the score that it would deprive shippers of the valuable right they had always enjoyed of routing their cars along the line they desired to use.

It was urged that the enforcement of the order would effect a radical change upon the whole service of freight in car lots and would involve the removal of the only competition now remaining to shippers—competition in service.

RAILWAYS ARE READY DECLARES WAR BOARD

"IF peace comes to-morrow or next week, Canada's trade arteries are in a healthy condition and will meet even the most complete changes in the current of traffic without confusion or congestion," is the statement issued by the Executive Committee of the Canadian Railway War Board, after its meeting on Wednesday. Lord Shaughnessy will continue as chairman, presiding over Canada's entire railway system. The board has made working plans for the Canadian Northern, Canadian Pacific and Grand Trunk Pacific to co-operate in carrying traffic in the West should any one road find itself over-burdened.

"The Board has arranged also that the Michigan Central, T., H. & B., C.P.R. and Grand Trunk shall all haul traffic direct into Toronto. Formerly the G.T.R. had the only direct route; the Michigan Central hauled from the frontier to Welland, the T., H. & B. from Welland to Hamilton, and the C.P.R. from Hamilton to Toronto. The engine coupled on at the frontier will now run through to Toronto."

ROLLED BRASS FAMINE AND GLUT OF SCRAP

A STRANGE contrast is presented in the States by the scarcity of rolled brass, which has become so acute that it is reported orders have been issued to do away with even brass buttons wherever they can be dispensed with, and the extraordinarily large accumulations of sheet and other kinds of brass scrap which dealers find it very difficult to move.

The explanation lies in the scarcity of labor which has made it necessary to detail troops as laborers in brass rolling mills. Due to the scarcity of labor, scrap dealers also find it extremely difficult to ship material and scrap consumers are equally handicapped by diminishment of their own working forces.

These conditions are temporary and the time is coming when accumulations of brass scrap now looked upon as a drug on the market will be eagerly sought.

CANADA WILL BUILD MANY STEEL VESSELS

STEEL shipbuilding in Canada has received a great impetus this week by the awarding of contracts for thirty-one steamers ranging from 3,400 to 8,100 tons.

In addition to the types of vessels for which contracts have been placed, plans and specifications for a larger type of 10,500 tons are in course of preparation, and it is expected that contracts for the construction of several vessels of this type will be placed in the near future at Halifax and possibly at Vancouver. The first launching under the program will take place in Montreal, probably next week.

MANY WAR CONTRACTS CANCELLED BY BRITISH

THE feeling that peace is very near is reflected in business circles all over Canada and the United States this week. It is shown strongly in a tendency to hold off buying in many lines. A dispatch from Chicago states that a number of British war contracts of importance and value placed with Chicago manufacturers have been cancelled by cable. The orders, which were for military supplies, had been placed here originally by British corporations, who, in turn, furnished the material to their Government. The cancellations, while not of wholesale character, were regarded as significant as a beginning.

Chicago bankers are advising manufacturers to accept cancellations only on terms which will safeguard them from loss and prevent general financial disturbance.

INFLUENZA REDUCING THE OUTPUT OF COAL

THE spread of Spanish influenza has cut into much needed coal production and indications are that unremitting vigilance in regard to conservation will be necessary if business is to go on without interruption. The average daily production now calculated as necessary during the remaining weeks of the coal year to March 31, 1919, is estimated at 2,034,038 net tons. An encouraging feature of the outlook is that reports from the bituminous fields indicate the general acceptance of weekly production quotas by miners, operators and managers.

The total production of anthracite for the coal year to date now amounts to 55,658,000 net tons, compared with 54,683,000 net tons during the same period of 1917, an increase of 1.8 per cent.

PLANS CLASS RATES TO BOOST BUSINESS

A MOVE which is expected to have very important effects on business is planned by Director-General of Railroads McAdoo who this week submitted to the Interstate Commerce Commission and State Railroad Commissions a system of mileage schedule of class rates which, if adopted, will do away with most of the discriminations and inequalities that now exist and will bring about a greater degree of uniformity in those sections of the country where conditions of transportation are practically identical.

He says he hopes the people of the Southeast may find it advantageous to adopt the Western scale and Western classification which would prove not only a great convenience to the shipping public but also a long step toward a uniform classification, which is desired.

ALLIES MAY POOL ALL SHIPPING AFTER WAR

SHIPPING conditions after the war, especially in regard to ocean tonnage, are receiving considerable attention at present. It seems likely that as far as the Allies are concerned an interrational pooling system may be arranged so that all may receive the greatest benefits as quickly as possible. There will be a tremendous scramble for raw materials and huge quantities will be required for reconstruction work not to mention projects that have been held up by the war. Ship building in Canada promises to be an important industry for some time. The problem of wisely directing shipping from now on is from an international standpoint decidedly important.

To-day all Allied tonnage is under direct Government control and nearly all neutral is, more or less, in the same position. Shipyards also under control are turning out vast quantities of tonnage, present and nearby delivery, the cost of which is very high and the quality medium. If the war stopped tomorrow and Government control the day after, what could we look to as likely to happen? Probably serious confusion results disastrous to commerce and industry. Too quick a return to old methods might invite disaster.

SAFEGUARDING THE FUTURE

Every intelligent Canadian knows that he must cut out waste; husband resources; be careful about debt; take precautions for the future. The best way to do that is to put your surplus capital, however small, into

VICTORY BONDS

STORING AWAY PROSPERITY

When you buy a Victory Bond you are purchasing an endowment policy for yourself and also for Canada. You will be storing away a portion of the nation's prosperity for future use.

BUY VICTORY BONDS

YOUR INVESTMENT

Can you feel the pinch? If not, keep on buying Victory Bonds. Buy till your pocket-book grows slim. Invest your savings in Canada. Every dollar you own would not repay your debt to those who fight for you, were you to GIVE it. You are not asked to give, but to LEND, not only what you can easily spare, but every dollar you have or can borrow.

BUY VICTORY BONDS

OUR "NICKEL"

Germany wants Canada's nickel. Let her have it. Twenty "nickels" make a dollar. Put your dollar into

VICTORY BONDS

MONEY TALKS

You can't beat the Kaiser with shouting. You can't place Canada on a firm footing to grapple with the problems of peace with words. It's your money that talks. Money is the sinews of war. You make your money talk when you

BUY VICTORY BONDS

WHAT IS YOUR PATRIOTISM WORTH IN DOLLARS AND CENTS?

Sentiment is all right but it won't win the war. Let your patriotism take a more definite shape. Invest your dollars in your country. Canada is your security for the investment when you

BUY VICTORY BONDS

Serious Outlook For Varnish Future

Will be Scarce and Higher in Price—Some Materials Practically Unobtainable—Manufacturers' Heavy Buying Saved Worse Situation—Gums, Shellacs and Imported Oils Abnormally High

THERE is every reason to anticipate a varnish scarcity. Varnish makers, who are in a position to know what they may look for in the way of supplies, have stated often, that they see no relief within measurable distance.

In discussing the situation with a Montreal varnish maker, HARDWARE AND METAL was assured that the immediate future, as confronting the varnish makers, is more acute than it has been for a long time. So serious has it become, from the standpoint of available supplies that some companies have had to temporarily withdraw from the market.

Some Difficulties

For a long time some of the basic materials have been almost unobtainable. Where a fair amount of the necessary raw supplies were obtainable they had been laid up against possible shortage through the prudence of the maker in buying early and heavily. This informant, in relating his own experience, stated that their usual policy had been to buy ahead at least one and a half to two years. It was only through adopting such policy, that they had been able to operate on as favorable a basis as records for the past year had indicated.

Shellacs, Gums, Oils

One of the very scarcest materials throughout the present year has been shellac. It was difficult to procure this months ago, but so acute has the shortage become that there is little promise of more reaching the trade for immediate future manufacturing. Cost does not enter into the question as it used to. In a general way the cost was almost a negligible factor now, but to get all the necessary supplies at all was quite out of the question to-day. Permits could be had where the quantity wanted was for essential war work. If it were not to be so used, there was only a slight chance of securing anything. Imports for some time were entirely inadequate, it was stated.

Varnish gums were practically out of sight. Transportation and lack of labor had worked together in making prices practically prohibitive, and aside from the stocks in hand there was little promise of improvement in this item. Oils also—the imported variety, at least—were scarce and high.

Reasons For Advances

Among the contributing reasons given for higher prices are the following. Delay in getting freight had required the bringing forward of various supplies by express. As an instance, this informant stated that they had brought in recently in one week as much as six tons of supplies by express. The cost was great, but the need of getting material forward made transportation cost a secondary consideration. Bleached shellacs used to cost 23c to 26c per pound. To-day the cost of these in Montreal ranged from 90c to $1 per pound. The pre-war cost of Chinese oils was from 6½c to 7c, landed in Montreal; today they cost 34c per pound.

Labor had been very high of late, and men were tempted to change their present employment, it might be by a better offer. Even though the employment offered was likely to be of short duration in some instances it was a difficult matter to hold men, and if they were held they demanded more money.

Container material was scarce and high. It was apparent that, unless relief came soon there would be a dearth of varnish cans such as was never known in the history of the trade.

Substitute Containers

This manufacturer is very dubious regarding the feasibility of using a container made of anything else than tin. He had investigated the matter fully. The well-known substitute package—that made with a fibre body and tin top and bottom did not appeal to him as it had to many. The strain placed upon it was too great. It would not, in his opinion, stand the racket. Shipments would be opened up with one or more of the packages broken, and with resultant loss. He even doubted whether the transportation companies would accept shipments of varnish put up in this way. Therefore, if his deductions were well taken, it was obvious that the tin container is essential, and that it would depend upon the manufacturer's supplies of cans, just how long he could take care of his trade.

There was but one item, on which cost had not increased out of proportion, that of linseed oil, and of course the relative bearing of this with so many other high costs would not be a factor sufficiently profitable to overtake the inflated costs otherwise outlined.

Future Prices

The firm in question had already made four advances in 1918 to cover their advancing costs for material and labor. The question of another advance is already receiving attention, and it is very probable that this may come early in the new year, perhaps sooner. In any case varnish it is said is bound to advance and supplies also will be scarce.

Sues Government For Loss on Forced Sale

That it was compelled to supply over 12,000,000 pounds of copper to the Government at less than cost is claimed in a suit filed in the Court of Claims by L. Vogelstein & Co., of 42 Broadway, New York City. The Government fixed the price of copper at 23½ cents per pound in September, 1917, and the copper in question was taken under the act of June 3, 1916, making it a felony for any concern to fail to give priority to Government orders and providing that compensation for goods should be fair and just. The Vogelstein Co. states that the copper cost it more than 26 cents per pound under pre-war contracts, that the fixed price of 23½ cents was not fair and just, and seeks judgment for $424,196.54.

It further alleges that since the fixed price was adopted it has bought at 23½ cents and sold to the Government at the same price over 25,000,000 pounds of copper, making no profit. No claim for additional compensation is made, however, on this copper which it has sold to the Government at cost.

The suit will be defended.

Bankers Plan to Buy German Metal Firm

The assets of the American Metal Company, Ltd., of New York, a German-owned firm which did a large business in Canada will be placed on the market at a public auction shortly. The business was seized by A. Mitchell Palmer, Alien Property Custodian.

For the purpose of thoroughly Americanizing the metal concern and removing all taint of Teutonism about it, a syndicate of bankers and metal men is in course of formation with the intention of making a successful bid for the property.

A special meeting of the stockholders of this company has been called for November 22 for the purpose of dissolving the organization. Of the total stock outstanding, it is stated, 51 per cent. is owned by interests identified with the Metals Gesellschaft of Germany, 23 per cent. by German-Americans, and 27 per cent. by German citizens of Great Britain.

The American Metal Co. had an authorized capital of $25,000,000. The company controls the Ohio & Colorado Smelting & Refining Company, the Bartlesville Zinc Company, Chanute Spelter Company, Metallurgical Company of America, American Zinc & Chemical Company, Compania Minera de Penoles of Mexico, the Compania de Mineralesy Metals of Mexico, and Cia Metallurgical de Torreon of Mexico.

William and Charles Gillespie, of Gillespie Bros., hardware, Orangeville, Ont., who have been ill with the influenza, are recovering.

The Victory Loan---Why?

PATRIOTISM, at the present time, joins hands with self-interest. Patriotism demands that the Victory Loan be oversubscribed; the self interest of all merchants demands the same thing.

Forgetting altogether, for the moment, that the Victory Loan offers an untaxable investment yielding 5½%; that the security is the present and future prosperity of Canada; we need to remember that the Victory Loan is required to keep our wheels of commerce and industry turning.

Due to war conditions, England can not send cash to Canada for our wheat, our bacon, our shells. We must pay for these temporarily—giving John Bull credit, as it were, though running a contra account with John, who is feeding our soldiers at the front. John Bull can be trusted to pay, but we are called upon to extend him credit for the time being.

If our wheat, our bacon, our shells, our ships, our timber are to be bought for the Allies we must temporarily pay for them. Whether peace comes shortly or not this duty is still ours. If we didn't get the money in Canada to pay for that wheat, timber, bacon, shells, our farmers would cease to prosper, our factories would close—we would experience hard times.

We must make the Victory Loan an overwhelming success. By so doing we are keeping business in Canada healthy; we are doing still more to turn Canada from a debtor to a creditor nation; we are getting a share in one of the world's best investments; and best of all, we're spiking more guns of the Autocracy which has bedevilled Germany, and which was eagerly seeking to bedevil the world.

How German Wealth is Being Used in War Against its Owners

IT is a poor day when A. Mitchell Palmer does not seize a million dollars' worth of German-owned wealth in the United States and turn it in to be used directly against the Kaiser. Mr. Palmer is the Alien Property Custodian and has been very active in ferreting out cleverly-concealed German-controlled firms operating in the United States. He is the biggest buyer of Liberty bonds in the country and to date has something over $60,000,000 worth, all bought with the Kaiser's own money. Here is what he says about his work:

"We have made every dollar of German money in America fight the Germans. Great iron and steel mills, which were wont to send their profits out of America back to Germany, are now sending their profits to the Treasury of the United States and their product into war munitions to destroy their owners.

Turned the Tables

"Great woolen mills over in New Jersey, which were wont to send large dividends back to Berlin, are now sending those dividends to Washington, and working every loom and spindle to make those army suits for the boys with Pershing in France.

"Great metal, mining, and mineral companies all over the United States, owned with German money, are working night and day, three shifts to the day, to produce material, not for the German over here to plant his industry in our midst as a sort of spy system against us, but for the United States, which he sought to destroy.

Gigantic Plans

"During the last forty years, after Germany conceived her plan to colonize, subdue and control the world, she began to plant on American soil a great industrial and commercial army. That army had become so large and so powerful that when the war broke in 1914, Germany believed it would be strong enough to keep America out of the war, or failing in that, it at least would be a powerful ally to her cause if we did get into the war.

"She planted that army in every city in the Union, and its tentacles stretched out across the Pacific to Hawaii and the Philippines, in the Atlantic to Porto Rico and Virgin Islands, down to the Panama and up to Alaska, without any part of American soil free from its touch.

Treacherous Huns

"As I have sat here in Washington, taking over this enemy property, I could piece together the picture of Germany's industrial and commercial organization upon this soil. I could see how we mistakenly welcomed these people into America for the purpose of exploiting our great resources. I could see now how they husbanded those resources for their own use and their own power, how they kept secret from America processes and patents which might some day be used against them, and how they built up industry after industry, totaling possibly $2,000,000,000 in money value and billions more in potential political value. From what we know of Germany now we know that she did that because she wanted to have on American soil her allies in case of trouble.

Never be Soiled

"Knowing that, let me tell you what we are going to do.

"We are going to put upon the auction block every one of these great German-owned industries in America and sell them to American citizens, and we are going to do it now. We are doing it. We have sold dozens of them already. We propose to say to Germany, now while the war is on, that her plan has dismally failed. We propose to say to Germany now that, no matter how many worlds she might conquer, no matter what price she pays, no matter what loss she suffers, no matter what armies she destroys, there is one place on God's green earth that will never again be soiled by the marching legions of her army, and that place is the United States of America."

WILL SAVE $900,000

Nine hundred thousand dollars will be saved along with a material reduction in labor and time through the determination of the American Ordnance Department to allow an alternative specification in future contracts for the manufacture of magazines for .45-calibre revolvers. About 30,000,000 of these magazines remain to be completed. Through changing the method of attaching the base of the magazine to the tube the reduction in number of operations required has reduced the cost of production by 3 cents on each magazine.

Many Hardware Lines in Latest List of War Curtailments

THE Priorities Division of the United States War Industries Board, following the policy of conservation of labor, fuel, transportation, material, and capital where possible in order to supply war demands, announces the following industry curtailments:

Electric fans.—On the twelve-months' basis, curtailed to 40 per cent. of 1917 production.

Safes and vaults.—(1) Heavy safes and vaults, six months from October 1, 1918, curtailed 100 per cent; (2) smaller safes, and (3) office cabinets and the like, for six months commencing October 1, 1918, curtailed to 50 per cent. of six-twelfths of 1917 production.

Mowers Reduced

Lawn mowers.—From October 1, 1918, for three months curtailed to 40 per cent. of three-twelfths of 1917 production and that the industry be notified to get on war work before the expiration of said three months.

Pottery.—For six months from October 1, curtailed to 50 per cent. of six-twelfths of 1917 production.

Padlock industry.—For six months from October 1, 1918, curtailed to 70 per cent. of 1917 production.

Builders' hardware.—For six months from October 1, 1918, curtailed tonnage used in production to 40 per cent. of 50 per cent. of tonnage used in 1917 production.

Stepladders.—Six months from October 1, 1918, curtailed to two-thirds of six-twelfths of 1917 production.

Scales and Balances

Scales and balances —Six months from October 1, 1918, curtailed as follows:

1. Heavy track scales and heavy automatic dial scales curtailed to 50 per cent. of six-twelfths of 1917 production.
2. Store and counter and spring scales and balances curtailed to 40 per cent. of six-twelfths of 1917 production.
3. Automatic dumping and recording scales curtailed to 50 per cent. of six-twelfths of 1917 production.
4. Scientific scales not to be curtailed.

Sporting arms and ammunition.—Subject to revision, curtailed on the 12 months' basis to 10 per cent. of 1917 production.

Cash Registers

Cash registers.—(a) Because of the large amount of government work now being done by the National Cash Register Company, its production of cash registers for six months from October 1, 1918, be curtailed to 25 per cent of six-twelfths of 1917 production; (b) all other cash register concerns for six months from October 1, 1918, curtailed to 50 per cent. of 1917 production.

Rat and animal traps.—For six months from October 1, 1918, curtailed to 50 per cent. of six-twelfths of 1917 production.

Talking-machine needles.—For six months from October 1, 1918, curtailed to 50 per cent. of 1917 production in tonnage.

Ice cream freezers.—For six months from October 1, 1918, curtailed to 40 per cent. of six-twelfths of 1917 production.

Electric vacuum cleaners.—For six months from October 1, 1918, curtailed to 75 per cent. of six-twelfths of 1917 production.

Direct Routing of Freight is Planned Under New Order

AN important order which will affect all freight coming into Canada from the States has been issued by Director General of Railroads McAdoo, with a view of securing more direct routing and eliminating delays. He has issued the following instructions to the freight traffic committees:

"As an aid in the efforts of the Railroad Administration to secure the maximum in transportation efficiency of the carriers under Federal control, it would seem necessary to, at the very earliest possible date, establish what might be termed 'universal' transit, i.e., outbound shipments from a transit point to be allowed to move via any road regardless of the one hauling the inbound or raw product to the transit point, providing that such arrangements be confined to direct routes, and that nothing under such extension shall create circuitous or unduly out-of-route transportation.

Correction of Tariffs

"Tariffs restricting the application of outbound shipments to the roads hauling the inbound, or tariffs in any wise in conflict with the foregoing, shall be corrected, and where necessary to establish joint rates in order to apply the 'universal' transit system, such joint rates are to be established as soon as possible.

"Existing transit arrangements involving circuitous routes and back hauls shall be abrogated, or a proper charge therefor made, before doing which, however, associations or individuals enjoying such privileges are to be consulted, so that the abrogation, or the making of a charge, may be brought about with the least possible interruption to current business and the matter worked out harmoniously.

"It should be understood that where there is a transit charge in effect to-day it is not to be disturbed at this time, the question of applying a charge for transit service generally throughout the country, or the elimination of the existing transit charges, being a matter for future consideration."

Under Private Control

Under private operation of the railroads the granting of transit privileges was based on commercial necessities existing at certain points, but carried a restriction which forced the outbound product to move via the same railroad that handled the raw product into the transit point. Under conditions that exist to-day, where there is unified control and operation resulting in a single system of railroads for all practical purposes, the restrictions that operated under private control could not be continued without a material loss in transportation, such as switching at transit points, loss in car days, and the use of circuitous routes in order to force the outbound product to the railroad or system that handled the inbound product.

Copper Prices Fixed At 26 Cents a Pound

President Wilson has approved an agreement, made between the producers of copper and the price-fixing committee of the War Industries Board, that the maximum price of copper shall be continued at 26 cents per pound, from November 1, 1918, for shipments after said date, but subject to revision after January 1, 1919, f.o b. cars or lighters at Pacific coast refineries for Pacific coast destinations, and f.o.b. cars or lighters at New York if shipped to eastern or interior destinations from Pacific coast refineries and from refineries in the interior of the United States. All shipments made after January 1, 1919 are subject to any change in price made by the price-fixing committee to take effect after that date. This maximum price is subject to the additional charges on copper shapes approved by the price-fixing committee on June 5, 1918.

The conditions are: First, that the producers of copper will not reduce the wages now being paid; second, that they will sell to the United States government, to the public in the United States, and to the allied governments at not above the maximum price; third, that they will take the necessary measures, under the direction of the War Industries Board, in the distribution of copper to prevent it from falling into the hands of speculators, who might increase the price to the public; and fourth, that they will pledge themselves to exert every effort necessary to keep up the production of copper so as to insure an adequate supply so long as the war lasts.

J. D. Allan of Allan and McKenzie, when the "flu" epidemic was at its height in Galt recently, generously offered the authorities the use of the fine Gilholm residence on East Main street for an emergency hospital.

Current Events in Photograph

MODEL HOMES FOR SOLDIERS

The question of providing model homes for soldiers and workers is receiving a great deal of attention in Canada, in England and in the United States. England has probably made more real progress than any of the others. Houses of the type here shown have been erected in several model villages and have proven so satisfactory that it is likely that something very similar will be provided for the thousands of soldiers who will have to be looked after when the war ends. The British Labor Party has a proposition for Government consideration which provides for the expenditure of $1,500,000,000 for suitable homes for soldiers and workers.

Get Ready for Xmas Window Contest

Eight Cash Prizes Are Offered by Hardware and Metal For the Best Displays—Start Now to Try Out Your Ideas For the Christmas Window—Is Your Window a Profit Producer or a "Slacker"?

DON'T forget the Christmas window display contest and the eight cash prizes offered by HARDWARE AND METAL for the best photographs submitted before January 1, 1919. Make your plans with a view to becoming a participant in this contest and carrying off the money. Are your windows profit producers or slackers? That depends entirely upon the opportunity you are giving them. The sales of any line of hardware goods are in direct proportion to the prominence given that line. There is no better way of boosting your sales than by attractive windows. There is no time in the whole year when you can make a better display or interest such crowds of people in window displays as at Christmas time. Every passer by is a potential customer. Thousands of people are looking for just the right thing to give. If you have the goods in your window you can turn these people into actual buyers. But you must get your goods before them.

A Double Profit

Every window you arrange with a view of photographing for entering into HARDWARE AND METAL'S big contest will speed up the sales possibilities of your store and mean money in your pocket in two ways. You will certainly get rich returns from a good window display and the cash prizes offered mean just that much "velvet" for the winners. Remember the windows must be arranged with goods for the Christmas trade. It is not necessary that your windows be works of art. This is not desirable from a sales standpoint. Windows that are very pretty, often have little "pull" in them from a selling point. What the people want to see is what you have got to sell, and at Christmas time they want to see if you have in your store the things that are suitable for the gifts they would like to make. Hardware firms have an exceptionally large number of articles that find a welcome place as gifts in any home. They have a real value and will give real service.

Make Good Display

They lend themselves readily to an attractive display and effects to be obtained from a selling standpoint are enhanced by the ingenuity of the window dresser. Now is the time to start planning for your window and to get ready to win one of the prizes offered by HARDWARE AND METAL. You can try out a good many ideas between now and Christmas that will not only make money for you but will give you valuable bases on which to plan your grand display for Christmas. Try changing your windows weekly and you will be surprised at the results you will achieve not only from a window dressing standpoint, but in increasing sales. You do not need high priced window display fixtures. Many of the best window displays are those made without artificial aid of this kind. It is the natural taste of the window dresser in the selection and arrangement of goods that counts rather than an elaborate display which may cause people to stop for a moment but never makes them think of entering the store to buy.

Give Them A Chance

Many hardware firms all over Canada have new members on their sales staffs this year. If you have a young man in the store who shows an interest in arranging the stock or dressing windows, here is a chance to let him show what he can do. Give him a free hand and let him go to it. You may be surprised to find that his ideas will result in an agreeable increase in your sales.

EDITORIAL COMMENT

GENERAL rout seems to have succeeded General Ludendorff.

* * *

"WHY an armistice? I have got them!" Field Marshall Foch is reported to have said at the recent Versailles conference. That's the way to talk and he follows it up with another smash at the Hun.

* * *

SOMEBODY is always taking the joy out of life for the Germans these days. Now that Rheims cathedral is no longer within range of their guns and there is no chance to bomb hospitals the Huns must feel badly.

* * *

DID you ever think there are two kinds of shelling, both of which are equally effective in smashing the Huns. The boys on the Western front have been doing one kind and the folks at home this week have been doing theirs by "shelling out" splendidly for Victory Bonds.

WHAT OF THE FUTURE

GERMANY is alone against the world. When her ally Austria accepted the Allies' terms she was left without a friend. Will the Kaiser and the Prussian militarists be able to force a continuance of the struggle or will they give in? What the next few weeks will bring to the world no one knows but it is the part of wisdom to look for a continuance of the war. There must be no turning back or slowing up of efforts. Peace talk might have a tendency to make those at home slacken up. This will handicap the boys on the firing line who are heading for Berlin. From a business standpoint the future is especially important and many of the biggest men in the country are trying to plan ahead. Many of them frankly admit it has them guessing. On one thing all seem agreed and that is that Canadians should be optimistic. Many firms are looking ahead to big business. Others think there will be a period of readjustment and then one of great prosperity. As far as hardwaremen are concerned the future seems bright. With millions of dollars' worth of much needed construction work, home building, etc., held up it would appear there will be a steady demand for materials. The whole situation centers around financial conditions and indications are that the United States will have huge sums to loan at reasonable rates and Canada, as Uncle Sam's nearest neighbor, may reasonably be expected to benefit.

TREAT 'EM ROUGH

"TREAT 'Em Rough" is the slogan of the crews who man the tanks when they are going into action against the Huns. It has been found by bitter experience that this is the only way of making the Germans understand. They mistake kindness for weakness. The same thing applies in regard to business methods. "Treat 'em rough" must be the slogan of the Allies in the coming commercial battles. The Hun will try by every means, fair or foul, to get back the markets he has lost by the war. Any laxity on the part of the Allies will be taken full advantage of. It is rather gratifying to see the way the Alien Property Custodian in the United States is dealing with German interests. A few days ago a note was received from the German Government protesting against the Americanization of German owned concerns in the States. In the next sixty days German owned mills, textile concerns, chemical and color companies, a magneto company and several other plants, valued in all at well over $100,000,000 will be put on the auction block and sold to firms who can guarantee that they will never more be under German influence. This is the American Government's answer to Germany's note of protest and it is the only kind of an answer that will strike home.

HELPING RETURNED MEN

IN order that the value of re-training may not be lost the Invalided Soldiers' Commission has organized a follow-up system. It is realized that finding a place for the handicapped is not enough; he must be followed up, his progress watched, he must be encouraged and sustained throughout that first period of adjustment. This does not mean that he is to be coddled; quite the opposite is intended. Too much sympathy and too much support at such a time do him the greatest injury. But he must be made to help himself and encouraged to believe in himself. Upon employers is urged the necessity for sympathy and consideration in the early stages of employment of these men. Many of them are restless and at first find it hard to settle down to work. However, they gradually become accustomed to the new surroundings and the new work, and with the kindly word of encouragement, day by day they gain confidence in themselves and with that comes increased efficiency.

TORONTO, CANADA NOVEMBER 9, 1918

What is the True Meaning of the Victory Loan?

We are within sight of Victory, and now, less than ever, can we afford to rest in a false atmosphere of security.

Now is the moment for a grand rally, an irresistible push forward with men and money.

The men are there—and always fresh ones go. They must continually be fed, clothed, and supplied with ammunition. The work of supporting them, the EASY PART, is ours. Shall any one of us fail them at this end?

NO, A HUNDRED TIMES, **NO!**

And what are we asked to do? What is it that Canada asks of us?

Simply to LEND to our own country, more money, that the great fight may be finished for us, and that the sacrifices made for us in four years of war shall not be in vain. No thinking man or woman who realizes this can fail to respond to the limit of his or her ability.

And Canada makes it very easy for us to do this through

THE VICTORY LOAN 1918

She will pay us interest at 5½ per cent. on any amount we lend. She offers us Bonds backed by the country itself, the highest security in the world, Bonds issued in convenient denominations of $50, $100, $500 and $1,000, repayable in 5 or 15 years, as we may desire.

Let us get right down to business, OUR OWN BUSINESS—AND HELP TO OVER-SUBSCRIBE THE VICTORY LOAN 1918. And let us do it NOW.

BUY VICTORY BONDS

EVENTS IN THE TRADE

Personals

Ferris Stricker, formerly with the Bond Hardware Co., at Guelph, Ont., has taken a position in Hamilton.

L. P. Foucar, hardwareman of Tottenham, who was stricken with a paralytic stroke on September 23, is still confined to his bed.

Thomas Jones, manager of the Cowan Hardware Co., London, Ont., is recovering nicely from an attack of influenza.

George Tutor, of the Purdom Hardware Co., London, Ont., was badly shaken up by falling down the elevator shaft. He is making good progress toward recovery.

B. B. Halliday, sales manager of the Canada Cycle & Motor Company, Limited, Weston, is leaving for a tour of the Canadian West and California on November 12, and will be away for two or three months.

A. C. Fraser, senior member of the Fraser Hardware Co., Galt, Ont., is a happy man, his daughter, Nursing Sister Edna Fraser having just returned after an absence of three years on short furlough. She went overseas with the University of Toronto No. 4 Base Hospitals in 1915, and after serving in French and English hospitals for a time, spent 22 months in Saloniki nursing the British Tommies. Miss Fraser declares "there are no boys like the Canadians as fighters and patients."

Recently she had an audience with King George at Buckingham Palace, being one of the two Canadian nurses in the party to be presented.

Obituary

The death occurred at Oshawa, Ont., of William F. Cowan, president of the Ontario Malleable Iron Co.

T. J. E. Papineau, formerly of Toronto, died at Moose Jaw, Sask., after an illness of ten days with influenza. He was a salesman with the Great West Electric Company, of Winnipeg.

Ex-Mayor William Black, of Durham, Ont., died on Monday. He was 61 years old and had been in the hardware business for many years. He was a former resident of London, Ont.

Pneumonia, which developed from influenza, caused the death of Clifton J. Oille, secretary-treasurer of the Goodyear Tire & Rubber Company at his nome in Toronto.

W. A. Tait, a traveller in the employ of J. H. Ashdown Hardware Co., Calgary, fell a victim to pneumonia last week. He died after two week's illness, following an attack of influenza. The remains were sent to his former home at Campbellford, Ont.

Leslie Johnston, formerly a clerk in E. E. Johnston's hardware at Brockville, Ont., died after a short illness with pneumonia, which followed influenza. Lately he had been manager of the telephone exchange at Lansdowne, near Brockville.

Montreal News

James Craig, representing E. T. Wright & Co., of Hamilton, is in Montreal this week. It is his intention to proceed to St. John's, Nfld., after completing his calls here.

A. G. Bowman, with the Russell-Irwin Co., of New Britain, Conn., is expected to call on the Montreal trade during the coming week.

F. H. Houghton, of the Martin-Senour Co., was confined to the house for a few days this week.

DID YOU GET ONE?

HARDWARE AND METAL understands that a twelve-page paper, supposed to represent the September 21, 1918, issue of HARDWARE AND METAL, but containing none of the regular features of HARDWARE AND METAL, has been mailed to the trade, represented as a "special number" of our paper.

This paper bears the registered name and heading of HARDWARE AND METAL and also the name of the Maclean Publishing Company, with publication office as Toronto, Ont. We would greatly appreciate it if readers who have received a copy of this paper will kindly mail same to HARDWARE AND METAL, 153 University Avenue, Toronto.

Trade Notes

The St. Lawrence Broom & Brush Co. has been registered at Montreal.

Sanderson Pearcy & Co., Limited, of Toronto, have removed their office and warehouse to their new plant situated at 272 Van Horne street at the corner of Dufferin street.

The Dutton Wall Company has commenced work on a new hardware store at Pathlow, Sask. The building will be two storeys and the firm is putting in its own electric lighting plant.

In the Victory Loan parade at Sarnia, Ont., the commercial float of the Mackenzie Milne Co., hardware, was awarded first prize. The float consisted of a lifeboat, built by the firm and drawn by a tractor. All was very attractivly decorated.

Among the applications for Victory Bonds in the West were J. H. Ashdown (personally) $200,000; Ashdown Hardware Company, Saskatoon, $30,000; Ashdown Hardware Company, Calgary, $30,000.

The Royal Canadian Specialties (Hamilton Whip Co.), of Hamilton, Canada, have secured the selling rights for "Reflex" spark plugs, made by the Reflex Ignition Co., Cleveland, Ohio. They also have the selling rights for the G. A. C. Comfort foot rest.

Fine Promotion For D. A. Whittaker

D. A. Whittaker has been appointed assistant to W. S. Fallis, managing director of the Sherwin Williams Co. of Canada Ltd., and will have his headquarters in Montreal.

To HARDWARE AND METAL Mr. Fallis stated that Mr. Whittaker had been associated with the Sherwin-Williams Co. for the past fourteen years. During this period he has served in various important capacities, having been cashier, and recently came to his latest appointment from the accounting department. In addition to his long connection with the Montreal office Mr. Whittaker was at Winnipeg under Mr. Fallis' direction for some time and is thus versed in Western Canada conditions.

GOLDEN WEDDING CELEBRATED THIS WEEK

W. L. and Mrs. Haldimand, of Montreal, celebrated the sixtieth anniversary of their marriage last week, and received the congratulations and good wishes of many relatives and friends. One of the proud facts attendant upon the anniversary is that four of the eleven grandchildren are now in khaki. Mr. Haldimand was a well-known figure in the hardware manufacturers' agency business for many years, and has lived all his life in Montreal. He is 91 years of age.

New Companies

The United Iron Works & Machine Company, Limited, with a capital of $500,000 and head office at Haileybury, Ont., has been granted a charter.

The Alloy Steel Works, capital $500,000, and head office at Toronto, has secured a Provincial charter.

Pte. Alex. Kay, a former employee of E. I. Torrens, hardware, Tillsonburg, Ont., was killed in action recently. He went overseas with the 168th Battalion.

Lieut. Alex. R. Grant, of the 87th Battalion, was killed in action on October 1. He was in the employ of Peart Bros.' Hardware during his residence in Regina. He enlisted as a private in the 87th Grenadier Guards of Quebec, and went overseas in April, 1916. He won the Military Medal for bravery on the battlefield in July, 1917.

BIG RUBBER COMPANY AMONG FIRST SUBSCRIBERS

The Dunlop Rubber Company were one of the first to announce a subscription to the Victory Loan. The directors decided, after a brief discussion, to subscribe for one million dollars' worth of the bonds. This subscription did not represent conversion of previous loans, nor did it include personal subscriptions by either directors or employees of the company.

One of the most touching things in connection with the employees' campaign —the first subscription came from Pte. W. C. Dies, formerly head of the Dunlop shipping department, who is one of the worst wounded men that ever returned to Canada. Pte. Dies lost both eyes and his right hand at Vimy Ridge, and was awarded the Military Cross. When he heard that the employees' subscription list was open he phoned the company and asked to have his name put down for $200.

Kitchener Firms Hit Hard by Influenza

The hardware firms at Kitchener, Ont., have been particularly hard hit by the influenza epidemic. About 75 per cent. of the hardware men have been ill, many of them seriously, and three deaths occurred. Oscar Bucher, aged 23, of the firm of George Bucher & Son, was the first victim, dying of pneumonia after a brief illness. He entered the hardware business at the age of 15 as a clerk in the store of George Potter. Later he associated himself with Lincoln Snyder, whom he bought out two years ago in partnership with his father under the firm name of George Bucher & Son. Since that time, under his efficient management, the business increased rapidly.

Manager Ed. Weiss, of Knell's Hardware Company, whose obituary appeared in a previous issue of HARDWARE AND METAL, was the next to die.

The firm of John Fennell & Son was the third to feel the seriousness of the epidemic in the death of their head clerk, Alfred Kroetsch.

PRICE MAINTENANCE PERMITTED

U. S. Courts Say Manufacturers May Refuse to Sell Price Cutters

Norfolk, Va.—United States Federal Judge Waddill has dismissed an indictment recently returned against Colgate & Co. for alleged violation of the Sherman law.

Judge Waddill sustained the demurrer of Colgate & Co. that a manufacturer, provided he is not in conspiracy with other manufacturers of similar products, has the right to fix and enforce the maintenance of reasonable prices, and that such a manuing to sell again to a retailer who fails or refuses to maintain such a fixed price. Price cutting demoralizes business theh court asserted.

STORM SASH HELP TO CONSERVE COAL

There has recently been a considerable revival in the storm sash trade in the United States. Incidental to the campaign for coal conservation, it has been estimated that in the ordinary building fully one-third of the coal supply could be saved by the use of storm sash. With coal at the present prices, it appears that the entire cost of storm sash could soon be saved and this saving is recurrent year after year. The many hardwaremen at this season of the year are impressing upon their customers the patriotic benefit of this economy, with profit both to themselves and to the purchaser.

QUESTIONNAIRE IS SENT OUT TO AMERICAN PAINT FIRMS

Some important developments may take place in the paint business of the United States shortly.

Paul H. Butler, of the Institute of Industrial Research, has sent out to the paint industry of the country a questionnaire covering in general the following points: Business and administrative —name of establishment, address, date of business established, capitalization, credit rating; plant—location, building construction, floor space, insurance rate, fire prevention, etc.; manufacture and production—principal materials used, grade of varnish made, maximum capacity per day, etc.; labor; shipping facilities; point of contact; inventory of producing equipment.

SALES CONVENTION MARTIN-SENOUR AND INTERNATIONAL VARNISH CO.

General manager A. T. Black informs HARDWARE AND METAL that the annual sales force convention of the Martin-Senour Co., and of the International Varnish Co., will be held in Montreal next week. The sessions will open on Monday and will be continued daily until Thursday, November 14.

Owing to the prevalence of the Spanish influenza, this convention, among others, had to be postponed.

CATALOGUES and BOOKLETS

Taylor Forbes Company, Limited, Guelph, have issued catalogue number H64 for 1919, featuring TF lawn mowers. The catalogue consists of 32 pages and is splendidly illustrated in colors and features lawn mowers, grass catchers, lawn edgers and trimmers, lawn rollers, horse lawn mowers, combination rollers and mowers and contains a considerable amount of information which should interest the hardware merchant. Copies of the catalogue will be supplied upon request.

The Tallman Brass and Metal Co., Limited, of Hamilton, Ont., has issued a new stock list of brass, copper and bronze rod, brass and copper sheet, tubing and bars. It also includes electric fixtures, brass goods, arctic metal, solder, lead and similar lines.

"Gone Again" is the title of an attractively gotten up booklet issued by the Crescent Belt Fastener Company, 381 Fourth Ave., New York. It is filled with practical information showing the possibilities of getting increased service out of belting if old time methods of belt joining are completely discarded. The booklet by way of variety is written in the form of a movie comedy. A copy will be sent to all readers of HARDWARE AND METAL requesting it.

The Best Weather Strip Co., Limited, of Hamilton, has issued an attractive folder illustrating its new all bronze weather strip, spring bronze weather strip and No. 23 zinc and felt door bottom.

Catalogue No. 81 of Imperial Standard Scales, just issued by the Burrow Stewart & Milne Co, Ltd., of Hamilton, Ont., contains one hundred pages, listing a wide range of scales of all sizes and for all purposes. It is well illustrated and most attractively printed.

Hardwaremen Quick To Seize Opportunity

Hardwaremen have been quick at all times to see where they can be of service to the community in which their store is located. This has led them in many cases to branch out into all sorts of lines, and in doing so they have built up profitable side lines.

W. P. Macdonald, of Wapella, Sask., is one of the latest to see an opportunity and seize it.

He is building a cement engine room at the rear of his hardware store and installing an electric lighting plant that will enable him to supply electricity for lighting to many in his vicinity. The plant will be so arranged that new dynamos can be added at any time, and if the demand warrants it Mr. Macdonald will in time be able to furnish electric lighting to all parts of the town.

THE CLERKS DEPARTMENT

GETTING THINGS DONE BY GETTING MEN TO DO THEM

The Outstanding Gift of Coleman Du Pont, Himself a Doer of Big Things in Business, is the Power to Pick Able Men to Help Him

UPON the art of getting other men to do things for him, Coleman Du Pont—better know to many as General Du Pont—bases his own remarkable power to get things done. Modesty may be a characteristic of greatness. General Du Pont's modesty is genuine and admirable, but it covers his greatness as a pocket handkerchief might cover the Pyramid of Cheops. He picks good men to get things done for him, but before he places them Du Pont has done something colossal without their assistance or the assistance of anybody else. He believes in assistants who make their own decisions. He makes momentous decisions himself. Here is what B. C. Forbes has been writing about him lately:—

Coleman Du Pont has done and is doing more big things than almost any other financier or captain of industry in America. Wall Street never knows where his activities are likely to break out next. He confines himself to no one groove.

One day he is disclosed as the builder, right in the heart of Wall Street district, of the largest skyscraper in the world, at a cost of $30,000,000. Next he electrifies the whole financial and business community by quietly buying up control of the world's best known insurance company, the Equitable Life, with its $600,000,000 of assets and outstanding insurance of $1,500,000,000, after a succession of battles royal among kings of finance, including J. P. Morgan, E. H. Harriman and Thomas F. Ryan, for control of this stronghold of wealth and power. The most famous hotelkeeper in America dies, and scarce has the public ceased to read tributes to his worth from all classes from President Wilson down, when the news leaks out that Coleman Du Pont has taken over the establishment, the Waldorf-Astoria. Or a company is organized to extend financial assistance on merciful terms to thousands of workers and others in needy circumstances, and, lo! Du Pont is at the head of it.

Secrets of His Strength

"'How have you been able to do so much, in so many different lines?" I asked this sleepless, ubiquitous doer.

"I haven't done much—I don't do much. I pick other men to run things for me," he replied with a directness of speech that is characteristic of his actions.

"But how do you go about making your selections of men?" I further queried.

"You can hire a good doctor or lawyer or other professional man; but you have to find a good business man," was his response.

"Where or how do you begin to look for the good business men?" I persisted.

An Eye on "Good Starters"

"Where? I'm on the lookout for the right kind of men everywhere, anywhere, and always. I've found them North and South; I've found them in factories, in banks, in steel mills, even under the ground—in coal mines. Whenever I spot a man who has made a good start I watch him, I follow his progress, I try to get a correct line on his ability, I find out all I can about the results he produces."

"What are the qualities he must have?" I probed.

"Ability."

I smiled. "'How do you analyze, how would you define, ability?"

"Ability is the thing that gets results honestly," was the immediate, emphatic reply.

"Get a man with ability," he added, "who also has enthusiasm—and, of course, absolute honesty and fairness; then give him full responsibility, give him whole-hearted support, and you will get the one thing you want, results."

"I have been told that once you pick a man for a job you never interfere with him, but put all decisions, all responsibility, directly and wholly up to him," I remarked.

Gives Them the Reins

"Certainly. If I'm to hold him responsible for results, he must have freedom to make all decisions. If a man wants my advice, my judgment, I am always ready to give it to him; but I insist that he make the final decision, that the action taken must be his, not mine, as he is responsible for the outcome, not me. Some men make the mistake of overruling their lieutenants, of not accepting their judgment. How can you expect to develop the best that is in a man if you don't allow him to exercise his judgment and don't let him shoulder the entire responsibility for the results? If a man fails to make good, if his judgment repeatedly proves unsound and the results are a failure, then of course I replace him."

Well Chosen Lieutenants

As a matter of fact, Coleman Du Pont has the reputation of uncanny judgment in choosing lieutenants to manage his enterprises. He has developed almost as many young business geniuses as Charles M. Schwab has. His record reflects and proves this, for success has crowned every project he has taken up—and they have been many, varied and momentous—in the course of his eventful, dynamic career.

His military title, by the way, came through his interest in the National Guard. His work in that connection led four successive governors of Delaware to appoint him a brigadier-general on their staffs.

Born Poor But a Good Athlete

The name "Du Pont" conjures up in the public mind riches and powder. Coleman Du Pont was born poor, and never had anything to do with powder, except in his capacity as a grimy, work-a-day coal miner, until he had made his mark and his fortune in other things. His father, Antoine Bidermann Du Pont, though of the famous Du Pont family of Delaware, had no interest in the ancestral powder organization, but was engaged in several industrial enterprises in Kentucky at the time Coleman was born, in Louisville, on December 11th, 1863. After his preliminary schooling, finding he had a liking for engineering, young Du Pont proceeded to the famous Massachusetts Institute of Technology.

Here he played as hard as he studied. Six feet four inches in height and weighing two hundred and ten pounds, not a pound of it superfluous fat, he made an ideal captain of the football team, stroke of the crew and captain of the baseball nine. He could run one hundred yards in ten seconds. He was also a crack shot, a powerful swimmer, a tug-of-war giant, and a doughty competitor in the wrestling and boxing rings. Breaking bronchos was another of his favorite sports. All this, however, did not prevent him from graduating creditably.

He did not aim at starting at the top or half way up the ladder when he sought a job. He actually began as a mule driver in a coal mine, at Central City, Kentucky. From mule driving he graduated to the blacksmiths' shop in the mine, and later, through various equally grimy and sweaty stages, to the status of a full-fledged miner.

Next he was made mining engineer, and his work became so effective that he was finally appointed general manager of the property.

Of Democratic Make-up

It was significant of his democratic make-up that the first thing he did on gaining chief power was to launch a comprehensive plan for the remodeling of Central City, including the erection of comfortable homes for his co-workers, the laying of good streets and roads, the installation of a modern sewerage system, water works, electric lighting system, etc. He also encouraged the community to build schools

and churches, to open parks and to maintain recreation grounds. He did it all without suggestion or taint of paternalism. Indeed, the old inhabitants still delight to relate how he democratically attended weddings and baptisms and funerals, and was altogether as one of them.

For ten years he remained in that field. Then, when he investigated and found that the highest salary paid in the whole coal region was four thousand dollars, he looked for a wider sphere. The steel industry was then attracting some of the best brains of the country and yielding generous rewards. He opened negotiations with the heads of the Johnston Steel Company of Johnstown, Pennsylvania, whom he knew, and they gladly elected him general manager. Here he not only made good as a steel operator, but found an ideal field for his irrepressible energies in building street car lines. The presidency of the Johnstown Passenger Railway Company was one of the many offices he filled—this one, in fact, he still fills.

He Decided to Retire

In a few years he had built traction lines in Pennsylvania, New York, and New Jersey, and had embarked on coal-mining enterprises, with such success that he decided to retire from active business. He bought extensive farm lands in Maryland and Delaware, took up residence there, and began to conduct scientific farming on a mammoth scale, including the breeding of high-grade draft horses, pedigreed cattle, sheep, and other farm animals. He was an enthusiast on the subject of good roads, and he conceived the idea of building a model road clear through the state of Delaware, a project which, at a cost of more than two million dollars, is now well in hand.

Cincinnatus-like, Farmer Du Pont received a call to more important duties. The head of the famous Du Pont Powder Company had died, and a family council resulted in a summons to Coleman to take the helm. He was not quite forty. The life of a farmer, he had quickly discovered, did not afford the fullest scope for his head and hands. He had all the money he needed, but other urgings and motives impelled him to re-enter the business arena.

What Coleman Du Pont did for America's premier powder plant forms history. When he took hold there were seven clerks in the main office of the company—although this company had important interests in associated explosive enterprises. When he stepped out in 1915 there were some three thousand employees in the main office. The first thing he did was to amalgamate all the different offices and scores of sub-offices controlled by the Du Ponts into one strong, efficient corporation. Production was systematized and standardized. Able, high-priced managers were installed and clothed with large responsibilities and were offered premiums for results. For four or five years Coleman Du Pont arose at five o'clock in the morning and, as he once remarked, "thought powder, talked powder, ate powder, dreamed powder all through the day and night." By-products, formerly little regarded, were manufactured into 250 different commodities! When the call came for munitions to fight the Huns, the Du Ponts almost overnight were able to multiply their output by 100 per cent. by instantly placing on construction work an army of 40,000 men.

Then Stepped Out

Then, having placed the organization on a smooth-working, profitable basis, Coleman Du Pont did what for him was the natural thing: He stepped out. The rehabilitation, reconstruction, the upbuilding of the organization, had interested him intensely; but, that job finished, he was content to leave the management of it to others. He must needs tackle something new, something difficult, something demanding daring. So he sold out his powder interests at a profit of a million dollars for each of the more than thirteen years in which he had managed them.

It was at this stage (1915) that he decided to build the $30,000,000 Equitable Life Building. Scarcely was the paint dry when he coolly purchased, chiefly from the Morgan interests, a controlling amount of the stock of the Equitable Life Assurance Society itself, with the avowed intention of placing ownership of the company completely in the hands of its half-million policyholders. Other financial giants had fought for possession of this all-powerful financial weapon and had talked of mutualizing the company. Du Pont talked little but did mutualize it, selling his stock to the policy-holders at a net loss of $2,000,000. When asked at the time why he had carried through so costly a transaction, Du Pont replied: "I thought it was only right that the company should be owned by its policyholders, and I was glad, therefore, to be able to put it through. I guess I can stand the loss."

That last remark, "I guess I can stand the loss," throws light on Coleman Du Pont's method of handling men. Said one of the young men whom he "discovered" and who is now building up a remarkable reputation:

"'One funny characteristic of General Du Pont is that, unlike most capitalists, he does not go into a thing simply for the money there is in it for himself. I know from actual experience. More than once, when I have been with him in a proposition, he has balked at accepting a fair share of the profits. 'You did most of the work; you're entitled to the results,' he has insisted. Naturally, when you are associated with a man of that type, you put the best that is in you into whatever he asks you to take hold of.

IS CANADA READY?

(Continued from page 71.)

ported better than for any time in many years past.

In mercantile circles there has been no accumulation of large stocks. Never have there been so few failures, never such light outstanding obligations.

Money Plentiful

American financiers from all reports are going to have more money than they know what to do with as the wealth of the world has been pouring into the States. Uncle Sam is ready and willing to lend England and Canada large amounts of money if necessary, and scores of big Americans have their eyes on Canada as the country of the future for development.

There seems little doubt that for some time ship building will be an important Canadian industry. Millions of tons of ships will be needed to replace those lost. Canada is already busy on this work, and indications are that the output will steadily increase.

Anyone in touch with the railway situation knows that millions of dollars worth of construction work and improvement have been held up by the war.

We read of Baron Shaughnessy retiring as president of the C. P. R.—giving place to a forty-one year old man and suggesting as one reason for his retirement that a young man will be better fitted to carry on the wide extension work planned for after the war.

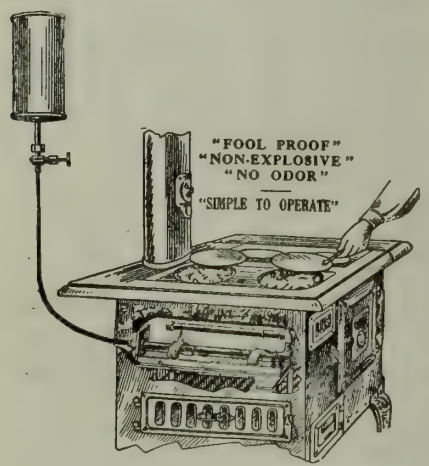
Railroad work — yes, there will be tremendous activity here. For four years no new work has been undertaken. More than this, during those four years hundreds of miles of track have been lifted for rails to be sent to France, won't rails be needed for this railroad extension work? Won't bolts and nuts be required? Won't ties be needed, and axes, saws and equipment to enable the ties to be brought out?

Work here alone for many of the munition workers. It isn't all steel, of course, that is suitable for rails; but some of the big plants will treat their Bessemer for rails; others will make spikes and bolts. Others again will make steel suitable for axes. Still others will make car axles—wheels—sheets for cars—all of the thousand and one things which will be needed to again put in order the rolling stock that has badly deteriorated during these rushed war days.

And think of the huge work of food production. The great desire of devastated Europe following the war will be for a square meal; and it will be this continent, the United States and Canada, which will be able to provide the foods. The United States and Canada almost alone will have big exportable margins. So the call will come for these products of the field. And the call will endure for years. It will be many seasons before devastated Belgium and hate-stricken France will re-establish the fruitfulness of their fields. For many seasons the call for food will come to Canada, keeping Canadian farmers hard at work at goodly wages.

Evidences that not only the farmer but the factory will be rushed is brought to the attention of *Canadian Grocer*—one of the MacLean business newspapers—only this week, an Eastern Ontario canner being asked to put a price on his plant. It appears an English syndicate wanted to buy—wanted in this way to make sure of canned goods for which they expect a huge European demand following the declaration of peace.

Nor is big work all that has stood in abeyance. It is true the railroads have been forced to let their tracks deteriorate, their trains go half cared for; it is true the Bell Telephone Co., has been advertising its inability to make necessary repairs as quickly as it would like; but it is true also that all up and down the country, from Dan to Beersheba, hundreds of people have been holding back hundreds of jobs simply because they had difficulty in getting the workers and materials to execute the jobs, and because war thrift made delay seem advisable.



Just as quickly as they can get the men and materials individuals, firms and corporations all over the country have work they want to go ahead with. All this means industrial activity, money in circulation and steady employment and incidentally stability and good business conditions.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

KEROSENE GAS MAKER

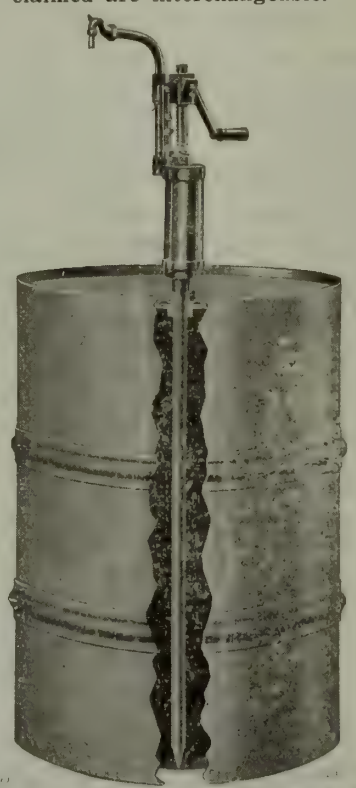
Armonts' Universal kerosene gas maker manufactured by Armonts, 63 Fifth Avenue, New York, is in effect like a carburetor and generates a blue flame vapor gas from ordinary coal oil. It burns a mixture of ten per cent. of the gas and ninety per cent. air, and it is stated produces a most intense heat. The "Universal" fits into the fire box of any stove, kitchen range, steam, hot water or hot air furnace. It has no wicks and is controlled by valves. It is claimed that it will heat, broil, roast, fry or bake nicer, quicker and cheaper

Kerosene Gas Maker

than coal, wood, or any other fuel. The claim is made also that there is no smoke, no odor, no dust, no dirt, and no ashes. Armonts' "Universal" is portable, and it is stated can be carried from the kitchen range to the stove or furnace. The claim is made that it is absolutely non-explosive and safe in every way. The use of the "Universal" is not confined to the home, and it is stated that, placed in a hennery, it will keep things so comfortable that as many eggs may be secured in winter as in summer.

VENEER CHAIR SEAT

Canadians are now manufacturing their own chair seats, and the demand for chair seats which hitherto went across the border, is now being met by home production. The Canadian Veneering Co., of Acton Vale, Quebec, are manufacturing three-ply veneer chair seats in such staple patterns as ball top, crown dining, round, square and local seats. The seats it is stated are well glued, nicely formed and carefully bored. The corners of the seats are rounded and the edges sand papered. The finish, it

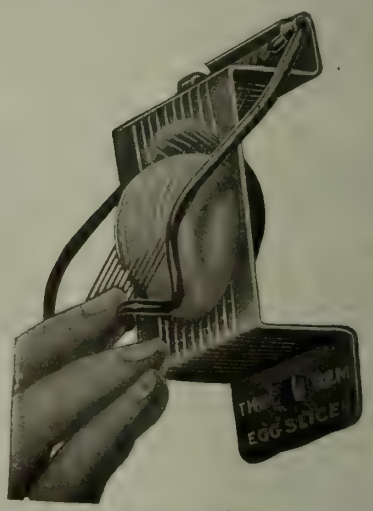


Veneer Chair Seat

is stated, is with real church pew varnish.

Richardson and Bureau of 55 St. Francois-Xavier street, Montreal, are the selling agents for the manufacturers.

SELF-MEASURING PUMP



The self-measuring barrel pump manufactured by the Milwaukee Tank Works, of Milwaukee, pumps quarts, pints, and half pints. It is claimed it can be adjusted in a few second to any ordinary barrel, thus turning an ordinary iron barrel into a self-measuring outfit. The makers claim that it is easy to handle, needs no tools, and is always ready. It is stated there is a spring lock on each pump, making it impossible for unauthorized persons to obtain the contents of the barrel. All the parts of the pump it is claimed are interchangeable.

Self-Measuring Pump

EGG SLICER

The "Gem" Egg Slicer made by the G. M. Thurnauer Co., of 6 East 20th st., New York, cuts hard boiled eggs into eleven uniform slices in one opera-

Egg Slicer

tion. It is stated it is clean, quick and dainty, and is especially adapted for salads and sandwiches. The cutting tray is of pure aluminium. The cutting handle is nickel-plated with automatically strung-piano wires.

LEAK REPAIRER

Se-Ment-Ol, a liquid chemical leak repairer, is being put on the market by the North Western Chemical Co., of Marietta, Ohio.

Se-Ment-Ol is poured into the system at any convenient opening. In perfect combination with the water, it is carried by thermal circulation to every part.

Although a liquid, it congeals quickly it is stated when it is exposed in small quantities to the air. It retains its liquid state until it finds a leak. Then it congeals, layer upon layer, in and over the leak until it forms a seal which it is claimed has resisted a pressure up to 500 pounds.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

TURPENTINE is attaining distinction as one of the most interesting items in the hardware man's stock. A further advance of 3c per gallon is recorded, with every indication that even higher levels may be expected. Markets in the South are very strong. Favorable war news, with opportunities which may develop for overseas shipments, are factors, along with advices that out-turn of crop this past season will not reach early estimates. The next month or six weeks may reveal very heavy advances.

Higher prices are the order of the day as applied to screen doors, screen windows and refrigerators. Orders are now being solicited for spring shipment, and figures arrived at show an advance of 15 to 20 per cent. The difficulty in securing suitable lumber, its high price and increased overhead expenses are mentioned as factors which have brought about this change.

A decline of 2c per pound has been recorded in antimony. This follows a drop of 1c per pound recorded last week, and the market is decidedly weak. Antimony is essentially a war metal, and favorable war news, with possibility of an early peace, are factors resulting in lower prices. Tin has stiffened somewhat this week from low levels reached last week. Licenses are very hard to get, but there seems to be some available. Lead is unchanged, but indications are that there is little if any at all available.

Horse rasps and horse tooth rasps have joined the list of goods to record advances, new prices being about 10 per cent. higher than former figures. Spring hinges are up about 5 per cent., and other lines of interest to the hardware trade which follow the upward trend are wood blocks, curtain stretchers, fibreware, and contractors' sieves.

The list on automobile oil is up 5c per gallon, and many lines of auto accessories have been revised. These include batteries, lamp bulbs, shock absorbers, cut-outs, lap robes, horns, push buttons and repair parts.

Prices on bug finish have been named for spring; these are higher than those prevailing last season. Mechanics' tools still advance, as will be noted in revisions this week on nut and pipe wrenches, socket chisels and bit extensions. Pump leathers have also been revised upward.

MONTREAL MARKETS

MONTREAL, Nov. 7.—Important changes have been made this week. Oil stones and slips, nail pullers and mortise locks have gone to higher price levels. Advances have been made for straight blade razors, hat and coat hooks, window blind hinges, planes and horse rasps. Declines have been effected in antimony, bar steel, and old materials, including lead, zinc, copper and brass. Other items to go to higher levels are handled axes, centre bits, fruit jars, shock absorbers, lamp bulbs, electric horns, auto robes, auto horns, cut-outs, thrust bearings and push buttons.

Business is resuming more nearly normal conditions after a lull during epidemic of sickness.

Oil Stones Up; Locks, Nail Pullers, Too

Montreal.

MORTISE LOCKS, NAIL PULLERS, OIL STONES.—Mortise locks are up, the No. 850 now selling at $10.50 per dozen sets and No. 851 at $36.50.

Nail Pullers, Cyclops, are selling at $18.60 per dozen, Universal No. 1 at $15.80, and No. 2, $21.

Oil stones and slips are up about 10 per cent.

Blind Hinges Higher; Razors Up, Too

Montreal.

BLIND HINGES, HOOKS, RAZORS—Advanced prices apply to window blind hinges. No. O1 are selling at $1.65 per dozen, and in case lots at $1.55; No. 3 are priced at $2.75.

Hat and coat hooks are up to $6.25 per gross in full lots, the former price being around $5.75 to $5.85.

Straight blade razors are higher. No. 1484 are now selling at $24 per dozen; No. 3468 at $28, and No. $4000 at $18.60.

Rasps, Centre Bits, Planes, Axes Higher

Montreal

RASPS, CENTRE BITS, PLANES, AXES—Heller line of horse rasps are up through a revision of the discount to 57½ per cent.

Centre bits are revised also and this to higher levels. Up to 1 inch the price is $2.65 per dozen; 1⅛ inch $3.50; 1¼ inch $4.20; 1⅜ inch $4.90; 1½ inch $5.60; 1⅝ inch $6.65; 1¾ inch $7.35; 1⅞ inch $8.05 and 2 inch $8.75.

Planes have been advanced, reference to this already being made in these columns. S. & S. No. 4 are quoted at $3.20 each; No. 5 at $3.60; No. 8 $6.40; No. 27 $2.45 and No. 36 $2.70. Corresponding styles in Stanley make are each, $4.10, $4.70, $8.25, $3.20, and $3.20.

Handled axes of Indiana brand are up to $16.50 per dozen.

Fruit Jar Prices Out; Oil Stoves Higher

Montreal.

FRUIT JARS, OIL STOVES—Prices for 1919 are announced for fruit jars of the Perfect Seal pattern. The small size are now priced at $12.50 per dozen; $13 for medium and $17.25 for large.

Oil stoves are higher. This applies to the Perfection, some of the prices being as follows:—No. 2B, $18.75; 3B, $24.25 and 4B, $30.75; discount of 25 per cent. to the trade applies to these prices. Heaters are now priced at $7.00, $8.25, $10.25 each, less 25 per cent. Wicks are $3.15 per dozen net for oil stoves and $3.45 per dozen net for heaters.

Shock Absorbers Up; Repair Parts; Hoods

Montreal.

SHOCK ABSORBERS, REPAIR PARTS, HOODS—Shock absorbers are up. This applies to the Burgess Improved Type and the trade price now is $15 per set, whereas the former price was $13.50. The trade discount is 25 per cent. For lots of 6 the price is now $14 and lots of 24, $13. Discounts on these quantities of 30 per cent. and 35 per cent. respectively, apply.

Ideal pump connections are higher. No. 1 are priced at 43c to the trade or in lots of 24, 41c and lots of 96, 38c. This line thus makes an advance of approximately 45 per cent.

Duplex reamers are reduced from $2.37 to $2.27. In lots of 6 the decline is from $2.26 to $2.16 each.

Streamline hoods and radiator shells are reduced from $21.60 to $19.10.

Various Lamp Bulbs Under Adjustment

Montreal.

LAMP BULBS—Adjustments, some of them making an increased price basis, and others lower prices, are made to apply for Mazda bulbs and ordinary flashlight bulbs. The changes made are various, some of them leaving the basis similar to that obtaining before, and an approximate change of 10 per cent. obtaining, where the change is a decline or an advance. Single and double contact lamps are affected.

Prices Given For Batteries; Coils

Montreal.

AUTO COILS, BATTERIES—The following prices obtain for Eveready batteries for particular makes of cars:—For Case 1914-15, Mod. 35, each $39.20; Maxwell pattern 1913-14, $45.72; for Cadillac 1914-15-16; Cadillac 1917; Cole 1914-15; Hudson 1914-15, $54.47; for Brewster 1916-17; Haynes 1913-14, $56.67.

K-W Coil Units No. 32127 are advanced from $2.70 each to $2.90 and coil points to 45c from 36c. Lower prices obtain for lots of 50 and lots of 100.

Electric Horns Higher; Robes and Manifolds

Montreal.

AUTO HORNS, BUTTONS, ROBES, ETC.—Some lines of auto electric horns are being discontinued and others take on advances. No. 11 Projector is raised from $10.50 to $14.62 each; No. 14 Straight Projector from $5.05 to $6.75; No. 45 Tiger Lion Hand Horn from $2.81 to $3.94 and No. 35 Tiger Hand Horn from $3.19 to $4.31.

Push buttons No. 215 are advanced to 49c each from 37½c and No. 216 from 30c to 41c each.

Auto robes of St. Louis pattern, 72 inch size are quoted at $16.52, less 20 per cent. and Leopard robes of the same size at $17.60 each, less the same discount to the trade.

Anco heat manifolds for Ford Cars are priced at, each, $10.50, less 25 per cent., or in lots of 6 at $9.80. Discounts, respectively, of 25 per cent. and 30 per cent., obtain.

Price Basis For Cut outs; Thrust Bearings

Montreal.

CUT OUTS, BEARINGS—Prices are given for Gray-Hawley Cut Outs. The 5A and 5B are priced at $1.37, singly; 6A and 6B, each at $2.07; 7A, 7B and 7D. each at $2.40 and No. 8A at $2.40; 8B at $2.74 and 8C and 8D at $3.07 each. Lower prices obtain for larger quantities.

Graham Ball Thrust Bearings are priced now at $3.75, with a discount of 25 per cent. to the trade.

Nail Movement Fair At Steady Prices

Montreal.

NAILS, WIRE—The position of wire nails is steady and without change. Some report good stocks on hand and others are not so fortunately situated. The base now for wire nails is $5.50 and that for cut nails $5.85 per 100 pounds. Standard smooth wire is based at $6.25 per 100 pounds.

Rope Market Steady; Buying Seasonable

Montreal.

ROPE AND CORDAGE—The situation is steady and unchanged. Stocks are ample to carry the trade along well on an uninterrupted supply basis and prices hold. The retail trade has been supplying itself with immediate needs rather than buying in large lots. Pure manila basis is 39c; sisal 27½c and British manila 33c per pound.

Gasoline Sale Lighter; Coal Oil Unchanged

Montreal.

COAL OIL, GASOLINE—The sale of gasoline continues on the basis of 34c per gallon. There is less demand for it, the weather making a big change in this respect and the epidemic also being a factor. Coal oil is seasonably active and unchanged, with Royalite price unchanged at 19c and Electroline and Palacine 22c per gallon.

Heavy Heater Sales; Specialties, Too

Montreal.

STOVES, WARES—Of all the necessities these days in the rural, and even in the local hardware trade, heaters are beginning to bulk large. The manufacturer has had difficulties to overcome, but has met these well and orders are filled quite promptly. The same active condition applying to heaters is applicable also to stoves and ranges, although in less degree.

Coal hods and shovels, stove boards and stove pipe have been going forward well. Material for making these was slow in arriving from outside, but this was an expected condition this year and the makers are overcoming the temporary shortage well.

Galvanized Sheets Short; Black Hold Firm

Montreal.

SHEETS—The market conditions are steady and unchanged. Galvanized sheets are to be had in limited quantities only and some are making no offers at the moment. As a consequence the price basis is more nominal than ever and those stocks have little trouble in securing their price. Black sheets are steady and firm, with the conditions quite unchanged all round.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$9 75	$11 50
12 gauge	9 65	11 00
14 gauge	9 00	8 20
16 gauge	9 15	8 25
18-20 gauge	9 25	8 30

26 gauge	9 75	8 40
28 gauge	9 90	8 50
GALVANIZED SHEETS—		
10¾ oz.	$12 00	$12 35
28 gauge	11 65	11 90
26 gauge		11 35
22 and 24gauge		11 15
20 gauge		11 05
18 gauge		10 95
16 gauge		10 85

NOTE.—These prices are for full bundles, an extra charge of 25c per 100 lbs. is made for broken lots.

Special Steel Lower; Iron Bars Scarce

Montreal.

IRON AND STEEL—The feature of the week is a lower price basis for Gold Coin Steel. This applies to the round and octagon. The base of ⅝ inch and larger now takes a price of $15.50 for round and octagon is reduced to $15. The former prices were 50c per 100 pounds higher. In a general way, iron and steel are steady and firm, the trade getting a fair delivery of stock sizes. Special sizes are scarcer and harder to obtain.

Common bar iron, per 100 lbs.	$4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00

Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 22

Lead Products Quiet Without Change

Montreal.

LEAD PRODUCTS — Without any price changes, lead products are quiet and there is little promise of improvement in the matter of sales just now. The business passing is that which constitutes immediate requirements of the trade, and none are inclined to buy ahead. There appears to be less difficulty in securing lead, and this has made the out-

look for the near future an improved one. Solder and all made-up lines are easy but unchanged.

Lead pipe, lb.	$0 15	$....
Lead waste pipe, lb.	0 16	....

45-55		0 57½
Zinc sheets, casks		....
Do., broken lots		....

Note—The above prices for solder are for full boxes of 100 lbs. Jobbers will charge several cents more for small lots.

Old Material Lower; Little Movement

Montreal.

OLD MATERIAL—The decline of prices this week affects lead and zinc, copper and brass. The declines are not large, but the demand for larger lots of any commodity appears to be lighter than it was, even though enquiries are numerous. Some stock is arriving from the country but the buying prices are softening, so that lower quotations still may be made.

Dealers' Buying Prices:		
Tea lead		0 05½

Antimony Weaker; Lead to be Had

Montreal.

INGOT METALS—Markets lag. This is due to the peace talk and as a result of this antimony has weakened. This is the only item that has been materially affected, but buying is very limited today.

COPPER—The market conditions are unchanged as is also the price, which holds at 30-31c per pound.

TIN—Supplies of tin are sufficient for the needs of the trade, for these are small at present. Local quotations of 90-92c per pound are made.

SPELTER—An easier undertone is apparent, but no changes of price have been made. The enquiry is limited and price rules at 10½c to 11c per pound.

LEAD—With price fixed, there is no change locally, this holding at 10½ to 11c per pound. There is more to be had, however, and the trade is light.

ALUMINUM.—Little can be said that is new on this item. Local trading is light at 48c to 50c per pound.

ANTIMONY—The price on this has declined locally to 15c per pound. This is a reflection of peace prospects, and the trade demand continues small.

TORONTO MARKETS

TORONTO, Nov. 7.—Booking prices on screen doors and windows for spring are out and show an advance approximating 15 to 20 per cent. New prices have also been arrived at on fibreware, horse rasps, horse tooth rasps, curtain stretchers, shotguns and spring hinges, which provide for advances in each instance. Lower quotations are noticeable on wheelbarrows, while automobile lubricating oils have joined the upward trend.

Antimony has declined 2c per pound, while tin has stiffened up somewhat. Wood blocks and cast iron hardware, Canadian made, have advanced.

Spring, Floor and Screen Door Hinges Up

Toronto.

SPRING, FLOOR, SCREEN DOOR HINGES.—Higher prices have been arrived at on spring hinges, floor hinges and screen door hinges and quotations which are now being named to the trade are: Chicago spring hinges, list plus 5 per cent.; Triplex spring hinges, 20 and 10 per cent. discount; Chicago mortise floor (5.000), 20, 7½ and 5 per cent.; Chicago Relax floor (6,000), 25, 10, 10 and 2½ per cent.; Chicago Premier (4,000), 12½ per cent.; Chicago Ajax (3,000), 12½ per cent.; Chicago fire station, add 10 per cent. to list; lavatory door hinges, 2 0per cent.; Chicago screen door (2,000), 40 and 2½ per cent.; Chicago screen door (3,000), 16 2-3 per per cent.; Non- hold back screen door, prices upon application. All above f.o.b. Chicago.

Screen Doors, Windows Higher for Spring

Toronto.

SCREEN DOORS, WINDOWS.—Higher prices are the order of the day on screen doors and windows. New prices now out on screen doors, at which basis orders for spring are being taken, show an advance approximating 20 per cent. The change in window screens is correspondingly high, amounting to about 15 per cent. On this basis quotations which have been arrived at are given as follows:

Screen Doors No. 1, grained, $18.20 per dozen; No. 2, $22.30; No. 3, grained, filled and varnished, $29.20; No. 6, $30.40; No. 8, $31.45; No. 9, $37.70; No. 21, $26.80; No. 21½, $28.05; in units of one-half dozen prices are 80 cents per dozen less than the above, no charge for crating.

Window Screens—No. 1, $3.30; No. 2, $4.40; No. 3, $4.80; No. 4, $5.15; No. 5, $5.65; No. 6, $6.10; No. 7, $6.55; No. 8, $7.05; No. 9, $7.75; No. 10, $9.50; No. 12, $3.40; No. 12½, $3.85; No. 13, $3.75; No. 14, $4.00; No. 14½, $4.25; No. 15, $4.60; No. 16, $6.35.

Horse Rasps, Tooth Rasps Up 10 Per Cent.

Toronto.

HORSE RASPS, HORSE TOOTH RASPS. — A new discount has been named on horse rasps. This provides for an advance of about 10 per cent. This applies to the Heller Bros. line these now being quoted at 57½ per cent. discount from list.

The Heller Bros. horse tooth rasps have also been revised in price, quotations given herewith providing for an increase over former levels: No. 1 is now quoted at $14.20 per dozen; No. 2 at $20.00; No. 3 at $17.65; and No. 4 at $22.75.

Curtain Stretchers Up; Fibreware Higher

Toronto.

CURTAIN STRETCHERS, FIBREWARE.—Quotations which have been arrived at on the Chicago curtain stretchers show that an increase in this line has been effected. The No. 3 is now quoted at $34.00 per dozen; No. 6 at $33.00 per dozen; and No. 8 at $22.00 per dozen.

Fibreware has also gone to higher levels. The Star fibre pails are now quoted at $5.50 per dozen; the fibre wash tubs have now reached a price of $25.00 per dozen for No. 0; No. 1 is $21.35; No. 2, $17.85, and No. 3, $15.15 per dozen.

Wheelbarrows Down; Hand Sieves Up

Toronto.

WHEELBARROWS, HAND SIEVES. —Further revisions have been made in wheelbarrows and the tendency this time is downward. The quotations which are now being named on the Navvy wheelbarrow, steel wheel, are $58.20 per dozen, the Garden barrow, large size, is now quoted at $67.20 per dozen, the Garden barrow boys' or lawn are quoted at $54.60 per dozen.

Contractors' hand sieves have advanced and are now being sold to the trade at $10.00 per dozen.

Blocks, Cast Goods, Guns Revised

Toronto.

BLOCKS, CAST GOODS. GUNS.—An advance has been made in the wood blocks; this amounts to 10 per cent. Quotations on the single and double are now being figured out on the basis of 10 per cent. advance on list.

An advance in Canadian manufactured hardware, principally cast iron goods has been made. This amounts to about 7½ per cent.

Higher prices are also being quoted on the New Victor shot gun, single barrel, plain, 12 gauge 30-inch barrel and 16 gauge now selling at $10.00 each, and

the No. 1 ejector in the same gauges, $12.50.

Lists on Automobile Oils Up 5c

Toronto.

AUTOMOBILE OILS. — Quotations have been revised on automobile oils, effective immediately. This is brought about by a change in the list price which has advanced about 5 cents. The Polarine on the new basis will be listed at 90 cents, the Polarine heavy, 90 cents, and the Gargoyle mobile oil, will be listed at $1.15. These prices are subject to a discount of 25 per cent. to the trade. These changes are in line with predictions made in HARDWARE AND METAL two weeks ago as likely to become effective.

Heavy Sales Coal Oil; Gasoline Firm

Toronto.

OILS, GASOLINE.—The demand is still very heavy for coal oil. Sales have reached enormous proportions and there is every indication that this will continue. Prices have held firm without change at 18½ to 21½ cents per gallon according to grade.

Gasoline is very steady and sales are maintained at a very satisfactory level. There is no shortage reported on the local market, but the demand has fallen off from the peak prevailing a month or six weeks ago.

Wire Nails Firm, Wire Quiet

Toronto.

NAILS, WIRE.—The situation in respect of wire nails, shows no change during the week. Quotations are firmly held at recent advance and no recession in values is looked for. The undertone to the market is very strong, and whereas immediate requirements of the trade are being taken care of, there is no indication as to what may develop in the next few months. Quotations on wire nails are still $5.50 per 100 pounds and on the cut nails, $5.85 base.

There is nothing new to report in regard to wire. The smooth steel wire is still based at an unchanged price of $6.25 per 100 pounds.

Stoves Unchanged; Wares Steady

Toronto.

STOVES, WARES.—No new developments are reported as far as stoves are concerned. The market generally is firm and raw materials come through slowly. The demand is considered very good and output of the manufacturers is absorbed almost as quickly as turned out.

The situation in wares is one of continued strength. The demand for all lines is very good and outlook rather clouded through difficulty in securing deliveries of materials necessary to carry on with.

Cordage Holds Steady, Twine Firm

Toronto.

CORDAGE, TWINES.—There have been no new developments to record during the week. Business is just a little quiet, a seasonable condition, and prices remain unchanged though firm, pure manila being quoted at 39c per pound base; British manila at 33c, and sisal at 27½c.

The twine market is firm and unchanged with demand normally good.

Iron and Steel Quiet; Market Firm

Toronto.

IRON AND STEEL.—The market is rather quiet. Supplies are hard to get and no improvement in conditions is looked for. Prices have held firmly, though without change.

TORONTO—	Per 100 lbs.	
Common bar iron	....	$ 5 25
Common bar steel	....	5 50

Tool steel	0 20	0 42

Sheet Situation Shows No Improvement

Toronto.

SHEETS, PLATES.—There is no improvement shown in the sheet situation. There have been a few cars arrive, but these are quickly absorbed and there seems to be a tightening of the lines drawn on commercial enterprises. Reports indicate that stocks of light galvanized particularly are about exhausted. Indications point to a disposition on the part of many buyers to hold off their purchases and even some cancellations are reported, due to peace rumors which are floating around. The consensus of opinion among the trade seems to be that this holding back is a more dangerous attitude than taking the goods, for any man that wants the goods and can use them. The priorities now existing in the mills will, it is thought, continue in force for many months after the war, as this is about the only method possible to handle accumulation of business. Quotations on galvanized sheets 28 gauge are up to $12.75 per 100 pounds in some quarters, and the 10¾ ounce, $13 50.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	....	$10 00

Corrugated Sheet Business Easier

Toronto.

CORRUGATED SHEETS. — There seems to be a little falling off in the amount of trade coming along but altogether volume of business being handled seems fair. Prices remain nominally at figures given below with orders being carefully watched so that most essential enterprises are taken care of.

TORONTO— Corrugated Sheets—	Per 100 Sq. Feet Gal'zed	Painted
No. 28 gauge	$ 9 00	$ 7 50
No. 26 gauge	10 00	8 50

Wrought Pipe Scarce; Tubes Also

Toronto.

WROUGHT PIPE, BOILER TUBES. —Wrought pipe is scarce and manufacturers generally are operating away behind schedule. It is understood that the United States War Trade Board's allotment of steel to pipe manufacturers is 30 per cent. normal requirements, but whether Canada fares quite as well seems to be a question. At any rate, the market is bare of pipe for immediate delivery and improved conditions are not looked for this year.

Boiler tubes record conditions unchanged. Stocks grow smaller but price is unchanged.

Solder Outlook Unchanged; Lead Products

Toronto.

LEAD AND ZINC PRODUCTS.—No change is reported in the situation on solder. Tin has firmed up again somewhat and this has tended to stiffen the market on solder. The demand is just a little easier but is expected to show improvement. Lead products are moving out in only fair quantities and the market rules firmly at unchanged levels.

Antimony Down 2c; Tin Stiffens

Toronto.

INGOT METALS.—A decline of two cents per pound in antimony has been recorded and a little stiffer feeling is noticeable in tin. Spelter holds firmly though there is little demand. No change is shown in the lead market, there being little or none available.

COPPER.—There is nothing being offered commercially and production is going into essential war work. Prices show no change at 30c to 32c per pound locally and conditions which prevail are featureless.

TIN.—The market has stiffened slightly, quotations ranging now around 90c to 95c per pound. Licenses to import are very hard to get but there seems to be some stock here and interest is rather lacking.

SPELTER.—There is no demand for this metal, but there is a firm undertone in evidence. Prices have held unchanged at around 11c per pound.

LEAD.—Supplies are practically nil if any at all are available commercially. The situation in the States is virtually Government controlled and it is indicated that no lower prices threaten. Locally quotations range nominally around 10½c to 11c per pound.

ALUMINIUM.—Production is being directed to war work and there is nothing of interest to the trade. Quotations nominally range around 50c per pound.

ANTIMONY.—A decline of 2c per pound has occurred following a drop of 1c last week, bringing quotations locally down to 15c per pound.

Antimony is essentially a war metal and favorable war news and peace talk are factors which may be expected to bring prices down.

PIG IRON.—There has been no let-up in the demands of the Government and for this reason commercial enterprises have not gone up any higher on the list of those who may get iron. Production continues to be absorbed largely in war demands of one sort or another, and no change in the outlook is promised for the immediate future.

LONDON MARKETS

LONDON, Ont., November 7, 1918.—New prices are out on screen doors and windows for spring, and these show an advance over opening prices last year of about 15 to 20 per cent. Refrigerators are also included in the list of lines to advance. Higher prices have also been named on pump leathers, this applying to both the cup and valve and plunger style. Other lines to advance include wrenches, tub stands, paint brushes, chisels, bit extensions, buggy finish, and shellac.

Fall and winter lines are moving fairly well, and as a whole business can be classed good.

Wrenches Go Higher; Hinge Hooks Up

London, Ont.

WRENCHES, HOOKS.—Higher prices are again the order of the day as far as mechanics' tools are concerned. This is shown on new prices issued this week on two or three different styles of wrenches. The Keystone pattern wrench No. 80, 6-inch, is now quoted at $10.00 per dozen, the 8-inch at $12.50, and the 10-inch at $15.50. The Westcott nut wrench is also higher, the 6-inch being quoted at $10.00; 8-inch at $13.00, and 10-inch at $15.50 per dozen. Smart's stillson pattern wrench is quoted at 50 per cent. discount from list.

Hooks for screw and stray hinges have also advanced, ½-inch being quoted at 11¼c per pound, ⅝-inch at 11c, and ¾-inch at 10¾c.

Screen Doors, Windows Up 15 to 20 Per Cent.

London, Ont.

SCREEN DOORS, WINDOWS.—Quotations have been arrived at on screen doors and windows for spring. Prices which are now being named to the trade show an advance of about 15 to 20 per cent. in these lines. Working on present basis quotations on screen doors, are given as follows: No. 1, plain grained, $17.40 per dozen; No. 2, plain grained, with brackets, $21.50; No. 21, grained, filled and varnished, mission style, $26.00; No. 3, grained, filled and varnished with brackets, $28.40; No. 8, grained, filled and varnished panel, $30.65; No. 9, grained, filled and varnished, panel with oval, $36.90.

Quotations which have been issued on screen windows are also higher as will be shown in quotations herewith: No. 1, $3.30; No. 2, $4.40; No. 3, $4.80; No. 4, $5.15; No. 5, $5.65; No. 6, $6.10; No. 7, $6.55; No. 8, $7.05; No. 9, $7.75; No. 10, $9.50; No. 13, $3.75; No. 14, $4.00; No. 14½, $4.25; No. 15, $4.60; No. 16, $6.35.

Refrigerators Go Up; Butter Bowls Too

London, Ont.

REFRIGERATORS, BUTTER BOWLS—Spring booking prices are also available now on refrigerators. Quotations being made on the Sanderson Harold line are given as follows: Household, 40 per cent. discount from list, and the Grocer and Butcher refrigerators 35 per rounds on maple butter bowls. The cent. discount from list.

Higher prices are also going the basis on which quotations are now being made to the trade are for the 15-inch, $7.00 per dozen; 17-inch, $16.50; 19-inch, $21.00.

Chisels Up 10%; Bit Extensions Higher

London, Ont.

CHISELS, BIT EXTENSIONS.—Another thing to follow the upward trend this week is socket chisels. These are up about 10 per cent. and are now quoted at a discount of 50 per cent. from list. New prices are also available on the Millers Falls bit extensions. These provide for higher levels also, the No. 5 by 15 inch being quoted at $1.75 each; 18 inch at $1.75; 21 inch at $1.80, and 24 inch at $1.85.

Pump Leathers Revised Upward

London, Ont.

PUMP LEATHERS.—An important line of interest to the hardware trade this week is pump leathers. These have been revised in price, and new quotations which are now being named show an advance over former figures. Basis of quotations on the cup style and the valve and plunger type are given herewith:

Leathers, Cup—1-in., 60c; 1¼-in., 70c; 1½-in., 75c; 2-inch, 90c; 2½-inch, $1.25; 3-inch, $1.68; 3½-inch, $2.15; 4-inch, $2.50; 4½-inch, $2.65.

Valve and Plunger Leathers—No. 1, 95c dozen; No. 2, $1.20; No. 3, $1.35; No. 4, $1.65.

Higher Prices on Tub Stands, Plane Irons

London, Ont.

TUB STANDS, PLANE IRONS.—Revised prices are out on tub stands or wash benches. These provide for advances, the Dowswell now being quoted at $28.86 per dozen.

Following the advance in planes, advice of which was given in last week's issue, plane irons have also followed suit and prices which are being quoted to the trade show a substantial advance. The present basis of quotations is given as follows:

Single.	Double.
1⅝ inch 45c.	75c. each.
1¾ inch 59c.	79c. each.
2 inch 52c.	90c. each.

2⅛ inch	59c. each.
2¼ inch	60c. each.
2⅜ inch	62c. each.
2⅝ inch	66c. each.
	96c. each.
	98c. each.
	$1.03 each.
	1.07 each.

New Prices Available on Traps

London, Ont.

GAME TRAPS.—Advice of an advance in game traps was given last week, but at time of sending report along new prices were not available. These have now been determined upon and quotations on some of the best selling numbers are given herewith:

Victor with Chain—No. 0, $2.25; No. 1, $2.60; No. 1½, $3.90; No. 2, $5.45.

Jump with Chain—No. 0, $2.95; No. 1, $3.50; No. 1½, $5.20; No. 2, $7.60.

Newhouse with Chain—No. 1, $5.55; No. 1½, $8.35; No. 2, $12.35; No. 3, $16.45; No. 4, $19.40.

Hawley and Norton with Chain—No. 0, $3.45; No. 1, $4.10; No. 1½, $6.10; No. 2, $8.55; No. 3, $11.40; No. 4, $13.40.

Bug Finish Up For Spring; Rasps

London, Ont.

BUG FINISH, HORSE RASPS.—Orders for spring are being taken on Bug finish. These are higher than opening prices last year, as will be seen from quotations given herewith: Barrels, $8.25 per barrel, f.o.b. factory, Paris; lots of 4 barrels or over, $8.00 per barrel, f.o.b. factory, Paris. 5 pound packages in single cases of 100 pounds, $5.50 case delivered, 5 pound packages, 2 cases or over, $5.25 per case delivered; 1 pound packages, single cases containing 80 pounds, $6.70 per case; and one pound packages, 2 cases or over, $6.45 per case.

Heller horse rasps have been advanced about 10 per cent. and are now quoted to the trade at 57½ per cent. discount from list.

Linseed Oil Steady; Turpentine Up

London, Ont.

LINSEED OIL, TURPENTINE.—The situation in regard to linseed oil, shows no change during the week. The market on seed being steadied a little bit, and even inclining upwards will, it is thought, have a tendency to stop any further declines in the price of linseed oil, and possibly provide a basis for increasing the price.

Turpentine is very firm and makes a further advance of 3c per gallon. Primary points show a very stiff undertone and the market locally reflects this condition. Quotations on both linseed oil and turpentine follow herewith:

Linseed Oil—	Raw Per Gal.	Boiled Per Gal.
1 to 2 barrels	$1.83	$1.86
3 to 5 barrels	1.82	1.85
6 to 9 barrels	1.80	1.83

Less barrels, add 10c gallon.

Turpentine—	
1 barrel lots	$1.03 per gal.
2 to 4 barrel lots	1.02 per gal.
5 gallon lots	1.13 per gal.

Shellac Goes Up; Brushes Higher

London, Ont.

BRUSHES, SHELLAC.—An advance is recorded in Meakins' brushes. The present basis of quotations is arrived at from a discount of 20 per cent. from list.

Shellac has also gone to higher levels. The new price on orange shellac in one gallon jugs is $4.75 per gallon, and on the white shellac in one gallon jugs, $5.15 per gallon.

WINNIPEG MARKETS

WINNIPEG, Nov. 7.—Price changes for the week show advances ranging from 5 to 10 per cent. on horseshoes, galvanized sheet, Stickfast paste, babbitt metal and mangles. Important changes are also recorded in boxing gloves, striking bags and other athletic goods, as well as in the extras on nails.

Owing to the present epidemic of influenza, business is reported as very quiet. Many of the Western towns are closed, which prevents the travellers from making their regular trips.

Coil Chain Rules Very Firmly

Winnipeg.

COIL CHAIN.—Prices on all lines of chain continue very firm, with the demand about normal. Stocks are reported as quite complete. Prices now ruling are confirmed as follows:

Coil Chain—3-16, $18.40; ¼, $16; 5-16, $13.60; ⅜, $18.40; 7-16, $12.20; ½, $12; 9-16, $12; ⅝, $11.75; ¾, $11.50; 1", $11.25 per 100 lbs.

Logging Chain—5-16, $15.40; ⅜, $14.20; ½", $13.30 per 100 lbs.

Boxing Gloves, Bags Go Up 10 Per Cent.

Winnipeg.

BOXING GLOVES, BAGS.—Due, it is said to the increasing costs of materials manufacturers have issued new prices to the trade on boxing gloves, striking bags, ec. These moved approximately 10 per cent., being applicable to the head line, making to-day's prices as follows:

Basket Balls—No. 1½, $6.25 each.

Boxing Gloves—No. B0, $38; No. B2, $54; No. B3, $60; No. B4, $63; No. B6, $75; No. B7, $84; No. B9, $100.50 doz. sets.

Striking Bags—No. S1, $33; No. S3, $46; No. S5, $54; No. S7, $67; No. S8, $72 doz.

Score Books—No. 1, 11c; No. 2, 27c; No. 3, 58c; No. 4, 75c; No. 5, $1.25 each.

Extras on Wire Nails Changed

Winnipeg.

NAILS.—Increased costs of lumber as well as higher wages have been instrumental in the changes made in the extras on wire nails. The following revisions have been made and are effective at once: Nails packed in 25 x 50 lb. boxes advance from 25c to 50c per 100 pounds; extra for blueing nails advance from 20c to 25c per 100 pounds; extra for coating nails advance from 20c to 25c per 100 pounds. The base price is unchanged at $6.25 for the wire nails and $6.55 for the cut nails per 100 pounds.

Fifty Cent Jump On Horse Shoes

Winnipeg.

HORSE SHOES.—Prices on iron and steel horseshoes which have remained firm for the past few months, have undergone a revision of 50c per keg. This provides for an advance over former quotations, making to-day's selling prices shoes, No. 1, $8.85, No. 2 and larger, $8.60 per 100 pounds; snowshoes, No. 1, as again given herewith: Iron horse-$9.10, No. 2 and larger, $8.85; steel horseshoes, No. 1, $9.30, No. 2 and larger, $9.05. Featherweight, all sizes, $10.45 per 100 pounds.

Galvanized Sheets Up 50c to 75c

Winnipeg.

GALVANIZED SHEETS.—With the embargo on galvanized sheets still in force jobbers' stocks are gradually becoming depleted, with no prospect of replenishing same. The result is that prices are strengthening, as recently predicted by HARDWARE AND METAL. New prices now effective show an upward trend of from 50c to 75c per 100 pounds, making to-day's selling prices as follows: Apollo, Premier,, or Fleur de Lis, 10¾-oz., $13.25; 28-ga., $12.75; 26-ga., $12.45; 24-ga., $12.30; 22-ga., $12.30; 20-ga., $12.15; 18-ga., $12.15 per 10 pounds.

Dry Paste Makes Advance

Winnipeg.

DRY PASTE.—During the week new prices have been issued on Stick Fast dry paste, showing a slight upward trend, and is now selling at the following figures: 1-lb. packages, $1.90; 2-lb. packages, $3.65 per dozen.

Babbitt Metal Up; Mangles Higher

Winnipeg.

BABBITT METAL, MANGLES.—Prices on Frictionless babbitt metal have again been revised in accordance with the present prices on tin, making to-day's selling price in case lots 35c per pound. Prices on Royal mangles have been revised during the week, due to the ever-increasing costs of material, it is said. These are now selling at $26.50 each.

Wrought Pipe Holding Firm

Winnipeg.

WROUGHT PIPE.—Prices on wrought

iron pipe are still holding firm at unchanged levels. Certain sizes are practically off the market owing to embargoes, while stocks on other sizes are reported below normal. Prices now in effect are confirmed as follows:

	Inch	Black	Galvanized Per 100'
Wrought Iron Pipe.....	¼,	$6.00	$ 8.35
	⅜,	6.05	8.45
	½,	7.85	9.60
	¾,	9.95	12.30
	1,	14.70	18.20
	1¼,	20.00	24.70
	1½,	23.75	29.35
	2,	32.00	39.50
	2½,	51.25	63.15
	3,	66.20	82.60
	3½,	86.85	.....
	4,	103.00	.....

Linseed Oil Steady; Turpentine Firm

Winnipeg.

LINSEED OIL, TURPENTINE.—Despite the fact that flax seed prices continue to fluctuate, linseed oil prices are still holding firm and no change is recorded during the week, to-day's market prices remaining as follows: Raw linseed oil, $2.20 per gal.; boiled linseed oil, $2.23 per gal. in single barrel lots. No change is reported during the week in the price of turpentine although reports indicate that stocks are low and very little being imported owing to the difficulty of securing transportation. Prices in the meantime hold firm as follows: Barrels, $1.15 per gal.; ½ barrels, $1.18 per gal.; 5-gal. lots, $1.20 per gal.; 1-gal. lots, $1.20 per gal., plus the usual extras for containers.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Nov. 8.—Disguise may be attempted, but the great question before the iron and steel trade in the past week has been the matter of prospective prices. Military developments have come rapidly, and it is the cessation of firing, when armistice terms are such as to prevent its resumption, that marks the advent of peace from the business man's viewpoint. In considering the matter of prices, and of control or regulation of business generally, it is important to have clearly in mind the difference between peace from the commercial world's viewpoint and peace from the diplomatic viewpoint. Diplomatically, peace will not come until the President has issued his peace proclamation, which will be many months after the cessation of hostilities. All the war instrumentalities that have been created by authority of law will continue in existence, and doubtless with full legal power, at least to the declaration of peace by Presidential proclamation. The Railroad Administration, the Food Administration and the Fuel Administration, will continue for some time afterwards.

Thus there will be an interim period, from the cessation of hostilities, called "peace" by the business world, to the declaration of peace by the Government. There may be, and probably will be, an interval of several months. Naturally there will be no effort to speed the declaration of peace, but rather the reverse, so as to maintain such war time control of affairs as is desirable.

This separation in the dates of "peace"—commercial and diplomatic—brings to the front the matter of how war time control of industry has been exercised. That which is based on law, like the control of the price of coke, resting upon the Lever Act of August, 1917, the "food, feed and fuel law" is one thing, that which rests upon agreement, like the steel price control, is another thing. The War Industries Board controls steel prices by agreement with the producers. the steel trade has felt strongly all along that control by agreement is better than control by law, and indeed one reason why it accepted control by agreement when it did was because otherwise control by law was in sight, the Pomerene bill being ready for submission to Congress. The matter becomes very awkward, however, at this time, because for war time conditions control was requisite to prevent prices being too high; for the immediate future the steel trade holds control to be desirable to prevent them being too low. It is intimated that the Government agrees. It wants to keep business prosperous for various reasons, one being that it is necessary to collect taxes, and it wishes to avoid a slump or demoralization. Legally, in view of the Sherman law, it is one thing for steel producers to agree not to sell at above certain prices and quite another thing for them to agree not to sell below certain prices.

Government as Buyer

It is hinted that there may be legislation to enable the War Industries Board or some other agency to control iron and steel prices either way, up or down, but legislation is not always easily secured. There is another contingency, however. In the case of railroad steel and ship steel the Government will continue to be a large buyer, perhaps a larger buyer in these two fields than formerly. If it agrees upon prices that will set a pace. Sherman law or not, steel producers could not be expected to sell to commercial buyers at lower prices than it asked the Government. One could hardly charge that adherence to prices thus approved by the Government constituted an agreement in restraint of trade.

When there is so much confusion, doubt and uncertaintly, there is one clear and important thing to consider in the matter of prospective prices: What will be the Government's attitude as to prices for ship steel and railroad steel? On this subject there is some light. The United States Shipping Board, which controls the Emergency Fleet Corporation, the body that places contracts for ships and controls the shipyards commandeered, has for about three weeks

(Continued on page 96.)

Somebody's on the Line.

WEEKLY PAINT DEPARTMENT

Suggestive Selling Will Boost Sales

Chance in Paint Department to Make Suggestions That Will be of Real Value to Purchasers—Service of This Kind is Appreciated and is Profitable to Store

DID you ever give an order in a restaurant or lunch room that the waiter did not inquire, "Tea or coffee, sir?" Sometimes he adds: "Or milk?" but he always takes it for granted that you wish something to drink. No matter if they have practically made up their minds that they only want to eat, ninety-five out of every hundred people will involuntarily order one of the things the waiter mentions. From a sales standpoint this question is interesting to all retailers. It is not through any special solicitude that the waiter asks about the tea or coffee. It is because the average restaurant makes considerably more profit on every cup of tea or coffee, in proportion, than on any other item on the menu. The firms realize that it is important to suggest these things and they make a lot of money by doing it.

SUGGESTIVE SELLING

How many clerks in your store realize the value of this very practical idea of "suggestive selling." Because the hardwareman in the course of his everyday business handles so many articles that are directly needed in the home he has particularly fine chances to expand his sales by this method. In no department can he make more effective use of "suggestive selling" than in disposing of paints and varnishes. A salesman who has the knack of selling in this way can not only greatly increase the amount of turnover in his department but can render a real service to the customer as well. A little suggestion here as to why this brush or that is just the thing required for the work in hand, a little suggestion there as to why that work requires to be prepared and finished with certain materials in order to get the best results, and the customer has purchased things he never intended to buy but without which he could not turn out a satisfactory job. What is more, the customer appreciates the suggestions.

HOW IT WORKS OUT

More than one person has gone into a hardware store and bought paint and returned home to find that he had an old hard brush to work with or that he did not know just how to go about preparing the woodwork or the wall or other parts he intended to paint. Had the clerk taken a few moments to ask about the job that was planned he could have sold the man the right kind of brush, given him a few directions about sandpapering, or rubbing, or shellacking and not only saved him a lot of time and trouble but enabled him to turn out work that he would be proud of. In this way he would have been encouraged to do more painting. Whenever he had a job in mind he would remember the good advice the salesman had given him and he would make it a point to go and see that man and ask him about what materials to use, how to prepare the work and so on.

IS NEVER FORGOTTEN

This is the sort of service that makes for future business. The salesman who is there with the useful suggestions, and can make them in a friendly and unofficious manner, apparently taking it for granted that the purchaser wants to be guided into getting the best value for his money can make a surprising number of sales that he would never make in any other way. He is not only a business booster but a good will builder, and good will backed by good goods makes a combination that is hard to beat. If a customer asks for paint, don't be satisfied with just passing him over a tin or two of any brand. Show him that you are interested in him, find out about his work and ten chances to one he will spend three or four times as much money with you as he had intended and will go away from your store feeling that he was well served in every way.

How Much Are You Willing to Loan for the Defence of Your Freedom?

HOW can you answer this question? Only by imagining for a moment that you were about to lose that freedom, that upon your willingness to loan depended your life and the lives of your family. There could be but one answer—you would give all you possess.

For four years the Allies have fought a gallant fight for freedom, and Money has paid for it. **Your** money has helped to pay for Canada's share in this wonderful struggle against the forces of oppression. Last year 80,000 people in Canada loaned their money to Canada to protect their homes and firesides against the ruthless advance of the enemies of civilization.

To-day, NOW, Canada says to you, "We are on the threshold of Victory; one grand rally and we shall push the madman of Europe back across his own frontier and draw the teeth of the gray wolf of Germany."

To-day Canada asks her people for a great enthusiastic response to

THE VICTORY LOAN 1918

Canada will not ask in vain. Since the 1917 Loan was floated last year we have seen the German hordes advance through France, devastating and spreading ruin as they came. We have seen them checked. We have seen them pushed back, and we know that Money, and Money alone, has enabled our gallant men to do what they have done. We know that money in vast sums has organized our armies, clothed and fed them and supplied them with guns and ammunition.

To-day Money is needed for the last great stages of this war for freedom. More than a million loyal and patriotic Canadians will come forward this year with all they can afford.

And You will be one of these! And having loaned your money to Canada, you will tell of it to others, that our Victory Loan 1918 may be the greatest Canadian success of this war.

CANADA LINSEED OIL MILLS, LIMITED

Montreal and Toronto

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Nov. 7. — Higher prices are in evidence on turpentine and indications point to even stiffer prices. Prices on linseed oil show a decline to November delivery basis. Supplies are none too heavy, but immediate requirements of the trade are being met. Putty is moving lively and is firm and steady. Consideration of the price basis for this and also for white lead in oil will be taken up toward the close of the month, for when the present prices were made, they were to obtain until November 30.

Linseed Oil Scarce; Selling at $1.75

Montreal.

LINSEED OIL.—The situation is steady and prices for November delivery as announced last week are now obtaining in this market. There is very little oil on spot. The delivery of seed from the West has been intermittent, though every advantage has been taken of lake and rail routes—little direct water transportation being available. The seed markets are changed but little from last week. Peace talk, and the probability of its coming soon has created a waiting condition. If peace does come some think there will be little recession from the present price basis, crushers having paid for seed on recent markets. Then again, the amount of seed available from any point is limited because of the difficulty of getting it forward. The lowest spot price on linseed oil is $1.75 for raw.

Linseed Oil—	Raw Imp. gal.	Boiled Imp. gal.
1 to 2 barrels	$1 75	$1 87
5 to 9 barrels	1 74	1 76½
10 to 25 barrels	1 73	1 75½

Add 10c per gallon in smaller quantities.

Turpentine Higher; Hard to Get Barrels

Montreal.

TURPENTINE.—There is some turpentine here and prices are firmer, with lowest quotations on barrel lots 98c and some asking as high as $1.11. There seems to be little surplus but for the most part small quantities only are going forward. The greatest difficulty experienced of late, or one of them, is that of securing barrels. These are high in price and none too plentiful. The shortage has made delivery irregular. Present prospects for lower prices ae not encouaging. Although trade needs are not very heavy, markets in the south are very strong and the outlook seems to be for an even higher level of quotations than that shown herewith.

Turpentine.	Per Imp. Ga.	
1 to 4 barrels	$0 98	$1 11
5 barrels and over	....	....
Small lots	1 01	1 17

(Packages extra)

May be Ample Putty But Prices Firm

Montreal.

PUTTY.—Prices are, and will continue to be firm it is generally expected. Linseed oil prices have declined somewhat, but whiting is the big item and this is not plentiful. It is expected however, that there may be ample stocks of this to carry the trade through the present season. The demand has been heavy and will be for some weeks yet.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Basis Firm on White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—The undertone is steady and firm, with a certain amount of business passing. This is done on the understanding that prices obtain for the balance of November only. At that time the consideration of prices will receive attention, and the paint men will consider schedules from that time forward on markets obtaining then. Five ton lots are selling at $17 per 100 pounds; ton lots at $17.50; and small quantities at $17.85.

Mixed Paints Firm; Sales Good

Montreal.

MIXED PAINT. — While sales have been somewhat hampered within the past three weeks, the amount of business coming forward has been large, and manufacturers are reporting a satisfactory condition. There is a steady and firm market, but features of any kind are lacking. Supplies for manufacturing needs are not heavy, but the various makers are decidedly busy making up stock.

TORONTO

TORONTO, Nov. 7.—Turpentine has advanced 5 cents per gallon and even higher levels seem probable. Linseed oil is very steady for the week though a narrowing of the range is reported. Sales of mixed paints for spring on the whole are very good. White lead in oil is quiet and unchanged conditions are reported in regard to glass and putty. Varnish is very strong.

Range Narrows On Linseed Oil

Toronto.

LINSEED OIL.—There has been no change locally in linseed oil during the week. The seed market is stronger than last week, but this has not brought about any marked change in the price though a narrowing of the range is noticeable. Supplies are very fair but movement through the regular channels generally is limited to seasonable requirements.

Linseed Oil—	Raw Imp. gal.
1 to 2 barrels, gal.	$1.77-$1.78-$1.83
3 to 5 barrels, gal.	1.76- 1.77- 1.82
	Boiled Imp. gal.
1 to 2 barrels, gal.	$1.79½-$1.80½-$1.86
3 to 5 barrels, gal.	1.78½- 1.79½- 1.85

Add 10c gallon in smaller quantities.

Turpentine Goes Up 3c; Very Firm

Toronto.

TURPENTINE.—Turpentine has advanced 3 cents per gallon, and even higher levels seem to be in line. Firm tendencies as outlined in these columns during the past three weeks are still in evidence, and the southern markets seem due for continued advances. Favorable war news, with the possibility of overseas shipments are the great factors in upward movement of prices and with a continually strengthening market the prospect for the next month or so it would seem advisable for dealers to keep up their stocks. Quotations prevailing now which seem likely to go even higher are as follows:

Turpentine—	Imp. gal.
1 barrel (barrel included)	$1 02-$1 03
2 to 4 barerls (barrels included)	1 01- 1 02
5 gallon lots	1 02- 1 13

Orders For Spring Coming Along

Toronto.

MIXED PAINT.—Reports from manufacturers generally indicate that booking orders for spring are coming along very freely, and for the odd merchant who is holding back there are ten who are

"If You Can Buy Liberty With Money, for God's Sake BUY IT!"

---HARRY LAUDER

Here is a call from the heart of a man who knows the full meaning of sacrifice.

From the first day that England entered the war Harry Lauder served his country.

Britain called for money. The Scotch bard dug deep into his savings. He enlisted his great talents to win gold for her cause.

And then he gave his only son to pay the toll that war exacted.

CANADIANS!—*This Victory Loan Is* YOUR *Call To Greater Sacrifice!*

Your country wants to end the war quickly. It does not wish to waste one single, precious life.

And early victory demands a mighty superiority in guns, munitions and material.

All this costs money—money which it is your privilege to loan—money that will BUY victory.

"If you can buy Liberty with money, for God's sake BUY IT," said he who has weighed dollars against the heart pangs of blood sacrifice.

Remember that your money buys not only Liberty for yourselves and your children and their children—it buys the lives of boys who will fall needlessly if your dollar-shirking prolongs the strife.

If dollars will buy Liberty, BUY IT! If dollars will buy lives, BUY THEM!

The Allied nations are doubling their efforts in order to cut down the life-cost of victory. If your interest is great enough to wish one boy safely home who might otherwise find his rest in a foreign grave, DOUBLE YOUR SUBSCRIPTION!

END THE TROUBLE—BUY DOUBLE!

Space Donated by

BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST JOHN TORONTO WINNIPEG CALGARY EDMONTON VANCOUVER

making sure of their supplies and getting covered at to-day's prices. Indications are that raw materials are very scarce, and it is pointed out that even should peace be declared tomorrow it would be months before stocks could be replenished. This is a factor which might be borne in mind, and the consensus of opinion seems to be that the only change in price likely to occur in view of existing conditions is an advance. It is also intimated that the dealer who buys now will stand a chance of getting a wider range of sizes from manufacturers' stocks than will be possible in a couple of months' time.

White Lead in Oil Holding Firm

Toronto.

WHITE LEAD IN OIL.—The market rules with a firm undertone and no easing away in prices seems likely. Corroders are experiencing considerable difficulty in getting lead owing to heavy demands for war work, and this condition seems likely to grow worse instead of better. Quotations to the trade remain at $17.80 per 100 pounds in ton lots and $18.15 in smaller quantities for pure white lead in oil.

Glass Unchanged; Putty Holds Firm

Toronto.

GLASS, PUTTY.—The situation in glass is without feature. Demand is only limited, and whereas stocks generally are considered light there seems to be sufficient to take care of business being offered. The undertone to the market is very strong. Putty rules very firm though no revision in prices given below is noted. The demand has eased away somewhat but is still considered fair.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

WEEKLY MARKET REPORTS

(Continued from page 91.)

been engaged on a program of revision of the whole operation, the matter being referred to in this correspondence a fortnight ago. There have been developments almost daily. Several contracts for shipyard extensions have been cancelled, also a number of contracts for ships, chiefly wood ships. The spirit in which this has been done has been quite obvious to those familiar with the circumstances, but both Chairman Hurley, of the Shipping Board, and Director General of Shipbuilding Schwab, of the Fleet Corporation, have made official statements which leave no room for doubt. The object is to continue building ships, as many as possible, but to economize, to cut out inefficient operations, which were grasped at when every single ship that could be added promised to be almost invaluable, and at the same time to encourage the building of ships at efficient yards. Mr. Schwab's statement of only a few days ago was that the definite program that had been adopted was to build 15,000,000 tons deadweight, and only 2,500,000 tons, or one-sixth, had thus far been built. The program was to be carried out. This would mean, as the efficient yards speed up still more, that the weekly or monthly tonnage of steel going into shipbuilding would increase for months to come over the present rate.

Thus there is assured a very heavy demand from the Government for ship steel, but obviously a part of the program already well considered is that of getting the steel at the lowest possible price. As already reported, contracts have lately been offered to steel mills with a new clause, allowing the Government to cancel at will. Clearly the object is to seek a lower price whenever circumstances permit.

As to railroad steel the case is equally clear. Long ago prices on all important steel commodities were fixed, with one prominent exception, standard section steel rails. Last September the War Industries Board agreed with the rail mills on prices of $55 for Bessemer and $57 for open-hearth rails, but the Railroad Administration withheld its approval. Of course, it is now more disposed than ever to seek a lower price. Another important fact is that some of the railroads have refused to accept, and pay for freight cars ordered by the Railroad Administration several months ago, its total distribution being 100,000 cars. The railroads that object assert that the prices are too high and they may not need the cars anyhow. They urged the Railroad Administration to pay for the cars out of the "revolving fund" of $500,000,000 provided by Congress for various purposes, and then sell the cars to the roads after the war at what would then be a fair price. Thus one has both the Railroad Administration and some of the individual railroads plainly opposed to the present steel prices, and their attitude assumed before the cessation of hostilities came so clearly in sight. Now, of course, they are necessarily still more strongly opposed.

Thus we have it that the two great fields in which the Government will remain a buyer of steel after the cessation of hostilities, and for quite a period, there is clearly going to be a move for materially lower steel prices. In all the present uncertainty this is something concrete. One cannot attempt to predict how steel prices will range during the period of readjustment from a war time to a peace time basis, but one of the distinct possibilities is that it will be a sort of "waiting market" for the Government to take the lead in developing new prices for ship steel and railroad steel.

As to the present attitude of the steel buying public, that is quite clearly disclosed. All the regulations of the War Industries Board remain in force, of course, but the restrictions have always related to the manufacture and delivery of steel, not its purchase and sale. One is permitted to buy and sell all the steel he likes, as "Class D," which is steel that may be made and delivered after priorities and preferences are provided for (not necessarily filled) so if buyers were eager to get steel without knowing the prospective price, they would be eager to place orders. This is not the case. They are not even enquiring.

PASSING OF THE BARGAIN HUNTER

In the busy down town district of Chicago, states the *National Hardware Bulletin*, there stands a palatial store building which covers the greater part of a block, but its miles of shelving are devoid of merchandise; gone is its army of employees and the teeming thousands of eager bargain hunters who once thronged its aisles have vanished.

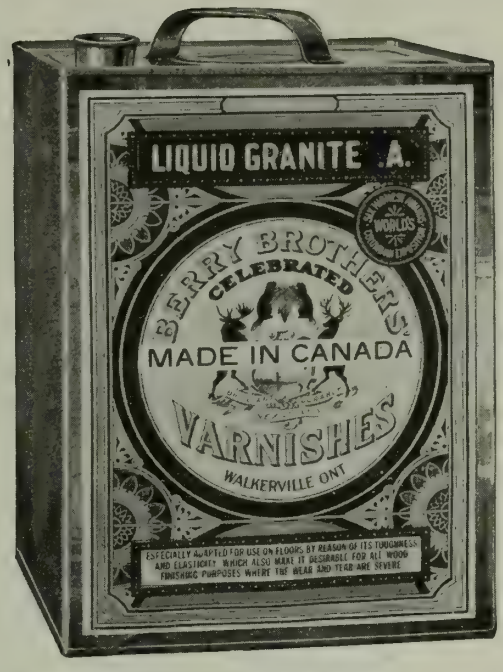
The time was when this store was the favorite trading point of a territory which included several states. People by the hundreds journeyed thither from the outlying towns, villages, cross-roads and farms, returning bundle-ladened and in the quiet of their homes discussed their bargains, cherishing the delusion that they had saved heavily over what their local merchant would have asked them for similar goods and feeling that somehow their outlay in time, expense and investment they had actually added something to the sum total of their capital.

Elsewhere in the same city another well known mercantile establishment is also winding up its affairs. Not long ago its bulky catalogues had a regular place on the book racks in hundreds of thousands of homes throughout the United States.

Its claims and its published prices were a favorite theme of conversation in village and country home and to it came orders in a stream which ran deep and strong.

We shall not attempt to outline all the reasons which lead to the closing out of the Siegel & Cooper Co. and the Smyth businesses, but among them is undoubtedly the growing disinclination of the public to respond to the lure of bargain baits.

A store which is forever featuring bargain sales has an uncertain following. It attracts the bargain hunter who flits butterfly-like wherever his fickle fancy dictates and the impression eventually becomes current that such a store runs strong to cheap stuff.



Even the uninitiated realize in time that it is impossible to maintain a big establishment and its heavy expense account and handle any considerable portion of its stock at a loss.

Experience goes to show that it is not necessary to utilize the trickster's methods in order to meet this competition.

It is stated on competent authority that even in Chicago the stores which advertise good values and satisfactory service rather than comparative prices set the standard of gross sales.

Quick Results

If you want to buy or sell a business, dispose of overstocks, hire a clerk or manager, use the "Wanted" page of HARDWARE AND METAL. There is no other way in which you can get in touch, more quickly or thoroughly with the best prospects, than by using the "Wanted" page of HARDWARE AND METAL. Cost is only two cents per word for first insertion, and one cent per word for subsequent insertions, with 5c additional for Box Number or Address.

BERRY BRANDS

The uniform reliability of Berry brands is a business-building asset for the dealer in varnishes.

All classes of buyers know from experience that when Berry Brothers' varnishes, enamels and stains are used there will be no uncertainty as to the handsome appearance and lasting quality of the finish.

The general recognition of the Berry label as a guarantee of complete dependability creates an ever-widening demand for all "Berry" products.

Terms 2% 30 days, approved credit.

Freight equalized on Chatham, Guelph, Hamilton, London, Montreal, Toronto, Welland.

While the foregoing prices on iron pipe are the nominal prices, it has been found in practice that prospective buyers should ask for quotations on sizes 2½ inches and larger on account of the shortage of these sizes and the extra difficulty of procuring supplies.

Boiling Water Wont Hurt

UNIVERNISH

Varnish a table top with UNIVERNISH and then pour boiling water on it—it will remain uninjured. Pour ammonia on it—it will have no ill effect. Pour water on it and leave it over night—there will be no mark.

It's equally good for any purpose whether it be pianos or floors. It is put up in all sized cans from quarter pint up. Let us send you a counter display case of twelve quarter pints to retail at 25c each. It will sell quickly—give satisfaction and enable you to judge the possibliities of this line.

WE'LL GO OVER THE TOP WILL YOU ?

THE war has brought great prosperity to Canada. Millions of dollars in contracts have come to her doors. Wages were never so high, money was never so plentiful.

This is a prosperity that must be used and conserved for the Nation's Welfare. We must share in the common sacrifice, the common endeavor to make that nation great in war and in peace.

Make This Come True!

THE best news we can send to our brave boys in France is that we are behind them to our last dollar for VICTORY.

We can send them that word by over-subscribing the Victory Loan.

They have been on the firing line long enough to know that speedy Victory is a matter of men *plus materials with which to fight.*

If they hear that we at home are backing them up with our money, that every dollar we can scrape together is going into the Victory Loan, they will feel that Victory is on the way.

They will gather new courage and new strength; they will go into battle with new confidence and determination; they will fear nothing and stop at nothing.

Let Us Send Them This Good News!

Let Us Buy Victory Bonds!

BUY—BUY—BUY—till it hurts!

Are You a Shareholder in Your Country?

CANADA offers you shares in Canada! These are Canada's Victory Bonds 1918, $50, $100, $500 or $1,000, as you can afford to buy them. These Bonds, with a fixed period to run, will be repaid in full at maturity, just as surely as you can get the change for a dollar bill. But, unlike the dollar, they will pay you interest at 5½ per cent. all the time you hold them.

Splendid as the investment is, this is only one side of the matter. The Money paid for these Bonds is used to bring the war to a successful ending, and every day we approach nearer Victory, for which we have fought so long, for which so many gallant men have died. This Money is loaned by us to Canada to bring us both Victory and Peace.

Canadians have been asked to subscribe $300,000.000 in the purchase of Victory Bonds, but we should not be content with that. Every time you add twenty-five per cent. to the amount asked for from your district you shall get a crown on your Honor Flag, the flag which shall fly in every town and village in Canada as a sign that we met the call with honor.

Let every purse in Canada be opened wide, let us act quickly and to the extreme limit of our ability that our home district may have a place of honor on the list.

The Victory Loan Honor Button will show that YOU are a buyer of Victory Bonds. Get it early. Your name on the Honor list of your place of business will be an inspiration to others. Get it there early.

How Many Crowns Shall We Have on Our Honor Flag?

RUBBERSET
TRADE MARK
BRUSHES

That's the Little Man!

Whenever you see a brush stamped with the quaint little man, you know that's a *Canadian-made Brush.* You also know it's a *Rubberset Brush*—with the bristles gripped *everlastingly* in hard rubber. You know that it must make good—or *We Will!*

And as every dealer who handles Brushes knows—*Rubberset Brushes* have a world-wide reputation for quality and service.

They sell themselves!

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Through Stephens' wide and persistent advertising, through window displays, counter displays and personal suggestion, through its own reputation, the Economical—and Decorative Advantages of Silkstone Flat Wall Colours have been driven home in the minds of the buying public **—the correct answer to all decoration problems.**

"Silkstone" is cheaper than wall paper, more sanitary—more permanently beautiful. "Silkstone" goes on easily and quickly, and dries hard with a soft, silky finish that wears like the plaster on which it's laid.

Right now, when economy is so much in the public mind, you should sell more "Silkstone" than ever before.

Talk No. One Hundred and Seventy-two

Round up your dormant dollars and help bind the Kaiser with Victory Bonds. Every dollar you have is of draft age. Put your shoulder to the wheel and help to finance final "Victory." We have been preaching thrift. The Victory Bond is applied thrift. You are not asked to donate, but to invest all you have or can borrow, with Canada as security. Buy more Victory Bonds and hasten the "Boys'" homecomings.

TINKER TOM.

Look for Talk No. 173 next week.

SOLE CANADIAN MAKERS:

THE STANDARD PAINT CO. OF CANADA, LIMITED

MONTREAL TORONTO WINNIPEG VANCOUVER

MADE IN CANADA

BUFFALO OILS

Special Cylinder Oil for Steam Engines
Harness Oil. Neatsfoot Oil

A Gas Engine Oil (for gasoline engines).
Tractorlene Oil (for oil burning engines).
Ideal Thresher's Machines Oil (for general use).
Automobile Oil and Transmission Greases.

These are a few of our most staple lines, so well and favorably known throughout Western Canada, and are sold only through reliable merchants.

PRAIRIE CITY OIL COMPANY, LIMITED, WINNIPEG

TO THE WESTERN CANADA DEALER

Does a connection with a progressive and aggressive, amply capitalized and fully equipped concern, grown to be the largest paint and varnish factory in Western Canada, appeal to you?

BRITISH AMERICA PAINT CO., LIMITED

Wants more live dealers in Western Canada. It co-operates with its dealers to make bigger and better business. Join up with a pushing selling organization that will help you put 'em over. Send for booklet "The Evidence." Tells the story in fac-simile letters from Bapco dealers.

DISTRIBUTING POINTS

Established at Victoria in 1900 the British America Paint Co., Ltd., has found ever-widening markets. To care for this trade branches have been opened at VANCOUVER, B.C., CALGARY and EDMONTON, ALBERTA, and REGINA, SASKATCHEWAN.

TO SELL AND RE-SELL

Paint MUST give satisfaction.

Bapco Pure Paint and Bapco Varnish are of the highest possible quality. To insure this the raw materials undergo chemical laboratory tests. Skilled makers see that the ingredients are perfectly proportioned and modern machinery insures proper grinding and blending. Rigid machine and chemical tests are made during process of manufacture and the completed mixtures are subjected to comparative tests with the fixed Standards. One big roof of the factory is devoted to weather tests.

The growth of the British America Paint Co. and its constantly expanding trade territory is convincing evidence, not only of the quality of its goods, but of its resourcefulness and enterprise as well.

Wanted

SITUATIONS WANTED

HARDWARE CLERK WANTS SPARE TIME work three nights, one afternoon, in city. Box 117, Hardware and Metal.

HELP WANTED

IS THERE A LIVE, AGGRESSIVE SALESMAN or manufacturer's agent with not too many irons in the fire, covering Quebec and the East, who would like to handle, on a commission basis, a line sold to the wholesale hardware and grocery trade? Box 119, Hardware and Metal.

FOR SALE

THE SUREST WAY FOR THE MANUFACturers' agent to connect with good live firms is to sell the manufacturers who read Hardware and Metal all about his ability to sell their goods. Try an advertisement on the Condensed Ad. Page of Hardware and Metal, under this heading.

FOR SALE—GENERAL HARDWARE STOCK. We offer our stock of hardware at invoice prices, as a greater part of this stock would be at prices before the war. We consider it a bargain for quick sale. Stock all new six years ago. Amount of stock at present between seven and eight thousand. Building can be rented or bought, or stock can be moved away. Good district in Ontario. Box 118, Hardware and Metal.

GALVANIZED IRON SHEETS, APOLLO brand. We have the following gauges in stock: 14, 16, 18, 20, 22 and 24. Wheeler & Bain, Toronto.

MISCELLANEOUS

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada. (tf)

DOUBLE YOUR FLOOR SPACE — BY INstalling an Otis-Fensome hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis Fensome Elevator Co., Toronto.

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

IF YOUR HARDWARE BUSINESS IS FOR sale, who is more likely to buy it than a hardware man, be he merchant, clerk, or traveller? It is only hardware men who read Hardware and Metal, and a condensed advertisement in this paper offering your business for sale, will put you in touch only with the people who will be most interested.

Hockey Stick Specialists

Our hockey sticks are made in the largest factory in Canada. They are manufactured out of select 2nd growth air-seasoned Rock Elm.

The INFALLIBLE GLAZIER'S DIAMOND

Just the Tool for Inexperienced Glass Cutters

MADE BY

A. SHAW & SON, London, England.

Hale Brothers, Canadian Agents, 3 St. Nicholas St., MONTREAL

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

INDEX TO ADVERTISERS

Occasionally advertisements are inserted in the paper after the index has been printed. The insertion of the advertiser's name in this index is not part of the advertising order. The index is inserted solely for the convenience of the readers of the paper.

A War Time Call for Fall

UNIVERSAL ELECTRIC HOME NEEDS

These are the days of electricity. The shortage of coal, the scarcity of domestic servants and the necessary conservation of time, money materials and labor make the use of electrical heating appliances almost a patriotic duty.

The prospect of a long winter and a short supply of coal will create many new uses for warmth producing electrical appliances. The call will come quickly and insistently. Are you ready for it?

UNIVERSAL
Electric Radiator

For every eighty pounds of coal saved another three-inch shell is made. Therefore it's up to every householder to postpone furnace lighting as long as possible. The UNIVERSAL Electric Radiator does the trick, as it quickly heats the nursery, bathroom or other small rooms and makes them cozy and warm on nippy fall days.

UNIVERSAL
Immersion
Electric Heater

A small but effective saver of fuel, time and money. Makes you independent of Old King Coal when a little hot water, milk or medicine is needed in a hurry. In three minutes after it is placed in the glass the liquid is steaming hot. Every home needs at least one; every hospital and public institution needs many.

UNIVERSAL
Electric Heating Pad

When coal must be conserved furnace heat in sleeping rooms is in the non-essential class. But a UNIVERSAL Heating Pad slipped between the sheets for a few moments before you jump in makes the bed warm and comfortable all night with all other heat in the room shut off. The UNIVERSAL Pad also adds to the comfort and health of outdoor sleeping.

You take no chances when you buy and you take none when you sell UNIVERSAL Electric Radiators, Heating Pads, Immersion Heater, etc. These goods have character, prestige, reputation. They are widely advertised and sought by people who have faith in every article that bears the UNIVERSAL trade mark. They know that UNIVERSAL stands for quality —real quality that is as sound as the money they pay for their goods.

A Drop of Oil, Easy to Apply Adds Years to a Door Hanger's Life

The Allith 1915, though constructed somewhat like the 1914, has several exclusive features. Each of the four wheels run independently and are fitted with a double set of roller bearings, which may be easily oiled from the oil holes conveniently placed in the Track Support and top of hangers. This allows the oiling to be done with great ease. It ensures proper lubrication, easy running and adds years to the life of the hanger.

Allith 1915 is a gilt-edge proposition. Send for set and hang it in your store.

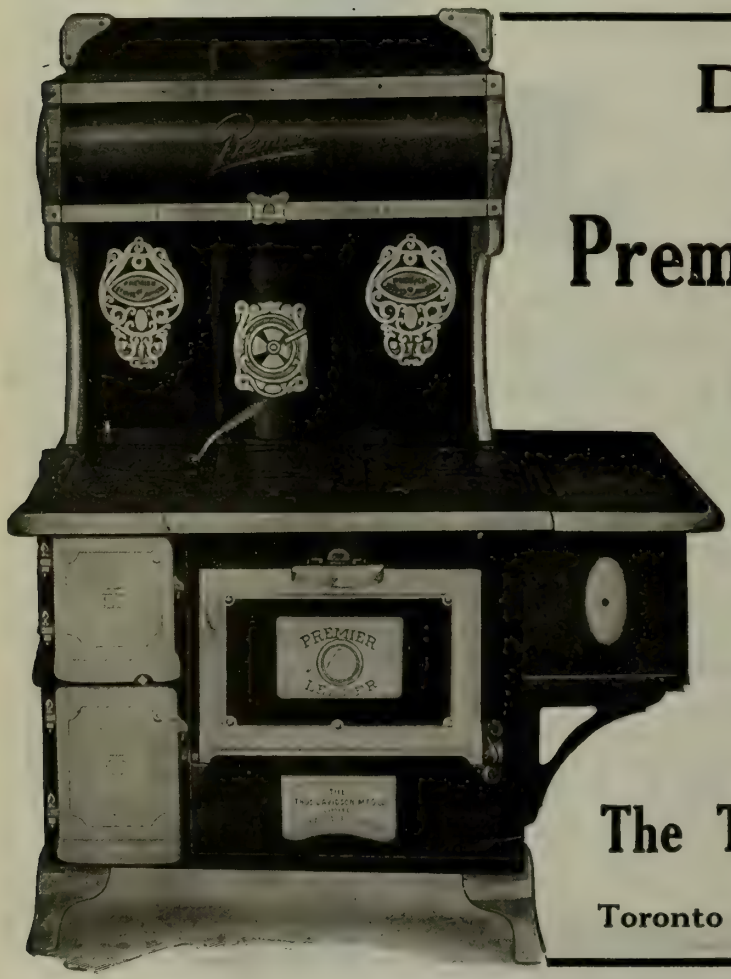
America Hangers Sell Easily and Give Life-time Service

The roller bearing tandem truck hanger is constructed entirely of steel and built to carry heavy doors.

The adjusting screw below the track is always accessible and allows increasing or decreasing the space between door and building.



The detachable drop strap permits door to swing out at right angles and prevents tearing down.

America hangers run on the famous Hatch Trolley Track, supported with corrugated brackets.

Swing in to-day. Hitch your efforts to the biggest selling, profit-making line of door hangers.

The First Bit Brace To Carry

This Millers Falls Bit Brace No. 732 is the only brace that's nationally advertised.

It ought to be the first bit brace in the stock of every dealer, however small his tool department.

We are advertising it heavily because it is the best brace to push with all kinds of trade—both professional and amateur. Ball-bearing head — ratchet — and all-purpose chuck that takes twist drills as well as auger bits. Finest finish —yet moderate in price.

Display a 732 Brace on your counter and in your window and talk bit braces to your customers who come in. You will be surprised at the number you can sell—especially to your amateur customers.

Feature it as the third tool every household should own—as we do in our advertising.

The higher cost of tools (as well as everything else) makes it important to talk quality in your tool department and emphasize the wasteful extravagance of buying cheap tools that do not last or give results.

The Millers Falls name is its own guarantee of the tool quality that gives best satisfaction and economy to every tool user.

Send for our handbook, "How to Sell Tools." It's full of good ideas—probably some you can use. Free on request.

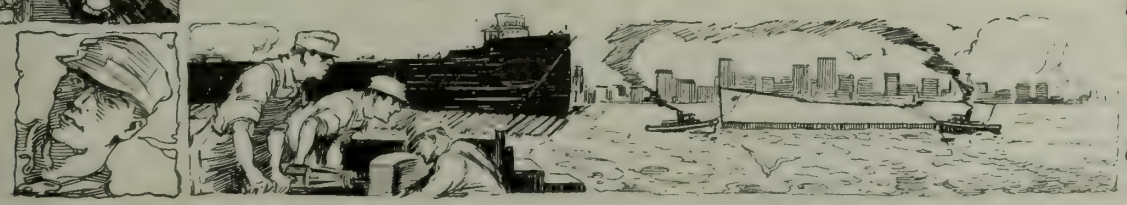
The Needs of the Empire

NEVER BEFORE in the history of Canada has greater opportunity been offered her Sons and Daughters to render SERVICE to the Empire;—and

NEVER BEFORE have the needs of the Empire demanded as high a standard of QUALITY in thought, deed and product as at present.



HOW NOBLY CANADA has responded is now known around the World and history will record it for the future.

THE PRODUCTS OF OUR MILLS are at the Fronts and on the Seas, in the Shipyards and Factories and in the Fields, faithfully fulfilling their mission of reliable performance wherever the Government's War-Winning Programme directs, as we are, and have been, stripped for action since the first call to arms.

THE NEEDS OF THE EMPIRE are many and the War-Winning Programme changes as necessity demands; but it matters not, the needs of the Empire are paramount and must be supplied.

THEREFORE, if in these trying times, we do not deliver promptly to you such of the products of our Mills or Blast Furnaces as you may need, console yourself with the thought that through us, you are rendering Service to the Empire and to the Cause that matters most for the Liberty, Justice and Freedom of the World.

"Belleville" Hardware

A "Made-in-Canada" Product Equal to the Best in the World

We are all apt to look up to imported goods as superior to home-made lines. Pause before you concede anything to foreign products over "BELLEVILLE" HARDWARE. Here is a Canadian-made product that is as good as the best.

"Belleville" hardware is meeting the demand of the most particular architects and builders, and is recording wonderful success throughout Canada. It is a worthy Canadian product, worthy of the best Canadian patronage. All hardware looks very much alike to builders and architects until they have had experience with "Belleville."

Best line for dealers to handle. Has greatest demand. Get our proposition.

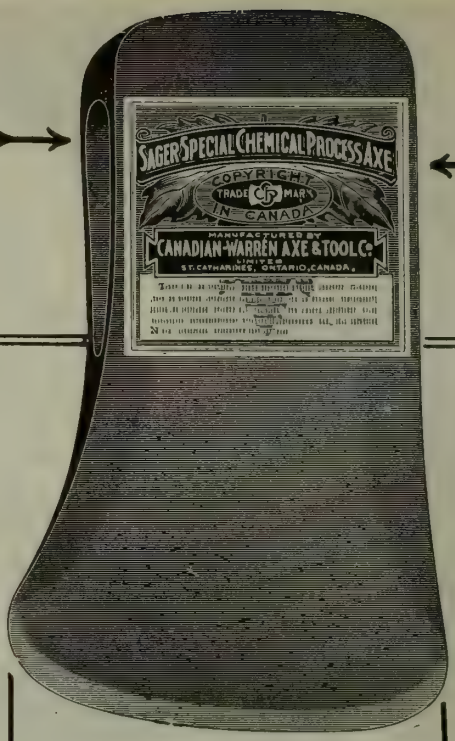
The True Need of the Victory Loan

We must at once get ready for making the merchandise of reconstruction and for a vast peace trade at home and in foreign countries.

Almost everything necessary for man's comfort is needed in large quantities. We have still to feed large armies, countless prisoners, and the peoples of Europe in Allied Countries.

To this has now been added Central Europe, which has been short of food for a long time, and will be seeking a meal three times a day.



Ships will be wanted in every port, and we shall build many of them for other countries; railroad engines and cars, agricultural machinery, electrical and traction machinery, lumber, steel and any transportable building material, and many other things will be needed from us in the rebuilding of the devastated parts of Belgium, France and Serbia.

Let us get right down to business. OUR OWN BUSINESS—AND HELP TO OVER-SUBSCRIBE THE VICTORY LOAN 1918. And let us do it NOW.

BUY VICTORY BONDS

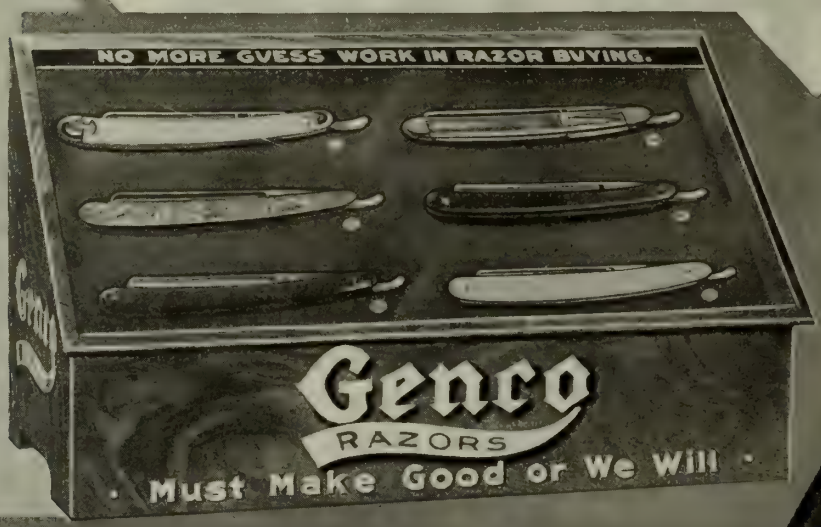
Genco RAZORS

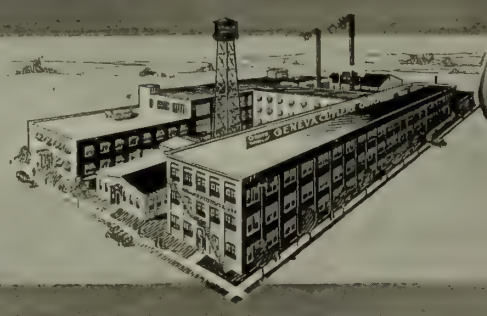
A Square Foot of Selling Space

That Can Be Made Very Profitable In Your Store

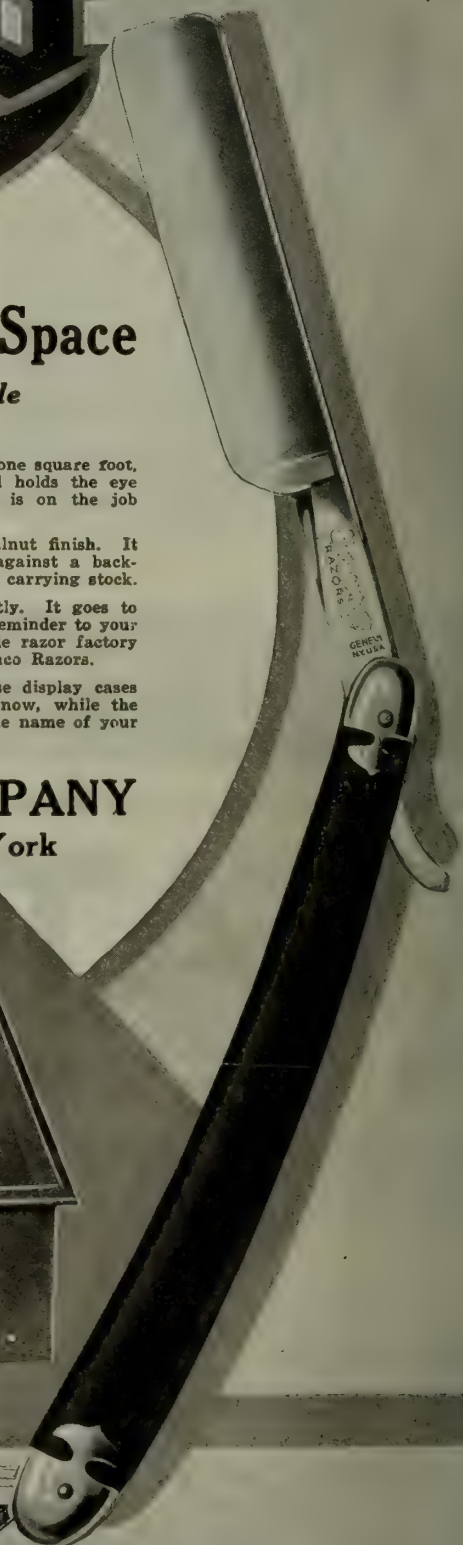
THE space occupied by this Genco Razor Display Case is about one square foot, Besides containing and protecting the razors, it catches and holds the eye and gives the goods a pleasing display. As a salesman it is on the job every minute.



The case is made of pressed steel, with handsome Circassian walnut finish. It holds six Genco Razors of different design on constant display against a background of Royal Purple plush and there is ample room beneath for carrying stock.



All current Genco Razor advertising features this case prominently. It goes to work for you the minute it appears on your counter. Let it be a reminder to your customers of the 500 master cutlers who, in the largest high grade razor factory in the world, grind the quality in and the guess work out of Genco Razors.



We are making a special proposition which included one of those display cases free with your first order. Write for the details of this offer now, while the matter is fresh in your mind. It's quite a good thing. Mention the name of your jobber when writing us.

LAYING THE DUST

90% of the ever-present atmospheric dust in your store can be captured and held.

STANDARD Floor Dressing

does this and more in your store. It keeps the goods on the shelves cleaner and fresher looking, and adds a note of tidiness and brightness to the whole store.

It definitely lays the dust because it is a sanitary, non-evaporating, wood preserving product. A gallon will take care of 500-700 square feet of surface, and one application will last for several months if the accumulating dust and dirt are swept regularly with a stiff brush or broom. Easily and quickly applied with an ordinary sprayer.

Sold in one and four gallon cans and in barrels and half barrels.

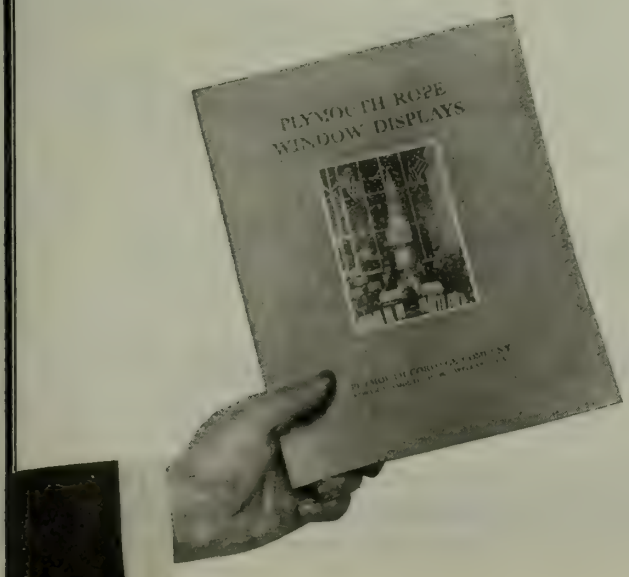
A DISPLAY THAT SELLS PLYMOUTH ROPE

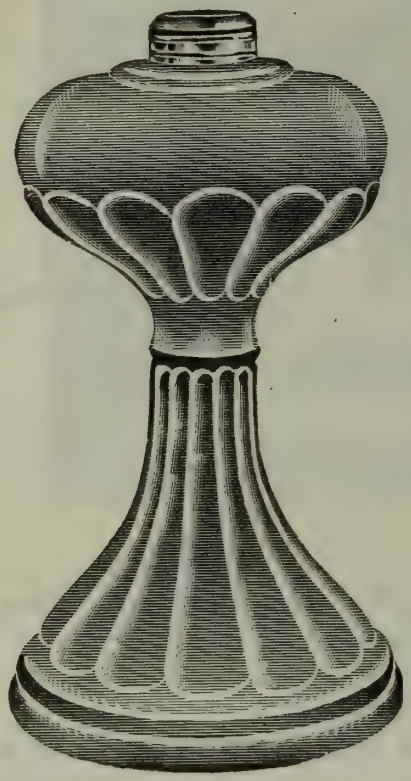


SUCH displays are easily installed by utilizing our free display material—hanks of manila hemp, lithographed window cards and Plymouth Rope sample signs.

A good, attractive window display creates interest and stimulates sales, and if your rope sales are conducted on the "Rope-by-the-Foot" plan, you can make an extra profit.

Several thousand dealers have already adopted the Plymouth Plan and say that it means greater profits and satisfied customers.

One dealer wrote: "We have given the Plymouth Plan a thorough test and find that we can figure *15% more profit* and can tell a customer how much his rope will cost."



Investigate the advantages of handling Plymouth Rope. Write for a copy of "Evidence" and "Window Displays."

ARMCO IRON Resists Rust

Apparatus for Determination of Oxygen Content—Research Laboratory of The American Rolling Mill Co., Middletown, Ohio

MODERN SCIENCE AND DURABLE ARMCO IRON

Oxygen is a good thing in the air we breathe, but a poor thing in iron. It is nothing short of a vicious impurity in iron or steel, with respect to rust-resistance and working properties.

It occurs in combination with iron or with metallic impurities as a solid, or as a gaseous compound with carbon existing in the form of tiny bubbles and blowholes.

In either case it must be kept within the lowest possible limits if the iron is to be durable under conditions of exposure.

The latest scientific apparatus are employed by the Research Department at Middletown for rigidly checking the oxygen content of Armco Iron.

In this and all other respects, Armco Iron must justify the faith and confidence of the public in its rust-resisting properties as an iron that's "made to last."

Armco Iron Blue Annealed, Black Galvanized, Polished and Locomotive Jacket Sheets, Roofing, Pipe and Metal Lath

OPEN HEARTH STEEL CASTINGS TO SPECIFICATIONS

300 lbs. to 80,000 lbs.

PROMPT SHIPMENTS

Our specialties are: Rolling Mill and Steel Works Castings, including annealing boxes and bottoms. Ship, dock, machinery, railroad, mine, engine, crane and miscellaneous heavy castings.

The trade mark ARMCO carries the assurance that iron bearing that mark is manufactured by The American Rolling Mill Company with the skill, intelligence and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for it.

Stirs up Business

Precious few housewives realize the many uses of an accurate scale in the kitchen—saving losses in careless weighing at butchers and grocers—weighing produce before marketing, weighing flour and other ingredients while baking, etc., etc., etc. It is surprising what a little bit of salesmanship and displaying will accomplish in stirring up big business in Renfrew Scales! The Renfrew is compact, handy, and stands hard knocks. It doesn't get out of order and always tells the truth. A government inspector's certificate accompanies every Renfrew. These features make the Renfrew a lively seller these days. Push business with the

Business Men Confident of Future

Coming of Peace Finds Canadian Firms in Good Shape to Deal With All Problems—No Drop in Prices Likely—Conservative Buying of Well Selected Stock Has Been General and Hardware Trade is on Substantial Basis

THE advent of peace, welcomed by all good Canadians, has placed Canadian manufacturers, wholesalers and retailers face to face with new problems. Those who had felt that the bottom would fall out of business with the conclusion of peace are liable to be disappointed. This does not mean that we should minimize the necessity of taking immediate steps to grapple with after-the-war problems. The outlook is, however, most encouraging at the present time, provided our government and manufacturers, with the assistance of wholesalers and retailers, make the most of the opportunities now presented.

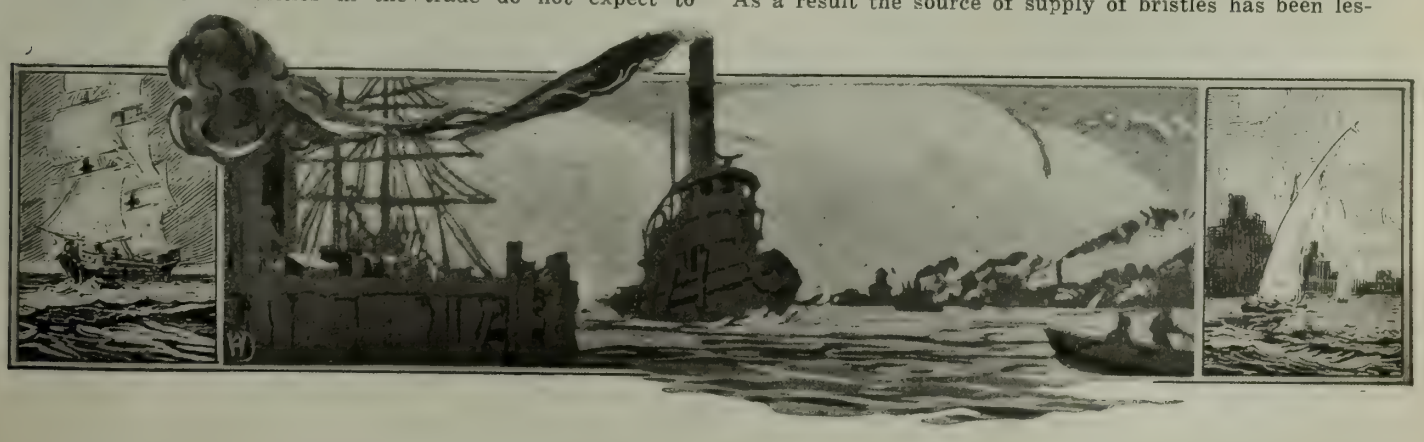
The fact that Germany has been forced to make an almost unconditional surrender is one of the brightest spots on the horizon at the present time. Canada is prosperous and despite her war bills is in good financial standing.

No Cancellation Flood

That there is confidence on the part of the retail trade is evidenced by the fact that the big flood of cancellation orders expected by some manufacturers and wholesalers has not been forthcoming. The retail trade to-day is in better shape than ever before with clean, well-selected stocks. There appear to be few cases of over-stocking on slow selling lines. There are more retail hardware businesses being conducted on a cash basis than ever before in the history of the trade. Peace was anticipated within a few months and the trade had prepared for it.

What About Prices?

One of the questions asked on all sides is: "Will prices go down immediately?" There may be a few declines here and there, but generally prices should remain at least stationary for some time. It is true that munition orders are being cancelled; that steel mills have this week received orders to discontinue the production of shell steel. It is probable that much of the shell steel now in the hands of munition makers will be returned to the mills for transformation into steel for other purposes. Steps are already under way for taking care of this situation. It is doubtful if Canadian steel mills are going to be called upon to supply any great quantities of steel for rebuilding purposes in the war-ridden countries. Some of the best authorities in the trade do not expect to receive a great share of this business. Where, then, are Canadian mills going to sell their output? The capacity of their plants has been greatly increased during the past four years.



It is anticipated that the Canadian government's railway programme will call for huge quantities of steel for some time, in fact if present plans are carried through, Canadian steel mills will be kept busy for many months.

Other developments more or less in the infant stage at present indicate that there will be a heavy home demand for steel products. As to price, it is probable that no immediate decline will be forthcoming immediately, as steel mills have thousands of tons of ore and scrap which have been purchased on a high market. Only developments unseen at present are likely to cause any great declines from present levels. Much depends on the outcome of several conferences which are being held at Ottawa this week.

SAYS HIGHER PRICES LIKELY FOR BRUSHES

INSTEAD of lowering the prices of brushes the coming of peace is likely to increase them according to a Toronto manufacturer. The whole situation, he stated to HARDWARE AND METAL, centres around the production of bristles. The finest bristles in the world come from China and Russia. In both these countries the people do not like pork until it is three or four years old. Good bristles are only to be had from mature animals and some of the best come from boars' necks. These bristles are often six inches long and of excellent quality.

"Before the war all buyers of bristles used to get them from Leipsig, in Germany, when the great annual fair was held," he stated to HARDWARE AND METAL. "A small cask of fine bristles may represent an investment of $15,000. Since the war Russia has been out of the business and the world has depended upon its supplies from China, purchasing them through London, England and New York brokers. Owing to the shortage of food in China the people have been killing off many of the animals for food. As a result the source of supply of bristles has been les-

sened. There is little hope of any being secured from Russia for some time and there are no substitutes for hog bristles."

NO DROP IN PRICES IS VIEW OF OIL MEN

The oil and gasoline manufacturers while among the first to feel the effects of the ending of hostilities are most optimistic regarding the future of their business. A few hours after the word came that the armistice was signed one of the big firms which has been supplying huge quantities of gasoline for the aviation camps received notice that no more would be required. On top of this was the prospect of losing very shortly the business from munitions factories which have been buying great quantities of crude oil for fuel.

"We do not look for any drop in prices or for any great decrease in the general volume of business," said one official to HARDWARE AND METAL. "The prices were all set by the United States Fuel Administration which has always had in mind stabilizing the business and preventing wild catting by speculators. It will be two years at least before the big producing oil fields of Russia, Roumania and Austria-Hungary can be put in working order again. Many of the shafts have been completely ruined and others will have to be drilled. Much of the machinery has been completely destroyed and it will take a very long time to replace it and transport and get it in running order. In the meantime the world is dependent upon America for oil and gasoline supplies largely. There is a tendency just now for many of the small buyers at home to buy in small quantities in expectancy of lower prices coming so that they will not be stocked up with goods purchased at war prices. It would seem, however, that prices will not go down. None of the men in the oil trade are looking for that."

MONTREAL FIRMS REGARD FUTURE OPTIMISTICALLY

THAT there will be no general or immediate disturbance in the prices of various hardware lines, is the consensus of opinion expressed to HARDWARE AND METAL by hardware men, manufacturers and steel importers. That there may even be further advances is suggested by several. In any case the keynote is one of confidence and of optimism, with trade moving along on a steady and undisturbed basis still.

Past Buying Light

In the opinion of George Caverhill, president of Caverhill, Learmont & Co., the ultimate distributor, the retail hardware man has been buying with care for some time. To the man who has been watching his stock and buying accordingly there need be no misgiving as to the readjustment from a war to a peace basis. His stock has been purchased on the basis of his selling and where this was done present stocks will not be excessive.

Mr. Caverhill also is confident of the effect that government assistance to the steel development in Canada will have in a broad and big way on the steel situation. This assistance will have served to stabilize this great industry so that business in steel goods may proceed with a confidence that might otherwise be less manifest. The big development at Sydney will mean a stabilizing of conditions that is now very important, and as the government is seeing this scheme through there will be no difficulty.

Orders were coming to hand and travellers were expected to convey to the customers in the country and elsewhere that confident outlook which a broad view of the situation inspired within the manufacturer and the jobber. If there was any uneasiness regarding prices and their future, this feeling should be dissipated.

An Optimistic View

James G. Lewis, of Lewis Bros., Limited, wholesale hardware, said that he was, by nature, an optimist. "As far as we are concerned," said Mr. Lewis, "business is coming along right to-day as well as it was last week and the week before, conditions are unchanged."

The retailer had been buying very carefully for some time, continued Mr. Lewis. He had sometimes bought in twelfth of a dozen lots where he would before buy much more generously. This condition was quite general and thus indicated the condition of stocks carried throughout the country. With little excess merchandise, the retailer had little to fear and no cause for anxiety. Prices would probably decline somewhat later on. In the meantime, however, there was nothing to indicate that there would not be further advances. Goods had been produced by the manufacturer on the basis of high production costs and they would have to be disposed of with due regard to this important consideration.

Mr. Lewis is of the firm opinion that Canada will enter upon an era of prosperity within the next two years such as she has never known.

Confident of Future

Col. Wm. Starke, of Starke-Seybold, Ltd., stated that their customers throughout Quebec would be unaffected by the recent big news. Solid and steady, they were dependable and would proceed in their work and in their selling with the same spirit as before. Said Mr. Starke: "I was talking with my banker recently and he inquired how we found business. I replied that it had been active and promising and he then told me that we had one of the best districts here in all Canada in which to conduct business." In a general way, Col. Starke did not expect any undue effects to follow the signing of an armistice, and looked forward with confidence.

W. S. Leslie, president of A. C. Leslie & Co., Ltd., said matters are likely to adjust themselves in time and that there is no cause for any alarm. There will be a gradual readjustment, he believes, but owing to careful buying of the majority for some time past stocks are light. The dealer who has bought carefully will not need to worry. Material is scarce and any readjustments to be made will necessarily be deferred for some months at least.

H. Kearns, managing director of B. & S. H. Thompson & Co., Ltd., feels that it is early to make estimates but that it must be borne in mind that the big steel companies have enormous orders on their books still unfilled. These it will take many months to execute, four or five months at least. Then there is a great depletion of stocks in Europe and these will have to be made up. In a general way the trade will be quite able to adjust itself satisfactorily over the period of time that must elapse while short stocks are being overcome.

Labor Will Be Absorbed

Edward Goodwill, manager of the Thos. Davidson Manfg. Co., Ltd., stated that at least six months will be required in which to effect any radical change from the present basis. It may take longer. The big mills of the United States will require a long time in which to make the change from a war to a peace basis, from war production to commercial production. In the opinion of Mr. Goodwill, the munition and other workers that may have to seek other employment can be readily absorbed. So short has labor been in some industries that there ought to be no difficulty in making full use of any labor that seeks a change.

In a general way the feeling among Montreal business men is confident and hopeful. There is little indication of any but a promising outlook and a readiness to take care of the development that is sure to come in many ways. Time will tell the tale. In any case, and in view of the fact that general housing conditions in Canada are acute, future activity bids fair to stay confidence now. And with immense resources still but touched upon the development to be cannot even be forecast with any degree of accuracy.

Much confidence has been further established through the important announcements made this week by the Hon. C. C. Ballantyne, Canadian Minister of Marine, regarding steel shipbuilding.

PAINT FIRMS EXPECT TO GET SUPPLY OF TIN

PAINT manufacturers and others interested in obtaining supplies of tin for cans and other purposes are expecting word at any time that large quantities of tin which have been held for war purposes will be released. If this is done it will solve a problem in reference to containers which has been giving many firms a good deal of anxiety. While sufficient supplies of tin are expected to be kept to meet all requirements for sending food to the men who will have to be kept overseas, it is anticipated that there will be ample supplies of plate to look after the demands of the paint trade.

WEST IS IN GRIP OF SPANISH INFLUENZA

THE West is now passing through an epidemic of Spanish influenza that is as bad if not worse than that which disorganized business in Ontario and Quebec so completely. Manufacturers showed HARDWARE AND METAL letters from their travellers stating that already 150 towns are quarantined and business at a complete standstill. The death rate, while high, so far has not been as high as that of the East. Many Eastern firms as a result of the temporary tie-up of business in the West are recalling their travellers and will send them into other territory until the epidemic is past.

MERCHANTS WANT LIGHT FOR STORE WINDOWS

MODIFICATION of the drastic orders which have been in effect prohibiting the illumination of store windows is expected very shortly. Now that power will not be needed for the munitions factories, merchants all over the country are taking the question up with the Government and are urging that changes be made in the regulations dealing with lighting restrictions as soon as possible.

TURPENTINE PRICES ARE FIRST TO JUMP

ONE of the first commodities to feel the effects of peace conditions has been turpentine. A big jump in prices has occurred this week and indications are that further increases are not unlikely. There are those who believe that another advance may take place next week. Two weeks ago turpentine jumped three cents and this week an advance of twelve cents was made. The latest report from Savannah regarding market conditions says:—

"Turpentine is feeling the stimulating effect of peace. The markets of the world outside of the United States are as bare of turpentine as they are of rosins, and the stocks in this country, while much larger in proportion to demand than rosins, are strongly held. For five months to come the receipts will be inconsequential. After that they have little or no prospect of being any larger than they were this season. Already the market has advanced to the highest point it has seen in many years. How much higher it will go is problematical. Those who refused to have faith in turpentine under conditions of peace can plainly see the error of their judgment. It and rosins are among the commodities that inevitably must be greatly stimulated by the re-opening of trade with the world at large.

"The advances of the current week were marked in turpentine. The market is excited, dealers eager for supplies not only at Savannah but at other ports and in the woods. Consumers needing supplies face months of minor receipts, with the market strongly controlled by natural laws and firmly held stocks."

MAY REMOVE BAN ON PRODUCTION OF AUTOS

IMPORTANT orders which will remove the restrictions on automobile manufacturing across the line are expected at any time. These will have an immediate effect in Canada. The order curtailing production resulted in booming business in old cars all over the country this fall. As a result of the sudden collapse of the war huge quantities of steel and other materials which had been set aside for war work will be available for auto manufacturers and millions of dollars' worth of motor trucks and autos which they were making for the Government will not now be needed.

INFLUENCE OF WAR ON SPORTING GOODS

BASEBALL equipment for 2,000 teams in England is one of the novel demands brought about by the presence in that country of American and Canadian troops in immense numbers. In taking up the bayonet and the machine gun, the gas-bomb and the grenade, the irrepressible westerner has not abandoned his favorite pastime.

While England has seen the domestic demand for athletic goods such as the Briton ordinarily uses fall off some 60 per cent. incident to the war, the demand for baseball outfits, boxing gloves and footballs has shown an increase, indicating the war-time trend to games that cultivate the fighting spirit.

A large London sports store to date in 1918 has imported $57,500 worth of baseball equipment as against $10,000 worth in the whole year of 1915.

BUSINESS IS BRISK ON THE PACIFIC COAST

THE revivals of shipbuilding on the Western Coast continues. Contracts have just been awarded for approximately fifty steel wooden ships of various sizes. In Vancouver it is very difficult to obtain houses and it is expected that building will have to commence again very shortly to meet the requirements of those coming to the city. Business in general it is stated is good and prospects are for it to continue good. Indications point to a great deal of mining development also, in which British and American capital is interested.

Trade Renounces German Toys

Rejection of the Famous Shipment of German-made Toys Which Arrived in the United States—How Are Toys to Be Disposed Of?

WITH the armistice signed, and peace almost an assured fact, the trade naturally wonders what efforts will be made by Germany to regain a standing in the world's commerce.

The business world was surprised to hear last week of the arrival in the United States of a big shipment of German-made toys. Many guesses were made as to the probable disposition of the shipment. *"Printers' Ink,"* New York in this week's issue deals fully with the subject, and as the Canadian hardware trade is deeply interested in the question the following report from the above paper will prove particularly interesting at this time, especially as some of the firms concerned are well known to the Canadian trade.

German manufacturers had a striking object lesson last week of what they may expect in their attempt to reintroduce their goods into America.

Several large consignments of German made toys and china came over on a Dutch vessel. They had been bought and paid for in 1914 by various American importers and had been sent to Rotterdam for ocean shipment. There they had been held because, owing to war-time conditions, they could not get through.

A few days ago Butler Bros., Sears Roebuck & Company and other importers were much surprised at being notified that large shipments of toys and china consigned to them had come in on the *Nieuw Amsterdam* and were held subject to their order. They would have been little more amazed had they been informed that the Kaiser had arrived to pay them a personal visit.

The biggest shipment in the lot, consisting of about 7,000 tons of merchandise, belonged to Butler Brothers.

Butler Brothers flatly refused to take the goods even though they had been paid for in 1914. Walter Scott, vice-president of the firm and manager of its New York house, promptly notified the customs officials that the house would not under any circumstances receive the toys and china.

There will be a loss of quite a number of thousands of dollars for Butler Brothers in this procedure—or rather there already has been such a loss. Many months ago the amount paid for the toys and china was charged off the books and forgotten.

There is a duty of around 35 per cent. due the government. In view of Butler Brothers' refusal to accept the goods they remain in the government's custody. What will be done with them has not been decided. The usual method is to hold shipments for a year and then sell them at auction for the payment of the duty and other charges. It is interesting to imagine what might be the fate of such an auction a year from now.

"We simply refused these goods because we positively will have no German made goods in our stock," said Mr. Scott. "We bought them and paid for them long before America entered the war. We had to leave them in Rotterdam for the very sufficient reason that we could not get them through the British blockade. Then after America entered the war we did not want them. So we charged off our loss and forgot about the whole proposition.

No Compromise for Butler Brothers

"Then all at once the goods came across. We did not order them sent and had no idea they were coming. We don't like to cause the customs officials all the bother our refusal to accept the goods will entail, but we can't help it. Nobody asked us about the shipment. If our wishes had been consulted our part of it never would have come over.

"American children should have American toys. Working to this end we have during this war-time period been encouraging American toy manufacturers. They are making amazing progress and should be protected against such insidious attempts to undermine them as this seems to be. America does not need German made goods and so far as Butler Brothers are concerned, America will not have German made goods."

It was declared that the *Nieuw Amsterdam* made the trip under a guarantee of safe conduct from the German Government. No submarines molested the vessel. It was apparent that Germany was going to take no chance on the goods failing to arrive. Big business men generally regard the whole transaction as another example of sharp German practice and as the opening wedge of Germany's expected effort to rehabilitate herself in the American market.

The country-wide furore that arose over the transaction showed very conclusively that Germany is going to have her troubles getting Americans to use her goods even though the goods can get over here.

Secretary Lansing regarded the agitation as important enough to issue a statement branding as untrue the charge that these goods were brought over on the *Nieuw Amsterdam* to the exclusion of Belgian made products. Newspapers quoted Secretary Lansing as saying that the State Department had helped to get the goods out of Holland because they were the property of American business men. But no matter why the shipment was brought about, the objections were manifold and pronounced.

Newspapers Commend Butler's Stand

New York newspapers discussed the matter under such editorial headings as "Bloody Toys." One New York paper declared that every American should be glad and proud that the toys were rejected, as to permit any part of them to find their way into the hands of American children would be a sin and a crime.

"There was the baby spitted on a German soldier's bayonet," said this newspaper. "There was the French boy levelling his toy gun, shot down for his impudence. Never has there been a slaughter of the innocents so wanton and so brutal. And it was these toys made by these bloody hands that would be allowed to become the playthings of American children."

People in all walks of life were shocked and wrathful that the toys were admitted. Within a few days after the news had been telegraphed over the country Butler Brothers began hearing from their customers by wire and by letter. The messages expressed the customers' pleasure over the incident as well as their indignation over the arrival of the goods.

"We won't have German goods in our store under the name of German or any other name," said one letter. "Any jobber who imposes on us in the slightest degree in this matter will never again get another dollar's worth of our business."

A *Printers' Ink* representative had the pleasure of reading some of these letters from retailers. They were of a type that make thrills of pride chase each other up and down your backbone. If anybody has the idea that American retailers are going to consider dollars before patriotism he ought to read these letters. It is plainly apparent that if any distributor tries to work off German goods on American retailers under the name of Swiss or Swedish they are in at once for all kinds of concentrated and double-distilled trouble.

Public Up In Arms

And even if the retailer would be complacent for the sake of the dollars involved

the consumer would not be. New York women talked of organizing another Boston tea party to get rid of this shipment. The Printers' Ink representative, after reading these letters from the retailers, asked several people at random on a suburban train what they thought of the toy incident.

A verbatim report of their language would not be permitted here. It is safe to say that their resentment was emphatically and sufficiently expressed.

One of the men approached on the train, a lawyer, said:

"This apparently is the beginning of Germany's new after-the-war commercial offensive. The American people are going to sit down on it hard. There is going to be all kinds of crookedness in this direction after the war. Germany is going to sneak these goods in here if she can. She will have plenty of people to aid her at that. But the American people won't buy the goods if they know it."

Sears Roebuck & Company also received a large shipment of toys on the *Nieuw Amsterdam*. These toys had been bought and paid for and practically forgotten.

Sears-Roebuck Offers Proceeds to Red Cross

Albert H. Loeb, vice-president of Sears Roebuck, announced that the firm would not under any circumstances take any profit from the sale of these goods. But he took the position that the toys were property and should not be destroyed. He therefore made a proposition to the American Red Cross that the toys be placed on sale as German made goods and the profits given the Red Cross.

"If the Red Cross wants to do this," Mr. Loeb said to *Printers' Ink*, we shall issue a special catalogue offering the toys for just what they are and explaining that they are being sold for the benefit of the Red Cross. Of course, we are not worrying about the loss that would be involved to us if they were not sold. So far as that is concerned the whole shipment can be dumped into the lake. We don't care anything about it. But it seems to me that to destroy property in this way is very much like playing into the hands of the German manufacturers.

"The United States confiscated a number of German ships. These ships are helping our nation win the war. Would it not be foolish on our part to refuse to use them just because they were made in Germany? Would it not be ridiculous to destroy these ships—valuable and indispensable property—simply because they were of German origin?

"The goods coming over on that ship should not be considered in the light of their German origin. They represent property that belongs to American importers—property that was bought and paid for long before America entered the war."

Mr. Loeb said his firm had not decided what disposition to make of the goods in case the Red Cross refused to accept the proposition.

The American Defense Society, a patriotic organization with 75,000 members, is conducting an active propaganda against permitting the German toys in the *Nieuw Amsterdam's* cargo to get into the hands of American children. Richard M. Hurd, chairman of the German boycott committee of this organization, is directing active efforts along several lines to this end. The seven firms which owned the toys, and the three firms to whom 3,000 cases of china were consigned, have been interviewed and urged not to permit the introduction of these blood-stained Hun products into America. Louis Wolf & Co., of New York City, has consigned its shipment to the care of the United States Government for the present, by making a warehouse entry. So far as could be learned, the other importers of toys, two of whom are Philadelphia firms and the rest New York, have gone ahead in selling of their shipments. One house reported an eager demand for the goods, and another importer said that the financial loss involved in sacrificing the goods would bankrupt him. A Philadelphia house, which is believed to be planning to sell the goods, is also reported to have placed heavy orders for additional toys to be made in Germany after the war. No reports have yet been made on the disposition of the chinaware, which constituted three-sevenths of the total cargo.

Might Furnish a Precedent

"The American Defense Society is proceeding cautiously and will do no harm to innocent people if it can possibly be avoided," said Mr. Hurd to a representative of *Printers' Ink*. "At the same time we propose to leave no stone unturned in our fight against this ingenious German scheme to creep back into the American market. There is every reason to believe that there are additional-pre-war German goods probably to the value of many millions of dollars, in Holland and other neutral countries. If Germany succeeds in getting this first cargo of toys distributed in America, it will establish a precedent very valuable to her. Moreover, the argument that the goods have been paid for anyhow, and might as well be used, seems to us fallacious. Removal of these goods from Holland simply creates an opportunity for more German goods to be sent to that country to replace them.

"The ideas which have been suggested about the disposition of these goods are various, but not all are practical. To create a popular fund, buy the toys and burn them or dump them in the ocean would cost more than people realize. This one cargo is valued at more than $200,000. We couldn't go on doing that indefinitely—and, anyhow, Germany wouldn't be in the least displeased to have us do so Possibly the solution will be to sell goods of this class in neutral countries, or return them to Holland.

"If all the importers would follow the example of Butler Brothers, and if the United States Government would waive its 35 per cent. import duty, we could put these goods on barges and dump them in the ocean. But the important thing is to show the retailers and jobbers that the American people are thoroughly aroused about this matter and will not tolerate goods from the land of the Huns."

An active campaign will be started at once all over the United States to secure, through committees of women, pledges from department stores that they will not sell any German goods at all. Stores agreeing to conform to this policy will be given an official placard to post in their windows, saying, "No German Goods Sold Here." Miss Elizabeth Marbury is chairman of the Women's National Committee, American Defense Society, which will have this work in charge.

The American Defense Society has asked Secretary Lansing to grant no more licenses for importation of German goods; it has requested the Holland-America line to ship no more, and has also requested marine insurance men not to insure such cargoes in future. An effort is being made to have Congress investigate the whole matter.

BRITISH ENTERPRISE IN ITALY

Subsequent to the prohibition of export of tungsten and tungsten alloys from England French makers were allowed to supply Italy, but on terms which evidently did not satisfy the Italian consumers and Government. It is interesting to note, says the Liverpool "Journal of Commerce," that by the enterprise of a well-known English metallurgical firm this unsatisfactory position has been altered and Italy made entirely self-supporting as far as her tungsten supplies are concerned. Mr. H. A. Blackwell, chairman of George G. Blackwell, Sons and Co., Ltd., of Liverpool (who are official smelters of tungsten ores to the Ministry of Munitions), arranged, with the entire concord of the Italian Government, the erection of a works and plant at San Querico, Genoa, for the manufacture by his process of ferro-tungsten and other alloys. These works are now completed and in full operation, producing large quantities of highest grade ferro-tungsten. The productive capacity of the works is in excess of the entire Italian requirements on a war basis, and the Italian Government is so satisfied with the progress made that the works were declared a 'Stabilimento Ausiliario." In addition to the manufacture of ferro-tungsten, plant has been put down for the production of various other ferro-alloys, and also all the alloys of copper and aluminum with the rarer metals.

Joint stock companies incorporated recently include the following: Ru-Ber-Oid Felt Manufacturing Company, Limited, Montreal, capital $200,000; the Belleville Rubber Company, Limited, Belleville, capital $1,000,000.

How Advertising Boosted Xmas Sales

Large Western Hardware Firm Conducts Energetic Campaign Every Year—Is One of Biggest Features of Year—Plans Carefully Laid—Cutlery and Sporting Goods Figured Prominently—Consistent Advertising Worked Wonders

THE Ashdown Hardware Company of Calgary has looked forward with increasing interest to the Christmas holiday season for many years, for its retail sales have so increased during the weeks immediately preceding Christmas that plans are carefully laid each year to take care of even a better business than was done the year before. There is no hit-or-miss programme followed, but on the other hand the management arranges its campaign with much forethought. The writer has personally assisted in the big rush during two seasons, and because the plans followed have consistently "brought home the bacon," HARDWARE AND METAL readers may find much in them of interest.

Use Printer's Ink

Time was when this store used but little newspaper space. Calgary was a promising field for a live retail hardware store, and with its rather rapid growth the Ashdown store has kept pace. In fact it has set the pace in many ways from the fact that its stock has been developed greatly to anticipate the needs of the buying public.

Anticipating that the buyer in a Western city is likely to follow a good lead, W. J. Illsey, manager of the Ashdown store, has made extensive additions each year to the stock that would very probably prove real sellers, and, most of all, which would yield that profit which special goods ought to yield. So many lines of a staple nature have to be carried in the hardware store that require selling at a moderate advance that the specialties are entitled to return a good margin of profit. But even though this is consistent, the sales here have been brought to the point where a large profit has been made out of quick turnover rather than having individual sales carry large profits.

The Advertising

Calgary has had three daily papers for some time. One of these is a morning paper and it is used to some extent. The nature of the advertising carried in it is that pertaining more particularly to the sporting goods department, and of this line sales bulk large at the Christmas season. Since the morning paper is credited with a large circulation among the sporting element its value in carrying the advertising pertaining to the sporting goods department has been looked upon as greater than other mediums used for various other lines sold. Space used for the advertising of these goods varies from a few inches to half a page.

For the most part, cutlery of various kinds, razors, flatware. silver tableware, aluminum ware, nickeled goods, and so on, are advertised in the evening papers. The value of this comes from the fact that the woman of the house will read the evening paper and also her husband. A detailed account as to the offerings of the store enlists much attention and eventual response. sales being constantly traceable to the advertising used.

When to Advertise

The timeliness of advertising has been figured out. Smaller space is used about three weeks before Christmas, and this is gradually increased as the holidays are approached. From a space of probably an eighth page at the beginning, or even less, according to the message embodied, this is increased during the last ten days of selling to a third a half, and several times to a full page.

The ads are well illustrated by the free use of electros. These vary in size, but are usually small, so that there is ample room for the reading matter. The latter is clear and direct, giving the reader such information as is required in the fewest words possible. Too much emphasis cannot be placed upon the importance of the illustrated advertisement for it arrests attention where that which is not so made up will fail of its object in pulling trade. During the last week the advertising is pressed to the limit, and no issues of the daily paper are missed. Sometimes both evening papers are used, but not always. Due regard is given circulation.

The Value of Windows

In the Ashdown store, effective, striking window displays are a definite and important phase of merchandising. The windows have proved their worth. Several times they have been altered to meet the growing demands of an increasing trade. It is just about a year and a half since elaborate plans were effected whereby the windows were deepened, and their selling value much increased. Reference to this was made in HARDWARE AND METAL some time ago.

No expense is spared in procuring effective cards to accompany the goods on display. Such displays are made the beginning of each week, and it is the duty of one of the clerks who shows a bent for this to take charge of and make all displays. In this way the ability of the window dresser is developed and he knows just what is expected of him. Given a considerable scope in the preparation of his displays he is able to create the effective, selling value windows that are desired, and in hooking up the advertising with timely displays this double-barreled plan serves to bring trade to the store. It assuredly does this.

A Typical Display

That the trade-pulling power of the windows may be clearer, a typical window is here described.

The glass is cleaned at all times and kept as near spotless as possible. This is indispensable. Plans are made beforehand as to what each window shall contain. If sporting goods, then selections are confined to these articles alone. This permits of attention being drawn, on a large card, to the big stock carried. "Quality Sporting Goods Have Their Home Here. See Display Third Floor," may be found on one card. Then small cards are used always, carrying the price of the line to which they refer.

Pedestals are used effectively for holding plate glass shelves about twelve inches in width and from two to three and a half feet long. These pedestals are varied in height from one foot to two and one half feet, so that when placed in various parts of the window they give a gradual "stepping" effect from front to back. Covered with the same material as that used for the background, the smaller goods are placed on these glass tables and look well.

The Background

The Ashdown windows would not be so effective if the attention given to building up backgrounds were lacking. It is always the most important feature, for whether built of the goods themselves, of a combination of lithographs supplied by the advertiser, crepe paper, or crepe paper alone, the character of the window, when finished, depends upon the time that was spent in making a good backing. The writer has himself spent many hours in making a suitable setting for the finished window, and it always paid well to spend this time.

Crepe paper was much used since the cost of cloth increased. This may be had by the box at wholesale price, and a variety of shades such as green, blue, purple and yellows afford a good selection. The one color scheme is always used and the background and floor of the windows always are covered.

With the arrangements just described completed, the window is ready for the goods. These are placed about the floor and arranged effectively across the back and one end. As the passerby comes along he is attracted at once and secures a good impression of the store and stock.

Interior Displays

The store interior is not forgotten. Tables are effectively used on which the various Christmas goods are shown. These are placed within the main store so that the eye of the customer entering will be readily attracted. They are long and narrow, and are covered with red cloth or baize. This is a good color and nickeled and aluminum goods, electric irons, chafing dishes and carpet sweep-

ers, etc., stand out well over this color.

The same idea is carried out on the second floor. Here the housefurnishings are carried. There are many lines that can be shown to advantage, and the displays bring actual results. There is nothing more effective than a good display to work on the mind and produce a decision upon the buyer's part.

On the third floor the sporting goods are carried. So important a department is this at the Christmas season that its sales within a couple of weeks often eclipse those for many weeks previous. They even are larger than for several of the remaining months of the winter.

Among the lines accorded this department are footballs, baseballs, roller skates, games, thermos bottles, athletic underwear, sweaters, boxing gloves, guns, rifles, velocipedes, carts, barrows, wagons, toy autos, etc. In the latter lines a large trade has been developed. One of the biggest items is that of ice skates. So large has the trade for these been during the week preceding Christmas that five to six men had to attend to the clamoring customers and attach skates. Hockey boots are of course sold in large quantity.

Suitable Decorations

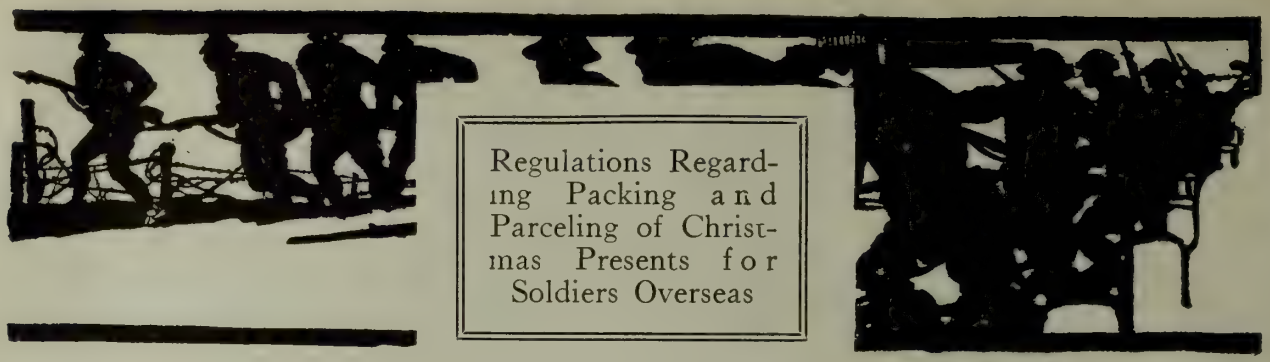
The Christmas spirit is made apparent by introducing timely and seasonable decorations. These are varied and neat, the trimming not being overdone. Festoons of green and red rope, Christmas bells properly placed, holly and mistletoe grace the tables and pillars, and hang from the ceiling in effective arrangement. Sometimes artificial autumn leaves are pleasing for use as a background, and these also are used in the windows at times. The idea is to create and foster the Christmas spirit.

War Has Put British Steel Trade on a More Substantial Basis

THE German-made war has given the British steel trades a remarkably big, new, and long lease of life. Up to 1914 it was in the iron, steel, and engineering group of industries above all others that the Germans were offering the strongest and most successful competition. They were making almost giant strides while England was merely marking time. At the prewar rate of progress England would very soon have been relegated to a very inferior position in the steel trades by Germany. Now the whole situation is revolutionized, the outlook is transformed. Britain has doubled her output, while German production is decreasing. Britain is acquiring and developing fresh supplies of raw material, while Germany will certainly lose some of her supplies. Britain is organizing her resources and improving her methods, and her goods will have preference after the war. Germany is losing her grip on the world's markets, she is losing man-power in far greater proportion than England, and she will certainly suffer some measure of boycott. After the war, as a direct result of Germany's mad plunge, which has awakened England, Great Britain will again take the first place as an iron and steel exporting nation.

Grew Rapidly

In the fifteen years before the war Germany increased her exports of iron and steel and manufactures thereof from 1,000,000 tons a year to 6,000,000 tons, and more than kept pace with the world's rapidly-growing demand for these goods. England only increased her exports from 4,000,000 to 5,000,000 tons, and even this was offset by increased importations. England neither kept pace with the world's demand nor with her rival's progress. Nearly all the world's increased trade in iron and steel went to other nations, chiefly to the Germans. The Germans produced on a large scale; they organized and specialized, they had Government assistance in the shape of preferential railway rates on exports and subventions for the ships carrying the goods abroad, and their exports were lavishly bounty-fed by the syndicates. England took no effective measures to meet this organized and subsidized competition and develop her own trade. In twenty-five years Britain increased her output, in terms of pig iron, only from 8,000,000 tons to 10,000,000 tons a year, against Germany's increase from 3,000,000 tons to 19,000,000 tons. Britain clung to old methods and policies, and it is probable that but for this German-made war would never have awakened in time to save one of her chief productive industries from decline and ruin.



Jumped 50 Per Cent.

Under the exigencies of war, and chiefly to meet the demand for munitions, she has in less than four years increased her steel output by more than 50 per cent., in spite of heavy enlistments. This is an amazing record. The return of peace finds her with a productive capacity twice as large as she possessed upon the outbreak of war, and in the meantime Germany's output has already declined by nearly one-third. With a hugely increased works capacity, a largely increased and better-trained labor supply, and a new spirit of co-operation among British manufacturers, they will have a much greater surplus of goods available for export than they dreamed of before the war. Not only will England be practically independent of the 2,000,000 tons of iron and steel formerly imported annually, but she will be able to export at least 8,000,000 tons a year against her previous 5,000,000 tons. German trade will be restricted by shortage of labor and materials, and by measures against her subsidized export policy.

The United States, her next largest rival, will never offer the keen, bounty-fed, State-subsidised, undercutting competition that Germany has practised. It is not the American policy. Besides, the home demand for steel in the United States is so abnormal that ordinarily there is very little available for export from that country. It is a remarkable fact that although the American productive capacity is roughly equal to that of Britain and Germany put together, American economic conditions are such that (the war apart) that country has never been, and perhaps never may be, a really great exporting nation in the heavy iron and steel trades. In the United States the ore is deposited so far from the coal, and the furnaces are so far from seaboard, whilst wages and other costs are so high, that the country must always labor under great disadvantages in international competition in steel. Relatively to labor supply and works output, American manufacturers have such a good market at home that they need not trouble much about exports. In this respect they occupy a position totally different from that held by their British and German rivals. Basic, natural, geographical, and economic conditions kept the United States far behind Britain and Germany in exports before the war, and similar conditions may prevail after the war.

A Vast Market

There need be no doubt of England's ability of finding markets abroad for some 8,000,000 tons of her iron and steel products annually after the war. There is a world's famine of general commercial iron and steel goods—railway and structural material, agricultural and mining implements and tools. The world depends for these things almost entirely upon three countries: Britain, Germany, and the United States, and will have to do so for many years to come—with the possible addition of France. Out of a world's export in steel of some 18,000,000 tons a year before the war, these three countries did about 14,000,000 tons. Throughout the war the Germans have been out of the business. British commercial exports have been steadily reduced until they are now less than 25 per cent. of the normal figure. America has made great efforts, but even her exports have fallen far short of making up the deficiency. Last year the United States managed to do a record trade of 6,000,000 tons of iron and steel exports, but such a large proportion was war material that little was done to relieve the general steel famine. Nearly every country in the world is simply hungering for steel, and eager to place enormous orders as soon as circumstances permit. Besides all the arrears of ordinary construction to catch up, and all the losses and wastages of war to make good, there will be a huge new demand for steel on account of the great agricultural revival that the high price of food is stimulating; vast new areas will be opened out and will need railways and the shortage and high cost of labor will cause a big demand for machinery and mechanical appliances.

Regulations Regarding Packing and Parceling of Christmas Presents for Soldiers Overseas

ALL parcels which are intended for the soldiers in France or England should be mailed before December 1, if the boys are to be reasonably sure of getting them in time. Hardware men report many inquiries for various useful articles for the boys overseas and have been doing a splendid trade in these lines.

From the Post Office Department HARDWARE AND METAL has obtained the following information regarding the posting of parcels for the soldiers overseas. This will be of value in enabling merchants to assist their customers in sending off their packages.

"Parcels posted for delivery to soldiers in France for Christmas, 1918, should be posted in time to permit of their despatch from Canadian ports not later than November 23.

"The address should be as follows: (a) Regimental number; (b) Rank; (c) Name; (d) Squadron, Battery or Company; (e) Battalion, Regiment or other unit; (f) Canadian Contingent; (g) British Expeditionary Force; (h) Army Post Office, London, England.

"Unnecessary mention of higher formations, such as Brigades or Divisions, is strictly forbidden and causes delays.

"Parcels for troops known to be in the United Kingdom are subject to the parcel post rate for the United Kingdom which is 12 cents per pound or fraction thereof. The limit of weight for the United Kingdom is 11 pounds.

"Parcels for the Expeditionary Forces in France and Flanders are subject to the following rates:

For parcels weighing up to 3 pounds ..... 24 cents
For parcels weighing over 3 pounds and not more than 7 pounds ..... 32 cents
The limit of weight in this case is 7 pounds.

"Parcels for the Egyptian and Salonika Expeditionary Forces are subject to the following rates:

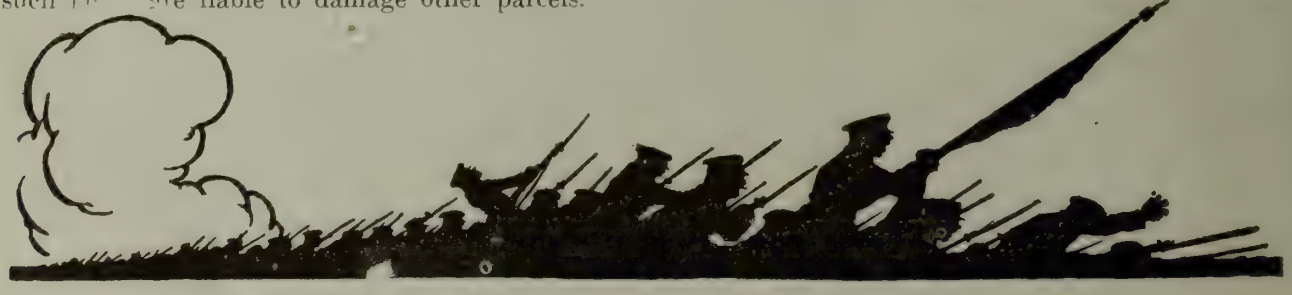
1 lb.	32 cents	4 lbs.	74 cents
2 lbs.	40 cents	5 lbs.	82 cents
3 lbs.	48 cents	6 lbs.	90 cents
		7 lbs.	98 cents

"The limit of weight in this case is 7 pounds.

"It is absolutely necessary that all parcels for troops should be very carefully and securely packed, as, owing to the conditions of transit, parcels not packed with more than ordinary care run great risk of damage or loss of contents.

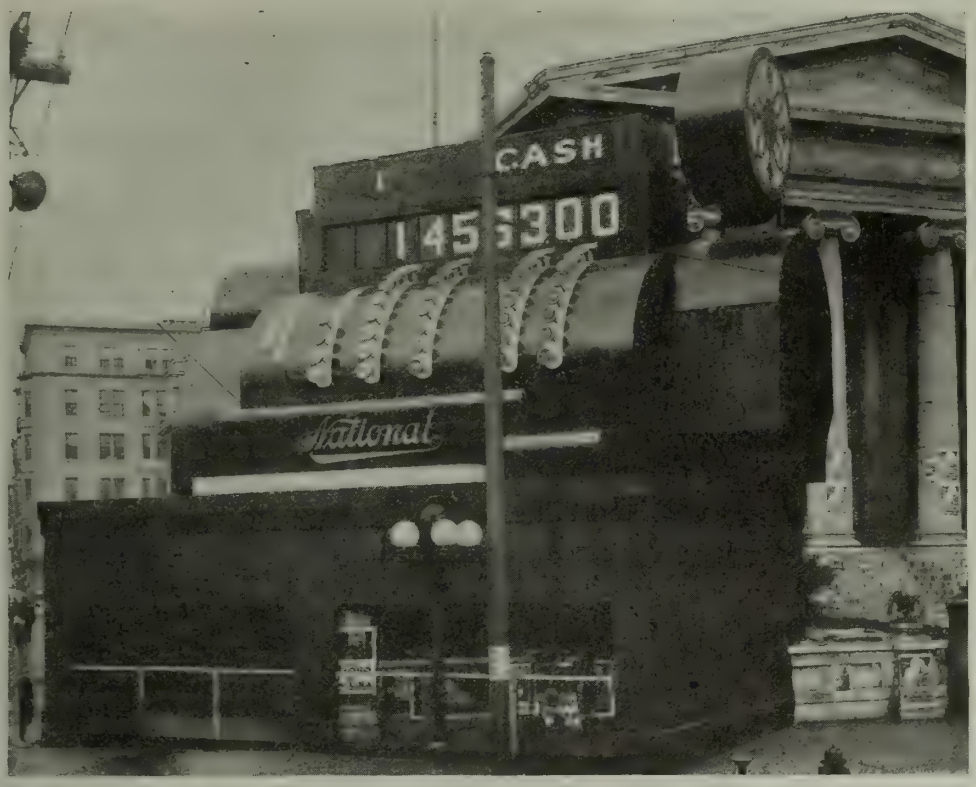
"Thin cardboard boxes such as shoe boxes, and thin wooden boxes should not be used, nor does a single sheet of ordinary brown paper afford sufficient protection. It is also found that cylindrical tin boxes are very liable to damage.

"The following forms of packing are recommended:



1. Strong double cardboard boxes, preferably those made of corrugated cardboard having lids which completely enclose the sides of the boxes.

2. Strong wooden boxes.



3. Several folds of stout packing paper.

"Additional security is afforded by an outer covering of linen, calico or canvas securely sewn up. It is recommended that all parcels be strongly and securely packed in covers of this nature.

"In the case of parcels for the Egyptian and Salonika Expeditionary Forces not only must every parcel have an outer covering of strong linen, calico, canvas or other textile securely sewn up, but these parcels should be as nearly round as possible, and well padded with shavings, crumbled paper, or other protective material, particularly if wooden or metal boxes with square corners are used, as such boxes are liable to damage other parcels."

Current Events in Photograph

A RECORD CASH REGISTER

The huge cash register, standing 38 feet high and 38 feet wide, was built through the patriotic contributions of citizens of Dayton, Ohio, and placed on one of the prominent corners of that city to register the city's subscription to the Liberty Loan. It holds the palm as the largest machine of its kind ever built.

Make Your Xmas Window a Winner

You Can Capture One of the Cash Prizes Offered by Hardware and Metal and Also Boost Your Profits by Exercising a Little Care and Ingenuity —Get Busy Now With Plans

THERE is always one very important thing to keep in mind when arranging a window display, that is to make it a business producer. At Christmas time this is especially important because probably ninety-five per cent. of the people who will be attracted to your window are out for the purpose of buying. They are trying to decide just what they will give, and if you can show them something that they will appreciate, and of value, the chances are they will walk right into your store and make the purchase. Almost anyone can arrange a window so that it will look pretty. From a business standpoint this, while not useless, has little real value in dollars and cents. It simply means that a prospective customer attracted by a pretty arrangement, or some striking feature comes to look in. Seeing nothing there to interest him in the way of goods he passes on to make his purchase in some store where he finds what he wants.

Sale Is What Counts

In preparing for the big window display contest for which HARDWARE AND METAL is offering eight cash prizes, it is well to keep in mind the Christmas sales possibilities. The hardwareman has splendid chances to offer to the buying public at all times goods that are of value. At Christmas time no merchant has better opportunities for drawing trade by means of his windows than the hardwareman. His success depends upon his selection and arrangement of goods, and just this is what makes one window display better than another. The chance is wide open for every hardwareman in every part of the Dominion, and HARDWARE AND METAL has eight cash prizes all ready to hand over to those who are adjudged the most proficient window trimmers.

Makes No Difference

It makes absolutely no difference where you live, you have an equal chance in the contest. The youngest clerk in the smallest hardware store in Canada can if he has the ideas produce a window display that will win. There is no limit to the possibilities offered by the contest. The only condition is that goods for the Christmas trade must be shown. Remember that what will appeal to the trade, say in a mining town, would not be of interest to the people in a farming center, except in a general way. In a country the size of Canada there are so many comunities, each with its own needs, that the window dresser has endless opportunity for developing originality. The possibilities of window dressing have never been, and probably never will be exhausted. There are so many good ideas and attractive arrangements that will boost sales at Christmas, that it is an easy matter to arrange a window that will "pull." Your clerk may have the idea that will mean hundreds of dollars in additional sales to you this Christmas. Give him a chance to try, it may mean splendid profits for you and encouragement and a cash prize from HARDWARE AND METAL for him. Dressing the window will be splendid training for him in every way. It will give him a better understanding of values, and a chance to exercise his ingenuity in a way that may prove most gratifying to everybody. You have six weeks in which to let him experiment and try out his ideas or your own. Enter the window display contest and you will be surprised at the results you can obtain.

EDITORIAL COMMENT

EDITORIAL BRIEFS

THERE'S three things you can't beat, the race horses, the stock market and the booze.

* * *

MERCHANTS and manufacturers who have stood the tests of the past four years need not worry about the future.

* * *

DON'T imagine you're a great patriot because you buy a war bond. It's a gilt edge security, and non-taxable. In fact it's the best investment in sight, and buying them isn't nearly so risky as fighting at $1.10 per day.

A TRIUMPHANT ENDING.

"THE whole empire pledged its word not to sheathe the sword until our end was achieved. That pledge is now redeemed. The end of the struggle finds the Empire still more closely united by common resolve, held firm through all vicissitudes, by suffering and sacrifice, by dangers and triumphs shared together. The hour is one of solemn thanksgiving and of gratitude to God." This in part is the message of King George to the people of the British Empire upon the conclusion of the greatest war in the history of the world. That it ended with the Kaiser a fugitive in Holland, with the Prussian militarists standing hat in hand humbly asking for the Allies' terms of Armistice from Marshal Foch and with the troops of the Entente everywhere smashing to victory is indeed most gratifying. It is especially pleasing to Canadians that the last fighting before the armistice was signed took place at Mons when the boys from the Dominion recaptured the city where the British troops started the war four years ago. The future of Germany seems decidedly uncertain. The people are starving and everywhere revolution is spreading . In Austria the same conditions prevail and Emperor Karl has followed the example set by the Kaiser and given up his throne. Many big problems still confront the Allies and that of supplying food to millions in Europe who are on the verge of starvation is not the least of them. There will, it seems, be the most urgent need for everything Canada can produce, food, materials for reconstruction, ships and other things. Leaders of Canadian business do not look for any serious troubles in connection with the transition from a war to a peace footing. It is realized fully that there will have to be some readjustments, but they say there is nothing on the horizon to cause apprehension as to the future.

EXPECT STEADY BUSINESS

THE war is over and Canadian retailers are just entering the era of reconstruction. There are many problems of readjustment to face. Some of these are apparent now and others will develop. Those in closest touch with the commercial life of the Dominion do not look for any serious disturbances. While trade in some lines is expected to be quieter because of the cutting off of the war orders there will unquestionably be an increased demand in many others just as quickly as supplies are available. Many millions of tons of steel which have been held for war purposes will probably be available shortly for other uses. Two of the first industries to benefit by this will be automobiles and agricultural implements. Manufacturers in these lines are far behind in their orders. A brisk demand for building material seems assured and as quickly as help is available many projects are likely to start. Men who have been working in munitions factories can find immediate employment in factories, on the farms and on the railways. A reduction in the high wages of the war will follow, but there will be plenty of work for all at good wages. Manufacturers do not look for prices to drop in many lines for a long time, and many merchants express the same views. Many manufacturers are almost out of raw materials. Even though the war is ended they cannot buy any cheaper. They expect though to be able to get the materials, which is a good deal more than they looked forward to a month ago. There may be delays even here as reports from various markets state that huge orders are being placed by British and French firms. British interests for instance are said to have arranged for large shipments of turpentine in the South. If the supplies are shipped overseas, they cannot be replaced for some time and other orders will be held up. Some manufacturers state that they already have orders on hand that will keep them working for two years. Their problem is to get the men and materials now. Altogether retailers are looking forward to a period of steady business.

LET THE CLERK DO HIS SHARE

THERE are many merchants who seem to think that the business would fall into ruin if they took their hands off the wheel even for a moment. Ask them why they do not hand over certain work to their clerks, and they will look horrified and reply "Oh, I have to look after it myself to see that it is well done." That is of course following out that good old misguided maxim: "If you want a thing done well do it yourself." That maxim sounds wiser than it really is. The business that is limited by one man capacity for doing things must of necessity be small. Business grows by the syndication of responsibility. Marshal Foch may know best how to carry out his own commands, but he couldn't win the war alone. He may retain the direction, but he must depute the work to others.

Moreover, the merchant who adopts the policy of doing all the important things himself must be contented with the half-hearted service on the part of his clerks that this policy engenders. Responsibility is the best tonic that a clerk can have. There are few men who will not grow with enlarging opportunities. If the clerk cannot be trusted to shoulder some responisibility, he is hardly worth keeping, and the logical conclusion of this policy is the one man store.

LONG TERM BONDS POPULAR

THE objective of half a billion in Canada's Victory Loan campaign is being steadily reached and from indications will be surpassed. In one important particular the subscriptions to the latest loan are different from those of other years in that calls for bonds of longer maturity, fifteen years, predominate. Last year a great percentage of the subscribers took five-year bonds. Those taking the long term bonds have freely expressed to canvassers their opinion that the bonds will go to a premium in a few years. The great majority of the larger investors took the long term bonds. This is in striking contrast to those who wanted bonds of $50 and $100 denomination. Practically all of these were short term bonds. This is significant. It indicates clearly that in most cases the smaller subscriptions were given in ignorance of the greater potential value of the long term bond and also that the subscribers went into the loan with the idea of helping only to raise the amount required. One gratifying fact in connection with the whole campaign is that the investment principle of the bonds has strongly impressed the public, and more than ever before the people of moderate means.

READY FOR THE FUTURE

BECAUSE it has forced them to study conditions and business methods more closely than ever before, the war has proved of inestimable value to hundreds of retailers in Canada. Conditions have been so entirely different to any that have prevailed that the merchants had nothing to guide them but their own judgment. They have had to figure out their own problems and lose or win according to whether their decision was right or wrong. Hardwaremen seem to have been particularly successful in handling this difficult situation and there are many indications that the hardware trade is on a broader and firmer basis now then ever before. It is for this reason that the hardwaremen are looking forward to the future with the utmost confidence. They have learned many valuable lessons in the past four years and they are ready to apply them in the time that now seems to be very near, when Canadian business must change back from a war basis to that of peace. Peace will bring its own problems, probably many of them, but profiting by the close attention they have been giving to business problems for some time, hardwaremen are ready to give the same careful study to the new questions. This will continue to make for better business as the closer any merchant gets to his merchandising the better he will understand it and the better he will be able to manage it.

IS YOUR NAME BASCOM SMITH?

"BASCOM SMITH liked his supper promptly at fifteen minutes past six, the fifteen minutes being for thirty years his regular allotment to glance over the day's receipts of the Murratown Leading Hardware Store, lock the store after his two clerks had gone, and then walk, at a deliberate gait, the four blocks east from Main Street to his square, flat-roofed, white house."

Ida M. Evans writes the above as her opening paragraph of her story in a recent issue of the *Saturday Evening Post.*

The story is supposed to be fiction, but is it fiction that this is the procedure of many of the smaller business men? Just imagine, only fifteen minutes to "glance over the day's receipts," lock up the store and walk four blocks at a deliberate gait. In other words, about ten minutes or less devoted to one of the most important parts of the business day, seeing what had been accomplished and planning for the future. Only ten minutes spent in analyzing the problems of ten hours. Only ten minutes to check up receipts and expenses, to examine invoices and make sure that charge accounts were correct. Only ten minutes to attend to the thousand and one little things to which successful merchants devote hours of patient endeavor each week. If this picture of Bascom is correct even in any small details, it contains a lesson that should make many retailers get a whole lot closer to their business than they have been getting.

EVENTS IN THE TRADE

Business Changes.

Montreal.—The Main Hardware and Paint Store has been registered.

Obituary

The death occurred at Yamachiche, Quebec, of P. G. Bellemare.

The death occurred at Medicine Hat, Alberta, from influenza, of William W. McNeely, who formerly operated the Alberta Linseed Oil Mills.

The funeral of Walter A. Tait, traveller for the Ashdown Hardware Co., Calgary, who died after one day's illness with pneumonia, was held at Campbellford, Ont., from the home of his father, T. S. Tait, of the firm of T. S. Tait & Son, hardware merchants.

Personals

Fred G. Funston has severed his connection with the Kennedy Hardware Co, Toronto, to accept the position of purchasing agent with the Vokes Hardware Co., Ltd., Toronto. Mr. Funston returns to his old firm with whom he was formerly associated for a period of sixteen years.

Montreal News

O. Anderson Barker, with Willis H. Simpson, Inc., New York City, was in Montreal this week.

Edw. W. Charlton, of Brandram-Henderson Ltd., has resumed his duties after a short illness.

A. G. Bowman, with Russell and Erwin Mfg. Co., New Britain, Conn., was in Montreal during the week.

S. G. Manheimer, with Kaufmann Bros. and Bondy, 33 East 17th Street, New York, was in Montreal this week.

George Henderson, president of Brandram-Henderson, Ltd., Montreal, was in Toronto for a few days and returned early in the week.

Trade Notes

S. L. Adolph, hardware merchant, of Listowel, has started a motor truck delivery. Besides the regular delivery work he is using it for hauling freight from freight sheds and also is making special deliveries in the surrounding country.

Ratepayers of Bowmanville, Ont., carried a by-law to loan $50,000 to the Canadian Can Company. Operations are to begin at once. The new company will absorb the J. F. Ross Can Co., and the Hygienic Containers Co., Toronto.

Owing to the epidemic of influenza the annual convention of the National Paint, Oil and Varnish Association, which was to have been held in New York last week, has been postponed until December 2.

The plant of the Chatham Brass Works at Chatham, Ont., has been purchased by the Denby Motor Truck Co., which plans to use it for the manufacture of axles and transmissions.

Notes From Regina

G. Y. Smith, of the Metal Specialty Co., has returned from the United States and is working for Armstrong, Smyth and Dowswell.

F. Moore, of Marshall Wells, stove specialty salesman, was in the city this week.

Mr. McLaughlin, representing the Marshall Wells Hardware Co,. was in the city this week.

Paint Salesmen To Meet Next Monday

The annual convention of the Sherwin Williams Company's Eastern Canada salesmen will open in Montreal on Monday, November 18. A general discussion of trade conditions, especially relating to the return to a peace basis, will take place. The salesmen's convention will last until Thursday. A gathering of the Sherwin Williams Company's Western Canada salesmen will be held at a later date.

MONTREAL MOTOR SHOW

Arrangements have been concluded whereby Montreal will have a big exhibition of used passenger cars, trucks, and motor cycles. A large building with 25,000 square feet of floor space has been obtained in the centre of the city, and the dates of the big show are fixed for April 5 to 12, 1919.

No older make of car than 1916 will be admitted, and it is proposed to have an auctioneer hold an auction sale of the cars on the floor every evening.

A special feature will be rebuilt cars, or used cars that have been taken to pieces and rebuilt, thus carrying practically the same guarantee from the builder as new cars have from the manufacturers. There will be no new cars shown. Several makes of tractors will be on view and there will also be a special accessory section.

McARTHUR, IRWIN, LIMITED TO ENLARGE PLANT

Announcement is made to HARDWARE AND METAL this week that McArthur, Irwin, Limited have decided upon expansion to their Montreal business. They have purchased the plant at Rockland avenue and C. P. R. tracks, Outremont, Montreal, and will immediately equip it for the manufacture of Paris green and other insecticides.

The buildings on this property, which has an area of about 6,500 square feet, comprises two stories and also a power house. The firm plans to use this property in increasing the output of their present dry color plant and paint factory.

PLAN TO CLOSE EARLY DURING THE WINTER

There is a movement under way by many of the merchants of St. Thomas, Ont., to have a new early closing order enforced in that city during the coming winter months, by which their light and heat bills would be greatly reduced. The new scheme in favor is an "open at 8 a.m. and close at 5.30 p.m." rule. It is pointed out by those behind the project, by closing at 5.30 they would be staying open half an hour longer than they did during the summer months. This new rule would not apply to nights before holidays and Saturday nights.

MONTREAL'S VICTORY ARCH MAY BE PERMANENT

Of all the outstanding features of Montreal's Victory Loan effort, none drew more favorable comment than that concerning the fine Victory arch that graces Phillips Square on the St. Catherine Street side. Interest in this attractive feature is added from the fact that its cost was defrayed by the retail merchants of Montreal. Its presentation on Monday night last to the Victory Loan committee was made by Messrs. Dupuis and Birks.

The present arch is of lath and plaster and was effectively designed and cleverly executed. On the sides and front of it suitable inscription directs attention to historical villages and towns in France and Belgium where Canada's sons covered themselves with glory.

In making the dedication and presentation, the suggestion was made that a permanent arch of marble might be erected to the memory of the fallen heroes.

Dealers Suggest 20 Per Cent. as Reasonable Basis For Gasoline Profits

SOME modification of the ruling of the Fuel Controller's regulation limiting prices of gasoline to ten per cent. for retailers is expected in the next few days. Strong representations made to Ottawa from all parts of the country urging that ten per cent. is too low a basis resulted in the Fuel Controller sending out notices that it would be unnecessary for dealers to take out licenses for ten days. In the meantime an investigation is being made into the situation.

A great number of letters have been received from hardware men, garage men and others handling gasoline, and the majority suggest that twenty per cent. would be a more reasonable margin of profit than ten, and that they will not make very much even at that figure when all expenses in connection with handling are considered.

Decision Shortly

Mr. Petersen, the deputy controller, has been absent in the West on duties connected with his office, and a great deal of business accumulated in his absence. He is now back in Ottawa, and as soon as he can take the matter up, which will be within a week or ten days at the outside, the whole question will be thoroughly gone into. Representatives from the dealers in gasoline will be invited to confer with the fuel department and the choosing of the delegates will probably be left in the hands of the Retail Merchants' Association.

The regulations in the matter of the profits to be allowed on the retail sale of gasoline were worked out by Dr. McFall of the cost of living branch of the Labor Department. He states that fully four weeks before the regulation was promulgated the public was advised through the press of action contemplated, and no complaints were received regarding the same.

Wants to be Fair

The Fuel Controller states that there is absolutely no desire on his part to deal unreasonably with those selling gasoline, and fully two weeks ago, when the matter was brought to his attention, he decided to have a thorough investigation as soon as Mr. Petersen returned.

In discussing the matter with HARDWARE AND METAL, Mr. Magrath said: "In issuing regulations governing the control of any commodity in abnormal times, it would be quite unwise to wait until all factors can be thoroughly balanced in order to be absolutely secure on the ground taken to protect the public. It seems better policy to use the best judgment one can, and if it is found there has been an injustice, then to have a reconsideration in order that we may be fair to all interests. It seems to me that the dealers might have waited until the investigation promised them could have been held. They were told that this would be done as soon as Mr. Petersen returned. It does not look good to me that any group of business men should undertake to say at a time like this that they would refuse to do business on a ten per cent. basis. We have heard a good deal of criticism of labor for threatening to strike, but it does not seem to me to be any worse than this attitude."

Complaints have been made that, while the profits of retailers have been limited to ten per cent., there has been practically no limit placed on the profits of wholesalers. This complaint and all others will be taken up, and every opportunity given to clear up the situation.

Not Handling It

In the meantime several garage men in various parts of the country have locked up their tanks and refusing to sell gasoline until they know just what is to be done. This is causing some inconvenience. In other places the garage men have refused to sell to anyone but physicians and mail men whose work they consider of such importance that it should not be delayed.

HARDWARE LETTER BOX

"Alaska" Handles

The C. Norsworthy Co., Ltd., St. Thomas, Ont.—Where can we purchase "Alaska" handles, about 4 inches in length overall, suitable for furnace doors?

Alaska handles, such as you want, are procurable from: Canada Foundries & Forgings, Ltd., Jas. Smart plant, Brockville, Ont.; McClary Mfg. Co., London, Ont.; Hamilton Stove & Heater Co., Hamilton, Ont.; Andrews Wire Works of Canada, Watford, Ont.; Stover Mfg. Co., Freeport, Ill., U.S.A.; Cassady-Fairbank Mfg. Co., Chicago, Ill., U.S.A.—Ed.

Roofing Tins

James Simmonds, Ltd., Halifax, N.S. —Where could we get roofing tins?

Manufacturers of roofing tins are: Sheet Metal Products Co., Toronto; Thos. Davidson Mfg. Co., Montreal; American Button Co., Montreal; Dominion Button Works, Montreal; Iron & Metal Supply Co., Montreal; MacDonald Mfg. Co., Toronto; Ammidon & Co., Baltimore, Md.; W. F. Robertson Steel & Iron Co., Cincinnati, Ohio; Consolidated Fruit Jar Co., New Brunswick, N.J.—Ed.

Gasoline Lighting System Supplies

H. Gustin, Innerkip, Ont.—Where can I buy supplies for the Pitner Gasoline Lighting System?

Supplies can be secured from H. W. Knight & Bro., 86 Richmond st. E., Toronto.—Ed.

Pte. Ernest Brown, aged 22, formerly with the Ryan Hardware Company, at Amherstburg, Ont., was killed in action recently. He went overseas with the 99th Essex County Battalion.

Signaller William Jackson, aged 21, son of W. B. Jackson, hardware, St. Thomas, Ont., was killed in action on October 11.

CATALOGUES and BOOKLETS

"Guide To More Tire Mileage," is the title of an attractively printed tire repair booklet issued by the Miller Rubber Co., of Akron, Ohio. In view of the large business in tires done by hardwaremen, it contains much of interest to the trade. The hardwareman who is most successful in selling tires is generally the one who knows most about the tire troubles, and can give his customers good advice concerning them. The booklet contains much valuable information along this line and is well illustrated.

RECLAIMED FRANCE WILL NEED WINDOW GLASS

Because of effects of bombardment through many battles in the French territories affected by the war, a correspondent of American papers cables, one of the greatest needs is for window glass. Such need will be felt for a long time, too, because of the difficulty of transporting the heavy, fragile commodity.

French families are seeking a substitute for glass that may be used to admit light but keep out the cold.

Trade Inquiries

769. **Enamelled Ware.**—A manufacturers' agent in Barbados desires to get in touch with Canadian manufacturers of enamelled ware.

773. **Iron Nuts.**—An American mercantile company having branch offices in Japan, China, Australia, Mexico, Argentina, Rio de Janeiro, Havana, Caracas, Cape Town, Madrid, Milan and other centres wishes to secure supplies of Canadian standard hot pressed iron, hexagonal tapped nuts with raised washer top, Whitworth thread, assorted as follows:

20 tons ⅜-inch, 20 tons ½-inch, 50 tons ⅝-inch, 50 tons ¾-inch, 50 tons ⅞-inch, 50 tons 1-inch; 30 tons 1-inch, ⅛-inch, 30 tons 1-inch, ¼-inch—300 tons.

774. **Axe Handles.**—A large Newfoundland hardware company wishes to secure a carload of axe handles.

THE CLERKS DEPARTMENT

GETTING THINGS DONE BY GETTING MEN TO DO THEM

• Continued from last issue)

Maybe the reason he has always made a lot of money is that he never was too blamed anxious to make a lot of it. He enjoys doing a big or difficult job far more than he enjoys any monetary reward."

No Use For Theorists

The emphasis General Du Pont places on results led me to hint that he is not partial to theorists.

"No. I want practical men, men who show they can deal with things and men rather than figures on paper," he replied vigorously.

"Do you give preference to college men in looking for young aides?"

"If a man has ability and ambitions, a college education will help him," he replied. "But here also I want to look into results. Was he a nonenity at college? Did he make no impression while there? Or was he singled out by his college mates for distinction and honors? Was he made captain of any athletic teams? Was he elected president of his class? Or did he carry off signal honors at his exams? Did he do anything to make his mark in one direction or another? Was he a mediocre nobody, or did he demonstrate he had something worth-while in him?

"Between a college man of ability and little ambition and a non-college man of ability and whole-souled ambition I prefer the latter every time. No amount of education will make up for a lack of never-say-die ambition. Ambition is what drives a man forward. It forces him over all kinds of hurdles. The fellow with one hundred per cent. ambition, even though he may not have transcendent ability, will go further than the fellow with ability but who lacks ambition."

Picks the Leaders

General Du Pont, it should be explained, does not as a rule personally select candidates for the less responsible positions in any of his organizations; his forte is picking lieutenants, men whom he can place in charge of an enterprise, men who have already had business experience. It is his success in this direction that has enabled him to control and run half a score of important enterprises at one time, enterprises as diverse as coal mines and the largest powder plant in the world, street railways and the largest office building in the world, thousands of farming acres and the largest hotels in the land.

"Tell me," I said, "just how, for example, you hit upon the man you did hit upon to manage the various coal companies you acquired down South."

Mule Driver to Mine Manager

"Certainly. Long ago a young fellow drove mules for me. He was the best mule driver I ever had. His father before him was a good man. The young fellow—his name is Shelby J. Gish—sent himself to college after three or four years in the mine. At college he played good football, rode bicycle races and the like. Later he began buying coal lands for himself. Although he started with nothing, he finally owned and operated a coal mine. He then commenced developing oil and gas in that country—Kentucky—which field had never been touched by any of the many capitalists interested in oil and gas lands. It wasn't hard for me to see that a man with that amount of originality and developing and constructive ability, with his practical knowledge of coal, was the right man to run all my coal properties. And results showed that I made no mistake."

Found—A Financial Wizard

The Chemical National Bank of New York, for many years the largest and most influential in America, controlled by the oldest and most aristocratic families in New York, and later by Hetty Green, decided a little more than a year ago that it needed an infusion of new blood, preferably from out of town, so as to widen the institution's connections. General Du Pont was consulted and he recommended a thirty-seven-year-old Southern banker, Percy H. Johnston. When this young financial genius stepped into the senior vice-presidency, the bank's deposits totalled $35,000,000. In twelve months they had soared to $75,000,000, a gain of three-quarters of a million dollars every week! Johnston is now looked upon as one of the most notable "comers" in the whole financial community.

"I first met Johnston," the general explained in reply to my queries, "when he joined the Citizens' National Bank of Louisville as a clerk. His fine physique, his excellent manners, the way he handled himself, impressed me, though he was then a very young man and had had no opportunity to make a record for himself. The next time I went down he had been promoted. The bank's deposits meanwhile had gone up. I learned that he was a hard worker. Next time I went down he had been elected vice-president, and the deposits were still rising. I made it my business to know him at close range, and I was convinced he was big enough for New York."

Boomer—Hotel Booster

Next I asked about the qualities of the man General Du Pont installed to run the Waldorf-Astoria, Lucius Boomer.

"Boomer has made good in every hotel proposition he has ever been responsible for," said the general, with typical directness. "He is very able, most practical, a good business man, an honest, hard worker, scrupulously fair, always."

General Du Pont, it may not be known, is perhaps the largest hotel owner in America. He built the imposing Du Pont Hotel at Wilmington; he controls the Claridge Hotel and the Hotel McAlpin, New York, the latter among the larger in the world. His chief reason for acquiring the Waldorf was that he had in Boomer a man who could run it successfully both from the public's and the profit standpoint. "Men make an organization; not its bricks or its machinery," is a favorite Du Pont maxim.

High Priced Men Best

He applied this principle when he took over the direction of the Du Pont Powder Company.

"We then engaged," he said, "the best men we could find. We paid six men very large salaries, and results proved they were the cheapest labor we had, for their brains made many thousands for the company annually." How successfully this system of choosing the right caliber of men worked out is illustrated by the fact that the business of the company was developed from a few millions to over three hundred million dollars annually. These six executives, as well as the rank and file of the Du Pont skilled workers, were placed on a bonus system, reflecting the general's invariable rule for giving his co-workers a fair share of the results earned.

"I never engage an executive who isn't fair," he remarked.

"What do you mean by 'fair'?" I asked.

Fairness to Labor

"I mean that he must deal fairly and squarely with everybody and that, in particular, he must have the right attitude toward labor. There is a lot of talk about possible trouble of a serious and wide-spread nature between employers and employed after the war. I personally am not alarmed, for if labor is treated as it should be treated, it will have no real occasion to kick over the traces. I have always managed to get along pleasantly with labor, and I will never select a lieutenant who is not so constituted that he cannot help but treat his workers fairly and uprightly. The man who has not learned how to get along smoothly with workers is not the type of man to place in a responsible executive position.

"In addition to being fair, the man I want must, of course, have other qualities. I want a man who is fearless; courage, self-confidence, self-reliance are very important essentials. The business game cannot be played aggressively and successfully by a molly-coddle. Then the right type of a man is democratic. He must not consider himself a superior sort of personage. He must actually feel democratic; it is not enough that he try to pose as democratic—he must be democratic, otherwise the veneer—the sheen—would wear off, for you can't fool a body of intelligent American workmen for very long. He must ring true.

Health Counts Immensely

"Another point—I always want a man who looks after his health. A strong, upstanding, square-shouldered fellow, whose muscles are whipcord rather than

putty, is usually apt to forge ahead against all sorts of odds. The man who is of inferior physique and who doesn't look after his health properly is less likely to succeed. Good health, in a sense, is at the base of all business achievement, for the pace nowadays is too gruelling for weaklings. The time a man's best effort is most needed is when a crisis has to be faced; and unless a man is thoroughly fit physically, the extra strain and stress and emotion are apt to play havoc with him at the crucial moment. Year after year I kept myself so strictly in trim that my weight did not vary five pounds from what it was when I left college.

"To win in the business game—or any game, including the game of life itself—you must enjoy it. There is something wrong with a man who does not enjoy his work more and more as he gets o'der This is not only my experience, but I find it is the experience of a number of successful men with whom I have talked. A man should grow happier as he grows older, and he can grow happier—I don't see how he can fail to grow happier—if he is on the right terms with his work.

"Here again, however, the question of health enters. To enjoy business, to enjoy life, to be fit to carry our hard or big things, a man must be in sound physical condition. Therefore, any young man who aspires to become a leader in his line should early realize the vital importance of strengthening, building up and tuning up his physical machine. I have emphasized the necessity for having ambition; but ambition is not likely to get a man anywhere unless he has a head, a body and hands capable of carrying out his ambition. Mere wishing gets a man nowhere. He must back up his wishes with action, and action is dependent in no little measure upon a man's physical stamina."

"'Don't misunderstand me. I am not a stickler for what is ordinarily understood by the term 'hard work.' Once I place a man in charge of something, I don't care a rap whether he works ten hours or only one hour a day—although I confess I have never known a man who could produce the right results by one hour's effort a day. I never try to keep tab on his going or coming. But I do watch the results. If he produces satisfactory results, what does it matter whether he spends a lot or a little of his time in his office, or whether he plays golf often or seldom?

Men to Command Must be Free

"The higher type of man can produce the best results if given an entirely free hand. He must be allowed freedom to do things his own way. Also, the responsibility of making decisions must be left to him. I never decide things for any of my lieutenants. They must make their own decisions. How, otherwise, could I hold them responsible for results? But don't you see that under this system a man knows and feels, if success is achieved, that he is entitled to the credit, not me? This develops a man as nothing else can.

"Of course, not all men are capable of filling positions which carry the responsibilities of making important decisions. Some men can work wonderfully for other people; they are ideal tools, or implements, when guided by others. But they lack initiative, originality, self-courage. They are capable, faithful, valuable followers, but not leaders."

"How can you tell which type a man is, and whether he can develop into a first-rate executive, resourceful, daring, progressive?" I asked.

Intuition Guides

"You have a feeling, a—" The general, for the first time, hesitated. He appeared puzzled. "I don't know what you could call it except 'intuition;' you sort of feel sure—something inside tells you—that a certain man has the right material in him and that he will develop into a big winner, a great result-getter."

"What are some of the characteristics that inspire this intuitive feeling?" I prodded.

"Brightness, alertness, pleasantness, on-the-toe-ness. Evidence of being practical, a doer, not a theorist or dreamer. A fine physique and robust health are important and attract. But, first, last, and all the time, ability as proved by results. What has been his record as youth and man? What impression, what mark, has he made?

"From the very start a youth begins to shape his whole future career. What he does or fails to do to-day governs to a large extent what he will do or fail to do to-morrow. Business men—at least in business matters—are sternly practical. What they want to know about a man is, What has he done? Each man writes his own answer. The sooner every young man in the country realizes this, the greater will be his chances of recognition, advancement and final success."

"Success," I asked, "real success, does not, apparently, consist of making enough money on which to retire, for you re-entered the business stage after quitting once."

No Time to Retire

"No. This idea that so many people have that they will have a glorious time after they can retire, and that until then they must simply wrestle along somehow, in a rather joyless fashion, is wrong—as wrong as it can be!" General Du Pont declared with fire. "If you haven't sense enough—or philosophy enough—to order your life and work so as to get genuine satisfaction and fun out of it as you go along, you certainly will not get any bumper measure of enjoyment when the day comes—if it does come—when you can step out of everything. There is more fun in producing, in creating something, whether it be a great building or an industry or only a dog kennel, than there ever can be in idleness. The person, therefore, who fails to derive satisfying happiness from his daily endeavors will enter only a fool's paradise when he quits work to enjoy—or, rather, suffer—leisure. Happiness in work not only goes hand-in-hand with success in work, but hand-in-hand with success and happiness in living. The retirement idol that so many people set before them is a delusion, a myth. If your work doesn't yield you satisfaction, money never will."

GREEDY Hun Fined And Sent to Prison

Even the boasted efficiency of German military government was not proof against profiteerin. One of the big steel men in the ex-Kaiser's kingdom, Herr Anton Adels, managing director of the Mannesmann Munition Works of Remschied, charged with fraud in making returns of his income for taxing purposes, has been sentenced to a fine of 1,552,000 marks (about $388.000) and six months' imprisonment. The amount of tax of which he was found to have defrauded the revenue was 12,000 marks ($3,000) in 1916, and 46,666 marks ($11,665), plus 240,000 marks ($60,000) for excess profits in 1917. The court did not admit the plea put forward by the defence that certain sums of money received by defendant from his co-director Zilzer and other business associates, amounting in Zilzer's case to one half of the latter's earnings, were "presents." On the contrary, a letter from Zilzer to Adels showed that the payment was blackmail paid by Zilzer to Adels for procuring him a position in the Mannesmann Company. The court refrained from imposing the maximum penalty on the ground that Adels, by his knowledge and energy, had brought the Mannesmann Works to a state of great efficiency, which had enabled them to render valuable war services. Defendant pleaded for the remission of the one remaining month's imprisonment (five months having been served already), but this was refused on the ground that Adels' business knowledge, his connections and financial investments abroad, and the fact that he was still protected by Herr Mannesmann and others, might enable him to escape from the country. Moreover an action for bribery is pending against Herr Adels. In the year 1913 Adels, then in a subordinate position, was earning $1,500. With the outbreak of the war his fortune advanced rapidly; in 1915 his salary was raised to $8,750, and in 1917 to $13,750, besides commission to the amount of $33,750. But not satisfied with this, he misused his new position as a director to appoint subordinates on condition that they handed him back half their salaries as presents. This and other corrupt practices he carried out on so large a scale that during the first three years of the war they brought him in $1,375,000. The greater part of this money he invested abroad, and none of it he declared for taxing purposes. Not long ago he was decorated with the Cross of Merit for War Work.

Mesopotamia Offers Trade Opportunities

British trade journals are calling attention to the great opportunities for trade with Mesopotamia after the war. It is predicted that it will become one of the world's great agricultural countries and that there will be an immense demand for manufactured goods.

In spite of war conditions this year's harvest is expected to be the greatest since the days of Nebuchadnezzar. The British are reported to have dug out more than one hundred canals formerly used for irrigation purposes in connection with the river Euphrates, but disused for many years. Some 320,000 acres have been brought afresh under cultivation—truly a wonderful achievement, doing great credit to the British local government.

The change that has come over the city of Bagdad since the British entered the town is reported to be simply marvellous. At that time the town was dead and moribund, while now it is full of life, building and construction work being carried on from early to late, with thousands of workmen repaving the streets and installing electric light and sanitation. A fire brigade and a police force have been organized.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

MARBLE'S MATCHBOX

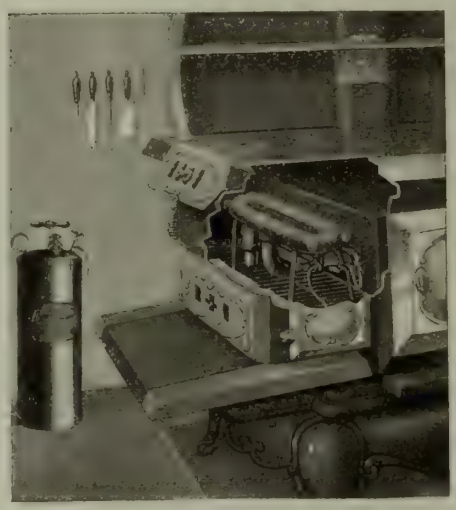
Accompanying is an illustration of a new display carton in which Marble's waterproof matchbox is now being packed. Each carton contains one dozen match-boxes, each packed in its own individual carton. When open the lid

Match Box

is so hinged that it lifts up the back end of the box so that the contents are visible and easy to get at. The inside of the display carton is printed in two-color poster effect as shown. Information may be obtained from jobbers or from Marble & Mfg. Co., 5,350 Delta ave., Gladstone, Mich.

BLOWOUT PATCH

The Perma Loc Blowout Patch for cord and fabric tires is made by the Perma Loc Mfg. Company, of Wilkesbarre, Pa. Flexibility is claimed as a big feature of the patch, also extreme lightness and great tensile strength. The patch is cut full, with a large flap and it is stated this gives the user a grip which makes it very easy to put the patch on. Patches are made in sizes



Blowout Patch

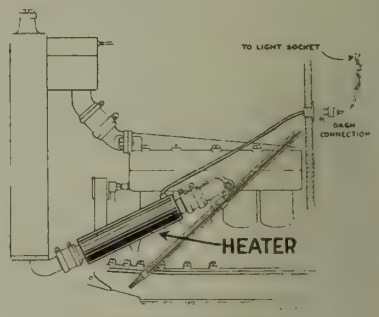
of 3, 3½, 4, 4½ and 5 inches, and it is claimed in each respective size they will cover a larger bruise than any other patch on the market.

"KERO" GAS BURNER

The "Kero" gas burner, which is manufactured by Hiram Walker & Sons' Metal Products Limited, Walkerville, Ont., utilizes coal oil for heating and cooking. The oil is converted into gas and is burned without wicks. It is claimed there is no smoke and no unpleasant odors. The claim is made that Kero is absolutely safe and cannot explode. It is stated that with four per cent. of oil 96 per cent. of air is burned, and that a smokeless blue flame of intense heat is produced.

Gas Burner

ELECTRIC HEATER



"Heato" a new device made by The Autocetra Co., Winnipeg. This device replaces the radiator to engine junction pipe, and contains an electric heating element wound on the outside of the pipe and jacketed by asbestos and metal covering.

Wires are carried back to a connecting receptacle on the dash, and the heater is connected to the lighting socket by an extension cord the same as an electric iron is connected.

The device, it is claimed, will heat the circulating water hot enough to start the engine on the first turn in the coldest weather in about fifteen minutes, putting an end to all winter starting troubles.

The circulating water need not be drained off, but may, it is stated, be kept hot over-night by the "Heato," or if Anti-Freeze is used, be heated up in a short time in the morning.

"Heato," it is stated, is invaluable to medical doctors and others who receive hurry calls at all times of the

Electric Heater

day or night, and are obliged to store their car in a cold garage.

Fire risk, it is claimed, is considerably reduced by adopting "The Heato," in place of coal oil stoves and other open flame heating devices that are being used by many in private garages, and are forbidden by the fire underwriters on account of being so near gasoline and oil.

ELECTRIC CLOCK

The Thompson Electric Clock manufactured by the Thompson Electric Clock Co., of Memphis, Tennessee, is made to operate on either dry cells or storage batteries of any voltage. The clock it

Electric Clock

is stated winds automatically at stated intervals, is dust proof and water proof. Simplicity, economy and efficiency are claimed for it. The movement in the case it is stated is mounted on springs and it is claimed all vibration and rattle are positively overcome.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

A SHARP advance in turpentine is recorded this week, amounting to 12c per gallon. This may be termed one of the first lines to reflect conditions which have followed signing of armistice and is in line with situation as outlined in HARDWARE AND METAL during the past few weeks.

There is no indication that the peak has yet been reached. Government reports from the United States show production for the past season is no more than required for United States needs. It is further pointed out that next year's production will not be any larger than for the past season. With the heavy demands to be met from overseas, it is not hard to determine how prices will go. It is also true that users face a situation which may develop into one of decided seriousness, due to shortage which may arise.

Linseed oil is another line which has undergone revision upward. Advances of four to five cents have been registered, and indications point to even higher levels as well within the realm of possibility. Prices on seed have been recovering from recent depression during the past two weeks, and since Monday of this week sharp advances have been made. This may be a speculative flurry, but feeling is general that from now until close of navigation seed will continue high.

Another line of horse nails is included in the list to go to higher levels, prices to-day being up just 1c per pound over former figures. Lace leather has gone higher, prices to-day being up about 25c per pound over previous quotations. The steady decline in available supplies of all leathers is a factor extending to this class of goods and resulting in increased prices.

Other lines included in the list to follow the upward trend this week are school crayons, carpenters' chalk, post drills, blowers, forges, mouse and rat traps, charcoal and wheelbarrows. An advance of about 5 per cent. is reported also in stocks and dies, screw plates, pipe taps, hand taps, reamers, etc., immediately effective. Vises, hand soap, mauls and gimlet bits have also gone to higher levels.

The trade as a whole looks forward to a period of marked prosperity for Canada. No reason for depression is expressed over the approach of peace, rather is the feeling in evidence that having faced four years of war, in which many dark days were strewn, prosperity should now come, and every effort to keep conditions bright exerted. No immediate recession in values is looked for. Stocks are low and replacement is impossible for some time to come with the majority of lines. This will probably mean a steadily maintained basis of quotations.

MONTREAL MARKETS

MONTREAL, Nov. 14.—Changes of price this week include advances for mouse and rat traps, horse nails, planes, ice cream freezers, and sandpaper is likely to advance, lists having been withdrawn.

The general feeling in the trade is one of confidence and even of optimism. Realizing that the readjustment from a war to a peace basis will require time, and in view of the fact that most supplies are scarce and far away, retailers and jobbers, as well as manufacturers, are viewing the future with well-defined hope. Changes will come. This is generally recognized, but it is also pointed out that they cannot be expected to manifest themselves in a large way for many months. Careful buying has been the rule for some time, and this will be the guiding thought still, both on the part of the jobber as well as on that of the retail dealer.

Ice Cream Freezers Are Advanced

Montreal.

FREEZERS.—A new range of prices are announced for ice cream freezers and this applies to Blizzard make. The quotations are as follows: No. 1, $2.35 each; No. 2, $2.70; No. 3, $3.15; No. 4, $4.15; No. 6, $5.35; No. 8, $6.85; No. 10, $9.10; No. 12, $10.40; No. 14, $11.50; No. 20, Jumbo, with fly wheel, $26.50, and Toy Gem, each, $2.25.

Horse Nails Higher; Some Planes Advance

Montreal.

HORSE NAILS, PLANES.—Advances in the price of Capewell horse nails are made amounting to $1.00 per 100 pounds. Prices appear in current market quotations. Planes, other than those on which changes have already been announced, are made on Monty and Bench Moulding styles. The list is now subject to an advance of 20 per cent., the old price being net list.

Sandpaper to Change; Mouse, Rat Traps Up

Montreal.

SANDPAPER, TRAPS.—A revised price list will be issued shortly on sandpaper and this is thought to presage an advance of price. Present lists are withdrawn in the meantime.

Rat and mouse traps are higher, the increase approximating about 10 per cent.

Gasoline to Hold; Coal Oil, Too

Montreal.

GASOLINE, COAL OIL.—The market is a steady one, and one of the biggest companies operating in Canada

stated to HARDWARE AND METAL that there was little likelihood of a change from the present basis, not of a declining nature at least.

Gasoline sales are lighter at 34c per gallon, while coal oil is steady at 19c for Royalite and 22c per gallon for Palacine and Electroline.

Rope Sale Seasonable; Quite Unchanged

Montreal.

ROPE, CORDAGE.—The situation is one of continued fair sales. These are not large, but they are steady and seasonable. Those catering to shipping demand have reported a fair volume of business right along, but the same is always more or less uncertain.

Pure manila basis is still 39c; British manila 33c and sisal 27½c.

Stove Movement Good; Supplies Fair

Montreal.

STOVES, WARES.—The heavy movement of heaters has continued and makers have reported an active season. The trade has really been fortunate in getting supplies as well as they have, for the difficulties of importing steel and iron have kept the maker guessing. Ranges, as well as heaters, have moved on a satisfactory basis and have been in better supply than some thought possible a while ago.

Wares of various kinds were active during the week, lines that were made up recently being sold promptly, and this continuing.

Nail Basis Steady; Wire Sale Light

Montreal.

NAILS AND WIRE.—Changes are absent in any sense this week and seasonable delivery of nails has been going on. There is no new feature in either wire or cut nails, the former being based at $5.50 per keg and the latter at $5.85.

Wire is slow. The sales of this have not been large for some time and the continued base price is unchanged at $6.25 per 100 lbs.

Lead Products May Decline Somewhat

Montreal.

LEAD PRODUCTS.—There is but little to indicate extensive changes of price, but an easing from present quotations is not improbable in the near future. Solder seems likely to reach lower levels ere long, but the lead market has made no change this week. Lead sheets and pipe have been quiet and easy.

Lead pipe, lb.	$0 15	$....
Lead waste pipe, lb.	0 16	....
Lead traps and bends	Net list.	
Lead wool, lb.	0 15½	0 16
Lead sheets, 3 to 3½ lbs. sq. ft., lb.		0 13¼
Lead sheets, 4 to 8 lbs., sq. ft.	0 12½	0 13

Cut sheets, ¾c lb. extra, and cut sheets to size. 1c. lb. extra.

Solder, guaranteed, lb.	0 52
Solder, strictly, lb.	0 45
Solder, commercial, lb.	0 41
Solder, wiping, lb.	0 41
Solder wire (8 gauge)—	
40-60	0 53
45-55	0 57½
Zinc sheets, casks	....
Do., broken lots	....

Note—The above prices for solder are for full boxes of 100 lbs. Jobbers will charge several cents more for small lots.

Iron and Steel Move on Fair Basis

Montreal.

IRON AND STEEL.—There is little new and movement is fair and seasonable. Some sizes are short from time to time, but the market has been fairly well supplied until this time with regular stock sizes. Prices are steady and without change.

Common bar iron, per 100 lbs.	$4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 22

Sheet Prices Hold; Little Available

Montreal.

SHEETS.—There is very little new in the situation, prices being maintained for stocks are not in good shape. It is thought that there will be no immediate revision of prices, for the outlook as to supplies being improved soon is not encouraging.

	Per 100 lbs.	
BLACK SHEETS—		
10 gauge	$9 75	$11 50
12 gauge	9 65	11 00
14 gauge	9 00	8 20

20 gauge		11 05
18 gauge		10 95
16 gauge		10 85

NOTE.—These prices are for full bundles, an extra charge of 25c per 100 lbs. is made for broken lots.

Old Material Held; May Be Declines

Montreal.

OLD MATERIAL.—While there is no immediate prospect of a change, the market is uninteresting and little movement has been reported. The feeling is an easing one, but one of the biggest buyers here stated that he did not anticipate a big drop. However with the present situation it is possible that there will be an easing to some extent with lower prices effective soon.

Dealers' Buying Prices:

Automobile tires	0 04¾	0 05

Antimony Now 13c; Ingots Are Dull

Montreal.

INGOT METALS.—Antimony has weakened and is quoted down two cents to 13c per pound. This is the only feature of the week, the general market ruling dull and with weakening tendencies. Slight declines may be made in spelter and probably another line or two very soon.

COPPER.—With price fixed on this in the States, there has been no change and local trading is done at 30-31c per pound, according to quantity and grade.

TIN.—The position of tin is uncertain, and the outlook somewhat clouded. Markets are generally quiet, with some speculation as to what movement the Government will make regarding prices. Local quotations are 90-92c per pound. There may be a decline soon.

SPELTER.—Although the feeling is easier, no change has been made. Prices locally are unchanged at 10½c to 11c per pound.

LEAD.—No decline in lead has been suggested, and any change that may be brought about will come, it is thought, gradually. Price here 10½-11c per pound.

ANTIMONY.—This has weakened somewhat and local prices now are 13c per pound.

ALUMINUM.—No change is made. The market is quiet and uninteresting with price based at 48-50c per pound.

TORONTO MARKETS

TORONTO, November 14—Higher prices are still the order of the day and the consensus of opinion seems to be that little, if any recession from present levels can be expected for some time to come. Advances have been made in post drills, blowers and forges along with charcoal, mauls and wheelbarrows. Indications point to an advance in sand paper, though definite advice is not yet forthcoming.

Other lines to record increases in price are: hand soap, lace

leather, gimlet bits, school crayons, mouse and rat traps, charcoal and vises. The attitude of the trade is that markets will be steady and business good.

Horse Nails Register Advance

Toronto.

HORSE NAILS. — An advance amounting to 1c per pound in the list has been made in Capewell horse nails. The situation in regard to steel, its scarcity, along with mounting manufacturing costs, have been factors contributing to this advance. New list prices are as follows: No. 5, 23c per pound; No. 6, 22c; No. 7, 21c; No. 8, 20c; Nos. 9 to 12, 19c, subject to a trade discount of 10 per cent.

Lace Leather Goes Higher

Toronto.

LACE LEATHER.—After a long period of inactivity, new prices have been issued on lace leather which provide for substantial increases. The situation in regard to all kinds of leather has been drawing more acute as time has gone on, and as a result supplies are down to a comparatively narrow basis. No immediate improvement in conditions is looked for, as it will take some time before readjustment to a normal basis can be expected. Oak tanned cut laces are being quoted at from $2.00 to $2.20 per pound; the rawhide cut laces range in price from $2.00 to $2.15 per pound.

Charcoal Up; Files, Vises Revised

Toronto.

CHARCOAL, FILES, VISES.—Higher prices are being asked on charcoal. The price to the trade in paper bags is now $2.10 per dozen.

A revision in the discounts on files has been made, the Heller Bros. line now being quoted at a discount of 37½ per cent. from list.

A change to higher levels has been made in Yankee vises; the 990 is now quoted at $2.35 each, the No. 1993 is quoted at $7.10 each.

Sand Paper To Go Up? Crayons, Bits, Higher

Toronto.

SAND PAPER, CRAYONS, BITS.—There is some indication that an advance in sand paper may be effected in the near future. Definite advices not yet forthcoming as to just how much it may be, but some announcement is expected at an early date.

Higher prices have been named on school crayons, quotations which are now being made to the trade for the white school crayons bring 38½ cents per gross, and on the white enameled school crayons, 30 cents per gross.

Gimlet bits have been revised, sizes from 3 to 8/32 inch now being quoted at $1.50 per dozen, a higher level than price formerly in effect.

Mouse Traps Advance; Soap Too

Toronto.

MOUSE TRAPS, SOAP. — Higher prices are now out on mouse traps and rat traps. The present basis of quotations provide for an advance of about 10 per cent. over former levels.

Cleanall soap is now being quoted to the trade, the small size in cases of 3 dozen selling at $4.00 per case; the smaller quantities are being sold at $1.50 per dozen.

Post Drills, Blowers, Forges Higher

Toronto.

DRILLS, BLOWERS, FORGES. — Quotations just issued on post drills, blowers, and forges, show that these lines have reached higher levels. Quotations which are now being named to the trade are given as follows: Post drills, No. 99, $22.50 each; No. 152, $12.60; blowers, No. 400, $36.45 each; forges, No. 625, $34.65 each; No. 631, $37.60; No. 651, $39.60; No. 224, $50.40 and No. 151, $11.70.

Barrows Up, Mauls, Refrigerators Too

Toronto.

BARROWS, MAULS, REFRIGERATORS.—An advance has been recorded in the Klondyke wheelbarrows, these now selling to the trade at $7.25 each. Last week mention was made of a decline in some lines of wheelbarrows and whereas these prices were lower than those shown before, this change was really a revision in price as costs had previously been figured on the wrong basis.

An advance has been in Smart's mauls No. 72, Oregon pattern. These now being quoted to the trade at 22½ cents per pound, which represents an advance.

An advance in refrigerators has been made, the Sanderson Harold line of household refrigerators being quoted at a discount of 40 per cent. from list and the grocers' refrigerator at 35 per cent. from list.

Coal Oil Moving Freely; Gasoline

Toronto.

OILS, GASOLINE.—Sales of coal oil are being maintained at an exceptionally high level, and there is no indication that an easing away in the demand can be looked for. Supplies are ample to take care of the immediate demand, and prices are holding firm without change at 18½ to 21½ cents per gallon according to grade.

Sales of gasoline have been maintained at a very satisfactory level. This does not reach the high point recorded a couple of months ago, but is still sufficient to represent a very large gallonage. The price is unchanged, quotations being made at 33 cents per gallon.

Nails Holding Firmly; Wire Steady

Toronto.

NAILS, WIRE.—The situation is without any particular change this week. Sales are within rather narrow limits, a natural condition at this time of the year, and outlook generally is considered fairly satisfactory. Quotations are being firmly held and there is no indication of any immediate recession in values. Wire nails are still quoted at $5.50 per 100 pounds base, and cut nails at $5.85.

Smooth steel wire is still pursuing its normal trend. This means quietness and an unchanged list of quotations; the price to-day is $6.25 per 100 pounds.

Stove Outlook Fair; Wares Firm

Toronto.

STOVES, WARES. — Manufacturers report that stocks have been pretty well cleaned up and indications seem to point to a steady, firm market. The feeling amongst the trade seems to be strong that any recession from present values will be a gradual one rather than otherwise and there seems no reason for excitement.

The opinion expressed by one manufacturer of sheet metal ware was that only change likely in wares would be an advance. Indications are that stocks are down to a pretty low point and by the way the trade is now buying the outlook is for a market maintained at firm levels.

Cordage Holds; Twines Unchanged

Toronto.

CORDAGE, TWINES.—There seems to be comparatively little to say about cordage. The demand is pretty small, and the supplies are ample to take care of any business that is offered. Prices show no disposition to change as yet, being held without revision at the following levels: Pure manila 39 cents per pound base, British manila 33 cents and sisal at 27½ cents.

The twine situation is without any particular feature. A sharp decline in the cotton market was recorded yesterday, but there is no indication that this is going to be continued. If further declines are effective and low basis is maintained, this will in time be reflected on the manufactured products. However, in the meantime there is nothing new to be said.

Little Movement of Bars; Firm

Toronto.

IRON AND STEEL.—Sales are within rather narrow limits, and the bulk of orders coming to hand now are being

taken care of fairly well. Stocks are not heavy by any means. Prices are without change at the following levels:

TORONTO—	Per 100 lbs.	
Common bar iron	....	$ 5 25
Common bar steel	....	5 50
Refined iron	....	5 65
Angle base	....	5 75
Horseshoe iron	....	5 50
Tire steel	....	5 70
Mild steel	....	5 50
Norway iron	11 00	13 00
Toe caulk steel	....	6 25
Sleigh shoe steel	....	5 50
Band steel, No. 10	....	5 75
Do., No. 12	....	6 00
Spring steel	9 50	11 50
Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 20	0 42

Sheets Unchanged; Stocks Small

Toronto.

SHEETS, PLATES. — Most of the houses doing a warehouse business in steel are in good shape. That is they are fairly well cleaned out of material that has had a period of very high and inflated value during the period of war buying. Dealers do not look for a slump in the price of the basic article, steel. They anticipate a higher level than is paid at United States points of production now.

There seems to be a tendency all through the market to look for good business ahead. The trade is willing to admit that there may be a period of quiet trade, but the fact that the war is over and the Allies are more than conquerors is enough to counterbalance this many times over. One importer has been offered sheets from a United States mill already it is intimated but the question of delivery was not definitely fixed. The interpretation placed on the offer was that the mill was looking ahead to the time when they would be in a position to take care of their old customers.

BLACK SHEETS—	Per 100 lbs.
10 gauge	.... $10 00
12 gauge	$9 60- 10 00
14 gauge	8 40- 8 90
16 gauge	8 50- 8 55

14 gauge		9 85	10 85

Prices shown are for full cases An extra charge of from 25c to $1 per 100 lbs. is made for less than case lots.

Little Moving in Corrugated Sheets

Toronto.

CORRUGATED SHEETS.—The market seems to be rather quiet and little movement to the trade is noticeable. Quotations have shown no change and range nominally at figures given below. Stocks are only fair but sufficient for immediate requirements.

TORONTO—	Per 100 Sq. Feet	
Corrugated Sheets—	Gal'zed	Painted
No. 28 gauge	$ 9 00	$ 7 50
No. 26 gauge	10 00	$ 50
No. 24 gauge	15 00	11 25
No. 22 gauge	18 00	14 00
No. 20 gauge	21 00	17 50
No. 18 gauge	27 00	21 00

Discount, 7½ per cent.

Supplies Boiler Tubes at Vanishing Point

Toronto.

WROUGHT PIPE, BOILER TUBES. —Stocks of boiler tubes are at the vanishing point, in fact it is intimated that it would be hard to imagine supplies on a smaller scale than exists to-day. Conditions as applied to wrought pipe are very little better and no immediate improvement is looked for. Prices show no change from figures given in current market quotations on pipe and those below on boiler tubes.

Toronto—	Per 100 feet Cold drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00

2½ inch	55 00	42 00
3 inch	64 00	50 00
3¼ inch	....	58 00
3½ inch	77 00	60 00
4 inch	90 00	75 00

Solder Steady, Lead Products Firm

Toronto.

LEAD AND ZINC PRODUCTS.—The trade seems to be waiting for developments. There has been no change in the situation this week and what may happen seems problematical. The demand is considered very fair for solder and prices are steady. Lead products are moving along same channels at unchanged basis of quotations.

Old Materials Waiting; Little Trading

Toronto.

OLD MATERIALS.—The attitude is one of waiting. A general revision downward has been looked for during the past two or three weeks but now there is nothing said. One dealer believes higher prices must come, the next one that declines must result. The outlook is uncertain. Trading is at a standstill and quotations nominally range at following levels:

Dealers' Buying Prices—		
Tea lead	$0 05¼	....
Heavy lead pipe	....	0 08
Yellow brass	0 12	0 13
Red brass	....	0 21
Light brass	....	0 09½
Heavy zinc	0 05½	0 06
Heavy copper	0 22	0 23
Stove plate, per ton	....	25 00

Auto tires	0 04½	....
Bicycle tires	0 03½	....
	Per gross ton.	
No. 1 railroad wrought	26 00	27 00
No. 2 railroad wrought	15 00	16 00
Pipes and flues	....	12 00
No. 1 busheling	16 00	17 00
No. 2 busheling	....	12 00
Country mixed scrap	....	15 00

Metal Markets At a Standstill

Toronto.

INGOT METALS.—Trading seems to have come to a complete standstill. This is undoubtedly a result of the signing of the armistice, but that a resumption of activity will soon be noticeable is the feeling amongst the trade. There is absolutely nothing new to report in any of the metal markets.

COPPER.—The trade seems to be sitting back and waiting for developments. Production is still proceeding quite briskly and quotations are held nominally at around 30 to 32 cents per pound.

TIN.—Waiting and watching seems to be the attitude of the buyers to-day. The result has been that there is very little movement recorded, and until something is known of what future conditions may bring about, it is hard to judge just what way the market may go. In the meantime quotations are held at around 90 to 95 cents per pound.

SPELTER.—There is no interest in this metal whatever. Trading is at a standstill and is expected to stay this way for a little while. Prices range around 11 cents per pound.

LEAD.—Supplies show no improvement, but the trade doesn't seem to be interested particularly in what there may be available. The attitude of waiting is noticeable in this metal too and there has been no reason to change the nominal quotation of 10½ to 11 cents per pound.

ALUMINUM.— Whether the signing of the armistice will be followed by peace and the signing of peace followed by the removal of restrictions which have surrounded aluminum is still a question. In the meantime there is nothing to say commercially, though quotations may be said to range around 50c per pound basis.

ANTIMONY. — Antimony being essentially a war metal, any peace developments will probably mean prices will reach lower levels. This week however, there is nothing to say outside of the fact that prices are holding at around 15c per pound.

LONDON MARKETS

LONDON, Ont., Nov. 14.—A sharp advance in turpentine has featured the markets this week, and an advance of 4c per gallon is noticeable in linseed oil. Carpenters' chalk and school crayons are also higher in price.

The merchants of London express their complete confidence in the future business outlook, and are buying freely for their present needs. Sales of guns, rifles, shells, and metallic cartridges are good, and other lines that are active are ash sifters and weather strip.

Carpenters' Chalk Up; Crayons, Too

London, Ont.

CARPENTERS' CHALK, CRAYONS.—Higher prices are the order of the day on carpenters' chalk this week. Revisions have been made which provide for substantial advances, as will be noted in quotations now available as follows: White, $1.45 gross; red, $1.65 gross; blue, $1.65 gross.

School crayons have also gone to higher levels, the common white crayons being quoted at 25c per box and the white, yellow enameled, 27c per box.

Oil Heaters Active; Shovels, Scoops Steady

London, Ont.

OIL HEATERS, SHOVELS, SCOOPS—A splendid sale of oil heaters is being maintained and supplies continue ample to meet demands of the trade. Prices are firm and unchanged, the Perfection line still being quoted at following list prices: No. 525, $7.00 each; No. 530, $8.25; No. 630, $10.25, less 25 per cent.

Snow shovels are firmly held and orders have been coming along in anticipation of later needs. Prices ruling today are: Common Jap'd., $4.65; Prince or No. 20, $9.55; King or No. 40, $12.75; Moose or No. 50, $15.95. Furnace scoops are steady and rule at unchanged prices, the Socket D handle and long handle being quoted at $10.65 per dozen.

Ash Sifters Move Freely; Weather Strip

London, Ont.

ASH SIFTERS, WEATHER STRIP.—There has been an exceptionally good sale of ash sifters this season, the idea of getting all the heat possible out of the coal being firmly planted in the average householder's mind. Prices have held firmly, the Banner being unchanged at $3.45 each; the Rocker, No. 1, at $5.50 each, and common wood side at $2.50 dozen.

Weather strip is active and sales have been very satisfactory. Quotations rule at following levels: Frost King, $4.40 doz. pkgs.; Swan Hardwood, 75c set; Wood and Felt, (list), No. 60, 5c ft.; No. 61, 5c ft.; No. 61½, 7c ft.; No. 64, 10c ft, less 60 per cent.

Nails Hold Firm; Lanterns Unchanged

London, Ont.

NAILS, LANTERN.—The market on nails is firm and rules on a very steady basis. Sales are within narrow channels just now, a seasonable condition and prices unchanged, wire being quoted at $5.50 per 100 pounds, base, and cut at $5.85.

Lanterns are held without change and a fair movement to the trade is reported. The plain tin cold blast are selling at $12.50 per dozen. Lantern globes are steady in 1 dozen cases selling at $1.00 per dozen; in 3 dozen cases at 95c per dozen; in 6 dozen cases at 90c per dozen.

Putty Steady; Glass, White Lead Firm

London, Ont.

PUTTY, GLASS, WHITE LEAD IN OIL.—There has been no change recorded in putty during the week. Sales have been very fair and prices rule at following figures: Standard, 100 lb. drums, $6.75 per cwt.; 25 lbs., $7.00 per cwt.; Pure, 100 lbs., $8.75 per cwt.; 25 lbs., $9.00 per cwt.

Glass is very firm and outlook one of decided strength. Stocks are fair, but higher prices would not be surprising. Discount on single and double diamond in boxes is 25 per cent.; cut lights, 10 per cent.

Quotations on pure white lead in oil hold steadily at $17.80 per 100 lbs. in ton lots and $18.15 in smaller quantities. Pure Elephant in ton lots is quoted at $18.30 per 100 pounds, and in smaller quantities, $18.65.

Linseed Oil Goes Up 4 Cents

London, Ont.

LINSEED OIL.—An advance of four cents per gallon has been recorded in linseed oil during the week. This follows closely on the heels of a seed market, which has shown considerable strength during the past two or three weeks and has even gone up sharply since news of signing of the armistice was received. Whether this is just a flurry or not is hard to determine, but opinion is general that seed will remain fairly high and the effect on oil will be the same. Quotations to-day are: Raw, 1 to 2 bbls., $1.87 per gal.; boiled, $1.90 per gallon. Raw, 3 to 5 bbls., $1.86 per gal.; boiled, $1.90 per gal. Raw, 6 to 9 bbls., $1.84 per gal.; boiled, $1.87 per gal. Less bbls. add 10 cts. gal.

Sharp Advance in Turpentine; Up 12c

London, Ont.

TURPENTINE.—A sharp advance in turpentine has been recorded this week. This follows closely on heels of signing of the armistice early in the week and is in line with predictions made in HARDWARE AND METAL. To-day's prices show an increase of 12c per gallon and there is no indication that the peak has been reached. Prices to-day are as follows: 1 bbl. lots, $1.15 per Imp. gal.; 2 to 4 bbl. lots, $1.14 per Imp. gal.; 5 gal., $1.25 per Imp. gal.

WINNIPEG MARKETS

WINNIPEG, November 14—Prices are still moving up, this week's changes being numerous. Such staple lines as planes, stocks and dies, pipe taps, boiler taps, pipe reamers, carpet sweepers, brass butts and clothes wringers are included in the list to advance.

Business is still reported very quiet as many towns throughout Western Canada are still closed to all travellers, owing to sickness prevailing, and until the bans are lifted no rush is looked for.

Stocks and Dies, Taps, Reamers Go Upward

Winnipeg.

STOCKS AND DIES, TAPS, REAMERS.—Advances in manufacturing costs have, it is stated, been instrumental in the present advance in Butterfield's stocks and dies, screw plates, boiler taps, hand taps, pipe taps, pipe reamers and burring reamers which move up approximately 5 per cent. To-day's prices on some lines are as given below:

Blacksmiths' Stocks and Dies—No. 23A, $5.25; No. 27, $6.80; No. 34, $4.75; No. 37, $4.45; No. 37A, $4.45; No. 37B, $4.45; No. 41A, $3.40; No. 100, $20.40; No. 105, $26.15 set.

Reece's Screw Plates—No. B, $26.35; No. C, $24.75; No. CC, $24.75; No. EE, $37.80 set.

Taper Boiler Taps—½-inch, 75c; ⅝-inch, $1.00; ¾-inch, $1.40; ⅞-inch, $1.75; 1-inch, $2.35 each.

Hand Taps, Taper—Plug and Bottoming—3/16-inch, 25c; ¼-inch, 32c; 5/16-inch, 35c; ⅜-inch, 39c; 7/16-inch, 42c; ½-inch, 42c; 9/16-inch, 56c; ⅝-inch, 63c; ¾-inch, 84c.

Patch Bolt Taps—½-inch, 70c; ⅝-inch, 88c; ¾-inch, $1.19; ⅞-inch, $1.58; 1-inch, $1,96 each.

Pipe Taps—⅛-inch, 43c; ¼-inch, 52c; ⅜-inch, 68c; ½-inch, 86c; ¾-inch, $1.20; 1-inch, $1.88; 1¼-inch, $2.25; 1½-inch, $2.95; 2-inch, $4.50 each.

Burring Reamers—No. 5, $3.60; No. 33, $1.35 each.

Pipe Reamers—⅛-inch, 43c; ¼-inch, 52c; ⅜-inch, 68c; ½-inch, 86c; ¾-inch, $1.20; 1-inch, $1 88; 1¼-inch, $2.25; 1½-inch, $2.95; 2-inch, $4.50 each.

Tap and Reamer Wrenches—No. 10, $3.30 each.

Tubular Rivets Go Higher

Winnipeg.

TUBULAR RIVETS.—A further revision is recorded during the week covering prices on tubular rivets which again move up in price. To-day's selling prices are as follows: 100 in a carton, 4-16 inch, $1.75; 6-16 inch, $1 85; 8-16 inch, $2.15; 10-16 inch, $2.45; 12-16 inch, $3.00 per 1,000. Tubular rivets assorted, ¼ to ⅝ inch. $1.00 per carton. Clinch rivets, assorted, No. B9, $1.35 per carton.

New Prices Out on Sweepers

Winnipeg.

CARPET SWEEPERS. — The Bissell carpet sweepers have just been revised, new prices representing a further increase. This it is intimated is in a large measure due to increased manufacturing costs along with scarcity of

raw materials. The new resale prices established on a few of the more familiar lines are given here: Carpet sweepers, Grand Rapids, japanned, $3.75 each; nickeled, $4.25; Vacuum sweepers, Superba, $10.75 each.

Higher Prices Reached on Planes

Winnipeg.

PLANES—New prices are now effective on Stanley planes. This advance was predicted by HARDWARE AND METAL in a recent issue. Increases just announced show an increase of from 5 to 7½ per cent. over former quotations, making to-day's prices as follows:

No. 3-3C, $3.85 each; No. 4-4C, $4.20; No. 4½-4½C, $4.80; No. 5-5C, $4.80; No. 6-6C, $6.20; No. 7-7C, $7.05; No. 24, $2.50; No. 35, $3.25; No. 26, $2.85; No. 27, $3.25; No. 27½, $3.30; No. 28, $3.60; No. 31, $3.90; No. 32, $4.15; No. 603-603C, $4.35; No. 604-604C, $4.70; No. 605-605C, $5.40; No. 606-606C, $6.80; No. 607-607C, $7.85; No. 99½, $1.95; No. 16, $2.20; No. 18, $2.45; No. 131, $2.40; No. 75, 62c; No. 140, $2.60; No. 113, $5.90; No. 50, $8.95; No. 444, $12.82; No. 55, $26.90; No. 45, $13.10; No. 71, $4.23; No. 78, $3.20; No. 190, $2.50; No. 191, $2.50; No. 192, $2.50.

Stanley Plane Irons, single—2-inch, 55c; 2⅛-inch, 61c; 2¼-inch, 63c; 2⅜-inch, 65c; 2⅝-inch, 70c each.

Stanley Block Planes—No. 101, 37c; No. 103, $1.00; No. 110, $1.00; No. 130, $1.46; No. 220, $1.46; No. 102, 71c each.

Monty Wood Planes—No. 4, $1.18; No. 16, $1.40; No. 18, $1.53; No. 24, $2.05; No. 40, $2.45 each.

Five Per Cent. Advance in Clothes Wringers

Winnipeg.

CLOTHES WRINGERS.—Advancing prices in raw materials entering into the manufacture of wringers has it is said again been the means of further advances of approximately 5 per cent. over former prices. New selling prices now effective are given herewith: Universal, $39.75 dozen; Royal Canadian, $57.95; Crest, $55.25; Eze, $62.55; Emperor, $105.90; Signet, $60 50; Eureka, $49.00; Reliance, $73 70

Brass Butts Register Advance

Winnipeg.

BRASS BUTTS.—Prices on narrow, middle and broad brass butts which have shown very little change during the past few years have advanced during the week and are now quoted at the following figures:

Brass Butts—	Per Dozen Pairs.		
Inch.	Narrow.	Middle.	Broad.
1	.48	....	....
1¼	.69	....	.81
1½	.78	.90	$1.02
1¾	$1.02	$1.14	1.26
2	1.20	1.38	1.56
2¼	....	1.95	2.25
2½	2.10	2.55	3.00

Fibre Ware Goes Up Ten Per Cent.

Winnipeg.

FIBRE WARE.—Fibre ware which has been steadily increasing during the past year, has again been revised showing an increase of about 10 per cent. Tubs and pails are the lines affected and are now selling at the following figures: Fibre tubs, No. 3, $15.95; No. 2, $18.80; No. 1, $22.65; No. 0, $26.40 dozen. Nests of tubs, Nos. 1, 2, 3, $4.90 per nest. Fibre pails, No. 1, $5.75 dozen.

Linseed Oil Steady, Turpentine Holds

Winnipeg.

LINSEED OIL, TURPENTINE—Linseed oil prices show no change during the week, despite the fluctuation in the price of flax seed which has gained heavily during the week. Prices now ruling are herewith confirmed as follows: Raw linseed oil, $2.20 gal.; Boiled linseed oil, $2.23 gal., single barrel lots.

Turpentine prices are reported to be holding very firm on the local market, stocks it is intimated being well below normal. To-day's ruling prices are confirmed as follows: Barrel lots, $1.15 gal.; ½ barrel lots, $1.18 gal.; 5 gal. lots, $1.20 gal.; 1 gal. lots, $1.20 gal., plus the usual extras for coneainers.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Nov. 14.—Pig iron production in October fell off about 1.3 per cent. from the September rate and steel ingot production about 3.2 per cent. This is contrary to precedent, as October, with its favorable weather conditions, usually shows exceptionally heavy production rate. This year there were two special factors. In the first place September production was very heavy, showing a sharp gain over the August rate, while in the second place the influenza epidemic very considerably reduced working forces at blast furnaces and steel mills. The production of coke was materially reduced, but it appears that the blast furnaces suffered from depletion of working forces more than from shortage of coke.

The production of steel ingots in October was at the rate of about 45,250,000 gross tons a year, and that is in itself a favorable showing, comparing with actual outputs of about 43,700,000 tons in 1917 and 41,400,000 tons in 1916. Productive capacity, with all conditions favorable, is fully 47,000,000 tons a year, perhaps more, but in these war times conditions have not all been favorable. There has been some shortage of labor, and in a few cases inefficiency of labor, while there has been a shortage of good grades of scrap. The total tonnage of scrap has been fairly large, but it has run to the lighter grades, really standard heavy melting steel being in poor supply.

Cancellations of War Contracts

It goes without saying that the cessation of hostilities means a great decrease in the total amount of steel required for war and near-war purposes, and many contracts have to be canceled. Already there has been worked out a definite plan for such cancellations as may be necessary, to cover the case of contracts that do not carry their own cancellation terms, and the majority of contracts do not. The government will accept and pay for all material finished at the time of the cancellation, and will also buy all material in process, at prices including a pro rata of profit. The term material in process will be interpreted liberally, to include material secured for the purpose of filling the contract, even though no actual work has been done on it. This plan has been submitted to leading holders of contracts and meets their approval. The Government having purchased material of various sorts will be in position to sell it at the best price obtainable, as values will run under the new conditions, and in most cases the material will no doubt be sold back to the contractor. The government has established a board of military men to hear and adjust complaints under these contract cancellations, so as to avoid what would otherwise be tedious delays in adjustment.

The first cancellations will doubtless be of contracts for shell steel for the Allies, the next of contracts for shell steel for the government. At all times there is a large quantity of shell steel in transit and in process of manufacture, and even the instant cessation of all rolling of shell steel would allow for a large supply of shells for emergencies during the period between the cessation of hostilities and the final assurance of absolute peace.

Ship Steel

The Shipping Board continues working out its policy of retrenchment, but this is retrenchment in expenditures, the introduction of economies, rather than any material reduction in the quantity of ships to be built. Relations with inefficient yards will be discontinued, and various contemplated shipyard extensions have been abandoned. The program to build 15,000,000 tons deadweight of vessels, of which about 2,500,000 tons has been completed, is left intact.

To the steel trade, especially as regards conditions during the next few months, the important item is a decision not yet officially announced, but quite well known in the steel circles immediately involved. That is, to reduce the weekly quota of ship plates called for to an amount not exceeding the quantity of plates that is at the same time actually passing into vessel hulls. This will effect a reduction in weekly deliveries of plates of from 30 to 50 per cent. For several months past the plate mills have been held to a schedule of 50,000 net tons weekly of plates for account of the Fleet Corporation. This would cover approximately 700,000 tons deadweight of steel shipbuilding per month. The actual average of steel hull launchings in the past few months has only been be-

tween 300,000 and 400,000 tons. As a consequence, plates have accumulated. There must be a large tonnage in transit and in course of fabrication, but the accumulation apart from that is now understood to be about a million tons. When it was important, regardless of expense, to complete every vessel possible, it was right to have a surplus at every point along the line, even though shortage in some particular retarded the use of the material or facilities. Thus the "bottle neck" for months past has been the supply of engines, boilers and other appurtenances. Now, when money must not be spent so lavishly, these extreme factors of safety are not desirable. Hence plate deliveries are shortly to be curtailed, so that there will be no further accumulation, and the present accumulation may even be reduced. The reduction, however, will only be temporary, as Director General of Shipbuilding Schwab has just stated that the present objective is 700,000 tons deadweight of vessels per month, and this rate is expected to be reached next Spring. That rate, or even a greater rate, will be continued for a long time when once it is attained. The rate would require about 50,000 net tons of plates a week, the quota recently in force, so that the former rate of deliveries is eventually to be restored. Meanwhile, there will be more plates for other purposes. Foreign buyers are keen to secure plates and there are indications that they are ready to pay very high prices, above the present Government limits. It appears even that some such purchases have been made. Plates in the domestic market, on the other hand, are expected to rule at less than the present level.

Price Control

The War Industries Board is making progress in its plans for continuing control of industry after the war. Its life is assured to the President's proclamation of peace, which will necessarily be months hence, but legislation is to be sought covering a further period of six months. This plan meets with general approval among iron and steel manufacturers, who expect that without such control there would be a period of light demand, while the market finds itself for extended period of prosperity that nearly all expect to follow the war. In that period the market would presumably slump to a level far below that subsequently to be established, and this would cause disorganization.

There are some iron and steel manufacturers, however, who apparently would prefer the slump. Doubtless their idea is that there is so much to be done by way of reducing costs that a period of slackness would be useful in helping this cost readjustment. They are thinking of wage rates among other items, but it is really doubtful whether wages can be reduced much, if at all. A couple of years or so ago the trade was almost a unit in expecting, and desiring, a general "shake-out" after the war, to get costs down, believing this to be imperatively necessary, but a great many have changed their minds meanwhile, and expect wages, commodity prices and practically everything to continue on a much higher level after the war than obtained before, probably for years afterwards and perhaps for an indefinite time.

Liquid Fuel May Be Produced in England

The question of the production of fuel oil from home sources has been investigated by a British Committee appointed by the Minister of Munitions, and under the chairmanship of the Marquis of Crewe. The report states that the best method is the carbonization of cannel coal in existing vertical retorts at gas works, although no very largely increased quantity of oil can be obtained from this source during the war owing to difficulties of labor, coal transport, etc. The Petroleum Research Department has recommended the erection of batteries of a form of low temperature retort for the carbonization of cannel coal, but an experimental investigation of low temperature processes by the Ministry has proved that the suggestion was impracticable on the grounds of expense, shortage of labor, time involved, and the fact that the mineral is not available in the quantities which the first investigations indicated. The Committee indicates other sources of supply as available in the future. These sources include boring for oil in Great Britain, the further development of the Scottish shale oil industry, and the increased carbonization of raw coal. In this latter connection the report states that some 1,250,000 tons of fuel oil might be obtained from every 20,000,000 tons of coal carbonized.

In the period of reconstruction which must come in Canada. The tool department will again be a busy place. This shows an attractive corner in a hardware store featuring mechanic's tools.

WEEKLY PAINT DEPARTMENT

What Does Peace Mean to Paint Trade?

Indications Are That There Will Be No Big Drop in Prices, But a Very Gradual Readjustment—Revival in Building Trade and Commencement of Work Held Up by the War Should Mean Steady Business

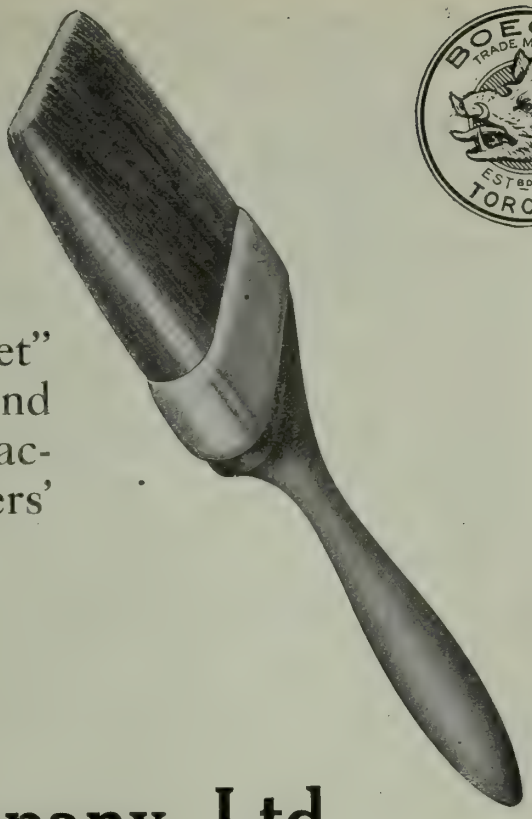
WHAT does the coming of peace mean to the paint dealer? This is a question now that is a live one throughout the trade as it may mean a big profit or a big loss in the next twelve months. Will there be an immediate drop in prices? Will there be a general reaction in trade due to readjustment in general business and financial conditions? Is it wise to buy now or to hold off buying until a better idea can be obtained of what may develop?

In the paint business as in most other lines the difficulty has been in the past two years not to sell the goods, but to get the goods to sell. Some dealers this fall have, owing to late deliveries, quite a lot of last spring's stock still on their shelves. A few still have portions of old stocks bought at lower prices on hand. Still others have been buying closely with a view of taking care only of their immediate needs. This is especially true of those dealers located close to manufacturers.

WHAT MAY HAPPEN

It is perfectly good business for any dealer to hold off buying if there is any real foundation for expecting lower prices. Interviews with leading manufacturers which have appeared in HARDWARE AND METAL from time to time would not appear to indicate however, that there is any chance of the bottom dropping out of prices. For one thing materials are too scarce. Now peace is here there will be a wild scramble for materials of all kinds. There will be a dearth of ships for some time and that will not help the situation. It would seem that while prices are likely to come down eventually, the process as far as paints are concerned will be a gradual one. Just what peace will bring no one can tell. One man's guess is as good as another's. There seems little question as far as Canada is concerned that business will be good. The world will need supplies of all kinds and Canada has them. This should mean big development and steadily growing business.

A WISE COURSE



No one can blame any merchant for not wanting to be overstocked with goods purchased at high prices. Such a course would neither be wise from a business standpoint nor from a financial view. As far as the paint trade is concerned, however, there seems little question that most dealers are not overstocked. They have taken advantage of the general shortage to unload any dead stock that they had and turn it into money. They have not placed big orders in replenishing their stocks and they have been forced by the general move toward standardization to eliminate many lines they generally carried. This is generally regarded as a move in the right direction and will make for better business in the future. It has shown the dealers and manufacturers that there was no need for making so many lines that were not necessary to meet trade requirements. This and the unloading of dead stocks has put the paint trade on a firmer basis.

LITTLE TO BE GAINED

It would seem then that there is little to be gained by holding off buying. Many of the best firms are adopting the policy of getting the goods they will need for their trade. They are not speculating and not buying anything they will not need, but they are not looking for any drop in prices immediately.

As far as trade in general is concerned, the outlook for the paint business of the future is good. There are indications that a large amount of building will go forward as soon as the help can be secured. Millions of dollars worth of work has been held over by railways and other large corporations because of the war and much of this will be undertaken as soon as possible. From the standpoint of the private individual, the farmer and the citizen, there is no question that a great deal of much needed painting has been held over. From now on this will be done and will create a steady demand for material.

A Canadian Brush Sold and Used All Over Canada!

Boeckh "Steel Grip Rubber Set" Brushes are built to serve and last—to give absolute satisfaction and hold your customers' trade.

There's an all-Canadian Boeckh Brush to suit every purpose for which a brush is used in Canadian industry.

The Boeckh Company, Ltd.

Victory Comes High, But We Must Have It!

THIS is no time to count the cost of Victory—when hundreds of thousands of our own Canadian boys are charging, full speed ahead, with the Huns on the run.

This is no time for loyal Canadians to stop and consider the terrible price, in blood and tears, this war has already cost the world.

When the word goes forth over there to CHARGE, every man is on his toes—straining every muscle—eyes front—head up—bayonet fixed—to sweep the German hordes back out of Belgium—out of France—back, ever back—until they throw up their hands with "Kamerad! Kamerad" on their cowardly lips.

Here, in Canada, when the word goes forth to "LEND," let us all be worthy of the gallant boys who have given up home, and comfort, and even life itself for the cause of Victory.

We, at home must furnish the funds that will keep the victorious Canadian troops supplied with food and clothing—with guns and ammunition—with tanks and shell and airplanes.

Victory is within our grasp. Continue the great offensive and the War will be won.

Every dollar you have, or can borrow, is needed to bring back the boys VICTORIOUS.

Canada needs your money, but Canada is willing to pay for the use of it.

Every dollar invested in Victory Bonds will be returned to you with interest.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Nov. 14.—Paint market changes this week are confined to a stiffening in the price of turpentine. This is very scarce and the various jobbers have little to offer—some have none at all.

Linseed oil is quite unchanged and supplies are light. The delivery of seed has not been good and general opinion seems to indicate that there will be little improvement in the near future. One paint man stated that present prices were altogether too low. Transportation is still, and will continue to be the big problem. Putty, white lead in oil, and mixed paints are steady and unchanged.

Linseed Oil Steady; Has Greater Spread

Montreal.

LINSEED OIL.—A greater spread is made this week for linseed oil, but the market has held with very little change of any kind. Seed is scarce and this situation is not expected to improve immediately. The supplies coming forward from the West are limited and even at the quotations of to-day some feel that the product should bring more money, the margin being small.

Linseed Oil—	Raw Imp. gal.	Boiled Imp. gal.
1 to 2 barrels ..	$1 75-$1 84	$1 77½-$1 87
5 to 9 barels ..	1 74-	1 76½-
10 to 25 barrels .	1 73-	1 75½-

Add 10c per gallon in smaller quantities.

Turpentine at $1.02; With Light Stocks

Montreal.

TURPENTINE.—At $1.02 per gallon, prices are higher than those of last week by four cents. Even at this some have none to offer, one jobber reporting that he had withdrawn from the market for the present entirely. There is no immediate prospect of improvement here and for what turpentine there is, little trouble is experienced in finding buyers at full prices.

Turpentine.	Per Imp. Gal.	
1 to 4 barrels	$1 02	$1 12
5 barrels and over	....	....
Small lots	1 05	1 17

(Packages extra)

Putty Very Steady; Will Rule So

Montreal.

PUTTY.—For the next two or three weeks at least putty is expected to rule on present basis. There is a steady and firm undertone, the demand is active, and whiting none too plentiful. Under the present arrangement, prices are expected to rule until the end of this month, at least.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

White Lead in Oil Sells Steadily

Montreal.

WHITE LEAD IN OIL.—The position of white lead in oil is steady and the same is moving on the usual seasonable basis. No change is anticipated at this time and the supply, while not short altogether, has been none too large for some weeks. Immediate requirements are going forward now on the basis of $17 per 100 lbs. for five ton lots; $17.50 per 100 lbs. for ton lots and for smaller quantities, $17.85.

Orders Mixed Paint Are Satisfactory

Montreal.

MIXED PAINT.—Orders have been coming to hand very well, and in a steady manner. The trade has indicated its willingness to buy on the basis of anticipated needs, and the undertone is steady. Present business is, of course, not heavy, but a fair seasonable volume of trade has been reported.

TORONTO

TORONTO, Nov. 14.—Turpentine has advanced 12c per gallon and there seems to be no indication that the peak has yet been reached. Linseed oil has advanced 4c per gallon and just which way the market will swing seems uncertain. The feeling prevails that seed will remain high for some little time. Orders continue to come along quite well for mixed paint and at present there is no indication of any recession in any line. Glass is very firm and outlook one of decided strength.

Linseed Oil Goes Up 4c

Toronto.

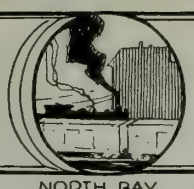
LINSEED OIL.—An advance of from four to five cents per gallon has been recorded this week. This is a direct result of the strengthening seed market during the past couple of weeks, accentuated this week apparently by the signing of the armistice. Flax seed did anything but break on news that hostilities had ceased; the effect was the reverse, but whether this is just a flurry or brought about by conditions unseen at this time is just a question. The epidemic of influenza throughout the Northwest has been very serious, many towns being closed to outside traffic, and whether this has curtailed harvesting of the crop is just a possibility. The feeling prevails that higher prices will come before lower are effective. Range of quotations to-day are as follows:

Linseed Oil—	Raw Imp. gal.
1 to 2 barrels, gal.	$1.82-$1.87-$1.92
3 to 5 barrels, gal.	1.81- 1.86- 1.91
	Boiled Imp. gal.
1 to 2 barrels, gal.	$1.84½-$1.90-$1.95
3 to 5 barrels, gal.	1.83½- 1.89- 1.94

Add 10c gallon in smaller quantities.

Turpentine Jumps Up 12c Gallon

Toronto.



TURPENTINE.—One of the sharpest advances yet made in turpentine is that recorded this week. Prices have advanced 12c per gallon with every indication that even higher levels would be recorded. This is one of the first lines to be affected by news of the signing of the armistice and is in line with information given out in HARDWARE AND METAL for some weeks past. United States Government reports now out show that production, which has been very light this year, is really no more than what is required by users in the United States. It is further reported that next year's production cannot be any larger, if as large. With the demands which will be forthcoming from overseas it is not hard to determine how prices will go, and it would seem that users face a situation that has a very serious side to it. Range of quotations to-day follows with indications that lowest price shown will be revised upward before Saturday.

Turpentine—	Imp. gal.
1 barrel (barrel included)	$1.10-$1.15
2 to 4 barrels (barrels included)	1.09- 1.14

DOMINION
Rubber System
Belting Service is Dominion Wide

No matter what your business or where it is located, there is within telephone distance of your plant, a branch of the Dominion Rubber System and a belting expert.

These technical experts are not merely salesmen, *they know belting* and its requirements thoroughly and their services are at your command, without charge, whether you are a customer or not.

Put your problems up to the Dominion Rubber System experts—*place your belting equipment in their care—they will shoulder the responsibility* for giving efficient service in all your belting, no matter what it is used for.

They are able to "speed up" your production—reduce your manufacturing or belting costs or eliminate unnecessary delays and "shut-downs."

The Dominion Rubber System is not only the largest but the oldest organization of its kind in Canada and has specialized in belting for more than fifty years—its entire facilities and Dominion Wide Service are at your command.

If you are in trouble or in doubt about a belt, 'phone, wire or write our nearest branch and *let us prove that our Belting Service means more than just selling belts.*

Orders Coming For Mixed Paint

Toronto.

MIXED PAINT.—Orders continue to come along quite well from retailers. Already it is indicated that aggressive selling campaign is being outlined by many merchants to further the use of paint and the question of price is not one which enters into their campaign so prominently as with others. Manufacturers are working on high-priced materials and replacement of many lines is a matter of months, so it is felt that no recession from present values is likely for a considerable period. The conclusion of the armistice does not mean that supplies of raw materials are automatically available for use—the question of securing these must be taken into consideration and that probably means months.

Firm Position Holds in White Lead

Toronto.

WHITE LEAD IN OIL.—There has been no tendency shown towards a break from present values and indications are that the market will hold pretty steadily. It is possible that before many months has elapsed that corroders will be in a position to secure lead much more liberally than during the past year; this should help materially. In the meantime prices hold steadily, pure white lead in oil selling at $17.80 per 100 pounds in ton lots, and $18.15 in smaller quantities.

Glass Strong; Putty Unchanged

Toronto.

GLASS, PUTTY.—The glass situation remains one of strength. There is nothing to indicate that declines may be looked for, rather is the reverse the case. The demand has been rather light and stocks, though not generally heavy, have been sufficient for requirements. Discounts are unchanged but indications point to a revision upward.

Putty is without change this week, the demand being only fair and prices steadily maintained.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

MUST CONSERVE TIN

The urgent need of conserving tin was emphasized at Milwaukee at a meeting of the American Institute of Mining Engineers when representatives of the Government and many of the country's largest firms conferred. Advice was given to substitute other metals for tin whenever possible.

Fine Chance for Canadians to do Big Export Trade With Japan

"THERE is a fine opening for Canadian firms to capture trade in Japan," said Rev. Dr. D. R. McKenzie, of Tokio, Japan, to HARDWARE AND METAL. Rev. Dr. McKenzie has been working in Japan for thirty years and knows the situation thoroughly. He is home on furlough until next March.

"From the standpoint of trade the Germans were insane to start the present war," he said. "They were gaining ground so rapidly all through the Far East that it was only a question of a short time when they would have dominated. They made rapid progress in cornering the trade because they adapted themselves to meet the needs of the people. The old established British houses were too conservative. They would not change their styles of goods for instance. Lines which they had been making for years to meet the requirements of certain conditions in England or some other market were not always suitable for trade in Japan or China. There was no question about the quality of the goods, but the Germans same along and would make lighter, cheaper styles than appealed to the people. The British merchants refused to change and as a result they were losing ground. The Germans had an immense business in the East, and as it is gone perhaps for ever, for many, many years for certain, that trade is going to go to people who go after it. Canada has as good a chance as anyone and should do a big business with Japan owing to the steamship connections she has. The United States will be Canada's great competitor, and is already busy with plans for securing a lot of after the war trade. The British firms are also busy.

The Japanese themselves are extremely ambitious to develop their home manufactures and their export trade. At the present time seventy-five per cent. of the people are farmers, but they are getting more and more into commercial life. Many big changes are being made in Japan and more of the Western spirit is being absorbed. It is not so long ago that business men and those engaged in manufacturing were regarded from a social standpoint as only one degree above outcasts This resulted in the men engaged in business always wanting to get revenge upon the upper classes for the insults they received. It made the business men not always scrupulously honest, and inclined to sharp practice. This spirit is being eliminated, and being engaged in business is now regarded as a more honorable occupation. The Japanese are ambitious for the future. They want to trade with other nations. One of their greatest troubles has come from their inexperience. Take. for instance. hardware. They try to copy the British or American goods. As far as looks go, some of their lines of cutlery, for instance, are a fair imitation. The test comes though when the goods are put into use. A Japanese pocket knife that was used once had the edge turned. The Japanese started making bicycles. One of the first, and worst, mistakes they made was in the bearings. The steel balls were all too soft and trouble resulted. The Japs, however, are learning all the time. They are trying now to engage in the manufacture of autos. They are having the same trouble here as in other lines. Their lack of experience results in goods being produced that will not always stand up to the tests. But they are learning and improving."

Rev. Dr. McKenzie was asked regarding Japan's attitude for the future in regard to making war.

"The Japs," he said, "are a peace loving people. They fought China and Russia because they were forced into it. They will not make war without great provocation. They are not looking for trouble. The Yellow Peril one hears so much about in the United States is, as far as Japan is concerned, a myth. The Japs want to be at peace with their neighbors. They have the very highest respect and esteem for the British, and this feeling is enhanced if anything by the present war. They want to develop their trade with Canada and other British colonies, and will be inclined, everything else being equal, to perhaps show a preference for anything from Britain or her colonies. Now is the time for Canadian firms to get busy and lay the foundation for after the war business."

METAL SCARCE IN GERMANY

Just how badly off the Huns are for metal may be gathered from the fact that the Metal-collecting Office at Berlin has drawn up a list of the monuments to be melted down in Frankfort-on-the-Main. They include the manument to Sommering, the inventor of the electrical telegraph, the War Monument of 1870-71, and the Bismarck and Heine monuments. The Frankfort municipal authorities have asked for the exemption of the last two.

Chief Canadian Trade Commissioner in Russia requires Industrial Number of The Financial Post for Reference

Ottawa, Nov. 9th, 1918.

To the Publisher,
THE FINANCIAL POST,
Toronto.

Dear Sir:

Will you please send me by return of post, a copy of your Annual Industrial Number, of last week, Nov. 2nd, as I would like to have it by me for reference purposes in Siberia. I enclose 15 cents (stamps) for the cost.

Yours faithfully,
C. F. JUST,
Chief Canadian Trade Commissioner in Russia

For reference purposes in connection with all matters of Canadian Industrial growth and Trade Expansion at this important epoch,

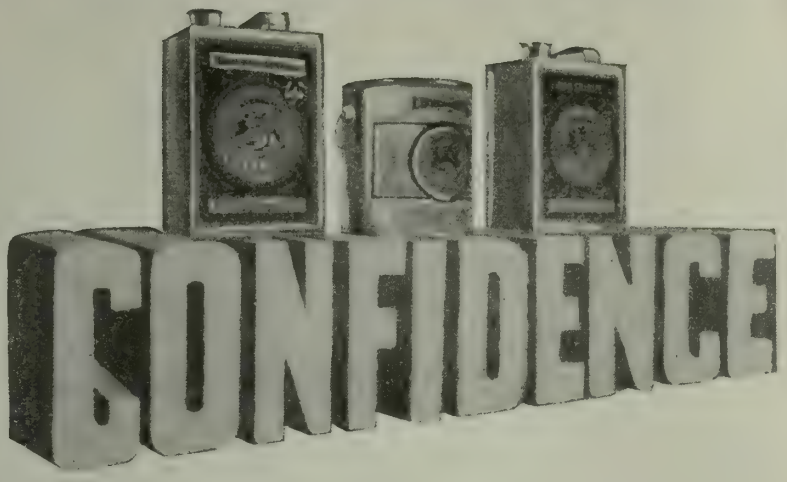
The Annual Industrial and Reconstruction Issue of The Financial Post

is invaluable. It contains the very latest views of experienced business men, and industrial leaders on the Outlook for Canadian Industry and Business, and the needs of the hour, and of the days ahead.

Send for a copy, but send quickly, for a large edition is becoming rapidly exhausted. You can have THE POST every week from now till January, 1920, for $3.00, and copies of the Industrial Number are being specially reserved for those ordering subscription on this form:

THE FINANCIAL POST
OF CANADA,
143-153 University Ave., Toronto.

Send me FREE a copy of the Annual Industrial Number, and enter me as a regular subscriber, commencing at once.



I enclose herewith / will forward $3.00 to pay for my subscription for the first year.
